Contents

Framework for the Distributed Computing of the Application Components .................................................. 1
Razvan-Mihai Aciu, Horia Ciocarlie

Analysis of Statistical Characteristics of User Arrival Process to the Testing Service ........................................ 13
Artem Adzhemov, Nikolay Albov, Irina Sineva

The Role of Enterprise Social Networking (ESN) on Business: Five Effective Recommendations for ESN .............. 23
Saeed M. Alqahtani, Sultan Alanazi, Derek McAuley

Dependability and Safety Analysis of ETCS Communication for ERTMS Level 3 Using Performance Statecharts and Analytic Estimation ................................................................. 37
Tomasz Babczyński, Jan Magott

Entropy-Based Internet Traffic Anomaly Detection: A Case Study ................................................................. 47
Przemysław Bereziński, Józef Pawelec, Marek Małowidzki, Rafał Piotrowski

A Formal Approach for Preventive Maintenance Workload Balancing ............................................................. 59
Ammar Bessam

Computer Support for the Railway Safety Management System – Requirements Analysis .................................. 69
Andrzej Białas

Computer Support for the Railway Safety Management System – First Validation Results .................................. 81
Andrzej Białas
Reductions of Operators in Java Mutation Testing .......................... 93
Ilona Bluemke, Karol Kulesza

An Approach for Planning and Analysis of the Sewage Sanitary Networks Using Some Calculation Formulas and Computer Simulation ................................................................. 103
Lucyna Bogdan, Grażyna Petriczek, Jan Studziński

Mathematical Model of Task Scheduling in Educational Cloud ................................................................. 115
Agata Brzozowska, Jerzy Greblicki

Optimization and Control of Transport Processes in the Distributed Systems ................................................................. 123
Alexander Buslaev, Mikhail Volkov

On Some Resources Placement Schemes in the 4-Dimensional Soft Degradable Hypercube Processors Network .................. 133
Jan Chudzikiewicz, Zbigniew Zielinski

Efficient Training of Context-Dependent Neural Nets with Conjugate Gradient Algorithms ................................................................. 145
Piotr Ciskowski

Analysis of Mutation Operators for the Python Language ...... 155
Anna Derezinska, Konrad Halas

Deterministic Schedule of Task in Multiprocessor Computer Systems with Higher Degree of Dependability .................. 165
Mieczyslaw Drabowski, Edward Wantuch

Using Simulation to Evaluate Dynamic Systems with Weibull or Lognormal Distributions ................................................................. 177
Ernest Edifor, Neil Gordon, Martin Walker, Yiannis Papadopoulos

FSM Simulation of Cryptographic Protocols Using Algebraic Processor ................................................................. 189
Alexander Frolov, Alexander Vinnikov

Disturbance Injection in Dependability Assessment of Android Applications ................................................................. 199
Piotr Gawkowski, Maciej Sulek

Approximate Algorithm for Fast Capacity Provisioning in WANs with Trade-Off between Performance and Cost under Budget Constraint ................................................................. 211
Mariusz Gola, Adam Czubak
Contents XI

Evolution of Software Quality Models in Context of the Standard ISO 25010 .................................................. 223
Oleksandr Gordieiev, Vyacheslav Kharchenko, Nataliia Fominykh, Vladimir Sklyar

Model Checking of UML Activity Diagrams in Logic Controllers Design .................................................. 233
Iwona Grobelna, Michal Grobelny, Marian Adarnski

Impact of Selected Java Idioms on Source Code Maintainability — Empirical Study .................................. 243
Bogumila Hnatkowska, Anna Jaszczak

Quantification of Temporal Fault Trees Based on Fuzzy Set Theory .................................................. 255
Sohag Kabir, Ernest Edifor, Martin Walker, Neil Gordon

Analysis of Physical Layer Model of WLAN 802.11g Data Transmission Protocol in Wireless Networks Used by Telematic Systems .................................................. 265
Zbigniew Kasprzyk, Mariusz Rychlicki

