

CELEBRATING THE MEGASCALE

Proceedings of the Extraction and Processing
Division Symposium on Pyrometallurgy
in Honor of David G.C. Robertson

*Proceedings of a symposium sponsored by
the Extraction and Processing Division of
The Minerals, Metals & Materials Society (TMS)*

held during

TMS2014
143rd Annual Meeting & Exhibition

*February 16-20, 2014
San Diego Convention Center
San Diego, California, USA*

Edited by:

**Phillip J. Mackey | Eric J. Grimsey
Rodney T. Jones | Geoffrey A. Brooks**

TABLE OF CONTENTS

Celebrating the Megасcale: Proceedings of the Extraction and Processing Division Symposium on Pyrometallurgy in Honor of David G.C. Robertson

Preface	xiii
About the Editors	xv
About the Organizers	xix
Technical Reviewers	xxi
Session Chairs	xxiii

Keynote Session

David Gordon Campbell Robertson: A Biographical Sketch	3
<i>J. See</i>	
Evolution of the Large Copper Smelter - 1800s to 2013	17
<i>P. Mackey</i>	
Evolution of the Mega-Scale in Ferro-Alloy Electric Furnace Smelting	39
<i>L. Nelson</i>	
From Sulfide Flash Smelting to a Novel Flash Ironmaking Technology	69
<i>H. Sohn</i>	
Fostering Minerals Workforce Skills of Tomorrow through Education and Training Partnerships	77
<i>G. Lind</i>	
Modeling of Ladle Metallurgy in Steelmaking	85
<i>G. Irons, K. Krishnapisharody, and K. Graham</i>	

Process Metallurgy an Enabler of Resource Efficiency: Linking Product Design to Metallurgy in Product Centric Recycling93
M. Reuter and A. van Schaik

Horizontal Single Belt Casting (HSBC) of Ca-Based, Bulk Metallic Glass (BMG) Strips 105
R. Guthrie, M. Isac, D. Li, and L. Calzado

Ferro-Alloys

Developments in Manganese Ferroalloy Research and Production in the Last 25 Years 121
M. Tangstad and R. Tronstad

DC Arc Furnaces - Past, Present, and Future..... 129
R. Jones

Recent Developments in FactSage Thermochemical Software and Databases 141
C. Bale, E. Béliste, P. Chartrand, S. Decterov, G. Eriksson, A. Gheribi, K. Hack, I. Jung, J. Melançon, A. Pelton, S. Peterson, and C. Robelin

Reduction of Agglomerated Manganese Ores in a 150 kW Pilot Scale Furnace..... 149
M. Tangstad, T. Brynjulfsen, and E. Ringdalen

Arc Detection in DC Arc Furnaces..... 157
Q. Reynolds, C. Hockaday, D. Jordan, and I. Barker

An Electromagnetically Stirred Slurry Model for the Smelting Zone of a Ferroalloy Furnace..... 169
B. Bowman

Roles of Mn Carbides in Carbothermic Processes for Mn Alloys 179
B. Lee, H. Shin, and Y. Lee

Non-Ferrous Smelting, Converting, and Refining

Redoubling Platinum Group Metal Smelting Intensity - Operational Challenges and Solutions..... 189
R. Hundermark, L. Nelson, B. de Villiers, J. Ndlovu, D. Mokwena, P. Mukumbe, B. Pieterse, W. Seyanund, and P. van Manen

