Proceedings of the
Second International Conference on
Railway Technology:
Research, Development and Maintenance

Edited by
J. Pombo

Including special sessions organised by
G.W. Yang, X.S. Jin, S. Krajnović, C. Wagner A. Gomes Correia,
S. Costa D’Aguiar, Y. Momoya, J.M. Goicolea, R.A.B. Calçada,
R. Karoumi, A. Núñez, Z. Li, B. De Schutter, M. Steenbergen, K. Six,
M. Rosenberger, B. Indraratna, E. Tutumluer, J.A.C. Ambrósio,
A. Facchinetti, A. Matsumoto, R. Smith, H. Nakamura, C. Vale,
A. Bracciali, R. Lewis, U. Olofsson, S. Moretto, H.X. Pan, M. Milenkovic,
J.E. Abdalla Filho, R. Carrazedo, E. Kassa, V. Markine, P. Koziol,
M. de Matos Neves, E. Fortunato, A. Nurminen, A. Levchenkov, R. Sarkisyan,
C. Tarawneh and B. Wilson
Contents

Preface

I Special Session: Advances in Mechanics of High-Speed Trains
Organised by Professor G.W. Yang and Professor X.S. Jin

1 High-Speed Feeder Passenger Train: NGT Link
D. Krüger and J. Winter

2 Hunting of Railway Vehicle under Actions of Steady Aerodynamic Loads in Open Air
X.H. Zeng, J. Lai, G.W. Yang and M.B. Liu

3 Effect of Corrugation of High-Speed Railways on the Dynamic Response of Vehicle
and Track
L. Wu, Y.L. Gu, H.Y. Wang, Z.F. Wen and X.S. Jin

4 Numerical Simulations Investigations of Flow Fields Underneath the High Speed Trains
G. Zhao, H. Li, Y. Yao, D. Guo and G. Yang

5 On-Track Tests and Simulation of Active Secondary Suspension on a Rail Vehicle
A. Qazizadeh, R. Persson and S. Stichel

6 Drag-reduction Design on High-speed Trains with Intelligent Optimization Algorithm
G.W. Yang, S.B. Yao and D.L. Guo

7 Vibroacoustic Problems in High Speed Trains
F. Sorribes-Palmer, G. Alonso and A. Sanz-Andres

8 Characteristics of Train Noise in Crosswind Conditions
Z.X. Sun, G.W. Yang and D.L. Guo

9 Reduction of Carbody Flexural Vibration by High-Damping Elastic Support of
Equipment
T. Tomioka, T. Takigami, K. Aida and Y. Akiyama

10 A New Wheel-Rail Contact Model Integrated into a Coupled Vehicle-Track System
Model considering Wheelset Bending
S.Q. Zhong, X.B. Xiao, Z.F. Wen and X.S. Jin

11 The Influence of the Fairing Shape and Cross Winds on the Aerodynamic
Characteristics of Pantograph
D.L. Guo, Y. Yao, S.B. Yao and G.W. Yang
12 Adhesion Control for a High Speed Train with Multiple Induction Motors Fed by a Single Inverter

13 Influence of Rail Top Contamination on Transient Rolling Contact of a High Speed Driving Wheel
X. Zhao, Z. Wen, M. Zhu and X. Jin

14 Numerical Analysis of High-Speed Wheel/Rail Adhesion Considering Non-Newtonian Interfacial Liquids, Elastic-Plastic Contact and Temperature
B. Wu, Z. Wen, H. Wang, M. Zhu and X. Jin

15 Impact of Rail Cant on the Wheel-Rail Contact Geometry Relationship of Worn Tread
F. Gan and H. Dai

16 Influence of Rail Cant and Profile on High-Speed Wheel/Rail Contact Behavior and Wheel Wear
G.Q. Tao, Z.F. Wen, X. Zhao, D.B. Cui and X.S. Jin

17 The Research of the Relation between Wheel Re-Profile and Wheel-Rail Dynamics for the Jing-Jin Inter-City High-Speed CRH3C EMU
X.Q. Dong, Y.M. Wang, Z.S. Ren and L.D. Wang

18 Effect of Rail Vibration Absorber on Track Dynamical Behavior under High-Speed Moving Wheel Load
Y. Zhao, X.B. Xiao, Z.F. Wen and X.S. Jin

19 A Novel Real-time Traction Force Reference Distribution Adhesion Control for High-Speed Trains
L. Hu, J.F. Qin, Z.P. Yang, C. Geng and F. Lin

20 Study on Bogie Lateral Stability with One Simple Type of Non-Smooth Element
H. Dong, J. Zeng, B. Zhang and W. Yong

21 Research on the Hunting Instability criteria for High Speed Vehicles
L. Wei, J. Zeng and R. Luo

22 Stochastic Bifurcation of Railway Suspended Wheelset
B. Zhang, J. Zeng and H. Dong

II Special Session: Train Aerodynamics
Organised by Professor S. Krajnović and Professor C. Wagner

23 The Measurement of Train Aerodynamic Phenomena in Operational Conditions

24 Numerical and Experimental Studies of Train Geometries Subject to Cross Winds
M.M. Fragner, K.A. Weinman, R. Deiterding, U. Fey and C. Wagner

26 Shape Optimization of High-Speed Train with Multiple Aerodynamic Properties
M. Suzuki, M. Satou, T. Ogawa and N. Okura

27 The Influence of Incoming Wind Profile and Its Self-Sustainability on Mean Force Applied on the High Speed Train Under Cross Wind
D. Zou, W.H. Zhang and G.M. Mei

28 Effects of Section Parameters on Rain Loads on High-Speed Trains under Crosswind

29 Effects of Nose Shape and Tunnel Cross-Sectional Area on Aerodynamic Drag of Train Travelling in Tunnels
J.K. Choi, S.M. Jeung and K.H. Kim

30 Aerodynamic Loads on Lightweight Railway Vehicles for the Evaluation of Rollover Risk
F. Cheli, S. Giappino, G. Tomasini, M. Villani and G. Zanetti

31 Experimental Study on the effect of Crosswind on a Container Train with Different Load Configurations
S. Giappino, S. Melzi, G. Tomasini and M. Villani

