</table>
Numerical Simulation of an Oscillating Wave Surge Converter
Yanji Wei, Ashkan Rafiee, Bjoern Elsaesser, and Frederic Dias

Dual Stiffness Approach for Polyester Mooring Line Analysis in Time Domain:
Semisubmersible Case
Arcandra Tahar and Djoni Sidarta

Fatigue Study of Conductors at the Conductor Guides’ Level on North Sea Platform
Bita Jalali Mosalam and Ove Tobias Gudmestad

Evaluation of Directional Analysis Methods for Low-Frequency Waves to Predict LNGC Motion Response in Nearshore Areas
Sanne van Essen, Arne van der Hout, René Huijsmans, and Olaf Waals

Offshore Launching of Jack-Up Units: An Experimental Approach
Claudio Rodriguez, Paulo T. T. Esperança, Mário Moura, and Jacques Raigorodsky

Calculation of Wave Height Dependent Force RAO’s on Submerged Bodies in Close Proximity to the Free Surface
Ivan van Winsen, Job S. Bokhorst, and René H. M. Huijsmans

Investigation of the Mighty Servant 3 Accident by a Progressive Flooding Method
Hendrik Dankowski and Hendrik Dilger

Wave Diffraction Forces on Offshore Wind Turbine Piles With an Octagonal Cross Section
Serena Lim and Longbin Tao

Multidimensional Interpolation Filters Development for Risers’ Database Analysis
Ricardo Pereira Gonçalves and Edison C. P. Lima

Analysis and Offshore Support for the Float-Over of a 24,250mT Topsides on the
North West Shelf
Abdel-AH el Mouhandiz and Job Bokhorst

Validation of the HVS Semisubmersible Global Performance by Model Tests
Johyun Kyoung, C. K. Yang, Jim O’Sullivan, and Thiago Miliante

Comprehensive Downtime Analysis of DP-Assisted Offloading Operation of Spread Moored Platforms in Brazilian Waters
Diego C. Corrêa, Allan C. de Oliveira, Eduardo A. Tannuri, and Sergio H. Sphaier
OMAE2013-10682 ........................................... V001T01A035
Efficient Mooring Line Fatigue Analysis Using a Hybrid Method Time Domain
Simulation Scheme
  Niels Hørbye Christiansen, Per Erlend Torbergsen Voie, Jan Høgsberg, and Nils Sødahl

OMAE2013-10684 ........................................... V001T01A036
A Comparison Study of Pressure Vessel Design Using Different Standards
  Frode Tjelta Askestrand and Ove Tobias Gudmestad

OMAE2013-10707 ........................................... V001T01A037
Design of Leg Mating Unit for Float-Over Installation of Decks
  Krishna Chaitanya and Sajith B. Nair

OMAE2013-10708 ........................................... V001T01A038
Hydrodynamic Moonpool Behavior in a Monocolumn Hub Platform With an Internal Dock
  Allan C. de Oliveira, Eduardo M. Vilameá, Silvia R. Figueiredo, and Edgard B. Malta

OMAE2013-10721 ........................................... V001T01A039
Ice-Resistant Turret-Based Mobile Drilling Unit With the Wedge-Shaped Hull
  Approximating Ship Form (Wedge-Shaped Ship)
  Lev B. Blagovidov, Maksym V. Kovalyov, Iryna L. Blagovidova, Leonid V. Kolchenko, and
  Victor F. Lensky

OMAE2013-10732 ........................................... V001T01A040
Online Safety Monitor Design of the Jacket Platform Based on Structural Members
  Failure Study
  Yuwang Xu, Shixiao Fu, Qian Zhong, Dixia Fan, Yu Zhang, and Runpei Li

OMAE2013-10737 ........................................... V001T01A041
Wave Drift Forces on Three Barges Arranged Side by Side in Floatover Installation
  Xin Xu, Jianmin Yang, Xin Li, and Haining Lu

OMAE2013-10749 ........................................... V001T01A042
Gap Effects at Side-by-Side LNG-Transfer Operations
  Günther F. Clauss, Matthias Dudek, and Daniel Testa

OMAE2013-10763 ........................................... V001T01A043
The Collision Time of Free-Floating Multiple Vessels in Waves
  Fei Guo, Shixiao Fu, Wei Wei, Weidong Zhang, Xiqia Chen, and Yuwang Xu

OMAE2013-10838 ........................................... V001T01A044
Nonlinear Wave Group Impact on a Cylindrical Monopile
  Zhong Peng, Tim Raaijmakers, and Peter Wellens

OMAE2013-10860 ........................................... V001T01A045
Improving Offshore Platforms Wave Measurements
  George Z. Forristall and Alexia Aubault

OMAE2013-10893 ........................................... V001T01A046
A Stabilized Edge-Based Finite Element Approach to Wave-Structure Interaction Assessment
  Renato N. Elias, Alvaro L. G. A. Coutinho, José L. Drummond Alves, Nestor O. Guevara, Jr.,
  Milton A. Gonçalves, Jr., Adriano M. A. Cortês, Carlos E. Silva, Bruno Correa,
  Fernando A. Rochinha, Gabriel M. Guerra Bernadá, and Daniel F. de Carvalho e Silva

</table>
OMAE2013-11126 ................................................................. V001T01A058
A Practical $O(\Delta t)$ Approximation of Low Frequency Wave Loads
Charles Monroy, Guillaume de Hauteclocque, and Xiao-Bo Chen

