CONTENTS

18TH DESIGN FOR MANUFACTURING AND THE LIFE CYCLE CONFERENCE

INTRODUCTION......................................................................................................................... A1

CONCEPTUAL DESIGN, MANUFACTURABILITY ANALYSIS, MANUFACTURING COST ESTIMATION, AND TOTAL COST OF OWNERSHIP
DETC2013-12028 .................................................................................................................. V004T05A001
Manufacturability Analysis and Design Feedback System Developed Using Semantic Framework
  Arvind Rangarajan, Pradeep Radhakrishnan, Abha Moitra, Andrew Crapo, and Dean Robinson

DETC2013-12113 .................................................................................................................. V004T05A002
Interactive and On-Line Learning System for Assembly Task Motion Planning
  Yu Yan, Emilie Poirson, and Fouad Bennis

DETC2013-12736 .................................................................................................................. V004T05A003
Modeling and Estimation of Energy Usage for Double Skin Facades Buildings
  Guy Abou-Nassar and Zahed Siddique

DETC2013-13070 .................................................................................................................. V004T05A004
Knowledge Management for Semi-Automated Automotive Assembly Instruction
Authorship and Translation
  Matthew Peterson, Gregory Mocko, and Joshua Summers

DETC2013-13123 .................................................................................................................. V004T05A005
Preliminary Investigation on Generating an Explicit GD&T Scheme From a Process Plan
  Payam Haghighi, Prabath Vemulapalli, Prashant Mohan, Jami J. Shah, and Joseph K. Davidson

DESIGN FOR MASS CUSTOMIZATION, DESIGN FOR SERVICE, AND DESIGN FOR LAYERED MANUFACTURING
DETC2013-12311 .................................................................................................................. V004T05A006
Multi-Aspect Study of Mass Customization in the Context of Cyber-Physical Consumer Durables
  Shahab Pourtalebi, Imre Horváth, and Eliab Opiyo

DETC2013-12762 .................................................................................................................. V004T05A007
Business Domain Decision Method for Manufacturing and Service
  Hiroomi Onda, Toshiharu Miwa, Vincent R. Jackson, Kevin W. Reynolds, Dahwe Park, and Kurt A. Beiter

DETC2013-13114 .................................................................................................................. V004T05A008
A Knowledge Management Method for Supporting Conceptual Design of Product Service Systems
  Yutaro Nemoto, Fumiya Akasaka, and Yoshiki Shimomura
DETC2013-13624 ................................................................. V004T05A009
Quantification of Customer Perception on Airplane Cabin Lighting Design Based on
Cumulative Prospect Theory
Feng Zhou and Jianxin (Roger) Jiao

DETC2013-13663 ................................................................. V004T05A010
Service Failure Effects Analysis Based on Customer Perspective
Yusuke Kurita, Koji Kimita, Kantaro Watanabe, and Yoshiki Shimomura

DESIGN FOR QUALITY, ROBUST DESIGN, AND
UNCERTAINTY MANAGEMENT
DETC2013-12242 ................................................................. V004T05A011
Using Morphing Techniques in Early Variation Analysis
Ola Wagersten, Björn Lindau, Lars Lindkvist, and Rikard Söderberg

DETC2013-12418 ................................................................. V004T05A012
Process Capability – A Surrogate Measure of Process Robustness: A Case Study
S. C. Mondal

DETC2013-12814 ................................................................. V004T05A013
Variation Simulation of Stresses Using the Method of Influence Coefficients
Samuel Lorin, Lars Lindkvist, and Rikard Söderberg

DETC2013-13389 ................................................................. V004T05A014
Improvement of RFID Accuracy for a Product Tracking System
Chao Bian, Qingjin Peng, and Gong Zhang

DETC2013-13600 ................................................................. V004T05A015
Robust Adaptable Design of Mechanical Products
Jian Zhang, Yongliang Chen, Deyi Xue, and Peihua Gu