32 Experimental Investigation of Topological Changes in the Flow Field around High-Speed Trains with respect to Reynolds Number Scaling Effects
U. Fey, J. Haff, M. Jönsson, S. Loose and C. Wagner

33 Numerical Simulation of the Aerodynamic Behavior of High Velocity Trains under Synthetic Crosswinds of Different Shear and Turbulence Characteristics
J. García, J. Muñoz, A. Jiménez, E. Migoya and A. Crespo

34 Development of a Numerical Modelling of Snow Accumulation on a High Speed Train
N. Paradot, E. Allain, R. Croué, X. De La Casa and J. Pauline

35 High Speed Regulation in Extreme Conditions
G. Saussine and O. Néel

36 Modeling of Aerodynamic Loads on Infrastructure Elements for High Speed Trains
S.M. Kaplunov, B.N. Chetverushkin, S.I. Doubinskiy, N.G. Valles and E.A. Dronova

37 Simplified Model to Estimate Forces on Track Side Objects
S. Rutschmann and K. Ehrenfried

38 Unsteady Simulations in Train Aerodynamics
S. Krajnović

39 Aerodynamic Shape Optimisation of a High Speed Train Locomotive using Adjoint Solver
M. Bujny, A.B. Jaworski and J. Rokicki
Aerodynamic Shape Optimization of the Nose of a High-Speed Train subjected to Cross-Wind Conditions
J. Muñoz-Paniagua, J. García and A. Crespo

Numerical Study of Streamlined Trains
F. Carmona, I. Pereira and J.M.C.S. André

Study of the Geometry of a Ventilated Tunnel Portal to Reduce the Pressure-Wave Gradient in Railway Tunnels
D. Heine, G. Lauenroth, S. Huntgeburth and K. Ehrenfried

Experimental Investigation of the Three-Dimensional Boundary Layer in the Nose of a Concept Train
I. Pereira and J.M.C.S. André

III Special Session: Geotechnical Aspects in Rail-Track Performance
Organised by Professor A. Gomes Correia, Dr S. Costa D’Aguiar and Dr Y. Momoya

Reuse of Degraded Ballast to Roadbed Improvement
Y. Momoya, K. Itou and T. Nakamura

New Recycled Aggregates with Enhanced Performance for Railway Track Bed and Form Layers
C. Saborido Amate

Mechanical Behavior of Interlayer Soil in Ancient Railway Sub-Structure
T.V. Duong, A.M. Tang, Y.-J. Cui, V.N. Trinh, J.-C. Dupla, N. Calon, J. Canou and A. Robinet

Trackbed Evolution on the French Railway Network
N. Calon, A. Robinet and V.N. Trinh

Increasing Loading Frequency: Effects on Railway Platform Materials

Stress Increments due to an Embankment Load
M.A. Mánica and E. Botero

Vulnerability Assessment of Railway Track Buckling During Severe Thermal Events
M.A. Bradford

Numerical Prediction of Permanent Deformation in Asphalt Track Foundation
S. Lee, J. Lee, Y. Lim, G. Song and M. Sagong

Prestressed Concrete Sleeper Response during an Evaluative Test: Effect of Fatigue
V. Veselý, H. Šimonović, Z. Kersner, V. Bilek, T. Mosler and L. Culfik

Ballasted Track Maintenance with a Multi-Unit Tamping Machine: A Numerical Discrete Efficiency Comparison
C. Voivret, R. Perales and G. Saussine
The Influence of Moving Load Speed on the Cyclic Response of a Railway Track Platform
V. Alves Fernandes, S. Costa D’Aguiar and F. Lopez-Caballero

Investigating the Railway Infrastructure through Numerical Analysis for Ground Stabilization Solutions
D. Zangani and C. Fuggini

Determination of Soil Dynamic Parameters by the Panda 3®: Railways Platform Case
M.A. Benz-Navarrete, E. Escobar, Y. Haddani, R. Gourves, S. Costa D’Aguiar and N. Calon

Importance of Non-Linear Soil Behaviour on Modelling Rail Track Response
J. Cunha and A. Gomes Correia

Assessment of the Double Integration Method using Accelerometers Data for Conventional Railway Platforms

Hydrogeological Simulation of the Impact of Jet Grouting on Seine Alluvial Groundwater
S. Lahore, X. Foca, P. Gregori and A. Courtin

Analysis of Hydraulic System Response for Works Optimisation on Conventional Railways
M.-A. Moulin, G. Bochaton and N. Calon

Shielding Structures From High Speed Rail Vibrations Using Wave Barriers
D.P. Connolly, G. Kouroussis, O. Laghrrouch, O. Verlinden and P.K. Woodward

Influence of Under Sleeper Pads on Track Quality in the Czech Republic
O. Plasek, M. Hruzikova, R. Svoboda and J. Bilek

Development of Panels for Asphalt Track

IV Special Session: Dynamics of Railway Bridges
Organised by Professor J.M. Goicolea, Professor R.A.B. Calçada and Professor R. Karoumi

Modelling Railway Bridge Asset Management using Petri-Net Modelling Techniques
B.L. Le and J.D. Andrews

Modelling Alternatives in the Dynamic Interaction of Freight Trains and Bridges
T. Arvidsson and R. Karoumi

Assessment of the Safety of a Short Span High-Speed Railway Bridge using an Efficient Probabilistic Methodology
J.M. Rocha, A.A. Henriques and R. Calçada
67 Extending the Assessment Dynamic Ratio to Railway Bridges
D. Cantero, E.J. O’Brien and R. Karoumi

68 Experiences from Designing Bridges for Higher Speeds
J. Bujnak and J. Wyrwal

69 Monitoring of Railway Viaducts and Bridges
H. De Backer, A. Outtier, K. Schotte, W. Nagy and P. Van Bogaert

70 A Reduced Model for Robust Control of Longitudinal Vibration of Floating Cable-Stayed Bridge Induced by Train Braking and Moving Vertical Loads
W.-L. Qu, J. Liu, Y.-L. Pi and M.A. Bradford

71 A Three Dimensional Train-Structure Interaction Methodology: Experimental Validation
P.A. Montenegro, S.G.M. Neves, R. Calçada, M. Tanabe and M. Sogabe

