2013 Humaine Association Conference on Affective Computing and Intelligent Interaction

(ACII 2013)

Geneva, Switzerland
2-5 September 2013
Main Conference—Full Papers

A Computational Model of Empathy: Empirical Evaluation ................................................................. 1
    Hana Boukricha, Ipke Wachsmuth, Maria Nella Carminati, and Pia Knoeferle

A Control-Theoretic Approach to Adaptive Physiological Games .............................................................. 7
    Avinash Parnandi, Youngpyo Son, and Ricardo Gutierrez-Osuna

A Large Video Data Base for Computational Models of Induced Emotion ........................................... 13
    Yoann Baveye, Jean-Noël Bettinelli, Emmanuel Dellantréa, Liming Chen,
    and Christel Chamaret

A Multimodal Corpus Approach to the Design of Virtual Recruiters .................................................... 19
    Mathieu Chollet, Magalie Ochs, Chloé Clavel, and Catherine Pelachaud

A Preliminary Investigation of the Effect of Social Media on Affective Trust in Customer-Supplier Relationships .............................................................................................................. 25
    Fabio Calefato, Filippo Lanubile, and Nicole Novielli

A Preliminary Study on GMM Weight Transformation for Emotional Speaker Recognition ............................... 31
    Li Chen and Yingchun Yang

A Probabilistic Approach to Tweets’ Sentiment Classification .................................................................. 37
    Francesco Colace, Massimo De Santo, and Luca Greco

Accessing Emotion Patterns from Affective Interactions Using Electrodermal Activity ............................... 43
    Rui Henriques, Ana Paiva, and Cláudia Antunes
Action Unit Models of Facial Expression of Emotion in the Presence of Speech .............................................49
Miraj Shah, David G. Cooper, Houwei Cao, Ruben C. Gur, Ani Nenkova,
and Ragini Verma

Active Labeling of Facial Feature Points .........................................................55
Menghua He, Shangfei Wang, and Qiang Ji

Addressing Loneliness and Isolation in Older Adults: Proactive Affective
Agents Provide Better Support ........................................................................61
Lazlo Ring, Barbara Barry, Kathleen Totzke, and Timothy Bickmore

Affect and Creative Performance on Crowdsourcing Platforms .........................67
Robert R. Morris, Mira Dontcheva, Adam Finkelstein, and Elizabeth Gerber

Affective Benchmarking of Movies Based on the Physiological Responses of
a Real Audience ..............................................................................................73
Julien Fleureau, Philippe Guillotet, and Izabela Oriac

Analyses of the Differences between Posed and Spontaneous Facial
Expressions .......................................................................................................79
Menghua He, Shangfei Wang, Zhilei Liu, and Xiaoping Chen

Analysis and Compensation of the Reaction Lag of Evaluators in Continuous
Emotional Annotations .....................................................................................85
Soroosh Mariooryad and Carlos Busso

Analysis and Modelling of Affective Japanese Sitting Postures by Japanese
and British Observers ......................................................................................91
Tatsuya Shibata, Akito Michishita, and Nadia Bianchi-Berthouze

Are Discrete Emotions Useful in Human-Robot Interaction? Feedback
from Motion Capture Analysis ..........................................................................97
Matthew Lewis and Lola Cañamero

Arguments for a Computational Model for Forms of Selective Attention Based
on Cognitive and Affective Feelings .............................................................103
Luis Macedo

Assessing Postural Control for Affect Recognition Using Video and Force
Plates ................................................................................................................109
Tom Giraud, David Antonio Gómez Jáuregui, Jiewen Hua, Brice Isableu,
Edith Filaire, Christine Le Scanff, and Jean Claude Martin

Assessment of Computer-Supported Collaborative Processes Using
Interpersonal Physiological and Eye-Movement Coupling .............................116
Guillaume Chanel, Mireille Bétrancourt, Thierry Pun, Donato Cereghetti,
and Gaëlle Molinari

Audiovisual Detection of Behavioural Mimicry ..............................................123
Sanjay Bilakhia, Stavros Petridis, and Maja Pantic
Audiovisual Detection of Laughter in Human-Machine Interaction .......................................................... 129
  Stavros Petridis, Maelle Leveque, and Maja Pantic

