CONTENTS

THERMAL MANAGEMENT

IPACK2013-73028 ................................................................. V002T08A001
Applications of Cold Plate Units With Micro-Channel for Cooling Electronics
Koichi Mashiko, Masataka Mochizuki, Kazuhiko Goto, Makoto Takahashi, Masahiro Matsuda,
Yasuhiro Horiuchi, and Tien Nguyen

IPACK2013-73031 ................................................................. V002T08A002
Direct Liquid Cooling of High Flux LED Systems: Hot Spot Abatement
Enes Tamdogan, Mehmet Arik, and M. Baris Dogruoz

IPACK2013-73033 ................................................................. V002T08A003
Heat Transfer due to the Impingement of an Axisymmetric Synthetic Jet Emanating
From a Circular Orifice: A Numerical Investigation of a Canonical Geometry
M. Ebrahim, L. Silva, and A. Ortega

IPACK2013-73039 ................................................................. V002T08A004
Novel Immersion Cooling Technique for a 3D Chip Stack
Ashish Sinha, Krishna Kota, Pablo Hidalgo, Yogendra Joshi, and Ari Glezer

IPACK2013-73042 ................................................................. V002T08A005
A Statistical Approach to Real-Time Updating and Automatic Scheduling of Physical Models
Huijing Jiang, Xinwei Deng, Vanessa Lopez, and Hendrik Hamann

IPACK2013-73043 ................................................................. V002T08A006
Thermal Transport Phenomenon in Circular Pipe Flow Using Different Nanofluids
Shuichi Torii

IPACK2013-73050 ................................................................. V002T08A007
Numerical Calculation of the Pulse Compression of Ultrashort Pulse Laser Light by
Means of the Thermoreflectance of SiC Substrate
Hong Duc Doan and Kazuyoshi Fushinobu

IPACK2013-73051 ................................................................. V002T08A008
New Method for Evaluating Heat Transfer Material
Yasuhiro Saito, Hiroyuki Emoto, Yuuki Tuji, and Takanori Komuro

IPACK2013-73052 ................................................................. V002T08A009
Steady and Transient Heat Transfer Analysis of the Microprocessor System Using
One-Dimensional Thermal Network
Koji Nishi, Tomoyuki Hatakeyama, and Masaru Ishizuka

IPACK2013-73056 ................................................................. V002T08A010
Study on the Flow and Heat Transfer Characteristics of Pulsating Heat Pipe With
Asymmetric Configuration
Gi Hwan Kwon and Sung Jin Kim

IPACK2013-73057 ................................................................. V002T08A011
Diagnostic Technique for Quantitative Resolution of Three-Dimensional Liquid-Gas Phase
Boundaries in Microchannel Flows
Ravi S. Patel and Suresh V. Garimella

Effect of Meniscus Recession on the Effective Pore Radius and Capillary Pumping of Copper Metal Foams
Mahmood R. S. Shirazy and Luc G. Fréchette

Improving the Thermal Performance of a Forced Convection Air Cooled Solution:
Part 2 – Effect on System-Level Performance
John Edward Fernandes, Saeed Ghalambor, Richard Eiland, Dereje Agonafer, and Veerendra Mulay

Improving the Thermal Performance of a Forced Convection Air Cooled Solution:
Part 1 – Modification of Heat Sink Assembly
Saeed Ghalambor, John Edward Fernandes, Dereje Agonafer, and Veerendra Mulay

Integration of a Multiple-Condenser Loop Heat Pipe in a Compact Air-Cooled Heat Sink

Daniel Trainer and Sung Jin Kim

Effect of Fin Interruptions on Natural Convection Heat Transfer From a Rectangular Interrupted Single-Wall
Golnoosh Mostafavi, Mehran Ahmadi, and Majid Bahrami

Experimental Study of the Convective Heat Transfer From a Geometrically Scaled Up 2D Impinging Synthetic Jet
Luis Silva, Alfonso Ortega, and Isaac Rose

Comparative Numerical Analysis of Angled Branching Microchannel Heat Sink
Cheng Chen, Emad Samadiani, and Bahgat Sammakia

Correlation Between Behaviors of the Vapor Bubbles and the Characteristics of the Heat Transfer Over the Heated Surface on MEB
Takahito Saiki, Tomohiro Osawa, Ichiro Ueno, and Chungpyo Hong

A Parametric Numerical Study in Cylindrical Oblique Fin Minichannel
Yan Fan, Poh Seng Lee, Li-Wen Jin, Beng Wah Chua, Na-Si Mou, and Mrinal Jagirdar

Experimental Measurement of the Thermal Performance of a Two-Die 3D Integrated Circuit (3D IC)
Leila Choobineh, Nick Vo, Trent Uehling, and Ankur Jain

</table>
Cooling Energy Reduction During Dynamically Controlled Data Center Operation
Pritish R. Parida, Timothy J. Chainer, Mark D. Schultz, and Milnes P. David

Open and Contained Cold Aisle Experimentally Validated CFD Model Implementing CRAC and Server Fan Curves for a Data Center Test Laboratory
Sami A. Alkharabsheh, Bharathkrishnan Muralidharan, Mahmoud Ibrahim, Saurabh K. Shrivastava, and Bahgat G. Sammakia

Effect of Cold Aisle Containment Leakage on Flow Rates and Temperatures in a Data Center
Sami A. Alkharabsheh, Saurabh K. Shrivastava, and Bahgat G. Sammakia

A Numerical Steady State and Dynamic Study in a Data Center Using Calibrated Fan Curves for CRACs and Servers
Sami A. Alkharabsheh, Bahgat Sammakia, Saurabh Shrivastava, Michael Ellsworth, Milnes David, and Roger Schmidt

Benefit of Cold Aisle Containment During Cooling Failure
Saurabh K. Shrivastava and Mahmoud Ibrahim

Assessment of the Energy Performance of Cogeneration Systems for Powering and Cooling Data Centers
Dale C. Ringham, Dan J. Rice, Brian S. Granetz, Hamza Salih Erden, H. Ezzat Khalifa, and Roger R. Schmidt

Transient Thermal Response of Servers Through Air Temperature Measurements
Hamza Salih Erden, H. Ezzat Khalifa, and Roger R. Schmidt

Room-Level Transient CFD Modeling of Rack Shutdown
Hamza Salih Erden, H. Ezzat Khalifa, and Roger R. Schmidt

Estimation Method of Temperature Distribution and Energy Saving Technology of Air Conditioner in Data Center
Kentaro Sano, Hayato Shimizu, Yoshihiro Kondo, and Takayuki Fujimoto

Compact Modeling of Data Center Air Containment Systems
Xuanhang (Simon) Zhang, James W. VanGilder, Christopher M. Healey, and Zachary R. Sheffer