72 Stability of Tapered Half-Through Girder High Strength Steel Railway Bridges
M.A. Bradford and H.Y. Ban

73 Assessment of Long-Term Structural Health at Villanueva del Jalón Viaduct
E. Moliner and M. Cuadrado

74 Finite Element Analysis of a Masonry Arch Railway Bridge using Polyurethane Polymer
P.K. Woodward, O. Laghrouche and S. Thomas

75 Dynamic Responses of Railway Bridge Ends: A Systems Performance Improvement by Application of Ballast Glue/Bond
S. Kaewunruen

76 Influence of the Vehicle-Structure Interaction in the Design of High-Speed Railway Bridges
A. Doménech, P. Museros and M.D. Martínez-Rodrigo

77 Global and Local Dynamic Effects on a Railway Viaduct with Precast Deck
A. Meixedo, D. Ribeiro, R. Calçada and R. Delgado

78 Design of the Renewal of Slab Track on Existing Steel Vierendeel Railway Bridges
J. Thielemans and B. De Pauw

79 Dynamic Behaviour of a Short Span Filler-Beam Railway Bridge under High Speed Traffic
C. Bonifácio, D. Ribeiro, R. Calçada and R. Delgado

80 Design of a Seismically Isolated Railway Viaduct over Axios River in Northern Greece
A.J. Kappos, I. Papadopoulos and A. Tokatlidis

81 A Direct Method for Analysing the Nonlinear Vehicle-Structure Interaction in High-Speed Railway Lines
S.G.M. Neves, P.A. Montenegro, A.F.M. Azevedo and R. Calçada

</table>
Monitoring Railway Track by Unmanned Vehicle: Innovation Toward Operational Practice
C. Brogard, N. Pollet, M. Chanas, F. Viguier, B. Landes, G. Saussine, P. Assali and D. Laousse

AV-RAMS: Maintenance of High Speed Lines
A. Andrés and A. Calvete

Analysis on the Track Irregularity Power Spectral Density of the Beijing-Shanghai High Speed Railway
X.B. Liu, H.Y. Li and W.D. Wang

Railway Integration of Midwest - Fico: Track Alignment Optimization
M.L. Barthasson

Non-Parametric Bayesian Network to Forecast Railway Disruption Lengths
A.A. Zilko, A.M. Hanea, D. Kurowicka and R.M.P. Goverde

Flexible Asset Monitoring System Improves Railway Infrastructure Availability
F.L.J. van den Bos, R. Koopal and N.J. Steentjes

A Specific Dynamic Bayesian Network for a Prognosis based Maintenance Strategy
J. Foulliaron, L. Bouillaut, P. Aknin and A. Baros

Special Session: Wheel-Rail Damage: Influencing Factors and Metallurgical Aspects
Organised by Dr M. Steenbergen, Dr K. Six and Dr M. Rosenberger

Numerical Prediction of Fatigue Crack Growth in Railway Components
S.H. Mai, M.L. Nguyen-Tajan and B. Trolle

Rolling Contact Fatigue and Wear of Wheel/Rail Simulation: Wheel Thermomechanical Defects in the Russian Railway
I.G. Goryacheva, S.M. Zakharov and E.V. Torskaya

Automated Measurement of Near-surface Plastic Shear Strain
G. Trummer, K. Six, C. Marte, A. Meierhofer and C. Sommitsch

On Simulating the Thermal Conditions of Martensite Formation on Railway Wheel Treads
L. Sábitz and I. Zobory

Influence of Low Temperature on Deformation and Fracture of Rail Steels
F. Yu, B. Jar, and M. Hendry

Rail Surface Layer Modification under Train Operation
M.J.M.M. Steenbergen

Simulation of Contact Phenomena at Full-Scale Wheel-on-Rail Test Rigs
D. Ullrich
Angles and Location of a RCF Crack in Heavy Haul Railways based on the Critical Plane
S. Wang, Y. Zhou, Y. Xu and H. Li

Mechanisms of Driving Surface Shear Cracks in Rolling Sliding Contact
W. Daves, M. Kracalik, W.P. Yao and S. Scheriau

Rail Performance and Management of Rolling Contact Fatigue under Heavy Axle Load Conditions
D.R. Welsby, C.L. Pun, P.J. Mutton and W. Yan

Residual Stress in Wheels: Comparison of Neutron Diffraction and Ultrasonic Methods with Trends in RCF
P.B. Molyneux-Berry, A.J. Bevan, S.Y. Zhang and S. Kabra

Towards a Maintenance Free Rail
G. Girsch, A. Joerg and R. Stock

Naturally Hard Steel Rails: Development and Feedback from Service
A. Bracciali and F. Piccioli

Out-Of-Roundness: Simulation and Real-Life Measurements
R. Schmid, P. Mittermayr, D. Maicz and W. Zottl

Chasing the Magic Wear Rate
E. Magel, J. Kalousek and P. Sroba

Restoration of Switch Manganese Steels Crossings by Electric Arc Welding in a Robotized Plant
A. Bracciali and M. Salecchia

A Microstructural Study of Rolling Contact Fatigue in Rails
J. Wu, R.H. Petrov, M. Naeimi, Z. Li and J. Sietsma

Influence of Rail Material to Corrugation on Ballastless High-Speed Railways
X.S. Yao, L. Wu, Y.L. Gu, H.Y. Wang, Z.F. Wen and X.S. Jin

Microstructures and Properties of Pulsed Mig Joint of A6n01 Al Alloy
J. Ye, P. Li, S. Yang, X. Deng and B. Gao

VII Special Session: Rail Track Geotechnology
Organised by Professor B. Indraratna and Professor E. Tutumluer

Railway Ballast Settlement: A New Predictive Model
G. Saussine, J.C. Quezada, P. Breul and F. Radjai

Impact of Ballast Fouling on Rail Tracks
N. Tennakoon, B. Indraratna and S. Nimbalker

Investigation of Ballast Degradation and Fouling Trends using Image Analysis
M. Moaveni, Y. Qian, H. Boler, D. Mishra and E. Tutumluer
Recent Research and Practice of Soil-Reinforcing Technologies for Railways in Japan
F. Tatsuoka, K. Watanabe, M. Tateyama and M. Okamoto

