CONTENTS

PIPELINE AND RISER TECHNOLOGY

OMAE2013-10010 ................................................................. V04AT04A001
Reliability Based Deep Water Spool Piece Design
   Naresh Juluri, Elie Dib, Sherif El-Gebaly, and Philip Cooper

OMAE2013-10028 ................................................................. V04AT04A002
Tracking of Buoyancy Flux of Underwater Plumes for Identification: Close Visual Inspection and Repair of Leaking Underwater Pipelines in Muddy Waters
   Jasper A. Agbakwuru, Ove T. Gudmestad, John Groenli, and Helge Skjæveland

OMAE2013-10054 ................................................................. V04AT04A003
Experimental Analysis and Modelling of the Thermomechanical Behaviour of Field Joint of Thermally Insulated Pipeline
   V. T. Phan, J. Y. Cognard, and D. Choqueuse

OMAE2013-10056 ................................................................. V04AT04A004
Friction, Contact Pressure and Non-Linear Behavior of Steel Tubes in Subsea Umbilicals
   Farzan Parsinejad, Chris Kassner, Mark Kurtz, and Naiquan Ye

OMAE2013-10057 ................................................................. V04AT04A005
Challenging Design Confronted in a Deepwater/HPHT PiP Tie-Back Flowline System
   Jason Sun, Sandra Jakl, and Han Shi

OMAE2013-10069 ................................................................. V04AT04A006
Real-Time Finite Element Analysis of a Remotely Operated Pipeline Repair System
   Dean M. Steinke, Ryan S. Nicoll, and André R. Roy

OMAE2013-10070 ................................................................. V04AT04A007
Anchoring Strategy Suggested for the Mitigation of Pipeline Walking
   Adriano Castelo, Nelson Szilard Galgoul, Luciano Tardelli, and Douglas Barros

OMAE2013-10090 ................................................................. V04AT04A008
Tension Loss of Hydro-Pneumatic Riser Tensioners
   Songcheng Li, Mike Campbell, Hugh Howells, and John Orsak

OMAE2013-10093 ................................................................. V04AT04A009
Design Challenges of Gas Export Pipelines for Pre-Salt Area Offshore Brazil
   Rafael F. Solano, Fábio B. de Azevedo, and Eduardo Oazen

OMAE2013-10106 ................................................................. V04AT04A010
Lateral Buckling Behaviour of Snake-Lay Pipeline With Vertical Support at Crown
   N. Raveendra Reddy

OMAE2013-10107 ................................................................. V04AT04A011
Optimisation of Steel Catenary Risers
   Per Erlend Voie and Nils Sødahl
Stress Concentration Factors of Dented Rigid Risers
Bianca Pinheiro, Ilson Pasqualino, and Nathália de Azevedo

Shear Interaction and Transverse Buckling of Tensile Armours in Flexible Pipes
Svein Sævik and Henan Li

Reliability of Buckle Formation Accounting for Bathymetry
Philippe Brunet and John Oliphant

Collapse and Buckle Propagation of Sandwich Pipes: A Review
Chen An, Menglan Duan, and Segen F. Estefen

Flow Assurance With Water Heated Pipe-in-Pipe in Fields With High Gas Oil Ratio and High Wax Appearance Temperature
Leandro P. Basílio, Fabiano G. Drumond, Pedro L. F. Mendes, Alessandro França, Marcilio P. Prado, and Jonatas Ribeiro

Influence of Axial Boundary Conditions on Free Spanning Pipeline Natural Frequencies
Gareth L. Forbes and Ahmed M. Reda

Global Buckling of a Pre-Pressurized Flexible Flowline
Zhengmao Yang and Daniel Karunakaran

Comparison of Applicable Codes and Standards for Design of End Bulkheads of Pipe-in-Pipe Systems
Soheil Manouchehri and Jason Potter

Safety Factors Calibration for Wall Thickness Design of Ultra Deepwater Pipelines
Eduardo Oazen, Bruno R. Antunes, Carlos O. Cardoso, and Rafael F. Solano

Safety Factor for Use in the Fatigue Crack Growth Assessment of Pipeline Weld Integrity and Engineering Critical Assessments
T. Sriskandarajah, Daowu Zhou, George Hobbs, and Graeme Roberts

Effective Full-History Finite Element Modelling of Pipe-in-Pipe Flowline System: From Installation to Operation
Facheng Wang, Zhigang Liu, and Xinshuai Liu

The Dynamic Response Induced by the Random Heave of Platform and Vortex for TTRs
Yougang Tang, Liyuan Wang, Yangqing Li, and Zhongbai Liu
Carcass Failures in Multilayer PVDF Risers
  Knut-Aril Farnes, Claus Kristensen, Steinar Kristoffersen, Jan Muren, and Nils Sødahl

