CONTENTS

OCEAN RENEWABLE ENERGY

OMAE2013-10020 ................................................................. V008T09A001
Empirical Demonstration of Acausal Control Strategies for Wave Energy Converters
James Eder, James Brett, and Kathleen Edwards

OMAE2013-10078 ................................................................. V008T09A002
Ocean Power Generator Using Flexible Piezoelectric Device
Hidemi Mutsuda, Ryuta Watanabe, Shota Azuma, Yoshikazu Tanaka, and Yasuaki Doi

OMAE2013-10120 ................................................................. V008T09A003
Hydrodynamic Modeling of Tension Leg Platform Wind Turbines
Erin E. Bachynski and Torgeir Moan

OMAE2013-10122 ................................................................. V008T09A004
Design and Testing of Scale Model Wind Turbines for Use in Wind/Wave Basin Model Tests of Floating Offshore Wind Turbines
Matthew J. Fowler, Richard W. Kimball, Dale A. Thomas, III, and Andrew J. Goupee

OMAE2013-10151 ................................................................. V008T09A005
Investigation to Air Compressibility of Oscillating Water Column Wave Energy Converters
Wanan Sheng, Florent Thiebaut, Marie Babuchon, Joseph Brooks, Anthony Lewis, and Raymond Alcorn

OMAE2013-10156 ................................................................. V008T09A006
Joint Environmental Data at Five European Offshore Sites for Design of Combined Wind and Wave Energy Devices
Lin Li, Zhen Gao, and Torgeir Moan

OMAE2013-10183 ................................................................. V008T09A007
Wave Energy Estimation in Four Italian Nearshore Areas
Valentina Vannucchi and Lorenzo Cappietti

OMAE2013-10188 ................................................................. V008T09A008
Wave Power Extraction by an Oscillating Wave Surge Converter in Random Seas
Dripta Sarkar, Emiliano Renzi, and Frederic Dias

OMAE2013-10191 ................................................................. V008T09A009
Micrositing Optimization of the Block Island Wind Farm, RI, USA
Christopher M. O’Reilly, Annette R. Grilli, and Gopu R. Potty

OMAE2013-10207 ................................................................. V008T09A010
The Efficiency of Tidal Fences: A Brief Review and Further Discussion on the Effect of Wake Mixing
Takafumi Nishino and Richard H. J. Willden

OMAE2013-10214 ................................................................. V008T09A011
Effect of Shut-Down Procedures on the Dynamic Responses of a Spar-Type Floating Wind Turbine
Zhiyu Jiang, Torgeir Moan, Zhen Gao, and Madjid Karimirad
Modelling and Analysis of a Semi-Submersible Wind Turbine With a Central Tower With Emphasis on the Brace System
Chenyu Luan, Zhen Gao, and Torgeir Moan

Point Absorber Design for a Combined Wind and Wave Energy Converter on a Tension-Leg Support Structure
Erin E. Bachynski and Torgeir Moan

Development of an Analysis Code of Rotor-Floater Coupled Response of a Floating Offshore Wind Turbine
Hideyuki Suzuki, Hajime Shibata, Hiroyuki Fujioka, Shinichiro Hirabayashi, Kimiko Ishii, and Hiroki Kikuchi

Influence of Wave Induced Second-Order Forces in Semi-Submersible FOWT Mooring Design
Carlos López-Pavón, Rafael A. Watai, Felipe Ruggeri, Alexandre N. Simos, and Antonio Souto-Iglesias

Motion of OC4 5MW Semi-Submersible Offshore Wind Turbine in Irregular Waves
Hyunkyoung Shin, Byungcheol Kim, Pham Thanh Dam, and Kwangjin Jung

Dynamic Analysis of Offshore Monopile Wind Turbine Including the Effects of Wind-Wave Loading and Soil Properties
Muk Chen Ong, Hui Li, Bernt J. Leira, and Dag Myrhaug

Model Test of the Aker Wave Energy Converter Concept
Svein Ersdal and Anders M. Moe

Verification of Engineering Modeling Tools for Floating Offshore Wind Turbines
Tiago Duarte, David Tomas, Denis Matha, António Sarmento, and Frieder Schuon

Dynamic Response Analysis of a Floating Offshore Wind Turbine During Severe Typhoon Event
Tomoaki Utsunomiya, Iku Sato, Shigeo Yoshida, Hiroshi Ookubo, and Shigesuke Ishida

An Integrated Approach for the Representation of Concrete Gravity Based Foundations for Offshore Wind Turbines
Maxime Philippe, Bruno Borgarino, Panagiotis Kotronis, and Guillaume Ducrozet