An Experimental Investigation on the Deformation and Degradation Behaviour of Geogrid-Reinforced Ballast
Sd.K. Karimullah Hussaini, B. Indraratna and J.S. Vinod

A Test Section with a Geocomposite Placed to Stabilise the Ballast Bed
L. Horníček, M. Lidmila and P. Jasanský

A Procedure to Assess Subballast Filtration under Cyclic Loading
L.D. Trani and B. Indraratna

Computing Stress Cycles in Subsoils for Concrete Slab Tracks subject to High-Speed Trains
E. Nsabimana and Y.H. Jung

Classification of Common Geotechnical Failure Types Occurring in Queensland’s Heavy Haul Rail Network

Resin Recovery and the use of Computed Tomography for Quantitative Image Analysis of Railway Ballast
L. Le Pen, S. Ahmed, A. Zervos, J. Harkness and W. Powrie

Railway Ballast Load Analysis using Small-Scale Cylindrical Triaxial Test
A. Merheb, R. Motta, L. Bernucci, E. Moura, R. Costa T. Vieira and F. Sgavioli

A Distinction Between Cyclically and Dynamically Loaded Ballasted Track
M. Baeßler and W. Rücker

Spectral Analysis of Train-Related Dynamic Loads Acting on a Ballast Layer
A. Aikawa and H. Sakai

The use of Falling Weight Deflectometer to Assess the Suitability of Routes for Upgrading
P. Sharpe and C.R. Govan

A Critical and Comparative Review of Ballasted and Slab Tracks: Where Are We Heading?
H. Khabbaz and B. Fatahi

Influence of Vegetation on Plastic Clays in Rail Corridors with Contrasting Climates
D.A. Cameron and W. Potter

Behavior of Continuous Welded Rail Tracks in Tight Curves on Narrow Gauge Railways
B. Bopp, U. Weidmann and D. Bruckmann
VIII Special Session: Pantograph-Catenary Interaction
Organised by Professor J.A.C. Ambrósio and Dr A. Facchinetti

138 Dynamic Optimization of an Existing Catenary System when Exceeding Design Speed
P. Nåvik and A. Rønnquist

139 Dynamic Assessment of a Norwegian Contact Line: Exploring Higher Speed in Sharp Curves
A. Rønnquist and P. Nåvik

140 Overhead Line Diagnostic System for High Speed Pantographs
M. Carnevale, A. Collina, A. Facchinetti and L. Gasparetto

141 Influence of High Speed Railway Catenary Overlap Span on the Current Collecting Performance
J. Zhang, W. Liu and M. Yu

142 Dynamic Analysis of the Pantograph-Catenary Interaction on Overlap Sections for High-Speed Railway Operations
P. Antunes, J. Ambrósio, J. Pombo and M. Pereira

143 Investigation on the Wave Propagation Characteristics of the Catenary
N. Zhou, R.P. Li, S.X. Wang, Q.S. Lv and W.H. Zhang

144 New Material and Design Solutions for Polish Railway Overhead Lines
T. Knych, A. Mamala, A. Kawecki, P. Kwaśniewski, G. Kiesiewicz, A. Szeląg
T. Maciołek, A. Rojek, W. Majewski, K. Woźniak, R. Koczaj and J. Maślanka

145 Magnetic Force Analyzing between Contact Wire and Pantograph
Y.Y. Zhao, G.Q. Gao, G.N. Wu, X.R. Liu and K.S. Yang

146 The Effect of the Working Height of Pantographs on Pantograph-Catenary Dynamic Performance
Q. Lv, R. Li, S. Wang, N. Zhou and W. Zhang

147 Analysis of Pantograph-Catenary Dynamic Performance in Consideration of Fluid-Solid Coupled Vibration of Pantograph
R. Li, N. Zhou, G. Mei and W. Zhang

148 Study on the Model of Electric Contact between Pantograph and Contact Wire
G. Zhu, W. Wang, G. Wu, G. Gao and X. Chen

149 Arc Detection and Classification in Pantograph Catenary Systems by the use of Clustering Techniques
S. Barmada, M. Tucci and F. Romano

150 Analysis of Over-Voltage during the Raising and Lowering Process of a Pantograph for a High Speed Train
Y. Xu, X.J. Deng, S.Q. Liu and Y.J. Zhao

151 Research on Test Method of Dynamics and Current-Collection Performance of Pantograph and Catenary System
Y.S. Ma, J.Y. Liang and N. Zhou
A Study on the Harmonic Characteristics arising from the Arc between Pantograph and Contact Wire
J. Yu, X. Deng, S. Liu and Y. Xu

IX Special Session: Accidents Analysis and Safety Technologies
Organised by Professor A. Matsumoto, Professor R. Smith and Professor H. Nakamura

Continuous “Y/Q” Monitoring by In-Service Trains for Prevention of Flange Climb Derailments
A. Matsumoto, Y. Sato, H. Ohno, M. Shimizu, T. Ogino, T. Seki, Y. Michitsuji
M. Tanimoto and M. Mizuno

Malfunctions caused by Common Cause Failures and their relation to IEC-61508
H. Nakamura and K. Tashiro

Numerical Simulation of Dynamical Derailment of High-Speed Train using a 3D Train-Track Model
L. Ling, X. Xiao, Y. Cao, L. Wu, Z. Wen and X. Jin

Managing Investigations in the Urgent Phase Following Railway Accidents
A. Bracciali and M. Monti

Numerical Simulation of Explosion Scenarios in a Real Metro Station
G. Valsamos, F. Casadei, G. Solomos and M. Larcher

Comparison of Braking Performance for Different Technologies of Heavy Hauled Freight Trains
L. Cantone and V. Vullo

Advanced Passive Safety Research Focused on Rail Vehicles Interiors
S. Špirk and M. Kepka

Tangential Force Characteristics of Wheel/Rail Interface with Machined Surface: Improvement of Running Safety
D. Yamamoto