DESIGN FOR SUPPLY CHAIN
DETC2013-12464 ................................................................. V004T05A016
Optimizing Part Sourcing Strategies for Low-Volume, Long Life Cycle Products Using Second
Sourcing and Part Hoarding
Varun J. Prabhakar, Hannah Allison, Peter Sandborn, and Bo Eriksson

DETC2013-12587 ................................................................. V004T05A017
Product Resynthesis as a Reverse Logistics Strategy for an Optimal Closed-Loop Supply Chain
Chinmay Sane and Conrad S. Tucker

EMERGING DESIGN FOR X METHODS (E.G., RELIABILITY,
MAINTAINABILITY, AND RESILIENCE)
DETC2013-13026 ................................................................. V004T05A018
Design for Availability (DFAV) and Design for Cost (DFC): Developing World Peculiarities
Bashar S. El-Khasawneh
DETC2013-13325 ................................................................. V004T05A019
Automated Navigation of Method Time Measurement Tables for Automotive Assembly
Line Planning
Rahul Renu, Matthew Peterson, Gregory Mocko, and Joshua Summers

DETC2013-13542 ................................................................. V004T05A020
Warranty Prediction During Product Development: Developing an Event Generation Engine
Sivakumar Sundar, Marcos Esterman, Brian K. Thorn, and Carol Romanowski

DETC2013-13606 ................................................................. V004T05A021
Design for FDA: A Predictive Model for the FDA's Decision Time for Medical Devices
Lourdes A. Medina, Saylisse Dávila, Gül E. Okudan Kremer, and Richard A. Wysk

ENTERTAINMENT ENGINEERING
DETC2013-12133 ................................................................. V004T05A022
A Fatal Accident Case and Lessons for Entertainment Engineering
Kenji lino and Masayuki Nakao

INTEGRATED PRODUCT AND PROCESS DEVELOPMENT PROCESSES
DETC2013-12722 ................................................................. V004T05A023
Using Tolerance-Maps to Transfer Datum Plane From Design Tolerancing to Machining
Tolerancing
Ke Jiang, Joseph K. Davidson, Jami J. Shah, and Jianhua Liu

DETC2013-12846 ................................................................. V004T05A024
Option-Based Risk Management Method of Challenging Design Project
Yutaka Nomaguchi, Takahiro Horinouchi, Chunzhi Dong, and Kikuo Fujita

DETC2013-12922 ................................................................. V004T05A025
Automatic 3D Documentation Method for Manufacturing Processes
Daniel Strang, Anselm Schüle, and Reiner Anderl

DETC2013-13006 ................................................................. V004T05A026
Effective Reverse Engineering of Qualitative Design Knowledge: A Case Study of Aerospace
Pylon Design
Suo Tan, Yong Zeng, Greg Huet, and Clément Fortin

DETC2013-13270 ................................................................. V004T05A027
Tools and Components of Wound Healing Assessment
Jessica Chin, Ibrahim Zeid, and Sagar Kamarthi

LIFE-CYCLE DECISION MAKING
DETC2013-12294 ................................................................. V004T05A028
User Study: Influence of Number of Design Errors on Ability to Predict Performance With and
Without Controls
Somaiah Thimmaiah, Keith Phelan, and Joshua D. Summers

DETC2013-12639 ................................................................. V004T05A029
Systems Simulation of Design for End-of-Life Recovery Under Uncertainty
Sara Behdad, Aaron T. Joseph, and Deborah Thurston
DETC2013-12701  V004T05A030
Impacts of Government Policies, Fuel Cell Cost, and Battery Cost on Greenhouse Gas
Emission of Light-Duty Vehicles
   Swithin S. Razu and Shun Takai

DETC2013-13529  V004T05A031
Study on Life Cycle Assessment of Servo Press With Comparison to Flywheel Press
   Suiran Yu, Yu Liu, Lu Li, and Qingjin Peng

DETC2013-13680  V004T05A032
Decision Making Tool in Life Cycle Assessment for Packaging Sustainability
   Huihui Qi, Euihark Lee, and Hae Chang Gea