OMAE2013-11128 ................................................................. V001T01A059
Water-Driven Debris Impact Forces on Structures: Experimental and Theoretical Program

OMAE2013-11138 ................................................................. V001T01A060
Thruster-Interaction Effects on a DP Semi-Submersible and a Drill Ship: Measurement and Analysis of the Thruster Wake Flow
J. L. Cozijn and R. Hallmann

OMAE2013-11248 ................................................................. V001T01A061
Consideration of a Rotary Power Take-Off Mechanism as a Wave-Energy Converter on the WindFloat Platform
Samuel Kanner and Ronald W. Yeung

OMAE2013-11260 ................................................................. V001T01A062
Semi-Coupled Scheme for the Analysis of Floating Production Systems
Fabricio Nogueira Corrêa and Breno Pinheiro Jacob

OMAE2013-11319 ................................................................. V001T01A063
An Offshore Platform Selection Approach for the Black Sea Region
Ayhan Mentes and Ismail Hakki Helvacioglu

OMAE2013-11332 ................................................................. V001T01A064
Bend Over Sheave Durability of Fibre Ropes for Deep Sea Handling Operations

OMAE2013-11340 ................................................................. V001T01A065
Docking and Undocking Considerations for Floatover Analyses and Operations
Jillian Duquesnay, Jason Baldwin, and James Wesley Rains

OMAE2013-11366 ................................................................. V001T01A066
Review of Hydrodynamic and Nautical Studies for Offshore LNG Operations
Jaap de Wilde and Johan Dekker

OMAE2013-11381 ................................................................. V001T01A067
Installation Methodologies for a Tension Leg Platform Under Ocean Swell Conditions
Oriol Rijken

OMAE2013-11387 ................................................................. V001T01A068
A Methodology for Calculating Wave Crest Enhancement in Extreme Seas
Bruce Martin and Oriol Rijken

OMAE2013-11391 ................................................................. V001T01A069
Procedure to Obtain Added Mass in Ships From Natural Frequencies Measured in Hull Vertical Vibration Full Scale Tests
Luiza de Mesquita Ortiz, Severino Fonseca da Silva Neto, and Sergio Hamilton Sphaier
OMAE2013-11392 ................................................................. V001T01A070
Experimental Validation of a New Shallow Water CALM Buoy Design
  A. Neil Williams and Williams G. McDougal

OMAE2013-11407 ................................................................. V001T01A071
Wave Drift Forces and Responses in Current
  Carl Trygve Stansberg, Jan Roger Hoff, Elin Marita Hermundstad, and Rolf Baarholm

OMAE2013-11409 ................................................................. V001T01A072
Wave-in-Deck Loads for an Intricate Pile-Supported Pier and Variation With Deck Clearance
  Andrew Cornett, David Anglin, and Trevor Elliott

OMAE2013-11412 ................................................................. V001T01A073
Module and Vessel Interaction Analysis for Module Ocean Transportation
  Zhonghui Liu, Xin Hai, Andy Ji, Chun Liang, and Yinguo Cheng

OMAE2013-11433 ................................................................. V001T01A074
Performance Comparison Between Linear and Nonlinear Controllers for a Dynamic Positioning System
  Helio Mitio Morishita, Lázaro Moratelli, Jr., and Rodrigo Santos Martinez

OMAE2013-11441 ................................................................. V001T01A075
A Possible Failure Mode for Leeward Mooring Lines on a Floating Storage Unit
  Vegard Aksnes, Terje Nybø, and Halvor Lie

OMAE2013-11450 ................................................................. V001T01A076
Hydrodynamic Issues of FLNG Systems
  Xiao-Bo Chen, Louis Diebold, and Guillaume de-Hauteclocque

OMAE2013-11460 ................................................................. V001T01A077
Increasing Water Depth Window for Moored Subsea Structures and Operations With Low Weight Hybrid Ropes
  Xavier Amils, Beste Durmus, Paul Smeets, Jorn Boesten, and Peter Davies

OMAE2013-11467 ................................................................. V001T01A078
Dynamics of Entrapped Water in Large Diameter Turret Moonpools
  Igor de Vries, Yann Roux, Mamoun Naciri, and Guillaume Bonnaffoux

OMAE2013-11468 ................................................................. V001T01A079
TLP Survivability Against Progressive Failure of Tendon and Foundation Systems in Offshore Western Australian Harsh Environment
  Alaa M. Mansour, Brian J. Gordon, Qi Ling, and Qiang Shen

OMAE2013-11471 ................................................................. V001T01A080
A Study on an Active Hybrid Decomposed Mooring System for Model Testing in Ocean Basin for Offshore Platforms
  Yusong Cao and Galin Tahchiev

OMAE2013-11585 ................................................................. V001T01A081
Towards a Different View on Ship Design: The Development of Ships Observed Through a Social-Technological Perspective
  Ties van Bruinessen, Hans Hopman, and Frido Smulders
Introduction to Offshore Platform Global Weight Management Database Program
Lixin Xu, Qin Tu, and Joe Zhou

A Frequency-Domain, Finite-Order Representation of a Catenary Riser's Dominant Nonlinear Dynamics
Dimitris C. Kazangas, Nikolaos I. Xiros, and Ioannis K. Chatjigeorgiou