Fault Diagnosis and Treatment of Abnormal Vibration for High-Speed Train Based On Line Test and Numeric Analysis
T. Cui, Y. Wang, S.-S. Jia, H.-C. Wu, M. Li, F. Gao, M.-G. Li, C. An and B.-C. Sun

Study on Train Derailment Mechanism Based on Catastrophe Theory
H. Dai, Z. Li and Z. Li

New Generation of Energy Dissipating Systems based on Biaxial Buckling for Improving Vehicular Crashworthiness
D. Lounis, R. Baleh, A. Menouer and A. Abdul-Latif

Post-Derailment Dynamic Behavior of Railway Vehicles
X.W. Wu, M.R. Chi and J. Zeng
Function Operation Test of an Innovative Advanced Safety Vehicle: Vehicle-to-Vehicle communication between Tramcars and Cars
I. Sakamoto, Y. Yamamoto, K. Kojima, H. Fujimoto and K. Higashi

Special Session: Interoperable Track and Rolling Stock: Testing, Homologation, Condition Monitoring and Maintenance
Organised by Professor C. Vale and Professor A. Bracciali

Modelling the Effects of Asset Management Decisions on a Railway Track Section
D.R. Prescott and J.D. Andrews

Review of Instrumented Wheelset Technology and Applications
A. Bracciali, F. Cavaliere and M. Macherelli

Fibre Optic Rail Pad Sensor Based Wheel Flat Identification
S.L. Zhang, C.G. Koh and K.S.C. Kuang

Reducing Life Cycle Costs through analysis of the Interface Between Vehicle and Railway Track in the Netherlands
A. Zoeteman and R.P.B.J. Dollevoet

Evaluation of Real-time Crack Monitoring Method for Railway Axle and Bogie Frame
M. Yamamoto, T. Miyachi, M. Takagaki and T. Yagi

Wayside Measurement of Lateral and Vertical Wheel/Rail Forces for Rolling Stock Homologation
L. Bocciolini, A. Bracciali, L. Di Benedetto, R. Mastandrea and F. Piccioli

Optimal Maintenance Strategies with a Dynamic Optimization Approach
R. Rozas, L. Bouillaut, P. Aknin and G. Branger

TC-Type Low-Maintenance Track Structure and Maintenance Methods
Y. Okumura and Y. Hori

A New Ballastless Trackform for Lower Maintenance
N. Milesi and J.M. Vanzenberg

Advanced Approaches for Axle Bearing Condition Monitoring
C. Vale

The EUREMCO project: European Railway Electromagnetic Compatibility
R. Hanley, N. Haddad, C. Place, W. Baldauf, G. Zimmer, F. Maumy and E. Rigaud

Reliability Analysis of Railway Rolling Stock Failure Patterns
B.M. Alkali, G. Brown, C. Tait and V. Orsi

Satellite Navigation Standardisation in the Railway Domain
E. González, V. Antón and M.-L. Mathieu
XI Special Session: Wheel-Rail Contact Tribology
Organised by Professor R. Lewis and Professor U. Olofsson

179 A Procedure for Wheel and Rail Steels Characterization in Rolling Contact
A. Mazzù, M. Faccoli, M. Lancini, C. Petrogalli, D. Nélías and A. Ghidini

180 Wear created by the Wheel-Rail Contact in Different Rail Vehicles
A. Rovira, P. Salvador, J. Carballeira and F. Salas

181 The Effects of Alternative Top of Rail Friction Materials on Pre-Existing Rolling Contact Fatigue Cracks
C. Hardwick and R. Lewis

182 Influence of Normal Pressure and Slip in Surface Hardening in Twin-Disc Tests
F. Salas, A. Rovira, V. Amigó and A. Roda

183 Experimental Modelling of Rail End Lipping in Insulated Joints
P. Beaty, R. Lewis, B. Temple and M.B. Marshall

184 Effect of Laser Dispersed Treated Morphology on Traction Coefficient under Mixed Lubrication

185 Dynamic Characterisation of the Wheel/Rail Contact using Ultrasonic Reflectometry

186 White Etching Layer Formed on Rail Surface and its Detection Method
M. Ishida, Y. Maruyama and T. Sasaki

187 An Innovative Adhesion Model for Railway Applications
B. Allotta, E. Meli, L. Pugi and A. Ridolfi

188 Influence of Heat Treatment and Surface Condition on Early-Damaging of Rail Materials
A. Trausmuth, T. Lebersorger, E. Badisch, S. Scheriau and H.P. Brantner

189 Development of Wear Models for Rolling-Sliding Rail-Wheel Contacts
A. Ramalho and P.V. Antunes

190 A Study of the Falling Friction Effect on Contact Parameters through Exact Contact Models
J. Giner, P. Vila, A. Alonso and L. Baeza

XII Special Session: Railway Research Commercialisation: Economy, Technology and Society
Organised by Dr S. Moretto, Dr H.X. Pan and Dr M. Milenkovic

M.A.M. Ali
Agent Based Simulation of a Single-Wagon Load Network
D. Bruckmann, C.E. Jackson, M. Balmer and U. Weidmann

Comparison of Sarima-Ann and Sarima-Kalman Methods for Railway Passenger Flow Forecasting
M. Milenković, N. Bojović, N. Glišović and R. Nuhodžić

Railway Transportation in Brazil under the perspective of Transaction Costs Economics
A.L.R. Oliveira

Mind The Gap In High-Speed Trains Futures: A Methodological Contribution
S. Moretto, D. Robinson, A.B Moniz and S. Chen

Influence of Site Selection of High-Speed Railway Stations on Travel Efficiency: An example of the Shanghai Hongqiao Hub
H.X. Pan, S. Ye and M.L. Chen

An Integrated Test Track Field for Railway System and Intelligent Transport System in University Research
Y. Suda and S. Lin

A Decision Support System for Railway Track Maintenance and Renewal Planning
P.F. Teixeira, L.F. Caetano, J. Loff, M. Baldeiras and J. Clemente

Punctuality Based Calibration of Railway Capacity Models
S. Ricci

XIII Special Session: Railway Vehicle-Infrastructure Interaction: Experimental, Analytical and Numerical Advances
Organised by Professor J.E. Abdalla Filho and Professor R. Carrazedo