SUSTAINABLE DESIGN AND MANUFACTURING
DETC2013-12077  V004T05A033
Sustainable Design Education Through a Self-Directed Online System
   Jeremy Faludi and Adam Menter

DETC2013-12104  V004T05A034
Comparing Standards and Policies for Sustainability in Tolerance Optimization
   Steven Hoffenson and Rikard Söderberg

DETC2013-12219  V004T05A035
Design of Agricultural Waste Charcoal Cooking Fuel for Developing Countries
   Amy Banzaert and Amos Winter, V

DETC2013-12267  V004T05A036
Comparison of Sustainability Performance for Cross Laminated Timber and Concrete
   Joseph R. Piacenza, Irem Y. Tumer, S. H. Seyedmahmoudi, Karl R. Haapala, and
   Christopher Hoyle

DETC2013-12599  V004T05A037
Functional Impact Comparison of Common and Innovative Products
   Brady Gilchrist, Douglas L. Van Bossuyt, Irem Y. Tumer, Ryan Arlitt, Robert B. Stone, and
   Karl R. Haapala

DETC2013-12606  V004T05A038
Value Chain Simulation and Analysis Methods to Design Recycling Systems
   Romain Farel and Bernard Yannou

DETC2013-12974  V004T05A039
A Methodology and a Software Platform to Implement an Eco-Design Strategy in a
Manufacturing Company
   Michele Germani, Marco Mandolini, Marco Marconi, Maud Dufrene, and Peggy Zwolinski

DETC2013-12975  V004T05A040
A Decision Support Approach for Modeling Sustainability Consequences in an
Aerospace Value Chain
   Sophie Hallstedt, Anthony W. Thompson, Ola Isaksson, Tobias C. Larsson, and Henrik Ny
ShapeSift: Suggesting Sustainable Options in Design Reuse From Part Repositories
  Devarajan Ramanujan, William Benjamin, William Z. Bernstein, Niklas Elmqvist, and Karthik Ramani

Profiling Energy Consumption of Smartphone Users for Environmentally Efficient Business Decisions
  William Z. Bernstein, Devarajan Ramanujan, Fu Zhao, and Karthik Ramani

Environmental Burdens and the Light-Weighting of Rockets
  Yuriy Romaniw and Bert Bras

Tools for Sustainable Product Design: Review and Expectation
  Qingjin Peng, Arash Hosseinpour, Peihua Gu, and Zhun Fan

Development of a Product Information Model to Support Replacement Analysis
  Mehmet Murat Baysal and Utpal Roy

An Agent-Based Method to Investigate Customers' Preference in Product Lifecycle
  Hamid Afshari, Qingjin Peng, and Peihua Gu

Consistency Management System Between Product Design and the Lifecycle
  Shinichi Fukushige, Yuki Matsuyama, Eisuke Kunii, and Yasushi Umeda

ASME/IEEE INTERNATIONAL CONFERENCE ON MECHATRONIC AND EMBEDDED SYSTEMS AND APPLICATIONS

AUTONOMOUS SYSTEMS AND AMBIENT INTELLIGENCE

Design and Robust Recognition of Omnidirectional Landmarks for Indoor Mobile Robot Positioning
  Hanyu Liu, Xu Zhong, and Yu Zhou

A Combined Speed and Finite-Time Controller for an Underactuated Unmanned Surface Vessel Using Way-Point Navigation
  Brendan Baker, Chunjiang Qian, and Brent Nowak

Virtual Test Environment for Self-Optimizing Systems
  Jörg Stöcklein, Daniel Baldin, Wolfgang Müller, and Tao Xie
DETC2013-12765  Utilizing Augmented Reality Technology for Crowd Pedestrian Analysis Involving Individuals With Disabilities  
Daniel Stuart, Keith Christensen, Anthony Chen, Yong Kim, and YangQuan Chen

