Advances in Earth and Environmental Sciences

Editor

Y. Yang

Tongji University, China
Contents

Chapter 1: Earth science

The establishment of a decision model based on fuzzy regression and the application of a chemical solid adsorption quantity  
Hao Kang, Youyi Chen, Wei Tian & Mingqian Wang ................................................. 3

Researching ligninolytic enzymes  
Zhang Qingfang & Yu Zonglian ............................................................................. 11

Application of GIS on power grid material distribution  
Yurong Chen, Song Yan & Jian Du ....................................................................... 17

Non-linear filter for regional-residual separation of gravity anomalies  
F. Xiao .................................................................................................................. 23

Application of geographically weighted regression analysis to estimate the normalized difference vegetation index of Yunnan province  
X. Chen, Y. Zhang & Z. Qiang ............................................................................ 31

The wide angle seismic wave field character in the model with velocity increasing  
Zhi Zhang, Chao Dong & Lilong Liu .................................................................... 39

Comprehensive evaluation of reclaimed soil fertility based on fuzzy math  
Lihua Gao, Shuhong Sun, Qingyun Zhou & Liguo Jin .......................................... 45

A tentative study on the stability of a check dam  
Xueping Lin, Yong You, Jinfeng Liu & Yanbo Zhao ............................................. 53

Analysis on the intergeneration allocation based on game theory in port coastline resources development  
Xi Wu & Guiliang Tian ......................................................................................... 61
Application of fuzzy comprehensive evaluation in analysis to land reclamation potentiality of Anlilai coal mine in Guizhou
Xiaoxiao Ma, Baoshan Wang, Changhua Liu & Changchun Li..........................67

Dynamic characteristic analysis on phreatic groundwater for quaternary loose rock pore in Daqing and the surrounding area
Fuli Qi, Fenglong Zhang & Yongli Li .................................................................73

A study on the mechanism involving sulfate removal from waste water using modified bauxite as an adsorbent
Shaohua Li, Ju Wang, Guoyan Zhang, Shujie Zhao & Jurui Qi .............................81

Evaluation of network monitoring ability of Inner Mongolia Hetao seismic zone
Xiao Ming Han & Fan Zhang .............................................................................89

Land surface deformation monitoring of mining area based on PS-InSAR
Qiong Yan, Jicang Wu & Lina Zhang ................................................................95

Characteristics of phosphorus in sediments of the Sancha Lake in Sichuan province and their relationship with human activity
Binyang Jia, Ya Tang, Yan Zhan & Hongbing Luo ...........................................103

Characteristics of crustal horizontal strain in the Weihe basin of China
Hurong Duan, Ligong Li & Hongguang Zhai .....................................................109

The establishment and cluster analysis method for analogous reservoir under the new SEC rules
Qiufen Sun, Haiyan Meng, Liang Xu, Jinjun Fu, Xia Wang, Yuzhen Lv, Chongjun Cao & Qiyang Zhao .................................................................117

Flood coincidence probability analysis for the middle and lower Weihe River and its tributaries based on the LHS method
Nan Zhang, LongLong Lv, Hong Jiang & Kui Huang .........................................123

Semi-automatic interpretation of subsurface cavities by microgravity data:
a case study from the Liaoyuan area, Northeast of China
Wenna Zhou .......................................................................................................131

The fast assignment and software implementation of the ultra-high degree Earth’s gravity field parameters
Li Wei & Zhang Chao .........................................................................................137

The difference in temperature and humidity in different-positioned leaves of Lilium regale
Zisong Yang & Qiumei Quan .............................................................................145
Urban water environment construction of Wroclaw and its inspiration
Hui Xiong & Xingyao Xiong ................................................................. 151

A study on the separation of a Bouguer anomaly map using wavelet analysis
Menglong Xu, Changbao Yang & Yangang Wu .................................... 159

Research on the application of ground penetrating radar in detecting siltation thickness in small and medium reservoirs
Qi Wu, Jintian Tang, Xunan Xiong, Shisen Liu, Dong Liu, Zhengping Yang & Zhuang Zhang .............................................................. 167

Research and evaluation on the characteristics of canyon landscape in Alxa Global Geopark
Qian Li, Mingzhong Tian, Xujiao Zhang, Yihua Shi & Shuhe Han ......... 173

Research on the application of fusing multi-source monitoring data technology to a geographical hazards early-warning system
Jiang Rui & Guili Li ............................................................................... 179