Rail vibrations: Data Analysis and FE Modelling with Applications to Signalling Equipment
A. Bracciali, M. Macherelli and F. Piccioli

Experimental Investigation of the Effect of Short-Pitch Rail Corrugation on Dynamic Behaviors of Metro Vehicle and Track Components
W. Li, L. Ling, Z. Wen, X. Du, Y. Cao and X. Jin

Ultra-High-Speed Passenger Train (NGT HST): Conceptual Design of an Innovative Station
J. Winter and C. Kalatz

Vehicle Models for the Dynamic Behaviour of Roller Rigs in a Running Test
Y. Kunimatsu and Y. Terumichi

Dynamic Behaviour of a Typical Short-Span Brazilian Railway Bridge due to a Passing Vehicle
F.L.M. Beghetto and J.E. Abdalla Filho

219 Using Analytical Target Cascading to Improve Ultra-light Railway Vehicle Ride Comfort
D. Silva, M.M. Neves, V. Infante and P. Koziol

220 Dynamic Effects in a High-Speed Train-Track System
R. Bogacz, K. Frischmuth and W. Czyżuła

221 Numerical Study of Trenches for the Reduction of Vibrations Induced by Traffic
J. Barbosa, P. Alves Costa and R. Calçada

222 The Analysis of Beams subject to Moving Loads using: Coiflets, the Wavelet Finite Element Method and the Finite Element Method
M. Musuva, P. Koziol, C. Mares and M.M. Neves

223 Mitigation of Vibrations in Buildings Induced by Railway Traffic in Tunnels: A Numerical Study
P. Lopes, P. Alves Costa, R. Calçada and A. Silva Cardoso

XVI Special Session: Railway Transition Zones: From Design to Maintenance
Organised by Dr E. Fortunato and Professor A. Nurmiškolu

224 Impact Analysis of Track Irregularity in Transition Section of High Speed Rail
H.W. Yang, D. Chu, I.C. Wang, C.F. Hung and S.K. Ho

225 Linear Thermo-Viscoelastic Behaviour of Bituminous Mixtures used for Railway Trackbeds

226 Modelling Uneven Support at Railway Crossings using a Vehicle-track Coupling System
I. Grossoni, Y. Bezin and A. Alonso

227 The Analysis of Degradation Mechanism in Track Transition Zones using 3D Finite Element Model
H. Wang, V.L. Markine and I. Shevtsov

228 Non-linear Elastic Behaviour of Unbound Aggregates in FEM representing Railway Transition Zones
J.N. Varandas, A. Paixão, E. Fortunato, P. Hölscher and R. Calçada

229 Use of Multidepth Deflectometers and Strain Gauges to Investigate the Differential Movement at Railway Bridge Approaches
D. Mishra, E. Tutumluer, H. Kazmee, and H. Boler
XVII Special Session: Computerized Systems for Vehicle Management, Diagnostics and Maintenance  
Organised by Professor A. Levchenkov and Professor R. Sarkisyan  

230 An Evolutionary Algorithm for Reducing Railway Accidents Caused by Human Factors  
A. Levchenkov and M. Gorobetz  

231 Cyber-Physical Modelling of Railroad Vehicle Systems using Modelica Simulation Language  
S. Barsali, P. Bolognesi, M. Ceraolo, M. Funaioli and G. Lutzemberger  

232 Stochastic Train Delay Simulation using Petri Nets  
L.F. Caetano and P.F. Teixeira  

233 Feasibility Study on Following Control of Trams through Numerical Simulations  
K. Nakano and S. Wakabayashi  

XVIII Special Session: Railroad Bearing Technologies  
Organised by Professor C. Tarawneh and Dr B. Wilson  

234 Multi-Interfacial Contact Behaviours of an Axle Roller Bearing Assembly of Railroad Cars  
S.N. Xu, K.J. Diao, H. Xu and F.C. Wang  

235 Manufacturing Geometry of Bearings and its Dynamic Effect on Reliability of Railway Bearings  

236 Field Implementation Statistical Analysis of an Emerging Bearing Condition Monitoring System  
C.M. Tarawneh, R. Estrada, B.M. Wilson and A. Martin  

237 Vibration Performance and Measurement Technology of Double Row Tapered Roller Bearings for Freight Wagon  

XIX Further Papers  

Energy Storage Technologies  

238 Comparison of Dynamic Phenomena in the Drive System Electric Locomotive Powered by DC Motors and Asynchronous  
S. Duda and T. Trawinski  

239 Fuel Measurements in Diesel Multiple Units for Energy Management Purposes  
P. Salvador, R. Insa, I. Villalba, P. Martínez, R. Sánchez and A. Rovira
240 A Greedy Heuristic for Optimizing Metro Regenerative Energy Usage
D. Fournier, F. Fages and D. Mulard

241 Analysis of Effect and Characteristic of Fuel Cell Generation connected to Traction Power Supply System
J.R. Kim and S.H. Chang

242 High-Speed Passenger Train NGT Link: Propulsion and Electrical Power Supply Concept
S. Kaimer, S. Streit and J. Winter

243 Optimal Control Methods for Energy Optimal Subway Operation
H.G. Bock, R.W. Longman, S. Sager and J.P. Schlöder

244 Electrical Storage for the Enhancement of Energy and Cost Efficiency of Urban Railroad Systems
M. Ceraolo, M. Funaioli, G. Lutzemberger, M. Pasquali, D. Poli and L. Sani

245 Estimation of Train Energy Consumption in Different Operational Scenarios by means of a Neural Network
P. Martínez, R. Insa, P. Salvador and A. Rovira

Modelling and Simulation of Railroad Vehicle Systems

246 Typical Flutter Phenomena of HSRS and Optimal Configuration of High-Speed Bogies
M.W. Piao, S.L. Liang, W.Z. Zhao, J.Y. Li and Z.G. Fang

247 Optimization of Traction and Braking Subsystems with respect to Mission Profile
L. Pugi, M. Malvezzi and R. Conti

248 Dynamic Rolling Contact Analysis between Wheel/Rail by Large-Scale Parallel FEM
H. Sakai, M. Takagaki, M. Hayashi, A. Aikawa, H. Okuda and J. Yin