Experimental Study for SPAR Type Floating Offshore Wind Turbine With Blade Pitch-Angle Control
Toshiki Chujo, Yoshimasa Minami, Tadashi Nimura, and Shigesuke Ishida
At-Sea Experiment of a Hybrid SPAR Type Offshore Wind Turbine
Shigesuke Ishida, Kentaroh Kokubun, Tadashi Nimura, Tomoaki Utsunomiya, Iku Sato, and Shigeo Yoshida

A Low Motion Floating Platform for Offshore Wind Resource Assessment Using Lidars
Rachel Nicholls-Lee

Development of an Economic and Efficient Installation Vessel for Tidal Stream Energy Converter Arrays
Rachel Nicholls-Lee, Simon Hindley, and Richard Parkinson

Coupled Multi-Phase CFD and Transient Mooring Analysis of the Floating Wave Energy Converter OWEL
Rachel Nicholls-Lee, Adam Walker, Simon Hindley, and Richard Argall

Metocean Data Acquisition, and Live Transmission, for Tidal Array Sites
Rachel Nicholls-Lee and Jon Csehi

An Experimental Study of the Hydrodynamic Effects of Marine Growth on Wave Energy Converters
Roxana Tiron, Sarah Gallagher, Kenneth Doherty, Emmanuel G. Reynaud, Frédéric Dias, Fionn Mallon, and Trevor Whittaker

Mike J. Beam, Brian L. Kline, Brian E. Elbing, William Straka, Arnold A. Fontaine, Michael Lawson, Ye Li, Robert Thresher, and Mirko Previsic

An Experimental Investigation of Scale Effects on Offshore Wind Turbine Blades
Chittiappa Muthanna, Jan Hendrik Visscher, and Tale Fjell Egeberg

Random Wave Forces on Monopile Wind Turbine Foundations: A Comparison of Wave Models
Xiang Yuan Zheng

Tonio Sant and Robert N. Farrugia

FloVAWT: Progress on the Development of a Coupled Model of Dynamics for Floating Offshore Vertical Axis Wind Turbines
Maurizio Collu, Michael Borg, Andrew Shires, and F. P. Brennan
Fatigue Analysis of a Wave Energy Converter Taking Into Account Different Control Strategies

Andrew S. Zurkinden, Zhen Gao, Søren Heide Lambertsen, Torgeir Moan, and Lars Damkilde

3D Efficiency Analysis of Cycloidal Wave Energy Converters in Oblique Wave Fields

Casey Fagley, Stefan G. Siegel, Jürgen Seidel, and Christian Schmittner

U-Oscillating Water Column in Random Waves: Modelling and Performances

Giovanni Malara and Felice Arena

OTEC Cold Water Pipe Global Dynamic Design for Ship-Shaped Vessels

Sherry Xiang, Peimin Cao, Richard Erwin, and Steve Kibbee

Installing U-OWC Devices Along Italian Coasts

Felice Arena, Vincenzo Fiamma, Valentina Laface, Giovanni Malara, Alessandra Romolo, Antonino Viviano, Gianmaria Sannino, and Adriana Carillo

Dynamic Excitation of Monopiles by Steep and Breaking Waves: Experimental and Numerical Study

Henrik Bredmose, Peter Slabiak, Lasse Sahlberg-Nielsen, and Flemming Schlütter

Modeling and Experiments on an Oscillating Water Column Using a Self-Adaptive Air Turbine and Shutter

Patrick Lorenz, Richard W. Kimball, Frank DiBella, Richard Smith, and Scott Ring

Numerical Analysis of Offshore Pile Structure for Tidal Current Devise Using FSI Method

Chul-hee Jo, Kang-hee Lee, Yu-ho Rho, and Do-youb Kim

A Feasibility Study on Hybrid Use of Ocean Renewable Energy Resources Around Japan

Tomoki Taniguchi, Shigesuke Ishida, and Yoshimasa Minami

Irregular Nonlinear Wave Simulation and Associated Loads on Offshore Wind Turbines

E. Marino, H. Nguyen, C. Lugni, L. Manuel, and C. Borri

Coordinators Overview and Lessons Learned From the Galway Bay Seatrials of the FP7 EU Funded CORES Wave Energy Project

Raymond Alcorn, Anthony Lewis, and Mark Healy

Weather Window Analysis of Irish and Portuguese Wave Data With Relevance to Operations and Maintenance of Marine Renewables

Michael O’Connor, Tony Lewis, and Gordon Dalton
OMAE2013-11133 ........................................................................................................... V008T09A069
Numerical and Experimental Study on a Floating Platform for Offshore Renewable Energy
Changhong Hu, Makoto Sueyoshi, Chen Liu, Yusaku Kyozuka, and Yuji Ohya

OMAE2013-11140 ........................................................................................................... V008T09A070
On the Response of a Spar Floating Wind Turbine Under the Occurrence of Extreme Events
Vincenzo Nava, Hasan Bagbanci, C. Guedes Soares, and Felice Arena