Applying SEBAL model and P-M formula to estimate forestland evapotranspiration and ecological water consumption of the Banchengzi watershed of China
Yao Wang & Xue-xia Zhang ................................................................ 185

Clustering rock discontinuity sets through Gustafson–Kessel (GK) algorithm and validity index
J. H. Hua, C. F. Leung, G. P. Ong & B. N. Hong ............................... 193

Study on water level decline effected on navigation in the reach of Changzhou Hydraulic Complex to Jieshou of Xijiang River
Xiuhong Wang, Jingmin Du, Minxiong Cao, Guozheng Cai, Xinnong Zhang, Dongdong Jia & Aixing Ma ......................................... 201

Research on land use change of a small watershed in an inland river of Northwest China based on RS and GIS
Guanglu Hu & Shoubo Li ................................................................. 209

Estimating Qinghai Lake area with a BP neural network based on a genetic algorithm
Chengfeng Luo, Haoyan You, Hui Liu & Zhengjun Liu ......................... 221

Geological characteristics of the No. I deposit in the Xiongcun district, southern Gangdese belt, Tibet
Xing-Hai Lang, Ju-Xing Tang, Zhi-Jun Li, Feng Ding, Yong Huang, Fu-Wei Xie, Huan-Huan Yang & Yun Zhou ........................................... 229
An analysis on the provenance of dune sands in the sandy lands of Korqin and Hulun-Beir: evidence from the heavy mineral assemblages
G. Han, L. Yang, J. Yang, M. Hu & G. Zhang ......................................................... 237

The hazard assessment of karst collapse risk zoning based on GIS in Wuhan City
Zhigang Li, Shangde Xiao & Shaoping Liu ............................................................. 245

Ecological understanding of the Earth by studying process philosophy
Shiyan Li & Lulu Liu .................................................................................................. 251

Age, sources and geodynamical background of the Sichuan-Yunnan-Guizhou Lead-Zinc Metallogenic Province, SW China
Pengyu Feng, Guangshu Yang, Yongfeng Yan, Runsheng Han & Xiaodong Sun .................. 257

Tectonic subsidence and hydrocarbon thermal evolution of Cretaceous source rocks of Fulongquan rift in Songliao Basin
Yuting Zhao, Xuanlong Shan & Jing Sun ................................................................... 263

Study on the folding mutation model of a pressure-shear typed unstable rock block
Hongkai Chen, Dan Hu, Ruigang Zhang & Jing-yu Zhang ........................................ 271

Vulnerability assessment of the geological environment in a coal mine area based on GIS
Zhexing Wang, Qingxian Sun & Lin Zhang .................................................................. 279

Preliminary study of the soil condition and improvement based on Yellow River sediment filling reclaimed arable land
Zhidong Jiang, Fang Shao, Peijun Wang, Dongwen Liu, Zhiyong Qiao, Yakai Chen & Yao Li ................................................................. 287

Satellite remote sensing monitoring and analysis of wetland in Zhuhai
Guangsheng Zhang, Changchun Li & Dongdong Li .................................................... 295

Design of the mineral resources economic spatial data management system for Puer
Yan Dong, JianGuo Gao & Cheng Guo ......................................................................... 303

Allocation of water environmental capacity based on linear programming model and its application in North Canal River
Haixiao Jing, Changgen Liu & Jianhua Tao .................................................................. 309

Three-dimensional dipole-source electromagnetic modeling based on an integral equation method with a rugged earth surface
Yong Li, Pinrong Lin & Sixu Han .............................................................. 319
The registration and certification problems of collective land ownership and countermeasures research
Xiaolei Zhang, Lianrong Zhao, Meng Lu & Xin Lian ............................................329

Phosphorus spatial-temporal characteristics and influence factors of Baoxiang River in Dianchi Lake

SAR imaging simulation of the ocean surface with the double superimposition method
Shijuan Wang & Yarong Xia ..................................................................................343

A primary study on sediment issues due to ahead impounding water of the cascade reservoirs in the upper Yangtze River
Renyong Huang & Jie Zhang .............................................................................351

Geochemistry characteristics of the sediment profile Barunbaoritaolegai from the inter-dune lake basin in the Badain Jaran Desert and its palaeo-environmental significance
Siwen Liu, Xiaolu Fan & Mingzhong Tian ........................................................405

Iron mine land reclamation measures: Niu Xi River iron ore
Yunchao Liu, Yunli Liu & Li Ma .........................................................................365