249 Long Time Evolution of Train Dynamics with Respect to Track Irregularities
N. Lestoille, C. Soize, G. Perrin and C. Funfschilling

250 Novel Lightweight Construction Concepts and Methods for Car Bodies
J. Koenig, H.E. Friedrich, J. Winter and M. Schoen

251 Application of Modal Analysis on Railway Vehicles using On-track Measurements
L.M. Erviti and J.G. Gimenez

252 Effects of Wheel Wear and Diameter Difference on Dynamics of High-speed Trains
P. Han, W.H. Zhang and Y. Li

M. Aizpun, A. Alonso and J. Vinolas

254 Wavelet Theory in Relation to Vehicle Response and Shortwave Rail Irregularity
S.Q. Song and W.H. Zhang
255 Study on Pipe Modelling of an Air Spring in Railway Vehicles  

256 Wheel Wear Evaluation on Regional and High Speed Trains using In-House Wear Prediction Tools and Commercial Mbs  
N. Kuka, R. Verardi and C. Ariaudo  

257 A New Wear Model for the Analysis of Wheel and Rail Profile Evolution on Complex Railway Networks  
A. Innocenti, L. Marini, E. Meli, G. Pallini and A. Rindi  

258 Numerical Tests of the Prototype Railway Wagon for Intermodal Transport  
W. Krason and T. Niezgoda  

259 Modeling of Railway Tanks Stress-Strain Condition under Hydrodynamic Loading  
A.V. Putsiata, A.O. Shimanovsky and M.G. Kuzniatsova  

260 Stabilization of a Wheelset Hunting Motion by Utilizing the Rotating Device of the Running Gear as a Gyroscopic Damper  
S. Lin, H. Yoshino, H. Yabuno and Y. Suda  

261 Railway System for Intermodal Transport Based on the Special Wagon with Platform  
T. Niezgoda and W. Krason  

262 Effect of Bogie Frame Torsional Rigidity on Vehicle Operating Performance  
Y. Song, P.B. Wu and L. Jia  

263 Study on the Influence of Gyroscopic Forces on High Speed Rail Vehicle Stability  
H. Dai, H. Gao and S. Huang  

264 Equipment Suspension Modeling and its Influence on Car Body Vibration  
H.C. Wu, M.G. Li, M. Li and F. Gao  

265 Dynamics of 2 and 4-Axle Railway Vehicles in Transition Curves above Critical Velocity  
K. Zboinski and M. Golofit-Stawinska  

266 A Fast Non-Elliptic Contact Model for Application to Rail Vehicle Dynamics Simulation  
M. Sh. Sichani, R. Enblom and M. Berg  

267 Characteristics Analysis of Air Spring with Connecting Pipe  

268 Fluid-Solid Coupling Analysis of the Fuel Tank under Certain Generator Train  
P. Lin, X.J. Deng, S.Q. Liu, D.W. Chen and S.Q. Fu  

269 The Influence of the Maintenance State of Track and Bogie Components on the Track-Vehicle Interaction and Loads  
N. Kuka, R. Verardi, C. Ariaudo and J. Pombo
Railway Sleeper Modelling with Deterministic and Non-deterministic Support Conditions
E. Kassa and D. Salomon

Detailed Models for Dynamic Analysis of Railway Vehicles
H. Magalhães, J. Pombo, J. Ambrósio and M. Pereira

A Study on the Feasibility of adopting Identical Wheel Profiles for the Electric Multiple Unit
F.T. Lin, Y.M. Wang, X.Q. Dong, B. Wen and N. Wu

Railway Signalling and Communication

An Innovative Method of Train Integrity Verifying through a Wireless Sensor Network
B. Allotta, G. Biffi Gentili, P. D’Adamio, D. Faralli, R. Giusti, S. Papini and L. Pugi

Knowledge Management in a Railway Network: The Case of Signalling Systems
A. Morant, M. Westerberg and P.-O. Larsson-Kråäk

A New Control Relay for Automatic Transfer of Supplies for Signalling Applications
D.M. Van de Sype, P. Hayt and S. Thiem

An Optimized Supply System for Electronic Signalling Applications
D.M. Van de Sype and P. Hayt

The Failure Part Detector and Synchronized Data Display System for Track Circuit
T. Noguchi, M. Suzuki, T. Takamori and H. Uehara

Mobile Agent based CBTC System with Moving Block Signalling for Indian Railways
A. Verma, K.K. Pattanaik and P.P. Goel

Development of a Measuring Method for the Ground Coil of ATS using a GPS
K. Kosuge, K. Oda, K. Yasuoka and T. Tsushima

Causal Analysis Methodology of Multisensor Systems based on GNSS
C. Legrand, J. Beugin, B. Conrad, J. Marais, M. Berbineau and E.-M. El-Koursi

Dependability Issues of Track Circuits: A Hybrid Approach
E. Rodríguez, V. Simón, D. Galar and S. Niska

Railway Noise and Vibration

Contribution Analysis of the Interior Noise on High-Speed Trains using Operational Transfer Path Analysis
H.M. Noh, S.W. Kim, S.S. Kim and H.S. Cho

A Study of the Equivalent Acoustic Method for Carbody Profiles of High Speed Trains
S.S. Ding, Y.J. Zhao, X.J. Deng, A.Q. Tian, J. Du and S.Q. Liu

Acoustic Performance of Railways: A Case Study in Germany
H. Guler, B. Fath and T.P. Akyol

xxi
Noise Transmission Mode in the Carbody of High-Speed Trains

Environmental Aspects on Railway Operation and Maintenance

Evaluating Environmental Impacts of an Old Metallic Railway Bridge using LCA

Recycling Guidelines of the Rolling Stock
A. Merkisz-Guranowska, J. Merkisz, M. Jacyna, H. Stawecka and M. Wasiak

Carbon Emissions Analysis of Rail Resurfacing Work: A Case Study, Practical Guideline and Systems Thinking Approach
S. Krezo, O. Mirza, Y. He, S. Kaewunruen and J.M. Sussman