Pyrometallurgical Processing Technologies for Treating High Arsenic Copper Concentrates.....	197
<i>P. Taylor and T. Putra</i>	
Arsenic and Antimony Capacities in Ni-Cu Mattes and Slags	213
<i>R. Reddy and J. Font</i>	
Quartz-Cristobalite Transformation and Its Effect on Reactions in Si Production: Initial Studies	225
<i>E. Ringdalen, D. Adisty, and L. Kolbeinsen</i>	
Modifications to a Smelter to Accommodate Recycled Materials.....	237
<i>G. Roset, D. Flynn, and K. Schumacher</i>	
Removal of Pb from Molten Copper by Fe_2O-SiO_2 (-CaO, Al_2O_3) Slag Treatment in Mitsubishi Process.....	243
<i>S. Park and J. Park</i>	
Simulation of the Gas Flow in a Peirce-Smith Converter.....	251
<i>W. Silva, B. Ribeiro, and F. Elias</i>	
From Phase Equilibrium and Thermodynamic Modeling to Freeze Linings – The Development of Techniques for the Analysis of Complex Slag Systems.....	259
<i>A. Mehrjardi, P. Hayes, and E. Jak</i>	
Modelling Simulation and Comparison of Refractory Corrosion at RHI's Technology Center.....	267
<i>D. Gregurek, A. Ressler, A. Franzkowiak, and A. Spanring</i>	

Iron and Steel Production

Sustainability in Ironmaking: The Rise of Direct Reduction.....	277
<i>T. Battle</i>	
Kinetics of Reaction Important in Oxygen Steelmaking	289
<i>K. Coley, E. Chen, and M. Pomeroy</i>	
Current Status and Future Direction of Low-Emission Integrated Steelmaking Process	303
<i>S. Jahanshahi, A. Deev, N. Haque, L. Lu, J. Mathieson, T. Norgate, Y. Pan, P. Ridgeway, H. Rogers, M. Somerville, D. Xie, and P. Zulli</i>	

Analysis of Steelmaking Reactions by Coupled Reaction Model.....317
S. Kitamura

Cold Modelling of Splashing Phenomena in Oxygen Steelmaking.....325
S. Sabah and G. Brooks

Lean Operations Strategy to Combat Uncertainties in Temperature at BOF
 End Point, Tapping, Deoxidation, Alloy Addition and Thermal History333
I. Shukla, G. Rajesh, P. Agarwal, A. Shukla, and D. Philip

Ladle Metallurgy Kinetics: Inclusion-Inclusion Reactions.....341
P. Pistorius

Valorization of Electrical Arc Furnace Oxidizing Slag347
J. Lee, S. An, M. Shin, and K. Sim

Process Modeling and Simulation

Computational Modelling of Metallurgical Processes: Achievements
 and Challenges.....359
M. Cross, D. McBride, and N. Croft

Metallurgical Plant Optimization through the Use of Flowsheet Simulation
 Modelling.....367
M. Kennedy

ChemSheet as a Simulation Platform for Pyrometallurgical Processes377
K. Penttilä, J. Salminen, N. Tripathi, and P. Koukkari

A Computational Fluid Dynamic Model for a Novel Flash
 Ironmaking Process385
S. Perez-Fontes, H. Sohn, and M. Olivas-Martinez

Application of the Combined Reactors Method for Analysis of Steelmaking
 Process393
S. Lekakh and D. Robertson

Modelling of Slag Foaming Coupled with Decarburisation401
M. Sattar, J. Naser, and G. Brooks

A Methodology for Modeling Electromagnetic Confinement Systems:
 Application to Levitation Melting409
N. El-Kaddah and T. Natarajan

Electrochemical Characterization and Modeling of a Solid Oxide Membrane-Based Electrolyzer for Production of Magnesium and Oxygen	417
<i>X. Guan, U. Pal, S. Gopalan, and A. Powell</i>	
Phenomenological Models and Animations of Welding and Their Impact	425
<i>T. DebRoy</i>	

Metallurgical Education

Current and Suggested Focus on Sustainability in Pyrometallurgy	429
<i>J. See, D. Robertson, and P. Mackey</i>	
Teaching Process Simulation in Eleven Easy Lessons Using Excel and Its Tools	447
<i>A. Morris</i>	
Enhancement of Pyrometallurgical Teaching Using Excel Simulation Models	455
<i>E. Grimsey</i>	
The Engineering Design Sequence and Materials Development: 990 Gold-Titanium as a Case Study.....	465
<i>M. Schlesinger</i>	
The Challenges for Professional Metallurgical Education.....	473
<i>B. Hannah and P. Hayes</i>	
Sustainability Education for Minerals and Materials Industry Professionals ...	481
<i>W. Rankin</i>	
Delivering a National Process Design Unit with Industry Support	489
<i>D. Ibana</i>	
The MetSkill Program - Rapidly Developing Effective Young Engineers in the Workplace.....	499
<i>D. Drinkwater and N. Bianco</i>	