The grain-size of the Barunbaoritaolegai profile in the Badain Jaran Desert and its palaeoenvironmental implications
Xiaolu Fan, Mingzhong Tian & Siwen Liu ........................................................405

Land subsidence and mitigation measures along the coastal cities of China
Bin Tang & Liang Xie ............................................................................................371

Contents and evaluation of heavy metals in whale shark from China’s eastern coast
Yamin Wang, Wanyi Zhang & Min Chen ............................................................387

Approach of vectorization for coal mine geological section drawings
Hongyan Wang ....................................................................................................399

Study of the sequence stratigraphy of the Guantao Formation in Jiyang Depression
Qidong Yang, Haiyan Liu & Huan Shen .............................................................405

The influence of basic volcanic fluids on the geochemical indicators and carbon isotopic of gaseous products
Jiyan Li, Xuanlong Shan & Zhe Sun .................................................................413
Analysis of influential factors in the river pattern change of a braided channel in a fluctuating backwater area
Jinqiong Zhao...........................................................................................................419

Study on the control of farmland surface source pollution based on environmental capacity
Shuhong Sun, Shusheng Yang, Zheyuan Zhang & Xiaohong Liang.........................427

The research into the extraction of road information from satellite images
Caiyun Qin, Cuixia Feng & Zhenji Huang.................................................................437

Application of the improved fuzzy different optimum model in water resources reproducibility evaluation
Jianjun Zeng, Zhengtao Shi, Gang Liu, Yanwu Chen, Jinyi Dong & Jun Chen.........445

Trace metal pollution of drinking water sources
Z. Y. Zhang & S. H. Sun ...............................................................................................453

Temporal and spatial variations of extreme precipitation events of the Meiyu period in Anhui from 1961 to 2012
C. F. Duan, H. H. Wu, W. Cao & X. J. Ding.............................................................463

The effect of pH value of irrigation water on the available nutrients in soil
Juan Hong, Gang Chen, Xiang Huang, Lihong Zhang, Mihong Ge, Suping Wang, Lei Du, Lixia Ye & Zhicheng Lian .........................................................471

Study on biomass of riparian herbaceous species and communities in Taizihe River, Liaoning, China
W. J. Kong, H. J. Xia, W. L. Zhang, Y. H. Wang & Y. Zhang.....................................481

CO₂ geological utilization technologies for storage
Yujie Diao, Xufeng Li, Chun Chang & Senqi Zhang..................................................491

Application of the GPS in earthquakes: monitoring and prediction

Application of clustering mining on the study of Chang 6 reservoir in Baibao oilfield
Huixia Chao, Weihua Yao, Xingke Yang, Zhiliang Gao & Hujun He.........................505

Geochemical characteristics of late carboniferous volcanic rocks in the southeast of Heishan ridge, Beishan
C. X. Qu, X. K. Yang, H. J. He & H. Y. Song .............................................................511

Division and its evolution characteristics of the intrusive rock sequence in the southeast of Heishan ridge, Xinjiang
C. X. Qu & H. Y. Song ...............................................................................................517
The evaluation of the landscape pattern at the disturbed area of the Xiangjiaba Hydropower Project
Ping-juan Xia & Fang-qing Chen ................................................................. 523

Analysis of urban sustainable development based on a dynamic study of the ecological footprint: a case study in Shuangliu County of Chengdu, China
Xia Wang, Qingyuan Wang & Xiaoyu Gan ...................................................... 529

Permeability characteristics of modified loess under freeze-thaw cycles
Qingfeng Lv, Shenglin Wang & Yanxu Zhao ................................................... 537

Numerical simulation of near surface meteorological elements using WRF model over semi-arid Northeastern China
Xiaohang Wen ............................................................................................ 545

Spatial distribution optimization of rural settlements using the Weighted Voronoi Diagram
Dianjun Feng, Chenhua Shen, Xujiao Wang, Yali Si & Chaoling Li .................. 551

Improved structure tensor in the edge detection of potential field data
Guoqing Ma, Danian Huang & Lingshun Meng ............................................. 563

Early warning analysis for rocky desertification of agricultural land at county regional level based on 3S-ANN technology:
Du'an Yao Autonomous County of Guangxi as an example
Baoqing Hu, Yan Yan, Kaixian Qin, Duanlian & Jianwei Liu ......................... 571

Karst land system evolution simulation in Du'an based on BP-ANN-CA
Kaixian Qin, Baoqing Hu, Duanlian & Jianwei Liu ....................................... 583