DETC2013-12878  Positioning System for the Interaction With Virtual Shapes Through a Desktop Haptic Device  
Mario Covarrubias, Monica Bordegoni, and Umberto Cugini

BIO-MECHATRONICS: MEDICAL DEVICES AND TECHNOLOGIES
DETC2013-12592  Design of a System for Upper-Limb Rehabilitation Based on an Electromechanical Orthosis and sEMG Wireless Sensors  
Marco Gentile, Matteo luale, Maura Mengoni, and Michele Germani

DETC2013-13337  Functional Modeling of Human Joints: A Feasibility Study for the Knee  
Michele Conconi and Vincenzo Parenti Castelli

DETC2013-13402  Simultaneous Identification of the Human Tibio-Talar and Talo-Calcaneal Joint Rotation Axes by the Burmester Theory  
Nicola Sancisi and Vincenzo Parenti-Castelli

DETC2013-13622  Cement Placement Optimization in Femoral Augmentation Using an Evolutionary Algorithm  
Ehsan Basafa and Mehran Armand

DETC2013-13636  Computer Assisted Femoral Augmentation: Modeling and Experimental Validation  
Ehsan Basafa, Ryan J. Murphy, Michael D. Kutzer, Yoshito Otake, and Mehran Armand

CYBER-PHYSICAL SYSTEMS AND HYBRID SYSTEMS
Daniel Stuart, Keith Christensen, Anthony Chen, Ke-Cai Cao, Caibin Zeng, and YangQuan Chen

DETC2013-12882  Principles on Collaborations in Cloud-Aided X (CLAX)  
Po Ting Lin and Yu-Cheng Chou

Yu-Cheng Chou

DETC2013-13543  Programming Modular Robots in a Simulated Environment for Hardware Control Validation  
Kevin J. Gucwa and Harry H. Cheng
| DETC2013-12059 | Second Order Accuracy Finite Difference Methods for Fractional Diffusion Equations | Yuki Takeuchi and Reiji Suda |
| DETC2013-12332 | Euler-Lagrange Equations on Cantor Sets | Dumitru Baleanu and Xiao-Jun Yang |
| DETC2013-12388 | Numerical Scheme for Generalized Isoparametric Constraint Variational Problems With A-Operator | Rajesh K. Pandey and Om P. Agrawal |
| DETC2013-12470 | A Gallery of Root Locus of Fractional Systems | J. A. Tenreiro Machado |
| DETC2013-12604 | Space- and Time-Fractional Legendre-Pearson Diffusion Equation | Malgorzata Klimek and Om Prakash Agrawal |
| DETC2013-12705 | Numerical Solutions of Generalized Oscillator Equations | Yufeng Xu and Om P. Agrawal |
| DETC2013-12724 | Fractional Order Sliding Mode Control Based on Fractional Order Reaching Law: Reaching Condition Analysis and Experimental Validation | Chun Yin, Zhuo Li, YangQuan Chen, and Shou-ming Zhong |
| DETC2013-12734 | Optimal Random Search, Fractional Dynamics and Fractional Calculus | Caibin Zeng and YangQuan Chen |
| DETC2013-12749 | Fractional Order Coulomb Friction Compensation: Convergence Analysis and Experimental Validation on a Fractional Horsepower Dynamometer | Sara Dadras, Hadi Malek, and YangQuan Chen |
| DETC2013-12793 | An Improved Maximum Power Point Tracking Based on Fractional Order Extremum Seeking Control for Grid-Connected Photovoltaic (PV) Systems | Hadi Malek, Sara Dadras, and YangQuan Chen |
Anti-Control of Chaos in Fractional Difference Equations
Changpin Li, Li Ma, and Huang Xiao

Radiation and Impedance Characteristics of a Circular Loop Antenna Driven by Fractional Order Electronics
Calvin Coopmans, Hadi Malek, and Edmund Spencer

Energy Considerations for Fractional Elements
Carl F. Lorenzo and Tom T. Hartley

Position Control of a Hybrid Actuator With Air Muscles and Spherical MR-Brake
Doruk Senkal and Hakan Gurocak