Railway Operations and Maintenance Planning

An Optimal Control Model for Rail Freight Car Fleet Sizing Problem
M. Milenković, N. Bojović and R. Nuhodžić

The Impact of Competitive Tendering on Railway Maintenance Performance in Sweden
A.M. Petersson and J. Lundberg

A Methodology for Comparing and Harmonizing Railway Operating Processes
S. Hoeppner and U.A. Weidmann

Planning for Intra-city and Regional Transport Multimode Systems
R.B. Silva, M.A. Cavalcanti Netto and A.E. Rezende

Comparative Assessment of Manual and Automated Railway Wheels Inspection Means for Fault Detection
L. Ibarra, M.G. Lipsett and M.T. Hendry

Applying the Advanced Multimedia Technique for a Railway Tourism Vehicle to Raise the Operating Benefit
S.H. Han

A Model to Simulate the Traffic of Trains on the Paraopeba Corridor
T.A. Dos Santos

Rail-Infrastructure Performance: The Conflict between Rail-Availability for Maintenance and Operation
M.L. Bobbink, A. Hartmann and R. Degenhart

Optimization of Maintenance Cycle Time - OptJob
L.M. Vianna and L.C. Medeiros

Distribution Time for Empty Lots of GDE Wagons for Loading Iron Ore
A.L.M. Barros, M.M.C. Cruz and L. Fernandes
299 Smart Railroad Maintenance Engineering with Stochastic Model Checking
D. Guck and J.-P. Katoen and M.I.A. Stoëlinga, T. Luijten and J. Romijn

300 Decision Support System Availability: Optimal Combination and Allocation of Interventions
G. van der Werf and F.J. Többen

301 Spare Parts Planning and Control for Maintenance Operations
J.J. Arts

302 Remote Monitoring and Condition-Based Maintenance for High-Tech Capital Goods
Q. Zhu, H. Peng and G.J. van Houtum

303 Defining Robustness for Railway Infrastructure
P. Norrbin and A. Parida

304 An Innovative Runoff Hazard Mapping for Risk Diagnosis and Management on Railway Infrastructure
B. Chazelle, J. Dehotin and L. Lambert

305 RAM Modelling of Railway Operational Sections: A Case Study from the Iron Ore Line
S.M. Famurewa, M. Rantatalo and U. Kumar

Traction, Transmission and Braking Systems

306 Effect of Load on Vibrations of a Railway Gearbox
A. Bracciali and F. Piccioli

307 State Monitoring and Analysis of an In-service Rail Transit Vehicle Braking System
J.Y. Zuo, Z.M. Wang, W. Hu and M.L. Wu

308 Dynamic Thermal Analysis on High-Speed Railway Ventilated Brake Disc under the Effect of Air Flow
Q. Wang and J.Y. Zuo

309 Nonlinear Dynamics of a Gear Transmission System under Parametric and Self-Excited Excitation on a High-Speed Train
G.H. Huang, W.H. Zhang, Y.P. Fu, S.L. Liang and X.Y. Wang

310 CRH5 Cardan Shaft Condition Estimation from Gearbox Vibration
C. Yi, J.H. Lin, T.D. Ruan, Y.X. Hu and Y.P. Li

311 Braking Simulation of a High-Speed Railway Vehicle in Low Adhesion Conditions
H.J. Zhang, H.Y. Wang, Z.F. Wen and X.S. Jin

312 Elimination of Failures in Railway Gearboxes by Regenerative Coasting
A. Bracciali and F. Piccioli

313 Frictional Performance and Friction Film Evolution of Cu based Braking Materials
Y. Wang, Q.Z. Yan, Z.Y. Fan, X. Wen and C.C. Ge

xxiii
Light Railways and Trams

314 Monitoring System of the Tram Vibroacoustic Activity Level: General Concept
B. Czechyra, B. Firlik and F. Tomaszewski

315 New Approaches for the Evaluation of the Driving Resistance of Tramway Systems
using Data of the Dresden Measurement Tram
G. Duerrschmidt and M. Beitelschmidt

316 Identification and Modeling of Nonlinear Phenomena at the Wheel/Rail Contact Area
B. Firlik, B. Czechyra and W. Sawczuk

Mechatronics and Control Systems

317 Scaled Roller Rig Experiments with a Mechatronic Bogie
J. Kalivoda and P. Bauer

318 Application of Semi-Active Control Strategies in Bogie Primary Suspension System
S.M. Mousavi Bideleh and V. Berbyuk

319 Mechatronic System Simulation of a Full Scale Roller Rig for a Single Wheelset
B.B. Liu, S. Bruni and C.Y. Chang

320 Multimodal Flexural Vibration Control of Carbody using Active Mass Dampers
Y. Akiyama, T. Tomioka and T. Takigami

321 Railway Vehicle Optimisation using the Concept of “Design for Control”
C.P. Ward, T.X. Mei, P.D. Hubbard and M. Mirzapour

Future Trends and Education in Railway Engineering

322 Lessons for Policy Makers in Non-High Speed Rail Countries
M.A.M. Ali

323 Omani Rail Institute for the Specific and Unique Needs of the GCC Countries
T. Effey, M. Modigell and T. Jussen

324 Examples of Public Research on Railway Vehicles in Czech Republic:
Crashworthiness, Aerodynamics and Fatigue Life
M. Kepka, P. Heller, V. Kemka and S. Spirk

325 Interactively Experiencing and Understanding Historical Steam Locomotive Technology
M. Schumann, A. Winge and K. Peters

New Materials for Railway Applications

326 Applications of New Materials in the Design of Rail Vehicles and Laboratory Verification of their Dynamic and Fatigue Properties
M. Kepka, P. Heller and J. Chvojan
Selection of Railway Floor and Roof Panels Based on Finite Element Analysis
J. Kwapisz

Thermal Comfort

Numerical Simulation of the Air Flow and Thermal Comfort in a Train Cabin
M. Konstantinov and C. Wagner

Optimising Ventilation Ducting in High Speed and Regional Trains
B. Angel, S. Ségrétain and N. Paradot

A Non-Contact and Non-Destructive Railway Bridge Monitoring System: A Case Study in Germany
B. Fath, H. Guler and T.P. Akyol
