

Progress in Slow Sand and Alternative Biofiltration Processes *Further Developments and Applications*

Edited By

Nobutada Nakamoto, Nigel Graham, M. Robin Collins and Rolf Gimbel

Contents

Preface	xi
Conference programme advisory panel	xiii
Part I General Overview	
1 Slow Sand Filtration: Recent Research and Application Perspectives.....	3
<i>N.J.D. Graham and M. R. Collins</i>	
2 A Review of Biologically-Based Drinking Water Treatment Processes for Organic Micropollutant Removal	17
<i>R. S. Summers, K. Shimabuku and T. L. Zearley</i>	
3 Overview on the Current Condition of Slow Sand Filtration and its Challenges in Japan	25
<i>S. Yamamura</i>	
4 The Centenary Slow Sand Filtration in Nagoya City – A 100 Year Trend of Water Quality	35
<i>K. Mori</i>	
5 The Centenary Slow Sand Filtration in Nagoya City – The Reconstruction of the Slow Sand Filters	45
<i>A. Okuyama</i>	
6 Value of Adenosine Tri-Phosphate and Total Cell Count for the Assessment of General Microbial Water Quality after Sand Filtration.....	51
<i>A. Magic-Knezev, L. Zandvliet, W.A. Oorthuizen and E.J. van der Mark</i>	
7 Evaluation of Dissolved Organic Matter Fractions Removal Due to Biodegradation.....	59
<i>E. Vasyukova, R. Proft and W. Uhl</i>	

- 8 Comparison between Different Filter Systems as a Post Treatment after Tertiary Ozonation..... 67
M. Stapf, U. Miehe, B. Wiedemann and M. Jekel

Part II Slow Sand Filtration – Process Behaviour

- 9 Food Chain is the Key in Ecological Purification System: New Concept and New Name of Slow Sand Filter 77
N. Nakamoto
- 10 A Study of Protistan Movement Speed and Filtration Rate in Slow Sand Filter as an Ecological Purification System 85
N. Iwase and N. Nakamoto
- 11 Analysis of Bacterial Community Structures in Slow Sand Filtration Bed on Different Region and Soil Depth by PCR-DGGE Method..... 91
K. Seike, M. Eguch and K. Ueno
- 12 Gut Bacterial Floras of Aquatic Invertebrates Inhabiting Slow Sand Filter Beds 97
J. Takeuchi, Y. Zhao and R. Tanaka
- 13 The Functioning of Biological Slow Sand Filtration in Relation to the Presence and the Role of Annelids in the Schmutzdecke 103
G.H. Wubbels, J.H. Bruins, M. Bosman and D. vd Woerdt
- 14 The Inhibitory Effect of Tubificid on Head Loss in Slow Sand Filtration..... 111
H. Sugino, S. Nakamasu, T. Komatsu and S. Takano
- 15 Schmutzdecke Development and Treated Water Quality 121
T. Sugimoto
- 16 The Silicon Circulation Hypothesis based on Slow Sand Filtration/Ecological Purification System..... 131
S. Inoue and Y. Mochizuki
- 17 Effect of Sudden Changes of Slow Sand Filtration Rate on Number of Bacteria and Particles in Effluent 135
W.A. Oorthuizen, A. Magic-Knezev and F. Cui

Part III Slow Sand Filtration – Treatment Performance

- 18 Slow Sand Filtration Process Model for Removal of Microorganisms..... 141
J.F. Schijven, H.J.J. van den Berg, M. Colin, Y. Dullemont, W.A.M. Hijnen, A. Magic-Knezev, W. Oorthuizen and G. Wubbels
- 19 Removal of Anti-Inflammatory Compounds by Ecological Filtration 147
C.M. Erba, E.P. Tangerino, W.D. Isique and L.C. Campos
- 20 Removal of Bromophenols by Slow Sand Filtration 153
K. Katayama-Hirayama, H. Suzuki, N. Toda, A. Tauch, A. Fujioka, T. Akitsu, H. Kaneko and K. Hirayama
- 21 The Iron and Manganese Removal Process: Its Microbial Habitats and Functions..... 161
K. Kaya and J. Takeuchi

22	Biological Iron Removal from Community Water Source - Corriverton, Republic of Guyana.....	167
	<i>H. Nakazono, P. Thapa, A. Takechi and S. Barran</i>	
23	Case Studies of Slow Sand Filtration/Ecological Purification System in Small Scale Water Supply.....	175
	<i>K. Sanda and M. Seno</i>	
24	Water Supply of a Small Community with a Small Slow Sand Filtration/Ecological Purification System Unit.....	179
	<i>F. Kazaki</i>	
25	Refocus on Slow Sand Filter in Kakunda City and Marumori Town after Great East Japan Earthquake.....	183
	<i>M. Nanbu and K. Yamaki</i>	
26	Small Slow Sand Filter System for Rural Area in Bolivia.....	187
	<i>T. Horie, Y. Fukushima, G. Calicho and C. Takahatake</i>	

