CONTENS

FLUID-STRUCTURE INTERACTION

17TH INTERNATIONAL SYMPOSIUM ON EMERGING TECHNOLOGIES IN FLUIDS, STRUCTURES AND FLUID-STRUCTURE INTERACTIONS

INTRODUCTION A ............................................................................................................. A1

PVP2013-97104............................................................................................................. V004T04A001
Experimental Investigation of Pulsatile Flow Through Prosthetic Heart Valves
  Oleksandr Barannyk, Satya Karri, and Peter Oshkai

PVP2013-97105............................................................................................................. V004T04A002
In Vitro Study of the Influence of the Aortic Root Geometry on Flow Characteristics of a
Prosthetic Heart Valve
  Oleksandr Barannyk, Satya Karri, and Peter Oshkai

PVP2013-97150............................................................................................................. V004T04A003
Numerical Method to Provide Cavitation Index for Control Valves
  Stefano Malavasi, Marco M. A. Rossi, Gianandrea V. Messa, and Giacomo Ferrarese

PVP2013-97247............................................................................................................. V004T04A004
Solid-Liquid Slurry Flow Through an Expansion in a Rectangular Duct
  Gianandrea Vittorio Messa and Stefano Malavasi

PVP2013-97345............................................................................................................. V004T04A005
Towards a Smoothed Particle Hydrodynamics Algorithm for Shocks Through Layered Materials
  Iason Zisis, Bas van der Linden, and Christina Giannopapa

PVP2013-97460............................................................................................................. V004T04A006
Numerical Prediction of Pressure Gradient of Slurry Flows in Horizontal Pipes
  Gianandrea Vittorio Messa, Michael Malin, and Stefano Malavasi

PVP2013-97567............................................................................................................. V004T04A007
Wave Propagation in Tapered Vessels: New Analytic Solutions That Account for Vessel
Distensibility and Fluid Compressibility
  George Papadakis

PVP2013-97737............................................................................................................. V004T04A008
Solid-Liquid Flow Through a Wellhead Choke Valve
  Stefano Malavasi, Gianandrea Vittorio Messa, and Giacomo Ferrarese

PVP2013-97829............................................................................................................. V004T04A009
Production and Evaluation of Pressure Vessel for Highly Effective Rice Powder Manufacturing
Using Underwater Shock Wave
  Ken Shimojima, Yoshikazu Higa, Osamu Higa, Katsuya Higa, Ayumi Takemoto, and
  Shigeru Itoh
PVP2013-97855
Transient Behavior of Water Hammer in a Two-Pipe System
Kazuaki Inaba, Masaya Kamijukkoku, Kosuke Takahashi, and Kikuo Kishimoto

FLUID-STRUCTURE INTERACTION ISSUES IN AERONAUTICAL ENGINEERING

INTRODUCTION B

PVP2013-97060
Effect of Pressure on Two-Phase Modeling for Viscous Potential Flow
Somayeh Ahmadi

PVP2013-97592
On Some Aspects of Fluid-Structure Interaction in Two-Phase Flow
M. Benaouicha and J. A. Astolfi

PVP2013-97637
Structure Dynamics Analysis in Inhomogeneous Density Flows
Tolotra Emerry Rajaomazava, Ill, Mustapha Benaouicha, and Jacques-André Astolfi

PVP2013-97661
Stability of Cylinder Arrangement in Potential Flow
M. Benaouicha, E. Longatte, and F. Baj

STRUCTURES UNDER EXTREME LOADING CONDITIONS

INTRODUCTION C

PVP2013-97207
Development of a Two-Way Fluid Structure Coupling for Studying Power Transformers Subjected to Internal Dynamic Over-Pressures
Ben Landis, Omar Ahmed, Sangpil Yoon, Anne M. Goj, and Guillaume Perigaud

PVP2013-97505
Simulating Explosive Detonations Within Multiroom Buildings
David Vaughan, John Mould, Howard Levine, and Darren Tennant

PVP2013-97640
Impact of Thermal Hazards on Process Buildings Using CFD Techniques
Anay Raibagkar and Matthew Edel

PVP2013-97728
Daniel Sommerville

PVP2013-98020
Effect of Explosion Source Type on Blast Wave Shielding
Ji Hui Geng and J. Kelly Thomas
SYMPOSIUM ON FLOW-INDUCED VIBRATION

INTRODUCTION D .................................................................D1

PVP2013-97020 .................................................................V004T04A020
Numerical and Experimental Investigation of Flow-Acoustic Resonance of Side-by-Side
Cylinders in a Duct
Atif Mohany, David Arthurs, Michael Bolduc, Marwan Hassan, and Samir Ziada

