6th International Conference
POWER SYSTEM PROTECTION
AND AUTOMATION
27-28 February 2014
New Delhi, India
PROCEEDINGS

Editors
V.K. Kanjlia
P.P. Wahi
S.G. Patki

Organized by
Central Board of Irrigation and Power
Malcha Marg, Chanakyapuri, New Delhi 110021

In association with
CIGRE India
CONTENTS

Foreword viii

PROTECTIONSCHEMESTRENDS IN DESIGN, NEW TECHNOLOGY, APPLICATIONS FOR IMPROVED RELIABILITY OF POWER SYSTEM 1

1. Fault Position Discrimination for Protection of Double-Circuit Transmission Lines 3

2. The Ground Fault Neutralizer – Smart Grid Protection for Everybody 18
   – Ken Barber and Klaus Winter

3. Impact of Mutual Coupling on Distance Protection with Specific Reference to Double Circuit LILO Lines 24
   – M. Vijaya Kumar and G. Raghavendra, Shaik Khaled Nadeem and Abhay Kumar

4. Protective Relay Setting Guide Lines for 220 kV, 400 kV and 765 kV Transmission Lines 38
   – B.S. Pandey, P.P. Francis, S.G. Patki, R.H. Satpute, R. Nagaraja, Bapuji Palki and Vikas Saksena

5. The New Distributed Busbar Protection IED Based on IEC 61850 49
   – CUI Chenfan and SONG Xiaozhou

6. Practical Application of Symmetrical Components in Relay Testing 55
   – Jason Buneo

7. Impact on the Power System Protection Due to High Penetration of Solar PV Technology and in Context of Distributed Generation 64
   – Deepak Kumar Saxena

8. Magnetically-Saturated Controlled Reactor Protection Based on Time Domain Translation Balance Differential Protection and Voltage Differential Protection 73
   – Xionghui, Chengxiao, Wen Jifeng, Lili and Chen Songlin

9. Rogowski Coil - A Novel Transducer for Current Measurement 80
   – Ashish S. Paramane, Avinash N. Sarwade, Pradeep K. Katti and Jayant G. Ghodekar

10. Utility of Backup Under Impedance Protection for Grid Connected Generators 89
    – S. Jagadish and D.R. Shanthi

    – Zhao Zhihong, Zhang Yuepin, Wu Yekai, Wei Huili and Mengyan
### PROTECTION SCHEMES TO HANDLE POWER SYSTEM DISTURBANCES AND PREVENTION OF GRID COLLAPSE

</table>
24. Digital Substations of Future – Communication Redundancy, Process Bus and Cyber Security  
   – S.R. Vijayan and Rajiv Krishnan

25. Experiences and Benefits with Substation Automation and Protection Schemes Based on IEC 61850  

26. Defining and Designing Communications Determinism for Substation Applications  
   – Dorran Bekker, Timothy Tibbals and David Dolezilek

27. The Digital Substation, an Imminent Reality  
   – José Miguel Yarza and Roberto Cimadevilla

   – Richard Marenbach and Boris Bastigkeit

29. Discovering the Digital Substation  
   – Simon Richards, Denis Chatrefou, Ritesh Bharat and Saurabh Makwana

30. Modular Integrated Distribution Automation System  
   – Ramesh Narayanan

31. Remote Relay Parameterization of IEC 61850 Compliant Relays & Condition Monitoring of Circuit Breaker  
   – Ganesh Murlidhar Mane, Nazirudeen Bahurudeen, Kumar Saurabh Dhabale and Mugdha J. Thakur

32. Applications of Protection Schemes Based on IEC 61850 Protocol During Transmission Network Expansion Projects in Tata Power  
   – Abhit Rao, S.G. Joshi, S.G. Patki and U.K. Maharaja

33. Installation, Commissioning and Integration of IEC 61850 Based IEDs for 145 kV / 33 kV Substation with Unified SCADA at Tata Power, Powai, Mumbai  
   – U.K. Maharaja, Bhagyashree S. Pisolkar and Nallasamy

34. Integrated Protection, Automation and Control in Distribution Substations  
   – V. Shivakumar and P. Naresh and E. Manikya Chakravarthi

35. Experience during Implementation of IEC-61850 based Protection, Automation and Remote Control System for EHV Sub-Station  
   – Amol Salunkhe, Prakash Y. Permalla, Ashish M. Waknis and Mahesh Ambardekar

