2014 Twentieth National Conference on Communications

(NCC 2014)

Kanpur, Uttar Pradesh, India
28 February – 2 March 2014
128 Gbit/s × 80 Ch Signal Transmission Over 1840 Km of Standard G652.D Fiber 124

3-D Mobile Node Localization Using Constrained Volume Optimization Over Ad-Hoc Sensor Networks 403

A Bayesian Approach to Speaker Normalization Using Vowel Formant Frequency 790
A Broadband Cavity-backed Slot Antenna Design with Small Cavity Height and Analysis on Large Ground Plane 33
A Generic Real-Time Traffic Scheduler for OFDMA based Cellular Networks 88
A Geometrical Approach for Power Optimization in Relay-Based Cellular Networks 415
A Modified Rough Longest Common Subsequence Algorithm for Motif Spotting in an Alapana of Carnatic Music 692
A New Algorithm for Nonparametric Sequential Detection 212
A New Multilead ECG Data Compression Method Using Higher-Order Singular Value Decomposition 650
A Novel Compact Tri-Band Antenna Design for WiMAX, WLAN and Bluetooth Applications 772
A Novel Cubic-Phase Linear Chirp for Time Delay and Doppler Stretch Estimation 760
A Novel Method for Redundant Feature Rejection in Correspondence Problem 721
A Polymatroid Approach to Separable Convex Optimization with Linear Ascending Constraints 294
A Probabilistic Approach to Selecting Units for Speech Synthesis Based on Acoustic Similarity 533
A Range-Free Tracking Algorithm in Vehicular Ad-Hoc Networks 409
A Secure Transmission Scheme for Textual Data with Least Overhead 246
A Sliding-band Dynamic Range Compression for Use in Hearing Aids 350
A Spatio-Temporal Model for Estimation and Efficient Tracking of Dynamic Boundaries 545
A Strip Fed Wideband Rectangular Dielectric Resonator Antenna Using Perforations 374
An Approach to Building Language-Independent Text-to-Speech Synthesis for Indian Languages 654
An Enhanced Algorithm for the Quantification of Human Chorionic Gonadotropin (hCG) Level in Commercially Available Home Pregnancy Test Kits 289
An Improved Puncturing Method for Rate-compatible LDPC Codes 601
An Integrated Framework for Optimizing Power Consumption of Smart Antennas 578
An Object Recognition Algorithm Using Maximum Margin Correlation Filter and Support Vector Machine 194
Analysis of Fricatives, Stop Consonants and Nasals in the Automatic Segmentation of Speech Using the Group Delay Algorithm 698
Analysis of SAW Correlator Based Communication Systems Employing Binary Encoded Orthogonal Frequency Coding  362
Analysis of Scattering Parameters of a Stepped Cylindrical Horn Containing Inner Posts Using MM and 2-D FEM  437
Analysis of Weights for Optimal Positioning of Base Station in a Wireless Sensor Network  742
Application Resource and Activity Footprinting to Influence Management in Next Generation Clouds  613
Automated PCG Signal Delineation Method for Heart Sound Analysis  572
Automatic Phonetic Transcription for Read, Extempore and Conversation Speech for an Indian Language: Bengali  607

B
Balancing Energy Consumption Using Cluster Based Approach in Wireless Sensor Network  551
BER Performance of Switched Diversity Receivers over \( \kappa-\mu \) and \( \eta-\mu \) Fading Channels  39
Better Phone Alignment for Confidence Measures in Voice Based Querying  230
Burstiness Minimized Rate Control for High Resolution H.264 Video Conferencing  527

C
Characterization of Wireless Accelerometer Sensor and Its Industrial Applications  746
Class Based Priority Scheduling to Support Machine to Machine Communications in LTE Systems  784
Compact Fractal Shaped, Unequal Length Branch-line Coupler for Dual-band Applications  236
Comparative Study of Spectral Mapping Techniques for Enhancement of Throat Microphone Speech  45
Construction of Singer Subgroup Orbit Codes Based on Cyclic Difference Sets  334
Cross-lingual Acoustic Modeling for Indian Languages Based on Subspace Gaussian Mixture Models  252

D
Decentralized Cooperative Spectrum Sensing in Cognitive Radio without Fusion Centre  469
Design of a Novel Dual Band Patch Antenna Loaded with CELC Resonator for WLAN/WiMAX Applications  188
Dual Antenna Array for Radiolocation of RCIED Trigger  756
Dynamic Routing Framework for OMNET++ Based Hardware-in-the-Loop (HITL) Network Simulation  94

E
Effect of Frequency Granularity and Link Margin At 100G and Beyond Flexgrid Optical Networks  274
Effect of Multipoles in Resolution with Linear Sampling Method  637
Effective Approach to Reduce Complexity for HEVC Intra Prediction in Inter Frames  556
Energy Efficient Outsider Attacks on IEEE 802.15.4 Beacon Enabled Wireless Sensor Networks  356
Energy Optimized Caching Decision and Size for IP-TV Services Based on Estimated Arrival Rate 323
ePAB: Energy-Efficient, User-Preference Based Adaptive Multimedia Broadcast 589
Epochs Based Compression of LP Residual for Source Modeling in Text-to-Speech Synthesis 443
Equality Conditions for Quantum Quasi-Entropies Under Monotonicity and Joint-Convexity 224
Estimation of Allpass Transfer Functions by Introducing Sparsity Constraints to Particle Swarm Optimization 50
Experiments on Front-End Techniques and Segmentation Model for Robust Indian Language Speech Recognizer 262