AutoBAP: Automatic Coding of Body Action and Posture Units from Wearable Sensors .......................................................... 135
  Eduardo Velloso, Andreas Bulling, and Hans Gellersen

Automatic Classification of Literature Pieces by Emotion Detection: A Study on Quevedo's Poetry .................................................. 141
  Linda Barros, Pilar Rodriguez, and Alvaro Ortigosa

Automatic Nonverbal Behavior Indicators of Depression and PTSD: Exploring Gender Differences .................................................. 147
  Giota Stratou, Stefan Scherer, Jonathan Gratch, and Louis-Philippe Morency

Automatic Phonetic Transcription of Laughter and Its Application to Laughter Synthesis .......................................................... 153
  Jérôme Urbain, Hüseyin Çakmak, and Thierry Dutoit

Automatically Recognizing Facial Indicators of Frustration: A Learning-centric Analysis .......................................................... 159
  Joseph F. Grafsgaard, Joseph B. Wiggins, Kristy Elizabeth Boyer, Eric N. Wiebe, and James C. Lester

Bayesian Affect Control Theory .......................................................... 166
  Jesse Hoey, Tobias Schroder, and Areej Alhothali

Bayesian Inference Based Temporal Modeling for Naturalistic Affective Expression Classification .................................................. 173
  Linlin Chao, Jianhua Tao, Minghao Yang, and Ya Li

Bodily Manifestations of Affects: The Example of Gait and Virtual Reality .......................................................... 179
  Vincent Krieger, Elise Lallart, and Roland Jouvent

Computational Analysis of Emotion Dynamics .......................................................... 185
  Ayesha Hakim, Stephen Marsland, and Hans W. Guesgen

Contactless Measurement of Heart Rate Variability from Pupillary Fluctuations .......................................................... 191
  Avinash Parnandi and Ricardo Gutierrez-Osuna

Continuous Emotion Recognition: Another Look at the Regression Problem .......................................................... 197
  Pouria Fewzee and Fakhri Karray

Conversational Topics Handle Social Relationships .......................................................... 203
  Jean-Paul Sansonnet

Does Learner Conscientiousness Matter When Generating Emotional Support in Feedback? .......................................................... 209
  Matt Dennis, Judith Masthoff, and Chris Mellish

EmotionAir: Perception of Emotions from Air Jet Based Tactile Stimulation .......................................................... 215
  Mohamed Yassine Tsalamal, Nizar Ouarti, Jean-Claude Martin, and Mehdi Ammi

</table>
Modeling Framing Effects: Comparing an Appraisal-Based Model with Existing Models .................................................381
  Jonathan Ito and Stacy Marsella

Modeling Stress Using Thermal Facial Patterns: A Spatio-temporal Approach .........................................................387
  Nandita Sharma, Abhinav Dhall, Tom Gedeon, and Roland Goecke

Modelling Context to Solve Conflicts in SentiWordNet .................................................................393
  Ovidiu Serban, Alexandre Pauchet, Alexandrina Rogozan, and Jean-Pierre Pecuchet

Mouse Trajectories and State Anxiety: Feature Selection with Random Forest ..................................................399
  Takashi Yamauchi

Multimodal Emotion Expressions of Virtual Agents, Mimic and Vocal Emotion Expressions and Their Effects on Emotion Recognition .........................................................405
  Benny Liebold and Peter Ohler

Multimodal Engagement Classification for Affective Cinema ...............................................................................411
  Mojtaba Khomami Abadi, Jacopo Staiano, Alessandro Cappelletti, Massimo Zancanaro, and Nicu Sebe

Multimodal Expressions of Stress during a Public Speaking Task: Collection, Annotation and Global Analyses ..........................................................417
  Tom Giraud, Mariette Soury, Jiewen Hua, Agnes Delaborde, Marie Tahon, David Antonio Gomez Jauregui, Victoria Eyharabide, Edith Filaire, Christine Le Scanff, Laurence Devillers, Brice Isableu, and Jean Claude Martin

