ENASE 2014

Proceedings of the
9th International Conference on
Evaluation of Novel Approaches to Software
Engineering

Lisbon, Portugal

28 - 30 April, 2014

Sponsored by
INSTICC – Institute for Systems and Technologies of Information, Control
and Communication

Technically Co-sponsored by
INVITED SPEAKERS

KEYNOTE SPEAKERS

Semiotics in Visualisation
Kecheng Liu

Why ERP Systems Will Keep Failing
Jan Dietz

Conceptual Modeling in Agile Information Systems Development
Antoni Olivé

An Engineering Approach to Natural Enterprise Dynamics - From Top-down Purposeful Systemic Steering to Bottom-up Adaptive Guidance Control
José Tríbolet

Data Fraud Detection
Hans-J. Lenz

PAPERS

FULL PAPERS

Visualizing Traceability Information with iTrace
Iván Santiago, Juan M. Vara, Valeria de Castro and Esperanza Marcos

Application of a Lightweight Enterprise Architecture Elicitation Technique Using a Case Study Approach
Nicholas Rosasco and Josh Dehlinger

The AXIOM Model Framework - Transforming Requirements to Native Code for Cross-platform Mobile Applications
Chris Jones and Xiaoping Jia

Understanding Class-level Testability Through Dynamic Analysis
Amjed Tahir, Stephen G. MacDonell and Jim Buchan

Investigating Defect Prediction Models for Iterative Software Development When Phase Data is Not Recorded - Lessons Learned
Anil Aydin and Ayça Tarhan

A System for Collaborative Building of Use Case Models: Communication Analysis and Experiences - Experiences of Use and Lessons Learned from the Use of the SPACE-DESIGN Tool in the Domain of Use Case Diagrams
Jesús Gallardo, Ana Isabel Molina, Crescencio Bravo and Fernando Gallego

Automated Generation of Activity and Sequence Diagrams from Natural Language Requirements
Richa Sharma, Sarita Gulia and K. K. Biswas

Recovering Software Layers from Object Oriented Systems
Alvine Boaye Belle, Ghizlane El Boussaidi and Hafedh Mili
Short Papers

Methods for Supporting Management of Interactions Between Quality Characteristics
Gabriel Alberto García-Mireles, Mª Ángeles Moraga de la Rubia, Félix García and Mario Piattini

Where Is Scrum in the Current Agile World?
Georgia M. Kapitsaki and Marios Christou

Designing Reusable Systems That Can Handle Change - Description-Driven Systems: Revisiting Object-oriented Principles
Richard McClatchey, Andrew Branson and Jetendr Shamdasani

Tool Independent Code Generation for the UML - Closing the Gap Between Proprietary Models and the Standardized UML Model
Arne Noyer, Padma Iyengar, Elke Pulvermüller, Florian Pramme, Joachim Engelhardt, Benjamin Samson and Gert Bikker

A GUI Modeling DSL for Pattern-Based GUI Testing - PARADIGM
Rodrigo M. L. M. Moreira and Ana C. R. Paiva

An Online Passive Testing Approach for Communication Protocols
Jorge Lopez, Xiaoping Che and Stephane Maag

An Evaluation to Compare Software Product Line Decision Model and Feature Model
Liana B. Lisboa, J. Jenny Li, P. Morreale, D. Heer and D. M. Weiss

A Business-Oriented Approach to Requirements Elicitation
Adam Przybylek

Flexible Business-oriented Service Interfaces in Information Systems
Michal Žemlička and Jaroslav Král

SOA-CoM: Building a Correct by Design Service Oriented Architectural Style - Supporting Structural and Non-functional Properties
Imen Graja, Imen Loulou and Ahmed Hadj Kacem

Improving Software Projects Inception Phase Using Games - ActiveAction Workshop
Miguel Ehécatl Morales-Trujillo, Hanna Oktaba and Juan Carlos González

Recovering Sequence Diagrams from Object-oriented Code - An ADM Approach
Liliana Martínez, Claudia Pereira and Liliana Favre

Service-oriented Platform for Virtual Reality Application Development
Evandro César Freiberger, Ricardo Nakamura and Romero Tori

Process Discovery - Automated Approach for Block Discovery
Souhail Boushaba, Mohammed Issam Kabbaj and Zohra Bakkoury

Models for Mobile Application Maintenance Based on Update History
Xiaozhou Li, Zheying Zhang and Jyrki Nummenmaa

Cyber-virtual Systems - Simulation, Validation & Visualization
Jan Olaf Blech, Maria Spichkova, Ian Peake and Heinz Schmidt

Function-centered Engineering of Embedded Systems - Evaluating Industry Needs and Possible Solutions
Marian Daun, Jens Höflinger and Thorsten Weyer
Towards a Discipline of Software Engineering Forensics Analysis
Paul Bailes, Christine Cornish, Toby Myers, Louis Rago, Nick Tate and Mai Thatcher

Automated Generation of Test Cases from Logical Specification of Software Requirements
Richa Sharma and K. K. Biswas

The Applicability of Present Estimation Models to the Context of Mobile Applications
Laudson Silva de Souza and Gibeon Soares de Aquino Jr.
