Preface and Acknowledgments  page ix

1  Introduction 1
  1.1 Is There a Warming-up of Lake Mendota? 1
  1.2 Onset of Nonlethal Lung Tumor 3
  1.3 The Transmission Potential of a Disease 8
  1.4 The Bangkok Cohort Study 10
  1.5 Inverse Problems, Censoring, Mixture Models and Shape Constraints 11
  1.6 Outline of the Book 15
  Exercises 16
  Bibliographic Remarks 17

2  Basic Estimation Problems with Monotonicity Constraints 18
  2.1 Monotone Regression 18
  2.2 Monotone Density Estimation 22
  2.3 Estimating a Distribution Function from Current Status Data 28
  2.4 Deconvolution Problem with Jump Kernel 31
  2.5 Generalized Isotonic Regression Problems 33
  2.6 Estimating a Monotone Hazard Rate 37
  Exercises 42
  Bibliographic Remarks 46

3  Asymptotic Theory for the Basic Monotone Problems 47
  3.1 Consistency 47
  3.2 Heuristic Asymptotics for the Grenander Estimator 51
  3.3 Convex Minorants: Basic Properties 55
  3.4 Some Empirical Process Theory 57
  3.5 Asymptotic Distribution in Exponential Deconvolution Model 60
  3.6 Limit Distribution of the Grenander Estimator 64
  3.7 Some Martingale Theory 67
  3.8 Asymptotic Distribution of the MLE in the Current Status Model 68
3.9 Chernoff's Distribution 73
3.10 The Concave Majorant of Brownian Motion and Brownian Bridge 77
Exercises 80
Bibliographic Remarks 86

4 Other Univariate Problems Involving Monotonicity Constraints 87
4.1 Wicksell's Corpuscle Problem 87
4.2 Convex Regression 91
4.3 Convex Density Estimation 93
4.4 Log Concave Densities 101
4.5 Star Shaped Distributions on [0, 1] 105
4.6 Deconvolution Problems 108
4.7 Interval Censoring Case 2 112
Exercises 116
Bibliographic Remarks 119

5 Higher Dimensional Problems 121
5.1 Competing Risks with Current Status Observations 121
5.2 Bivariate Interval Censoring 127
5.3 Current Status with Continuous Marks 132
5.4 Multivariate Log Concave Densities 134
Exercises 136
Bibliographic Remarks 138

6 Lower Bounds on Estimation Rates 139
6.1 Global and Local Minimax Risk 139
6.2 A Minimax Lower Bound Theorem 141
6.3 Lower Bound Based on the Van Trees Inequality 144
6.4 Applications 149
Exercises 152
Bibliographic Remarks 154

7 Algorithms and Computation 155
7.1 Algorithm: Concept and Convergence 156
7.2 The EM Algorithm 159
7.3 The Iterative Convex Minorant Algorithm 170
7.4 Vertex Direction Algorithms 177
7.5 The MLE in the Competing Risks Model with Interval Censoring 186
Exercises 192
Bibliographic Remarks 195

## Contents

12  **Pointwise Asymptotic Distribution Theory for Multivariate Problems**  360
    12.1 The ML Estimator in the Competing Risk Model with Current Status Data  360
    12.2 The SMLE in the Current Status Competing Risk Model  363
    12.3 The Bivariate Current Status Model  369
    Exercises  376
    Bibliographic Remarks  377

13  **Asymptotic Distribution of Global Deviations**  378
    13.1 The $L_1$ Loss of the Grenander Estimator  378
    13.2 Empirical $L_1$-Test for a Monotone Hazard  385
    13.3 Two-Sample Tests for Current Status Data  392
    Exercises  398
    Bibliographic Remarks  399