Mutual Behaviors during Dyadic Negotiation: Automatic Prediction of Respondent Reactions ........................................423
  SungHyun Park, Stefan Scherer, Jonathan Gratch, Peter Carnevale, and Louis-Philippe Morency

Neuroticism, Extraversion and Stress: Physiological Correlates .......................................................................................429
  Anne-Marie Brouwer, Martin van Schaik, Jan van Erp, and Hans Korteling

Non-anthropomorphic Expression of Affective States through Parametrized Abstract Motifs .........................................................435
  Alberto Betella, Martin Inderbitzin, Ulysses Bernardet, and Paul F.M.J. Verschure

On Recovering Structure of Affect ........................................................................................................442
  Ashish Kapoor, Mary Czerwinski, Diana Lynn Maclean, and Alex Zolotovitski

On the Influence of Emotional Feedback on Emotion Awareness and Gaze Behavior ........................................448
  Fabien Ringeval, Andreas Sonderegger, Basilio Noris, Aude Billard, Juergen Sauer, and Denis Lalanne

Parameter Optimization Issues for Cross-corpora Emotion Classification .........................................................454
  Bogdan Vlasenko, David Philippou-Hübner, and Andreas Wendemuth
Perception of Emotional Gaits Using Avatar Animation of Real and Artificially Synthesized Gaits ................................................................. 460
Halim Hicheur, Hideki Kadone, Julie Grèzes, and Alain Berthoz

PERSEED: A Self-Based Model of Personality for Virtual Agents Inspired by Socio-cognitive Theories ....................................................... 467
Caroline Faur, Céline Clavel, Sylvie Pesty, and Jean-Claude Martin

Physiological Correlates of Stress in Individuals about to Undergo Eye Laser Surgery ................................................................. 473
Maarten A. Hogervorst, Anne-Marie Brouwer, and Wouter K. Vos

Reading Personality: Avatar vs. Human Faces ................................................................. 479
Yuqiong Wang, Joe Geigel, and Andrew Herbert

Real-Time LDCRF-Based Method for Inferring TV Viewer Interest ................................................................. 485
Masahide Naemura, Simon Clippingdale, Masaki Takahashi, Makoto Okuda,
Yuko Yamanouchi, and Mahito Fujii

Relative Body Parts Movement for Automatic Depression Analysis ................................................................. 492
Jyoti Joshi, Abhinav Dhall, Roland Goecke, and Jeffrey F. Cohn

Reversal Learning Based on Somatic Markers ................................................................. 498
Jens Hoefinghoff and Josef Pauli

Some Correlates of Agency Ascription and Emotional Value and Their Effects on Decision-Making ................................................................. 505
Megan Strait, Gordon Briggs, and Matthias Scheutz

Sparse Autoencoder-Based Feature Transfer Learning for Speech Emotion Recognition ................................................................. 511
Jun Deng, Zixing Zhang, Erik Marchi, and Björn Schuller

Statistical Modelling of Complex Emotions Using Mixture of Von Mises Distributions ................................................................. 517
Ayesha Hakim, Stephen Marsland, and Hans W. Guesgen

Stress Detection for PTSD via the StartleMart Game ................................................................. 523
Christoffer Holmgård, Georgios N. Yannakakis, Karen-Inge Karstoft,
and Henrik Steen Andersen

Stress Detection from Audio on Multiple Window Analysis Size in a Public Speaking Task ................................................................. 529
Mariette Soury and Laurence Devillers

Student Emotions with an Edu-game: A Detailed Analysis ................................................................. 534
Mirela Gutica and Cristina Conati

Subjective Perceptions in Wartime Negotiation ................................................................. 540
Ning Wang, David V. Pynadath, and Stacy C. Marsella
The Effect of Agency on the Impact of Emotion Expressions on People's Decision Making .......................................................................................................................... 546
   Celso M. de Melo, Jonathan Gratch, and Peter J. Carnevale

The Perception of Charisma from Voice: A Cross-Cultural Study ................................................................................................................................. 552
   Francesca D'Errico, Rosario Signorello, Didier Demolin, and Isabella Poggi

