2011 18th Asia Pacific Software Engineering Conference

(APSEC 2011)

Ho Chi Minh, Vietnam
5-8 December 2011

Editors:

T. Thu K. Leung

IEEE Catalog Number: CFP11154-PRT
ISBN: 978-1-4577-2199-1
Message from the Conference Co-Chairs ................................................................. x
Message from the Program Co-Chairs ..................................................................... xi
Organizing Committee ........................................................................................... xii
Program Committee ............................................................................................. xiii
Steering Committee ............................................................................................. xvi

Session 1A: Project Management and Software Engineering Education

A Simultaneous Project Scheduling and Resource Binding Method Based on the Load-Capacity Model ................................................................. 1
Akinori Saito, Takumi Kusanagi, and Koichiro Ochimizu

Optimal Scheduling of Software Projects Using Reinforcement Learning ............................... 9
Frank Padberg and David Weiss

Assessing Teamwork Performance in Software Engineering Education: A Case in a Software Engineering Undergraduate Course ........................................... 17
Jian Chen, Guoyong Qiu, Liu Yuan, Li Zhang, and Gang Lu

Session 1B: Software Security and Safety

Proving Non-interference on Reachability Properties: A Refinement Approach ......................... 25
Marc Frappier and Amel Mammar

Memory Leak Detection Based on Memory State Transition Graph ........................................ 33
Zhenbo Xu, Jian Zhang, and Zhongxing Xu

Techniques for Analysing PDF Malware ......................................................................... 41
Caglar Ulucenk, Vijay Varadharajan, Venkat Balakrishnan, and Udaya Tupakula

Session 1C: Formal Methods

Derivation and Formal Verification of a Mode Logic for Layered Control Systems ...................... 49
Yuliya Prokhorova, Linas Laibinis, Elena Troubitsyna, Kimmo Varpaaniemi, and Timo Latvala
Stepwise Validation of Formal Specifications

Atif Mashkoor and Jean-Pierre Jacquot

Use Cases Modeling for Scalable Model-Checking

Amine Raji and Philippe Dhaussy

Session 2A: Software Testing I

A "Vibration" Method for Automatically Generating Test Cases Based on Formal Specifications

Shaoying Liu and Shin Nakajima

Formal Verification of Software Designs in Hierarchical State Transition Matrix with SMT-based Bounded Model Checking

Weiqiang Kong, Noriyuki Katahira, Masahiko Watanabe, Tetsuro Katayama, Kenji Hisazumi, and Akira Fukuda

Intrusive Test Automation with Failed Test Case Clustering

Chien-Hsin Hsueh, Yung-Pin Cheng, and Wei-Cheng Pan

An Automated Analysis of Errors for BPM Processes Modeled Using an In-house Infosys Tool

Alberto Bastias, Sidharth Bihary, and Suman Roy

Session 2B: Software Architecture I

Architecture-Centric Model-Driven Web Engineering

Ehan Escolt, Paul Strooper, Jörn Guy Suß, and Paul King

Executable and Translatable UML—How Difficult Can it Be?

Håkan Burden, Rogardt Heldal, and Toni Siljamäki

Towards a Framework for the Application of Model-Driven Development in Situational Method Engineering

Zahra Zohrevand, Yousef Mehrdad Bibalan, and Raman Ramsin

VisTML: A Visual Modeling Language for Model Transformation

He Xiao, Ma Zhiyi, Liu Yi, Chen Hongjie, and Shao Weizhong

Session 2C: Maintenance and Evolution

Extraction of Attribute Dependency Graph from Database Applications

Kaiping Liu, Hee Beng Kuan Tan, and Xu Chen

Applying Fellegi-Sunter (FS) Model for Traceability Link Recovery between Bug Databases and Version Archives

Ashish Sureka, Sangeeta Lal, and Lucky Agarwal

Toward Inconsistency Awareness in Collaborative Software Development

Phan Thi Thanh Huyen and Koichiro Ochimizu
A Concept Lattice for Recognition of User Problems in Real User Monitoring .................................................. 163
   Katsunori Oyama, Atsushi Takeuchi, Hua Ming, and Carl K. Chang

Session 3A: Software Testing II

RobustTest: A Framework for Automated Testing of Software Robustness ............................................................ 171
   Ali Shahrokni and Robert Feldt

STVL: Improve the Precision of Static Defect Detection with Symbolic Three-Valued Logic ........................................ 179
   Yunshan Zhao, Yawen Wang, Yunzhan Gong, Honghe Chen, Qing Xiao, and Zhaohong Yang

Integrating Model-Based Testing in Model-Driven Web Engineering .............................................................. 187
   Eban Escott, Paul Strooper, Jim Steel, and Paul King

Verification of Distributed Embedded Real-Time Systems and their Low-Level Implementations Using Timed CSP ........ 195
   Björn Bartels and Sabine Glesner

Session 3B: Software Architecture II

An Architecture of Dynamically Adaptive PHP-based Web Applications ........................................................ 203
   Shin Nakajima