Part IV Slow Sand Filtration – Process Developments

27	Switching on Pesticide Degradation in Biological Filters used in Drinking Water Production.....	195
	<i>C.A. Rolph, B. Jefferson and R. Villa</i>	
28	Bioaugmentation Reduces Negative Effect of Estrogens on Coliform Removal in Slow Sand Filters.....	203
	<i>S.J. Haig, C. Quince, G. Collins, R.L. Davies and C. Gauchotte-Lindsay</i>	
29	Reduction of Water Hardness with a Compact Slow Sand Filtration System.....	209
	<i>R. Miyahira, K. Yajima, J. Nakagawa and M. Koseki</i>	
30	Installing a DIY-based Home Slow Sand Filter - Is it Possible to Make It Without Speciality?.....	219
	<i>H. Hukuoka</i>	
31	Development of an Unmanned Operate System for a Slow Sand Filter/Ecological Purification System.....	225
	<i>T. Hirose</i>	
32	Process Optimization of Solar Energy Based Slow Sand Filtration.....	231
	<i>R. Chakrabarti, M. Jekel, P.K. Roy, M. Banik, G. Banerjee, S. Pal and A. Mazumdar</i>	
33	Performance of Ecological Purification System in Samoa.....	239
	<i>J. Tamasese, E. Fuimaono and S. Lautua</i>	
34	Household Bio-Purification Device.....	245
	<i>S. Jin</i>	
35	A Study to Further Reduce the Turbidity Level of Slow Sand Filtered Water in Tanigahara Water Purification Plant, Japan.....	251
	<i>I. Tateno, M. Sekiyama, N. Kobayashi and S. Arii</i>	
36	The Countermeasure against the Increase of Disinfection By-Products Concentration by Humic Substances at a Water Purification Plant Using a Slow Sand Filtration System.....	259
	<i>Y. Kado, K. Takao and K. Hashiwata</i>	

37	On the Function of Upflow Roughing Filter for Slow Sand Filter – Pilot Experiment in Niigata, Japan	265
	<i>T. Arakawa, M. Seno and N. Nakamoto</i>	
38	Enhancement of the Efficiency of Upflow Slow Sand Filtration – Effect of Combined Application with a Fiber Filter Unit	273
	<i>T. Kato, I. Ozaki and A. Okada</i>	
39	Surface Water Treatment Plant Using Ecological Purification System in Bangladesh	277
	<i>M.M. Rahman and M.J.A. Zaman</i>	
40	Development of Ecological Purification Unit for Producing Drinking Water from Organically Polluted Raw Water (BOD~30mg/L)	285
	<i>K. Maruyama and Y. Hashiguchi</i>	
41	Slow Sand and Slow Biochar Filtration of Raw Wastewater	297
	<i>K. Kaetzi, M. Lubken, K. Alfes, S. Werner, B. Marschner and M. Wichern</i>	

Part V Biosand Filters

42	Global Review of the Adoption, Use and Performance of the Biosand Filter	309
	<i>T.K.K. Ngai, B. Coff, D. Baker and R. Lentz</i>	
43	Recent Advances in Household Biosand Filter Design	319
	<i>T.K.K. Ngai and D. L. Baker</i>	
44	Performance Optimisation of Household Biosand Filters	331
	<i>L.C. Campos and R. Outhwaite</i>	
45	Optimizing Intermittent Slow Sand Filters (Biosand) Construction for More Consistent Microbial Removals	339
	<i>K. Sawyer, C. Perron and M.R. Collins</i>	
46	Utilizing Structural Equation Modeling as an Evaluation Tool for Critical Parameters of the Biosand Filter in a Pilot Study in Para, Brazil	347
	<i>L.E. Voth-Gaeddert, D.W. Divilbiss and D.B. Oerther</i>	
47	Household Filter to Remove Iron and Nitrate for Drinking Water	355
	<i>V. Asriningtyas, L. Villacreces and S.P. Saraswati</i>	
48	Long-Term Performance Evaluation of Biosand Filters Modified with Zero-Valent Iron	359
	<i>M.M. Ahammed, C. Solanki and A.T. Nair</i>	

Part VI Alternative Biofiltration – Process Behaviour

49	Mechanisms of DOC Removal from Secondary Effluents in a Lab Biofilter	369
	<i>N. Siebrath, C. Schaeffer and W. Uhl</i>	
50	Change of Water Treatment Efficiency in the Transition from Granular Activated Carbon to Biological Activated Carbon on an Advanced Water Purification Plant	375
	<i>H. Inoue, S. Kodama, M. Ishibashi and Y. Watanabe</i>	