The Relative Importance and Interrelations between Behavior Parameters for Robots' Mood Expression ................................................................. 558
   Junchao Xu, Joost Broekens, Koen Hindriks, and Mark A. Neerincx

Towards Ambulatory Mental Stress Measurement from Physiological Parameters ........................................................................................................... 564
   Jacqueline Wijsman, Ruud Vullers, Salvatore Polito, Carlos Agell,
   Julien Penders, and Hermie Hermens

Towards Robust Real-Time Valence Recognition from Facial Expressions for Market Research Applications ........................................................................ 570
   Jens-Uwe Garbas, Tobias Ruf, Matthias Unfried, and Anja Dieckmann

Towards the Design of Affective Survival Horror Games: An Investigation on Player Affect ......................................................................................... 576
   Vanus Vachiratamporn, Roberto Legaspi, Koichi Moriyama, and Masayuki Numao

User-centric Affective Video Tagging from MEG and Peripheral Physiological Responses ............................................................................................. 582
   Mojtaba Khomami Abadi, Seyed Mostafa Kia, Ramanathan Subramanian,
   Paolo Avesani, and Nicu Sebe

Using a Probabilistic Topic Model to Link Observers' Perception Tendency to Personality ............................................................................................. 588
   Shiro Kumano, Kazuhiro Otsuka, Masafumi Matsuda, Ryo Ishii, and Junji Yamato

VibeRate, An Affective Wearable Tool for Creative Design ................................................................................................................................. 594
   Stelios Giannoulis and Corina Sas

Wearable Physiological Sensors Reflect Mental Stress State in Office-Like Situations .............................................................................................. 600
   Jacqueline Wijsman, Bernard Grundlehner, Hao Liu, Julien Penders,
   and Hermie Hermens

   Vaiva Imbrasaitė, Tadas Baltrušaitis, and Peter Robinson

When Humans Become Objects: Out-Group Effects in Real and Artificial Faces .................................................................................................. 612
   Aleksandra Swiderska, Eva G. Krumhuber, and Arvid Kappas

Which Is More Responsible for Boredom in Intelligent Tutoring Systems: Students (Trait) or Problems (State)? ....................................................... 618
   William Hawkins, Neil Heffernan, and Ryan S.J.D. Baker
Main Conference—Doctoral Consortium

Affective Conversational Models: Interpersonal Stance in a Police Interview
Context ......................................................................................................................... 624
Merijn Bruijnes

An Automated Framework for Depression Analysis .................................................. 630
Jyoti Joshi

Context Based Facial Expression Analysis in the Wild .............................................. 636
Abhinav Dhall

Depression Detection & Emotion Classification via Data-Driven Glottal Waveforms ........................................................................................................... 642
David Vandyke

From Joyous to Clinically Depressed: Mood Detection Using Multimodal Analysis of a Person's Appearance and Speech ......................................................... 648
Sharifa Alghowinem

Identifying Task Engagement: Towards Personalised Interactions with Educational Robots ................................................................................................. 655
Lee J. Corrigan, Christopher Peters, and Ginevra Castellano

Measuring Affect for the Study and Enhancement of Co-present Creative Collaboration ........................................................................................................ 659
Evan Morgan, Hatice Gunes, and Nick Bryan-Kinns

Speaker Recognition and Speaker Characterization over Landline, VoIP and Wireless Channels ................................................................................................ 665
Laura Fernandez Gallardo

Stress Recognition Using Wearable Sensors and Mobile Phones ........................... 671
Akane Sano and Rosalind W. Picard

Toward a Computational Model of Social Relations for Artificial Companions ... 677
Florian Pecune

Towards a Virtual Teammate Whose Support Can Help Alleviate Stress in the Prehospital Care Domain ................................................................. 683
Peter Kindness

Towards an Autonomous Theatrical Robot ............................................................... 689
Julían M. Angel Fernandez and Andrea Bonarini

Towards Automatic and Unobtrusive Recognition of Primary-Process Emotions in Body Postures ................................................................. 695
Marko Radeta and Marco Maiocchi
Main Conference—Demo and Interactive Events

Affective Touch at a Distance ................................................................. 701
   Gijs Huisman, Aaduén Darriba Frederiks, and Dirk Heylen

