# TABLE OF CONTENTS

- Information Systems Challenges for through-life Engineering .................................................. 1  
  C. McMahon, A. Ball

- Sustainable Service System for Machine Tools ................................................................. 8  
  M. Mori, M. Fujishima

- Design for Obsolescence Risk Management ................................................................. 15  
  P. Sandborn

- Maintenance-centered Circular Manufacturing ............................................................... 23  
  S. Takata

- Modeling of Decision Making Process for Product Service Failure Diagnosis ......................... 32  
  A. Pal, D. Ceglarek

- Multi-step Functional Process Adjustments to Reduce No-fault-found Product Failures in Service  Caused by In-tolerance Faults ................................................................. 38  
  P. Prakash, D. Ceglarek

- Root Cause Analysis of Product Service Failure Using Computer Experimentation Technique ...... 44  
  C. Shrouti, P. Franciosa, D. Ceglarek

- Through-life Data Exploitation to Reduce Downtime and Costs ...................................... 50  
  G. Huby, J. Cockram, M. Fleming

- Failure Mechanisms of Radar and RF Systems .............................................................. 56  
  A. Wileman, S. Perinpanayagam

- Improving Maintenance Activities by the Usage of BOL Data ......................................... 62  
  M. Franke, K. Hribernik, K. Thoben, C. Hans

- Model-based Intermittent Fault Detection ................................................................. 68  
  T. Sedighi, P. Phillips, P. Foote

- Intermittent Fault Finding Strategies .......................................................... 74  
  W. Syed, S. Khan, P. Phillips, S. Perinpanayagam

- The Contribution of Test and Analysis to the No Fault Found (NFF) Issue within the UK MOD .... 80  
  V. Fedrick, P. Phillips, C. Hockley

- Win-win Collaboration, Functional Product Challenges and Value-chain Delivery: A Case Study Approach .......................................................... 86  
  V. Parida, D. Ronnberg-Sjodin, J. Wince!, H. Ylinenpaa

- Naval Surface Ship In-service Information Exploitation .............................................. 92  
  G. Ford, C. McMahon, C. Rowley

- Key Performance Indicators for Assessing the Planning and Delivery of Industrial Services .......... 99  
  H. Meier, H. Logemann, F. Morlock, C. Rathmann

- Maintenance Service Support System (MS3) – Work in Progress .................................. 105  
  E. Uhlmann, F. Otto

- Flexible Implementation of IPS2 through a Service-based Automation Approach .................. 108  
  E. Uhlmann, N. Raue, C. Gabriel

- Application of TRIZ to Develop an In-service Diagnostic System for a Synchronous Belt Transmission for Automotive Application ........................................ 114  
  M. Jupp, I. Campean, J. Tracenska

- Extending ANEMONA with NDT Phases .......................................................... 120  
  A. Giret, M. Salido

- Development of a Thermographic NDI System for Service Damage Identification in Inaccessible Areas .......................................................... 124  
  V. Guillebert, E. Nyingifa, D. Frangolho, C. Loureiro, A. Sporen, L. Tinsley, A. Shaw, L. Redding, R. Roy

- Data Mining and Knowledge Reuse for the Initial Systems Design and Manufacturing: Aero-engine Service Risk Drivers ........................................ 130  
  N. Moran, R. Roy, J. Mehnen, L. Redding, A. Harrison

- Application of Remote Condition Monitoring in Different Rolling Stock Life Cycle Phases .... 135  
  I. Ceng, L. Dongen

- Friction Stir Welding of Al Alloys: Analysis of Processing Parameters Affecting Mechanical Behavior .................................................. 139  
  P. Cavaliere

- A Framework for Producibility and Design for Manufacturing Requirements in a System Engineering Context ........................................ 145  
  J. Vallhagen, O. Isaksson, R. Soderberg, K. Warmefjord
An Approach for Producibility and DFM-methodology in Aerospace Engine Component Development .............................. 151
J. Vallhagen, J. Madrid, R. Soderberg, K. Warmejjord

Simulation-driven Mobility Function Development .................................................. 157
J. Pavasson, M. Karlberg, R. Maki

Remanufacturing Network Design Modeling: A Case of Diesel Particulate Filter ............. 163
G. Kizilboga, G. Mandil, M. Genevois, P. Zwolinski

Configuration Management Process Capabilities ................................................. 169
U. Ali, C. Kidd

Configuration Management in Complex Engineering Projects .................................. 173
C. Lindkvist, A. Stasis, J. Whyte

A Critical Examination of Change Control Processes ........................................... 177
A. Stasis, J. Whyte, R. Dentten

Configuration Management in Aerospace Industry .............................................. 183
Y. Xu, M. Malissetty, M. Round

Configuration Management – A Core Competence for Successful through-life Systems Engineering and Engineering Services .......................................................... 187
P. Muller

Continuous Improvement on Information and On-line Maintenance Technologies for Increased Cost-effectiveness ......................................................... 193
A. Arnaiz, E. Konde, J. Alarcon

Investigating Maintenance Decisions during Initial Fielding of Rolling Stock ............... 199
J. Pugi, R. Basten, L. Dongen

Work in Progress: Developing Tools that Support the Design of Easily Maintainable Rolling Stock ............................................................. 204
W. Mulder, R. Basten, J. Becker, L. Dongen

Planning to Extend the Life of Major Assets ...................................................... 207
M. Norris

Warrior Vehicle Fleet Sustainment Using Intelligent Agent Simulation .................. 213