Web Systems Availability Assessment Considering Attacks on Service Configuration Vulnerabilities .................. 275
Vyacheslav Kharchenko, Alaa Mohammed Abdul-Hadi, Artem Boyarchuk, Yuriy Ponochovny

A Recommender System Based on Content Clustering Used to Propose Forum Articles .................................. 285
Urszula Kuzelewska, Ewa Guziejko

Simple Measure of Network Reliability Using the Variance of the Degree Distribution .......................... 293
Ho Tat Lam, Kwok Yip Szeto

CDM: A Prototype Implementation of the Data Mining JDM Standard .................................................. 303
Piotr Lasek

Confidential Transportation of Data on the Technical State of Facilities .................................................. 313
Dariusz Laskowski, Piotr Lubkowski

Test of the Multimedia Services Implementation in Information and Communication Networks ................. 325
Piotr Lubkowski, Dariusz Laskowski

Unified Approach to Network Systems Multicriterial Analysis .................................................. 333
Jacek Mazurkiewicz
A Comparison of Forecasting Methods for Ro-Ro Traffic: A Case Study in the Strait of Gibraltar ........................................ 345
José Antonio Moscoso López, J.J. Ruiz-Aguilar, I. Turias, M. Cerbán, M.J. Jiménez-Come

Partial Blur: Model, Detection, Deblurring ........................................ 355
Dmytro Peleshko, Mariya Rashkevych, Andriy Klyuvak, Yuriy Ivanov

Software Support for Common Criteria Security Development Process on the Example of a Data Diode ........................................ 363
Dariusz Rogowski

Increasing Performance of SMS Based Information Systems ............ 373
Mariusz Rychlicki, Zbigniew Kasprzyk

Internet-Based Production Monitoring and Reporting ...................... 383
Krzysztof Sacha, Wojciech Pikulski

Reliability Analysis of a Two-Stage Goel-Okumoto and Yamada S-shaped Model .................................................. 393
Ioannis G. Sideratos, Agapitos N. Platis, Vasilis P. Koutras, Nicholas Ampazis

Reliability Assessment of Cooperation and Replacement of Surveillance Systems in Air Traffic ........................................ 403
Mirosław Siergiejczyk, Karolina Krzykowska, Adam Rosiński

Swarm Intelligence Metaheuristics Application in the Diagnosis of Transformer Oil .................................................. 413
Anis Smara, M'hana Bouktit, Ahmed Boubakeur

Performance Aspect of SaaS Application Based on Tenant-Based Allocation Model in a Public Cloud ...................... 423
Wojciech Stolarz, Marek Woda

Low Cost FPGA Devices in High Speed Implementations of Keccak-f Hash Algorithm ........................................ 433
Jarosław Sugier

Distributed Time Management in Wireless Sensor Networks ....... 443
Tomasz Surnacza, Bartosz Wojciechowski, Maciej Nikodem, Mariusz Słabicki

Heuristic Cycle-Based Scheduling with Backfilling for Large-Scale Distributed Environments ........................................ 455
Victor Toporkov, Anna Toporkova, Alexey Tselishchev, Dmitry Yemelyanov, Petr Potekhin
Behavior of Web Servers in Stress Tests .......................... 467
Tomasz Walkowiak

The Impact of Reconfiguration Time on the Dependability of
Complex Web Based Systems ................................. 477
Tomasz Walkowiak, Dariusz Cuban

Propagation Losses in Urban Areas .......................... 489
Marian Wnuk, Leszek Nowosielski

Web Service for Data Extraction from Semi-structured Data
Sources .......................................................... 499
Marina V. Yashina, Ivan I. Nakonechnyy

Investigation of System Reliability Depending on Some
System Components States ................................... 511
Elena Zaitseva, Vitaly Levashenko, Miroslav Kvassay

Model Fusion for the Compatibility Verification of Software
Components .................................................... 521
W.M. Zuberek

Author Index ...................................................... 531