Automated Coach to Practice Conversations ...................................... 703
   Mohammed (Ehsan) Hoque and Rosalind W. Picard

Automatic Staging of Audio with Emotions ...................................... 705
   Lakshmi Saheer and Milos Cernak

EEG-Enabled Affective Applications ................................................. 707
   Olga Sourina and Yisi Liu

Gtrace: General Trace Program Compatible with EmotionML ................. 709
   Roddy Cowie, Martin Sawey, Cian Doherty, Javier Jaimovich, Cavan Fyans,
   and Paul Stapleton

Herme, Yet Another Interactive Conversational Robot ......................... 711
   JinGuang Han, Emer Gilmartin, and Nick Campbell

On the Fly User's Emotion Capture .................................................. 713
   Philippe Guillotol, Julien Fleureau, Izabela Orlac, and Fernando Silveira

Sport and Technology: The Case of Archery ..................................... 715
   Cédric Bornand, Angelika Güsewell, Enrico Staderini, and Jagdish Patra

Ubiquitous Interaction for Computer Mediated Communication of Emotions
   Maurizio Caon, Omar Abou Khaled, Elena Mugellini, Denis Lalanne,
   and Leonardo Angelini

User Modelling and Adaptive, Natural Interaction for Conflict Resolution
   Kostas Karpouzis, Georgios Yannakakis, Ana Paiva, Jeppe Herlev Nielsen,
   Asimina Vasalou, and Arnav Jhala

Video Visualization of Predictors of Emotions Dynamically Expressed by Music
   Olivier Lartillot, Kim Eliard, Donato Cereghetti, and Didier Grandjean

Multimodal Affect Recognition in Virtual Worlds: Avatars Mirroring User's Affect
   Javier Gonzalez-Sanchez, Maria Elena Chavez-Echeagaray, David Gibson,
   and Robert Atkinson

Mood Conductor: Emotion-Driven Interactive Music Performance ........... 726
   György Fazekas, Mathieu Barthet, and Mark B. Sandler
Fifth International Workshop on Affective Interaction in Natural Environments (AFFINE 2013)

Fifth International Workshop on Affective Interaction in Natural Environments (AFFINE 2013): Interacting with Affective Artefacts in the Wild ................................................................. 727
  Ginevra Castellano, Kostas Karpouzis, Jean-Claude Martin,
  Louis-Philippe Morency, Christopher Peters, and Laurel D. Riek

Constraining Content in Mediated Unstructured Social Interactions: Studies in the Wild ................................................................................................................................. 728
  James Kennedy, Paul Baxter, and Tony Belpaeme

Determining the Smallest Emotional Unit for Level of Arousal Classification ................................................................. 734
  Bogdan Vlasenko and Andreas Wendemuth

Learner Modelling and Automatic Engagement Recognition with Robotic Tutors ................................................................................................................................. 740
  Fotios Papadopoulos, Lee J. Corrigan, Aidan Jones, and Ginevra Castellano

Shopmobia: An Emotion-Based Shop Rating System ......................................................................................................................... 745
  Nouf Alajmi, Eiman Kanjo, Nour El Mawass, and Alan Chamberlain

The Emotracker: Visualizing Contents, Gaze and Emotions at a Glance ......................................................................................................................... 751
  Isabelle Hupont, Sandra Baldassarri, Eva Cerezo, and Rafael Del-Hoyo

Towards Automated Full Body Detection of Laughter Driven by Human Expert Annotation ......................................................................................................................... 757
  Maurizio Mancini, Jennifer Hofmann, Tracey Platt, Gualtiero Volpe,
  Giovanna Varni, Donald Glowinski, Willibald Ruch, and Antonio Camurri

Towards Effective Emotional Support for Community First Responders Experiencing Stress ......................................................................................................................... 763
  Matt Dennis, Peter Kindness, Judith Masthoff, Chris Mellish, and Kirsten Smith

International Workshop on Mediated Touch and Affect (MeTA 2013)

International Workshop on Mediated Touch and Affect (MeTA 2013): Introduction ................................................................................................................................. 769
  Gijs Huisman, Nadia Bianchi-Berthouze, and Dirk Heylen