Sliding Mode Based LMI Criterion for Robust Stabilization of Uncertain Fractional Order Nonlinear Systems
Sara Dadras and YangQuan Chen

On the Energy Stored in Fractional-Order Electrical Elements
Tom T. Hartley, Robert J. Veillette, Carl F. Lorenzo, and Jay L. Adams

Optimizing Fourier Series Based Gaits for Modular Robots Using an Evolutionary Algorithm
David Ko and Harry H. Cheng

Energy Harvesting for Smart Shoes: A Real Life Application
Emanuele Frontoni, Adriano Mancini, Primo Zingaretti, and Andrea Gatto

Minimum Energy Cognitive Lighting Control: Stability Analysis and Experiments
Chun Yin, Brandon Stark, YangQuan Chen, and Shou-ming Zhong

Take-Home Mechatronics Control Labs: A Low-Cost Personal Solution and Educational Assessment
Brandon Stark, Zhuo Li, Brendan Smith, and YangQuan Chen

High Efficiency Electromagnetic Energy Harvester for Railroad Application
John Wang, Teng Lin, and Lei Zuo

Development of Model-Based Embedded Control Course Curriculum for Next Generation of Automotive Engineers
Bo Chen, Wei Luo, Pushkar Agashe, Lei Feng, Zicheng Ge, and Yang Li
MECHATRONIC CONTROL AND ELECTRICAL VEHICULAR SYSTEMS

DETC2013-12062 .............................................................. V004T08A039
Embedded Multi Core Virtual Prototyping for Software Engineers
Matthias Wenzl, Harald Schuster, Christian Obermayer, and Peter Balog

DETC2013-12785 .............................................................. V004T08A040
Study the Impact of Driver's Behavior on the Energy Efficiency of Hybrid Electric Vehicles
Lei Feng and Bo Chen

DETC2013-12888 .............................................................. V004T08A041
Experimental Assessment of the Clique Problem in FlexRay
Martin Horauer, Harald Schuster, and Peter Balog

DETC2013-13052 .............................................................. V004T08A042
Proposal for a Design Approach for Mechatronic Systems Based on Optimization Design and Case-Based Reasoning
Didier Casner, Rémy Houssin, Dominique Knittel, and Jean Renaud

DETC2013-13503 .............................................................. V004T08A043
Advanced Motion Control Design for Longitudinal Web Dynamics in Roll-to-Roll Systems: Velocity or Position Control?
Y. Martz, J. Frechard, and D. Knittel

MECHATRONICS AND EMBEDDED SYSTEMS APPLICATIONS

DETC2013-12118 .............................................................. V004T08A044
Design and Analysis of an Air/Electric Hybrid System
Yean-Ren Hwang and Shih-Yao Huang

DETC2013-12317 .............................................................. V004T08A045
Smart Vision System for Shelf Analysis in Intelligent Retail Environments
Adriano Mancini, Emanuele Frontoni, Primo Zingaretti, and Valerio Placidi

DETC2013-12530 .............................................................. V004T08A046
Wireless Charging of a Supercapacitor Model Vehicle Using Magnetic Resonance Coupling
Minfan Fu, Tong Zhang, Chengbin Ma, and Xinen Zhu

DETC2013-13343 .............................................................. V004T08A047
Thermal Control of Continuous Resistance Welding of Fiberglass Laminates for Automated Manufacturing
Iraj Mantegh, Imad Zammar, Mojtaba Ahmadi, and Ali Yousefpour

DETC2013-13450 .............................................................. V004T08A048
Handling Overruns and Underruns of Real-Time Processes With Precedence and Exclusion Relations Using a Pre-Run-Time Schedule
Jia Xu

SENSORS AND ACTUATORS

DETC2013-12378 .............................................................. V004T08A049
Design of a Biologically-Inspired Chemical Sensor
Jacquelyn K. S. Nagel