The sequence stratigraphy and controlling factors in Kongnan area of Shahejie Group
Jing Sun, Yuting Zhao, Linfu Xue & Jianqiang Wang ..................................... 595

3D thermal history modelling of the Xujiaweizi fault-depression, Song Liao basin
Wenguang Wang, Shuangfang Lu & Min Wang ............................................. 603

Research of nearshore subaqueous fan sand body macroscopic heterogeneity and response to sedimentary datum cycle of up part of A1 oil group in A’nan 31-11 block, A’nan Oilfield
Liu Beibei, Zhao Yanchao, Zhong Huijuan & Pang Lingyun ............................ 613

A novel feature with multi-scale context modeling for remote sensing image analysis
Zhijian Huang, Jinfang Zhang & Fanjiang Xu ............................................. 621
Selenium resources from the Wolverine deposit, Canada
Chongqing Wang, Hui Wang & Jiangang Fu ..........................................................627

The research of grid workflow dynamic scheduling algorithm based on planning
Wei Tian, Qiuyan Tian & Yingying Zhang ..........................................................633

Distribution regularity of oil sands in China
Honghao Luo & Xuanlong Shan .......................................................................639

Reviews and comments on environmental Kuznets curve research
Miao Li ...........................................................................................................645

Anthracite coal prepared energy-saving briquette and analysed pollution
Linzhuan Ma, Mengyun Chen, Yuntao Gao, Zhiyin Wang & Junming Guo......655

Segmentation of point source and non-point source pollution load in the Nanliu River basin based on the digital filtering method
Jiping Qiao, Junfeng Dai, Zuowang Zhou & Junge Dai .....................................663

Research on the spatial-temporal characteristics of landscape pattern change in the coastal zone of Xiamen Bay during 1989–2010
Peng Chen, Guangfa Lin & Jian Wu .................................................................669

An evaluation of the threat of degradation of ecosystem function of the Upper Yangtze River based on GIS
Cheng Wuxue, Zhou Jieming, Wang Yukuan & Ren Ping ..................................681

Study on variation of flow and sediment in the middle Yangtze River since the 1950s
L. L. Zhu & H. Ge ..........................................................................................689

Application of hydrochemical analysis and tracer test in mine water-inrush source identification
Yan Zhang & Zaibin Liu ..................................................................................695

Variation of ammonia concentration during different management conditions
Feng Chen & Yushu He ....................................................................................701

Regulation technology for seedling growth in the plug seedling
J. Chen, J. H. Wu, H. P. Si & K. Y. Lin ...............................................................709

Research on the influence of coal mining on the environment in arid and semi-arid coal mining areas
Hao Wang .......................................................................................................717
Chapter 2: Environmental protection

Utilization of sulfate-reducing bacteria with fermented soybeans as a carbon source for the removal of sulfate in acidic wastewaters
Guijuan Ji, Guoyan Zhang, Shujie Zhao, Ning Li, Yuguo Cui & Yulong Cui ................................................................. 745

Microbial community and functional genes assessed by real-time quantitative PCR in an oil-contaminated environment
H. J. Liu, J. Han, H. L. Zhang, S. Chen, Y. Gong, Z. M. Yuan & J. Yao .............. 751

Research and application of a 3YL non-cyanide gold leaching agent
Fengyun Yang, Yaming Zhao, Luanning Li, Shujie Zhao, Yuguo Cui & Hongwei Liang .......................................................... 757

Correlation between PM2.5 and aerosol optical depth in Tehran, Iran
H. Karimian, H. Chen & Q. Li ........................................................................ 765

Recycling of waste engine oil using hydrazine hydrate as a decolorizing agent

The preliminary analysis of the ground water pollution pathway in Karst areas
Luo Wei, Yang Xiuli, Pei Yongwei & Shen Cheng ............................................. 781

Assessment of groundwater vulnerability in the basin of Yachihe and Goupitan in Guizhou province
Yang Xiu-li & Luo Wei ........................................................................ 785

Extraction efficiency study of VX in water by disperser liquid-liquid micro-extraction technique
Guohua Ma, Guohong Liu, Chuanzhi Chen, Xin Wang & Jianhui Chen ...... 791

The effect of arid environment on geological heritages:
take Ordos for example
Longlong Zhao & Mingzhong Tian ............................................................... 797

Urban domestic water consumption response to climate change in Urumqi city
Dou Yan.........................................................................................................................897