PVP2013-97021 .................................................................V004T04A021
Effect of Sound on the Wake of Side-by-Side Cylinders in a Duct
David Arthurs, Michael Bolduc, Adam Ritcey, and Samir Ziada

PVP2013-97032 .................................................................V004T04A022
Consideration of Design Assessments for Pipeline/Facilities Dynamic Behavior
Roman W. Motriuk

PVP2013-97037 .................................................................V004T04A023
Aeroacoustics of Opposing Planar Air Jets
Moustafa Hassaballa, David Arthurs, and Samir Ziada

PVP2013-97103 .................................................................V004T04A024
Experimental Investigation of Flow-Acoustic Coupling in a Deep Axisymmetric Cavity
Peter Oshkai and Oleksandr Barannyk

PVP2013-97111 .................................................................V004T04A025
Study on In-Flow Fluidelastic Instability of Circular Cylinders Caused by Air Cross Flow
(Triangular Arrays)
Tomomichi Nakamura, Yoshiaki Fujita, Takuya Sumitani, and Shinichiro Hagiwara

PVP2013-97132 .................................................................V004T04A026
Dynamic Stability Analysis of a Flexible Plate Moving in a Parallel Flow
Katsuhisa Fujita

PVP2013-97141 .................................................................V004T04A027
The Effect of Fluid-Resonant Coupling in High-Speed Impinging Planar Jet Flows
David Arthurs and Samir Ziada

PVP2013-97149 .................................................................V004T04A028
Effect of Upstream Edge Geometry on the Trapped Mode Resonance of Ducted Cavities
Michael Bolduc, Manar Elsayed, and Samir Ziada

PVP2013-97163 .................................................................V004T04A029
Investigation on In-Flow Fluidelastic Instability of an Array of Tubes
Kazuo Hirota, Hideyuki Morita, Jun Hirai, Akihisa Iwasaki, Seiho Utsumi, Kengo Shimamura,
and Ryoichi Kawakami

PVP2013-97241 .................................................................V004T04A030
Quasi Static Approach of Damping Forces Exerted Upon a Long Cylinder
Oscillating in an Axial Flow
Lise Divaret, Julien Berland, Hassan Berro, Olivier Cadot, Olivier Doaré, and Pierre Moussou
A Method for Extracting the Time Delay From the Unsteady and Quasi-Steady Fluidelastic Forces in Two-Phase Flow
Teguewinde Sawadogo and Njuki Mureithi

Whirl Instability of a Rotating Impeller in a Baffled Mixing Vessel
G. C. Cudmore, A. Gordon L. Holloway, and Andrew G. Gerber

Stability Analysis of Rectangular Plates in Incompressible Flow With Fourier Multiplier Operators
Kensuke Hara and Masahiro Watanabe

Numerical Computation of Modal Characteristics of a Clamped-Clamped Cylinder in Turbulent Axial Pipe Flow
Jeroen De Ridder, Joris Degroote, Jan Vierendeels, Katrien Van Tichelen, and Paul Schuurmans

Development of BWR Steam Dryer Loading Evaluation Methods Through Scale Model Tests Under Actual Steam Conditions
Shiro Takahashi, Keita Okuyama, Akinori Tamura, Yasuhiro Mabuchi, Teppei Kubota, and Kazuhiro Yoshikawa

Stability Derivatives in a Parallel Triangular Tube Bundle Subject to Cross-Flow at Moderated Reynolds Number
C. Charreton, C. Béguin, R. Yu, and S. Etienne

Experimental and Numerical 3D Study of Flow-Sound Interaction in a Steam-Line Gate Valve
Romain Lacombe, Philippe Lafon, Frédéric Daude, Fabien Crouzet, Samir Ziada, and Christophe Bailly

Application of the Transfer Matrix Method to the Analysis of Hydro-Mechanical Vibration of NPP Piping
Igor Orynyak, Sergii Radchenko, and Iaroslav Dubyk

Synchronization Characteristics of Vortex Shedding From Tube Banks on Acoustic Resonance
Hiromitsu Hamakawa, Eiichi Nishida, and Kenta Asakura

Acoustic Resonance of a Steam Line Gate Valve
Philippe Lafon, Romain Lacombe, Fabien Crouzet, Frédéric Daude, Samir Ziada, and Christophe Bailly