Pyrometallurgy Process Fundamentals I

Oxidation of Flash Reduced Iron Particles in Various Gas Mixtures Under the Conditions of a Novel Flash Ironmaking Process	509
<i>Z. Yuan, H. Sohn, and M. Olivas-Martinez</i>	

A New Approach to Investigating Coke Reactivity.....	519
<i>B. Monaghan, R. Longbottom, M. Reid, O. Aladejebi, A. Jayasekara, and M. Panhuis</i>	
The Use of Natural Gas for Reduction of Metal Oxides: Constraints and Prospects.....	529
<i>O. Ostrovski</i>	
Decomposition of Methane during Oxide Reduction with Natural Gas	537
<i>H. Dalaker and P. Tetlie</i>	
Reduction of Mixtures of Ni-Oxide and Ti-Oxide Powder in a Natural Gas Containing Atmosphere	547
<i>C. van der Eijk and K. Tang</i>	
Kinetic and Thermodynamic Analysis of the Reduction of Oxides of Cu and Co in a SiO ₂ -CaO-(Al,Fe) ₂ O ₃ Slag	553
<i>Y. Hara and A. Jha</i>	
Carbothermic Reduction of Ilmenite Concentrate with Coke Assisted by High Energy Ball Milling	563
<i>B. Song, K. Zhang, F. Xi, and X. Lv</i>	

Pyrometallurgy Process Fundamentals II

Electricity-Independent Generation of Silicon Based on the Use of Rice Husk: A Concept Process	575
<i>M. Barati</i>	
Electrically Enhanced Metal Purification Using Slag.....	587
<i>M. Islam, M. Rhamdhani, and G. Brooks</i>	
Crystallization Behavior of Molten Blast Furnace Slag Using Confocal Scanning Laser Microscope.....	597
<i>L. Lu, H. Meilong, and B. Chenguang</i>	
Viscosity-Structure Relationship in the CaO-SiO ₂ -MnO-CaF ₂ Slag for the Production of Manganese Ferroalloys	605
<i>J. Park and K. Ko</i>	
Recovery of Vanadium from a High Ca/V Ratio Vanadium Slag Using Sodium Roasting and Ammonia Leaching	613
<i>S. Xu, M. Long, D. Chen, H. Fan, Y. Chen, and X. Sun</i>	

Sintering Process for Limonitic Nickel Laterite	623
<i>E. Guo, M. Liu, C. Pan, Q. Yuan, and X. Lv</i>	

Pyrometallurgy Process Fundamentals III

Development of a Thermodynamic Database for Mold Flux Applications to the Continuous Casting Process for Steelmaking	633
<i>M. Van Ende and I. Jung</i>	

Thermodynamic Optimization of Mn-Si-C System	641
<i>M. Paek, Y. Kang, and J. Pak</i>	

Removal of Non-Metallic Inclusions from Molten Steel Using a High Frequency Magnetic Field	651
<i>S. Wang, L. Zhang, and Y. Tian</i>	

Fluid Flow, Alloy Dispersion and Inclusion Motion in Argon-Stirred Steel Ladles	659
<i>Y. Li, L. Zhang, and Y. Ren</i>	

Poster Session

Nitrogen Solubility in Liquid Mn-Fe-Si-C Alloys	669
<i>J. Eom, J. Jang, M. Paek, and J. Pak</i>	

Study of Dezincification and De-Lead of Blast Furnace Dust by Fluidized Reduction Experiment	675
<i>S. Yang, C. Liu, X. Gao, and J. Li</i>