F
Fast and Robust Real Time Digital Video Stabilization with Smear Removal Using Integral Projection Curve Warping Technique 218
FPGA Based Implementation of High Speed Tunable Notch Filter Using Pipelining and Unfolding 311
Frequency Planning for Cellular Network Employing Carrier Aggregation 642
Frequency Reconfigurable Antenna Using PIN Diodes 448
FTTx Link Design Using Bend-Insensitive Fibers 166

G
Group Delay Based Phone Segmentation for HTS 200

H

I
Illuminant Colour Based Image Forensics Using Mismatch in Human Skin Highlights 619
Implementation of Multi-hop Time Synchronization on Miniature Test-bed Setup of Underwater Acoustic Sensor Network 583
Improved PSK Classification Using Spectral Correlation Functions 539
Improving Mobile Phone Based Query Recognition with a Microphone Array 344
In-Network Online Asynchronous Regression Over a Wireless Network 299
Instrument Identification Using PLCA Over Stretched Manifolds 183
InternetHDR: Enhancing an LDR Image Using Visually Similar Internet Images 391
Investigation on Crosspolar Performance of a Coaxial Fed Dual Mode Matched Rectangular Feed Horn with Step Discontinuity 566

J
Joint Channel Estimation and Data Detection in MIMO-OFDM Systems Using Sparse Bayesian Learning 474
K

Load-aware Routing for Non-Persistent Small-World Wireless Mesh Networks 12
Local Binary Pattern for Automatic Detection of Acute Lymphoblastic Leukemia 133
Localized Image Enhancement 177
Low Complexity Spectrum Sensing Algorithm Robust to Noise Uncertainty 503

M

MAC Channel with States for Pulse-based Communication Systems 338
Maximizing Utility Among Selfish Users in Social Groups 82
MIMO Decode-and-Forward Relay Beamforming for Secrecy with Cooperative Jamming 106
Modified Greedy Pursuits for Improving Sparse Recovery 732
Monaural Speaker Segregation Using Group Delay Spectral Matrix Factorization 452
Multi Channel Speech Dereverberation Using LP Residual Cepstrum in an Adaptive Beamforming Framework 480

N

New Encoding Schemes for Efficient Multilingual Text Messaging 492
No-Sense: Sense with Dormant Sensors 368
Node-splitting Constructions for Large Girth Irregular and Protograph LDPC Codes 284
Novel Approach Limiting Non-Square Prediction Unit (PU) Estimation in HEVC 498
Novel RSSI Evaluation Models for Accurate Indoor Localization with Sensor Networks 521

O

On Bounds and Capacity of Cognitive Multiple Access Z-Interference Channel 737
On Segmentation of MR Images Using Curvelet and Fuzzy C-Means Under Compressed Sensing 127
On the Capacity of Full and Partial CSI Based Transmission Link Selection in Decode-and-Forward Cooperative System 751
On the Performance of Underwater Communication System in Noise with Gaussian Mixture Statistics 726
On Using Complex Homotopy for Impulse Noise Cancellation in Images 432
On White-Space Detection, Localization and Coverage 379
Optimal Channel Stopping Rule Under Constrained Conditions for CRNs 257
Optimal Communication Scheduling for Iterative Decoding of Irregular Codes 18
Optimal Power Allocation Policies for Low Powered Wireless Communication Systems 464
Optimization of All Optical AND Gate for OOK Data At 10 Gbps 329
Optimized Codes for Bidirectional Relaying 150
Sparsity Based Face Modelling and Detection with Small Sample Problem 172
Spectrum Sensing with Censoring of Double Threshold Based Cognitive Radios in Rayleigh Fading 100
Speech Biometric Based Attendance System 595
SRS-based User Proximity Detection in LTE Small Cells 160
Study of Dual-Hop Urban Optical Wireless Communication (UOWC) Systems with Amplify and Forward Relay 458
Study on Ultra-thin Dual Frequency Metamaterial Absorber with Retrieval of Electromagnetic Parameters 67
Subcarrier Based Resource Allocation 671

T
The Jamming Capacity of the Fading Multiple Access Channel 317
Throughput Analysis of Best-m Feedback in OFDM Systems with Uniformly Correlated Subchannels 515
Throughput Enhancement Using Network Modulation in Cooperative Communication 138

U
URL Classification Using Non Negative Matrix Factorization 206
User-Based Integrated Offloading Approach for 3GPP LTE-WLAN Network 631
Utilizing Graph Sampling and Connected Dominating Set for Backbone Construction in Wireless Multimedia Sensor Networks 686

V
Video Codec Framework (VCF): Novel Firmware Architecture for Video Hardware 28
Vision-based Detection of Power Distribution Lines in Complex Remote Surroundings 659

W
Wavelet Based Spectrum Sensing in a Multipath Rayleigh Fading Channel 305
Wireless Sensor Network Based Advisory System for Apple Scab Prevention 144

Z
Zero-Crossings Based Spectrum Sensing Under Noise Uncertainties 397