A Design Methodology for Real-Time Distributed Software Architecture Based on the Behavioral Properties and Its Application to Advanced Automotive Software .................................... 211
   Mikio Aoyama and Hayaki Tanabe

Eliciting Unitary Constraints from Timed Sequence Diagram with Symbolic Techniques: Application to Testing .............. 219
   Boutheina Bannour, Christophe Gaston, and David Sen’at

An Effective Method for Dynamic Service Deployment on Mobile Devices .................................................. 227
   Jae Yoo Lee, Duc Vinh Tien Tran, and Soo Dong Kim

Session 3C: Metrics and Measurement

An Empirical Study of Requirements Elaboration in Object-Oriented Projects .................................................. 235
   Faiz Ali Shah and Ali Afzal Malik

A Case Study of Measuring Degeneration of Software Architectures from a Defect Perspective ............................ 242
   Zude Li and Jun Long

CMCD: Count Matrix Based Code Clone Detection .......................................................... 250
   Yang Yuan and Yao Guo

Cost Estimation Model for COTS Based Projects .......................................................... 258
   Habib Leffet, Sihem Ben Sassi, and Henda Ben Ghezala
Session 4A: Verification and Validation

AADL-based Modeling and TPN-based Verification of Reconfiguration in Integrated Modular Avionics .......................................................... 266
  Dajiang Suo, Jinxia An, and Jihong Zhu

Conformance Testing for OSEK/VDX Operating System Using Model Checking .......................................................... 274
  Jiang Chen and Toshiaki Aoki

Automated Verification of Load Tests Using Control Charts .......................................................................................... 282
  Thanh H.D. Nguyen, Bram Adams, Zhen Ming Jiang, Ahmed E. Hassan,
  Mohamed Nasser, and Parminder Flora

Evotec: Evolving the Best Testing Strategy for Contract-Equipped Programs .......................................................... 290
  Lucas Serpa Silva, Yi Wei, Bertrand Meyer, and Manuel Oriol

Session 4B: Software Architecture III

A Design Map for Recording Precise Architecture Decisions .................................................................................. 298
  Atsushi Sawada, Masami Noro, Han-Myung Chang, Yoshinari Hachisu,
  and Atsushi Yoshida

Aspects and Annotations for Controlling the Roles Application Classes Play for Design Patterns .................................................................. 306
  Rosario Giunla, Giuseppe Pappalardo, and Emiliano Tramontana

Object Oriented Software Clustering Based on Community Structure ........................................................................ 315
  Ural Erdemir, Umut Tekin, and Feza Buzluca

A Method to Derive Software Architectures from Quality Requirements ............................................................................ 322
  Azadeh Alebrahim, Denis Hatebur, and Maritta Heisel

Session 4C: Program Analysis

Recommending Proper API Code Examples for Documentation Purpose ........................................................................ 331
  Lee Wei Mar, Ye-Chi Wu, and Hewijin Christine Jiau

Understanding Source Code Differences by Separating Refactoring Effects ...................................................................... 339
  Sirinut Thangthumachit, Shinpei Hayashi, and Motoshi Saeki

Using Variability Models to Reduce Verification Effort of Train Station Models .......................................................... 348
  Andreas Svendsen, Øystein Haugen, and Birger Møller-Pedersen

Session 5A: Requirements Engineering

Requirements Maturation Analysis by Accessibility and Stability .............................................................................. 357
  Takako Nakatani, Toshihiko Tsumaki, Michio Tsuda, Mari Inoki, Shozo Hori,
  and Keiichi Katamine

Illusions and Perceptions of Transparency in Software Engineering .............................................................................. 365
  Yu-Cheng Tu, Clark Thomborson, and Ewan Tempero
A State Machine Analysis Support System Based on the Problem Frames ..................................................373
   Osamu Shigo and Kaoru Yokoyama

Modeling Timing Requirements in Problem Frames Using CCSL ..........................................................381
   Xiaohong Chen, Jing Liu, Frédéric Mallet, and Zhi Jin

Session 5B: Software Process and Quality

DREX: Developer Recommendation with K-Nearest-Neighbor Search and Expertise Ranking .................................................................389
   Wenjin Wu, Wen Zhang, Ye Yang, and Qing Wang

Value-Risk Trade-off Analysis for Iteration Planning in Extreme Programming ........................................397
   Xin Dong, Qiu-Song Yang, Qing Wang, Jian Zhai, and Günther Ruhe

Causal Factors, Benefits and Challenges of Test-Driven Development: Practitioner Perceptions .................................................................405
   Jim Buchan, Ling Li, and Stephen G. MacDonell

Towards a Tool-Supported Approach for Collaborative Process Modeling and Enactment .................................................................414
   Komlan Akpédjé Kedji, Minh Tu Ton That, Bernard Coulette, Redouane Lbath, Hanh Nhi Tran, and Mahmoud Nassar

Author Index ..............................................................................................................................................422