36. Understanding the Differences Between an Office Switch and a Substation Switch  
MONITORING, METERING, FAULT DISTURBANCE RECORDING, FAULT LOCATION AND ANALYSIS AND APPLICATIONS OF PMUs, WIDE AREA MONITORING AND CONTROL

37. Research and Engineering Experience on Wide Area Protection System  
   – Bonian Shi, Jingtao Wu and Chenfan Cui

38. Application of Synchronphasors for Over Voltage Tripping Analysis - A Case Study in Northern Regional Power System of India  
   – P. Mukhopadhyay, Rajiv Porwal, Nitin Yadav and Ankit Gupta

39. Application of the Travelling Wave Fault Location Method on Transmission and Sub-Transmission Networks  
   – David Cole

   – P. Harding and A. Varghese, E. Avinash, D.H. Wilson, R. Folkes, A. Edwards and B.W.D. Berry

41. Fault Location by Travelling Waves : Application in High Impedance Events  
   – Carlos Alberto Dutra, Rafael Rosar Matos, Sergio Luis Zimath, Jurandir Paz De Oliveira, João Henrique Monteiro de Resende and Joaquim Américo Pinto Moutinho

42. Fault Classification for Double - Circuit Series - Compensated Transmission Lines  

43. Installation and Monitoring Experiences of the First Synchronized Measurement System in the Brazilian National Grid  

44. Applications of Phasor Measurement Units in Electrical Power System  
   – Jitendra D. Wadhwa and D.M. Patel

45. System Integrity Protection Scheme (SIPS) in Transmission Network of GETCO  
   – Nirav G. Barot

MANAGEMENT OF PROTECTION AND AUTOMATION SYSTEM, INFORMATION MANAGEMENT, TESTING, MAINTENANCE, TRAINING

46. The Engineering Application of Jianfeng Smart Substation Based on Integration of Power Secondary Systems  
   – Qing Lin, Wen-Long Wang, Shao-Qian Hu and Zhen-Yu Tang

47. Improvements in Protection Performance Through Analysis of Protection Performance Indices (PPI)  
   – Vishal Kulkarni, Akhilesh Chandrakar and Girish Jawale

48. The Demands and Implications of IT and OT Collaboration  
   – Mohamed Moussamir and David Dolezilek

xii
49. Ethernet Design for Teleprotection and Automation Requires a Return to First Principles to Improve First Response  
   – David Dolezilek  

50. Automatic Identification of Non Compliant Fault Records  
   – David Cole  

51. Case Study on Mal-Operation of the Transformer Low-Impedance Restricted Earth Fault Protection  
   – Liangfang Yin, Juanhong Nie, Chenfan Cui and Bin Wang  

52. Improvement of Power Quality in Rural and Urban Distribution Grids  
   – Marco Rahner, Oliver Schroedel and Robert Rosenberger  

53. Real-Time Thermal Rating and Active Control Improved Distribution Network Utilisation  
   – Graeme Lloyd, Ricardo Gomez Bouchet, Li Zou, Chang An and Ritesh Bharat  

54. Islanding of Power Distribution Network & Load Shedding in Industrial Process Plant  
   – Anil Kumar Choudhary  

55. Laboratory Testing of Phasor Measurement Units  
   – P. Kaliappan  

56. Check List for Audit of Fault Clearance System for 765 kV, 400 kV & 220 kV Substations  
   – B.S. Pandey, P.P. Francis, S.G. Patki, R.H. Satpute, R. Nagaraja, Bapuji Palki and Vikas Saksea  

57. New Possibilities in Field Testing of Distributed Protection Systems  
   – Thomas Hensler, Boris Bastigkeit and Christopher Pritchard  

58. Testing and Commissioning of IEC 61850 Based Substation  
   – Uttam Mishra  

59. GPS Synchronized End-to-End Testing of Distance Protection Schemes – A Field Experience  
   – P. Kaliappan, A.R. Ravikumar and A. Amruthakala  

60. Maximization of Renewable Energy Penetration in the Distribution System under Existing Protection  
   – Manohar Singh and K.S. Meera  

CASE STUDIES ON PROTECTION PERFORMANCE AND FAILURE ANALYSIS  

   – P.K. Pattanaik