Seed germination, seedling growth and mortality of two different Distylium chinense populations to different flooding regimes in the Three Gorges Reservoir Region, China Chunyan Luan, Xiaoling Li, Jin Yang, Xuesong Wang & Fangqing Chen......905

Analysis of the existing problems and strategies of tourism environmental protection of tourism scenic areas in China Mingqi Wu.................................................................917

A 3D simulation system for chemical accidents based on an atmospheric dispersion model Huanfa Chen, Qi Li, Yajie Zhu & Hamed Karimian.................................923

Carbon dioxide exchange flux of bermudagrass (cynodon dactylon (linn.) pers.) from the water-level-fluctuate-zone of Three Gorges Reservoir, China Wenli Zhang, Ju Liu, Huijuan Xia, Jianzhu Wang & Quanfa Zhang.................931

Study of risk evaluation of mining collapse in Mentougou region Yongbo Teng, Naiqi Shen, Zhengshan Li, Xiaolu Xu & Yuqing Huang.........941

Optimization of superoxide dismutase immobilization carrier and the study on enzymatic properties C. X. Song, Q. Zhang, S. L. Song & X. Liu.................................................................947

Modelling of nitrogen leaching in different land uses in Dachong karst watershed in China Z. H. Wang, C. M. Xu & Li Wan.................................................................955

Controlling agriculture non-point source pollution on watershed scales Z. H. Wang, Y. G. Wu & L. Wan.................................................................965

On the non-productive factors of regional environmental problems Tang Ming, Le Leihan, Yan Ping & Zhong Dan.................................975

The risk assessment of seawater intrusion on the basis of GIS in Yantai coastal areas Xiangran Li, Gang Han & Youqian Qiao.................................983

Effect of mining subsidence on soil permeability and vertical nutrient loss at loess hilly coal areas Qing-jun Meng, Lin Ji, Qi-yan Feng, Qing Liu & Yangyang Zhong.................989
Mine water treatment in mine goaf with backfilled material
Xiangdong Li, Yangyang Zhong & Qi-yan Feng.................................997

Noise analysis of the wind turbine blade
Gwochung Tsai, Yita Wang, Yuhchuang Hu & Jaching Jiang.....................1003

The effects of film flow on headcut erosion of a gully in the dry-hot valley of Jinsha River, China
Nan Ling, Chen Anqaing, Xiong Donghong & Liu Gangcai........................1013

The influence of penetration fluid to the permeability coefficient of bentonite as a backfill material
Zhong Shen, Xiaoyuan Han, Yonghao Zhang, Lihui Liu & Zuhe Zhang..............1023

A sustainable development model of tourism estate
Shaojin Hao, Fu Chen & Shuang Liang..................................................1033

Invasive alien species in China: the current situation, problems and possible solutions
Congcong Xu....................................................................................1041

Volcanism is a key factor in climate change
Cuixiang Zhong.................................................................................1047

Application of fuzzy similar priority decision-making in selecting a city flower
Xiaoling Liu, Yanxia Zhang & Feng Yan.................................................1055

Recent 7.3 ka mud records of the East Asian winter monsoon from the inner shelf of the East China Sea
F. Xu, G. Sun & A. Li........................................................................1059

Research on an environmental risk assessment method by the cloud theory model
M. C. Li, G. Y. Zhang, Q. Si & S. X. Li..................................................1067

Times dynamic of soil phosphorus in the water-lever-fluctuation-zone of Xiangxi River in the Three Georges Reservoir Area
Tingting Song, Jianjun Du, Gangzhi Peng, Chenghu Zhang, Wenli Zhang & Jianzhu Wang........................................1073

The evaluation of ecological carrying capacity based on carbon emission reduction targets in Chongqing, China
Ling Li, Ming Li, Pengcheng Wang & Yan Xv........................................1081

Estimating extreme low temperature threshold in the Ob River Basin based on the Detrended Fluctuation Analysis Method
Juan Xue, Ziqiang Xia & Feng Huang................................................1085
Analysis of the relationship between economic growth and energy consumption and environmental pollution in Xinjiang
Xiangrong Song

Extension strategy generating of land use based on improved entropy
JianLin Wang & YinSheng Yang

Analysis of the influence of a drainage outlet on the nearby water quality of a large draining and drawing river mouth and a study on its management and countermeasures
De-Jun Du, Yun-Feng Xia, Min-Hui Shi, Yun-Cheng Wen & Hua Xu

The study and development of a self-centering seismic isolation system
Xinzhi Dang, Zhibo Wang, Wancheng Yuan & Deqin Song