Probabilistic Evaluation of the Integrity of Steam Generator Tubes Subjected to Flow Induced Vibrations
Marwan Hassan and Jovica Riznic
Experimental Evaluation of Resonance Frequency at Branch Section in Each Dry and Wet Steam Flow

Yuta Uchiyama and Ryo Morita

Basic Study of Mitigation of Annular Flow-Induced Vibration by Considering Variability of the Parameters of Structure and Fluid

Atsuhiko Shintani, Hirokazu Isono, Tomohiro Ito, and Chihiro Nakagawa

Instability of a Simply-Supported Cylinder Subjected to Annular Flow Over a Finite-Length at its Mid-Length

Heung Seok Kang, Kang Hee Lee, and Njuki W. Mureithi

Simulation of Low-Reynolds Number Flow Around a Circular Cylinder Following a Slender Elliptical Path

László Baranyi

The Effect of Punching Plates to Suppress the Sloshing in a Gas Liquid Separator

Hayato Suzuki and Shigehiko Kaneko

Numerical Simulation of Three-Dimensional Flow Past an Oscillating Cylinder

Sofia Peppa, Lambros Kaiktsis, and George Triantafyllou

Acoustic Damping in Smooth and Corrugated Pipes With and Without Liquid Injection

J. Golliard, S. P. C. Belfroid, and O. Vijlbrief

Singing Mitigation in Corrugated Tubes With Liquid Injection

S. P. C. Belfroid, J. Golliard, and O. Vijlbrief

An Exploratory Experimental Technique to Predict Two-Phase Flow Pattern From Vibration Response

Luis Enrique Ortiz-Vidal, Oscar M. H. Rodriguez, and Njuki Mureithi

Identification of the Turbulence Force Field Excitation From a Set of Vibratory Responses of a Multi-Supported Tube

Jose Antunes, Laurent Borsoi, Xavier Delaune, and Philippe Piteau

Non-Linear Analysis of Steam Generator U Tube In-Plane Vibration

Alan Kepple, Marwan Charrouf, David Rackiewicz, and Phillip Rush
THERMAL-HYDRAULIC PHENOMENA AND INTERACTIONS WITH VESSELS, PIPING AND COMPONENTS

INTRODUCTION

PVP2013-97082 ........................................................................................................................................... V004T04A064
The IN Vessel Retention Strategy to Mitigate the Severe Accidents for the VVER 1000/320 Type NPPs
Jiri Zdarek

PVP2013-97121 ........................................................................................................................................... V004T04A065
Jong Chull Jo, Kyu Sik Do, and Yong Kab Lee

PVP2013-97123 ........................................................................................................................................... V004T04A066
Analytical Study of Two-Phase Flow Instability in a Natural Circulation PWR Auxiliary Feedwater System
Jong Chull Jo, Frederick J. Moody, and Kyu Sik Do

PVP2013-97266 ........................................................................................................................................... V004T04A067
Aneurysm No-Linear Unsteady Dynamic: Mathematical Modeling
M. Hamadiche

PVP2013-97317 ........................................................................................................................................... V004T04A068
Crack Propagation due to Movement or Size Change of Hot Spot in Pipe
Jonas Erik Wirgart, Takayuki Terai, and Naoto Kasahara

PVP2013-97422 ........................................................................................................................................... V004T04A069
Small Scale Burst Facility: Experimental Investigation of Fluid-Structure Interaction in a PHWR
J. J. Baschuk, Alan West, and B. W. Leitch

PVP2013-97424 ........................................................................................................................................... V004T04A070
Waterhammer in a Horizontal Pipe Induced by Slug Formation and Rapid Condensation
C. Samuel Martin

PVP2013-97534 ........................................................................................................................................... V004T04A071
Acoustic Resonance Experiments in a Reservoir-Pipeline-Orifice System
Arris S. Tijsseling, Qingzhi Hou, Bjørnar Svingen, and Anton Bergant

PVP2013-97540 ........................................................................................................................................... V004T04A072
Fluid Transient Analysis for Safety Valve Vent Stack Using S-RELAP5 Code
Jen-Sheng Hsieh and Pascal Brocheny

PVP2013-97726 ........................................................................................................................................... V004T04A073
Stress Analysis of Pipeline Subjected to Differential Frost Heave
Yan Di, Jian Shuai, Lingzhen Kong, and Xiayi Zhou

PVP2013-97809 ........................................................................................................................................... V004T04A074
Commissioning Tests for an Experimental Study of Steam Generator Tube Loading During Blowdown
Ouajih Hamouda, David S. Weaver, and Jovica Riznic