51	Autotrophic Growth Competition between Ammonia-Oxidizing Archaea and Ammonia-Oxidizing Bacteria in Biological Activated Carbon Filter with Nitrification Potential	379
	<i>I. Kasuga, J. Niu, F. Kurisu, H. Furumai and T. Shigeeda</i>	
52	Influence of Preozonation on the Performance of Subsequent Bio-filter in Water Treatment under Low Temperature Condition: Biomass and Community Analysis	387
	<i>J. Yang, J. Ma, D. Song, Y. Shi and X. Zhai</i>	
53	Deterioration Mechanisms of Granular Activated Carbon in Fluidized-Bed Contactor with Biological and Physical Effects	397
	<i>Y. Kobayashi, M. Oya, Y. Tanaka, D. Nagashio and T. Hanamoto</i>	
54	Living-Filter: an In-Reservoir Biofiltration System for Phytoplankton Reduction at the Abstraction Point	405
	<i>A.T. Castro-Castellon, M. J. Chipps, J. M. R. Hughes and N. P. Hankins</i>	

Part VII Alternative Biofiltration – Treatment Performance

55	Removal of Easily and More Complex Biodegradable NOM by Full-Scale BAC Filters to Produce Biological Stable Drinking Water	413
	<i>W.A.M. Hijnen, R. Schurer, B. Martijn, J.A. Bahlman, W. Hoogenboezem and P.W.J.J. van der Wielen</i>	
56	Renewal and Selection of Granular Activated Carbon in Advanced Drinking Water Purification in Tokyo	421
	<i>T. Iwamoto, T. Tasaki and T. Kanami</i>	
57	Biofilm Accumulation Characteristics of Heterotrophic Bacteria in Tap Water Produced by Biological Activated Carbon Process	429
	<i>S. Kasahara and M. Ishikawa</i>	
58	Manganese Removal in BAC Facilities without Ozonation in Water Purification Plants	433
	<i>T. Yahata, E. Kawase, E. Takahashi and M. Yoshii</i>	
59	Use of Water Sensitive Urban Design Systems for Biofiltration of Urban Stormwater: Laboratory Biodegradation Batch Studies	441
	<i>K. Zhang, X. Tian, D. Page, A. Deletic and D. McCarthy</i>	

Part VIII Alternative Biofiltration – Process Developments

60	Applicability of Spherical Coconut Shell Activated Carbon to Biological Activated Carbon for Advanced Drinking Water Treatment	453
	<i>A. Okada, K. Takahashi, T. Okawa and K. Satoh</i>	
61	Development of Biological Roughing Filter as an Alternative to Coagulation-Sedimentation Process	465
	<i>T. Okamoto, K. Ogura, Y. Kobayashi, M. Oya, D. Nagashio and T. Hanamoto</i>	

62	The Environmentally-friendly Effects of Biotreatments in Osaka Water Supply Authority	473
	<i>T. Hoson and Y. Takeda</i>	
63	Biofilm Development in Upflow Gravel Filters in Layers with a Fabric Cover	481
	<i>L.D. Sanchez, E.A. Dominguez, N. Munoz, J.T. Visscher and L.C. Rietveld</i>	
64	Up-flow Biological Contact Filter for Advanced Water Treatment System.....	491
	<i>N. Kurahashi, R. Sato, S. Kumano, M. Fujimoto and Y. Ishimaru</i>	
65	pH Conditioning using Limestone with Upflow Gravel Filters.....	503
	<i>A. Araya, J. Valverde and L.D. Sanchez</i>	
66	Upward Biological Contact Filtration (U-BCF) in Vietnam.....	507
	<i>M. Yayama</i>	
67	Biofiltration of Pig Manure: Behavior of Nitrogen Compounds.....	515
	<i>P. Lessard, G. Aubry, Y. Gilbert, Y. LeBihan and G. Buelna</i>	
68	Exploring Sand and Bentonite-Enhanced Sand as Filter Media for Nitrate Removal.....	525
	<i>R. Malini and M.R. Sudhakar</i>	

Part IX River Bank Filtration and Groundwater Recharge

69	Reduction of the Formation Potentials of Trihalomethanes (THMs) and Haloacetic acids (HAAs) in Reclaimed Water by Soil Aquifer Treatment.....	535
	<i>S. Rahmawati, X. Wang, S. Phattarapattamawong, R. Suzuki, S. Echigo, Y. Takabe and S. Itoh</i>	
70	Removals of Pharmaceuticals and Personal Care Products in Reclaimed Water during Soil Aquifer Treatment with Different Soil Types, Hydraulic Retention, and Saturated Condition.....	543
	<i>K. He, T. Yonetani, Y. Takabe, S. Rahmawati, S. Echigo and S. Itoh</i>	
71	Behavior of Trace Organic Contaminants in Soil Aquifer Treatment (SAT) Process for Reuse of Secondary Sewage Effluent.....	553
	<i>F. Nishimura, N. Kurita, Y. Takabe, T. Mizuno, T. Hidaka and S. Ito</i>