An Embodiment Perspective of Affective Touch Behaviour in Experiencing Digital Textiles ................................................................................................................................. 770
  Bruna Petreca, Nadia Bianchi-Berthouze, Sharon Baurley, Penelope Watkins,
  and Douglas Atkinson

How to Collect Haptic Expressions of Spontaneous Emotions? Methodological Considerations ................................................................................................................................. 776
  Gaffary Yoren, Martin Jean-Claude, and Ammi Mehdi
How to Touch Humans: Guidelines for Social Agents and Robots That Can Touch

Jan B.F. Van Erp and Alexander Toet

Reach Out and Touch Somebody's Virtual Hand: Affectively Connected through Mediated Touch

Touched by the Storyteller: The Influence of Remote Touch in the Context of Storytelling

Merel M. Jung, Robert W.M. Boensma, Gijs Huisman, and Betsy van Dijk

Virtual Touch Sensations in an Online Shopping Context: An Experimental Approach

Suzanne Overmars and Karolien Poels

Second International Workshop on Context Based Affect Recognition (CBAR 2013)

Towards Context Based Affective Computing

Zakia Hammal and Merlin Teodosia Suarez

Annotation and Classification of Changes of Involvement in Group Conversation

Ronald Böck, Stefan Glüge, Ingo Siegert, Andreas Wendemuth, and Stefan Glüge

Estimation of Attentiveness of People Watching TV Based on Their Emotional Behaviors

Masaki Takahashi, Masahide Naemura, Mahito Fujii, and Shin'ichi Satoh

Vocal and Facial Imitation of Humans Interacting with Virtual Agents

Ruud Mattheij, Marie Nilsenova, and Eric Postma

Third Workshop on Affective Brain–Computer Interfaces (ABCI 2013)

Third Workshop on Affective Brain-Computer Interfaces (ABCI 2013):
Introduction

Christian Mühl, Guillaume Chanel, Brendan Allison, and Anton Nijholt

A Comparison of Evaluation Measures for Emotion Recognition in Dimensional Space

Robert Jenke, Angelika Peer, and Martin Buss

Affective Brain-Computer Interfaces for Arts

Hayrettin Gürkök and Anton Nijholt
Continuous Recognition of Affective States by Functional Near Infrared Spectroscopy Signals
Dominic Heger, Reinhard Mutter, Christian Herff, Felix Putze, and Tanja Schultz

Development of a Binary fMRI-BCI for Alzheimer Patients: A Semantic Conditioning Paradigm Using Affective Unconditioned Stimuli
Giulia Liberati, Ralf Veit, Sunjung Kim, Niels Birbaumer, Christine von Arnim, Anne Jenner, Dorothee Lulé, Albert Christian Ludolph, Antonino Raffone, Marta Olivetti Belardinelli, Josué Dalboni da Rocha, and Ranganatha Sitaram

EEG-Based Emotion-Adaptive Advertising
Yisi Liu, Olga Sourina, and Mohammad Rizqi Hafiyyandi

Emotion Detection from QRS Complex of ECG Signals Using Hurst Exponent for Different Age Groups
S. Jerritta, M. Murugappan, Khairunizam Wan, and Sazali Yaacob

Emotion Recognition from EEG during Self-Paced Emotional Imagery
Christian Andreas Kothe, Scott Makeig, and Julie Anne Onton

Emotional Influence on SSVEP Based BCI
Yachen Zhu, Xilan Tian, Guobing Wu, Gilles Gasso, Shangfei Wang, and Stéphane Canu

Phase-Amplitude Coupling between EEG and EDA While Experiencing Multimedia Content
Eleni Kroupi, Jean-Marc Vesin, and Touradj Ebrahimi

Towards an Affective Brain-Computer Interface Monitoring Musical Engagement
Grace Leslie, Alejandro Ojeda, and Scott Makeig

Using Cross-Task Classification for Classifying Workload Levels in Complex Learning Tasks
Carina Walter, Stephanie Schmidt, Wolfgang Rosenstiel, Peter Gerjets, and Martin Bogdan

Author Index