New Approaches to Through-life Asset Management in the Maritime Industry .... 219
C. Norden, K. Hribernik, Z. Ghrairi, K. Thoben, C. Fuggini

Data Mining and Visualization of Diagnostic Messages for Condition Monitoring .... 225
E. Uhlmann, C. Geisert, E. Hohwieler, J. Altmann

Computer Vision Analysis of 3D Scanned Circuit Boards for Functional Testing and Redesign .................................................................................. 229
H. Grosser, B. Beckmann-Dobrev, F. Politz, R. Stark

Applicability of Industrial Robots for Machining and Repair Processes ................. 234
E. Uhlmann, F. Heitmueller, M. Manthei, S. Reinkober

MRO – Challenge and Chance for Sustainable Enterprises .................................. 239
E. Uhlmann, M. Biec, J. Baumgarten

Design of Experiments for Laser Metal Deposition in Maintenance, Repair and Overhaul Applications ................................................................. 245
B. Graf, S. Ammer, A. Gumenyuk, M. Rethmeier

Through-life Engineering for Nuclear Plant ......................................................... 249
J. Matthews, N. Irvine, D. McMaster

Cellular Manufacturing Applications in MRO Operations .................................. 254
P. McLaughlin, I. Durazo-Cardenas

Through-life Management of Electric Vehicles ................................................... 260
M. Knowles

Prognostic Health Management of a RF Transceiver Chain ................................ 266
A. Wileman, S. Perinpanayagam

A Through-life Approach to Developing High-performance Microsystems ................ 272
J. Alcock, U. Attia

Integrating Allowable Design Strains in Composites with Whole Life Value .............. 278
M. Price, A. Murphy, J. Butterfield, B. Falcon, D. Quinn

Wind Turbine Maintenance and Topical Research Questions ................................ 284
C. Hockley

Review of Condition Monitoring and Fault Diagnosis Technologies for Wind Turbine Gearbox ......................................................... 287
M. Nie, L. Wang

Real-time Monitoring of Wind Turbine Generator Shaft Alignment Using Laser Measurement ................................................................. 291
O. Mankovski, Q. Wang

Risk Based Maintenance for Offshore Wind Structures .................................. 296
F. Brennan
A Possible Relation between Wind Conditions, Advanced Control and Early Gearbox Failures in Offshore Wind Turbines
G. Bussel, C. Bousison, C. Hofemann

Optimal Design Methodology for On-shore Hydraulic Pipelines Transporting Spherical Capsules
T. Asim, R. Mishra, A. Paris, K. Zala

Performance of a Vertical Axis Wind Turbine under Accelerating and Decelerating Flows
A. Shahzad, T. Asim, R. Mishra, A. Paris

Particle Size Effects on Optimal Sizing and Lifetime of Pipelines Transporting Multi-sized Solid-Liquid Mixtures
L. Kollar, R. Mishra, T. Asim

Computational Fluid Dynamics Based Optimal Design of Vertical Axis Marine Current Turbines
T. Asim, R. Mishra, K. Ubbi, K. Zala

Early Assessment of Defects and Damage in Jet Engines
R. Adamczuk, J. Seume

Applied Repairable-item Inventory Modeling in the Aviation Industry
K. Tracht, F. Hagen, D. Schneider

Risks for Functional Products – Empirical Insights from Two Swedish Manufacturing Companies
W. Reim, P. Varida, J. Lindstrom

Integration of Virtualized Environments in PDM Systems for Embedded Software Product Development
M. Hopf, J. Ovtcharova

Configurable Obsolescence Mitigation Methodologies
A. Baker

Disassembly Matrix for Liquid Crystal Displays Televisions
G. Jin, W. Li, K. Xia

Creating a Self-configuring Finite State Machine out of Memory Look-up Tables
P. Schiefer, R. McWilliam, A. Purvis

Maintenance Task Classification: Towards Automated Robotic Maintenance for Industry
H. Akrout, D. Anson, G. Bianchini, A. Neveur, C. Trinel, M. Farnsworth, T. Tomiyama

Demonstration of a Self-recovering ALU Using a Convergent Cellular Automata
R. McWilliam, P. Schiefer, A. Purvis

Simulation of High Precision Process Control for Set-up Dominant Processes
S. Cox, J. Garside, A. Kotsialos

Theoretical Design of a Self-rectifying 4-bar Linkage Mechanism
C. Bell, M. Farnsworth, A. Tiwari, R. Dorey

Using Memristors to Handle Cell Failures in Flexible Networks: From Programmed Cell Death to Zombies
O. Matthews, I. Georgilas, E. Gale

Evolvable Embryonics: 2-in-1 Approach to Self-healing Systems
E. Benkhelifa, A. Pipe, A. Tiwari

Uncellular Self-healing Electronic Array
M. Samie, G. Dragffy, T. Pipe, S. Perinpanayagam

Human Role in Industrial Installed Base Information Gathering
J. Ramanen, K. Mahlamaki, J. Borgman, M. Nieminen

Where the Knowledge Goes? Information Gathering and Managing Practices in a Global Technical Support Center
P. Manninen, V. Holta

Understanding the Aspects of Collecting Base Information in Manufacturing Context – Towards a Future Research Agenda
S. Luoto

Service Support System Modelling Language for Simulation-driven Development of Functional Products
S. Reed, M. Lofstrand, L. Karlsson, J. Andrews

Through-Life Systems Engineering Design & Support with SysML
S. Chandler, P. Matthews

A SPAR Modelling Platform Case Study: Skynet 5
I. Davison, I. Miles