Approach to Lateral Buckling and On-Bottom Stability Interaction Assessment
  Benjamin Anderson, Edwin Shim, Hammam Zeitoun, and Eu Jeen Chin

DCV Aegir Pipelay Installation Analyses and Capabilities
  Henk Smienk, Erwan Karjadi, Gabriel Vazquez, Peter Doherty, and Patrick Dooley

Investigation on the Burst Strength Capacity of Aging Subsea Gas Pipeline
  Dong Woo Kim, Mohd Hairil Mohd, Byeong Joon Lee, Do Kyun Kim, Jung Kwan Seo,
  Bong Ju Kim, and Jeom Kee Paik

Lazy Wave Catenary Risers: Scaling Factors and Analytical Approximation of the Static Stress Range in the Touchdown Zone
  Lucile M. Quéau, Mehrdad Kimiaei, and Mark F. Randolph

Strength and Deformation Capacity of Corroded Pipes: The Joint Industry Project
  Erik Levold, Andrea Restelli, Lorenzo Marchionni, Caterina Molinari, and Luigino Vitali

Finite Element Modeling of Flexible Pipes Under Crushing Loads
  Eduardo Ribeiro Malta, Clóvis de Arruda Martins, Silas Henrique Gonçalves, and
  Alfredo Gay Neto

Strain Based Design: Crossing of Local Features in Arctic Environment
  Lorenzo Bartolini, Roberto Bruschi, Maurizio Spinazzè, Enrico Torselletti, and Luigino Vitali

Development on Aegir Reeling Pipeline Analyses by Test Validation
  Erwan Karjadi, Helen Boyd, Reinout van Rooijen, Harm Demmink, and Thomas Balder

Top Tensioned Riser System Design for the FHSB Dry Tree Semisubmersible Platforms
  Jim Yu, Alaa M. Mansour, Alan Yu, and Ricardo Zuccolo

The Research on Bulk System Transfer Ability of CPOE-16 Jack-Up
  Ji Zeng, Gang Chen, Kuichen Zhu, Jian Mo, and Chenfeng Li

On the Predication of Pipeline As-Laid Embedment Using a Cycle-by-Cycle Approach for Deepwater Application
  Jie Sun, Gwo-Ang Chang, and Xiang Liu
OMAE2013-10490 Simulation of Hooking Event in Fish Trawling Operation
Xiaopeng Wu, Vegard Longva, Svein Sævik, and Torgeir Moan

OMAE2013-10498 Sensitivity Analysis of Buoyancy Modules Parameters of Lazy-Wave Flexible Riser
Hua Sun and De-yu Wang

OMAE2013-10521 An Overview of Theories Describing Head Losses in Slurry Transport: A Tribute to Some of the Early Researchers
Sape A. Miedema

OMAE2013-10523 Assessment of Effective Stiffness Formulation of Concrete Coated Rigid Pipeline
Joe-Joe Chellakat Satyaraj, Manoj John, Vinod Puthiyaparambath, and Senthilkumar Durairaj

OMAE2013-10554 Drilling Riser Analysis During Installation of a Wellhead Equipment
Lucas C. Sevillano, Celso K. Morooka, Jose Ricardo P. Mendes, and Kazuo Miura

OMAE2013-10555 Finite Element Method Simulating the Pipeline Mechanical Response During Reel-Lay Installation
Ali A. Dawood and S. Kenny

OMAE2013-10556 Development of a Fatigue Life Assessment Tool for Pipelines With Local Wrinkles
F. Bakhtyar and S. Kenny

OMAE2013-10574 Engineering Critical Assessment in Sour Service by Fracture and Fatigue Small Scale Sour Testing
Jun Nakamura, Nobuyuki Hisamune, Tetsuya Fukuba, Colin Stuart Scott, Ramgopal Thodla, and Feng Gui

OMAE2013-10577 A Model Experiment of a Free Standing Riser in the Deep-Sea Basin
Marcio Yamamoto, Sotaro Masanobu, Satoru Takano, Shigeo Kanada, Tomo Fujiwara, and Takayuki Asanuma

OMAE2013-10585 Lateral Buckling Response of Subsea HTHP Pipelines Using Finite Element Methods
M. Masood Haq and S. Kenny

OMAE2013-10604 Reassessment of Dynamically Stable Pipelines Accounting for Potential Clashing With New Assets
Daniel Carneiro, Sabine Powell, David Timmins, and Pier Bruzzo

OMAE2013-10621 Further Development and Benchmarking of a Novel Pipe-Soil Interaction Model for Subsea Pipeline Design
Terry Griffiths and Wenwen Shen