OMAE2013-11141 ........................................................................................................... V008T09A071
Effects of the Mooring Line Configuration on the Dynamics of a Point Absorber
Vincenzo Nava, Marin Rajic, and Carlos Guedes Soares

OMAE2013-11149 ........................................................................................................... V008T09A072
Preliminary Analysis on Integrated Transportation Technique for Offshore Wind Turbines
Puyang Zhang, Hongyan Ding, Conghuan Le, Siyu Zhang, and Xu Huang

OMAE2013-11174 ........................................................................................................... V008T09A073
Coupling of Two Tools for the Simulation of Floating Wind Turbines
Sébastien Gueydon, Koert Lindenburg, and Feike Savenije

OMAE2013-11177 ........................................................................................................... V008T09A074
Experimentally Calibrated Time-Domain Numerical Model for a Fixed OWC Device
Arantza Iturrioz, Raúl Guanche, José A. Armesto, César Vidal, and Íñigo J. Losada

OMAE2013-11179 ........................................................................................................... V008T09A075
A Surface Ice Module for Wind Turbine Dynamic Response Simulation Using FAST
Bingbin Yu, Dale G. Karr, Huimin Song, and Senu Sirnivas

OMAE2013-11200 ........................................................................................................... V008T09A076
Numerical Simulations for Installation of Offshore Wind Turbine Monopiles Using Floating Vessels
Lin Li, Zhen Gao, and Torgeir Moan

OMAE2013-11213 ........................................................................................................... V008T09A077
Air Turbine and Primary Converter Matching in Spar-Buoy Oscillating Water Column
Wave Energy Device
J. C. C. Henriques, A. F. O. Falcão, R. P. F. Gomes, and L. M. C. Gato

OMAE2013-11247 ........................................................................................................... V008T09A078
Non-Linear Model Predictive Control Applied to a Generic Ocean-Wave Energy Extractor
Nathan Tom and Ronald W. Yeung

OMAE2013-11259 ........................................................................................................... V008T09A079
Conceptual Design of a Single-Point-Moored FOWT and Tank Test for Its Motion Characteristics
K. Iijima, M. Kawai, Y. Nihei, M. Murai, and T. Ikoma

OMAE2013-11261 ........................................................................................................... V008T09A080
Turbine Floater-Tether Coupled Dynamic Analysis Including Second-Order Sum-Frequency Wave Loads for a TLP-Type FOWT (Floating Offshore Wind Turbine)
Y. H. Bae and M. H. Kim

Simulation-Length Requirements in the Loads Analysis of Offshore Floating Wind Turbines
Lorenz Haid, Gordon Stewart, Jason Jonkman, Matthew Lackner, Denis Matha, and
Amy Robertson

Second-Order Random Wave Kinematics and Resulting Loads on a Bottom-Fixed
Slender Monopile
Carl Trygve Stansberg, Andreas Amundsen, Sebastien Fouques, and Ole David Økland

Assessing the Importance of Nonlinearities in the Development of a Substructure Model for the
Wind Turbine CAE Tool FAST
Rick R. Damiani, Huimin Song, Amy N. Robertson, and Jason M. Jonkman

A Novel Concept for Self Installing Offshore Wind Turbines
Kasper Wåsjø, Jorge Vicente Bermúdez Rico, Morten Bjerkås, and Tore Søreide

Auxiliary Kite Propulsion Contribution to Ship Thrust
Heng Ran, Carl-Erik Janson, and Björn Allenström

Peakedness of Wave Systems Observed on the French Wave Energy Test Site (SEM-REV)
Using a Spectral Partitioning Algorithm
Jean-Baptiste Saulnier and Izan Le Crom

Numerical Modelling of a Heaving Point Absorber in Front of a Vertical Wall
Julius Schay, Joydip Bhattacharjee, and C. Guedes Soares

Analytical and Numerical Study of Nearshore Multiple Oscillating Water Columns
Kourosh Rezanejad, Joydip Bhattacharjee, and C. Guedes Soares

Simulation of Horizontal-Axis Tidal Turbine Wakes Using a Coupled Approach With
Rankine-Froude Actuator Disk Model and a Weakly-Compressible Finite Volume Solver
B. Elie, G. Oger, P.-E. Guillerm, and B. Alessandrini

Tank Testing of a New Concept of Floating Offshore Wind Turbine
Marc Le Boulluec, Jérémy Ohana, Alexis Martin, and Anne Houmard

Model Test Correlation Study for a Floating Wind Turbine on a Tension Leg Platform
Bonjun Koo, Andrew J. Goupee, Kostas Lambrakos, and Ho-Joon Lim

On Design and Building of a U-OWC Wave Energy Converter in the Mediterranean Sea:
A Case Study
Felice Arena, Alessandra Romolo, Giovanni Malara, and Alfredo Ascanelli
