**Preface**  
XXV  

**Conference organization**  
XXVII  

**Acknowledgements**  
XXXVII  

---

**T.Y. LIN LECTURE**

Conceptual design of bridges  
M.C. Tang  

---

**KEYNOTE LECTURES**

Bridge “examineering” or how monitoring and UHPFRC improve the performance of structures  
E. Brühwiler  

Assessment of existing structures in France: Standard and advanced practices  
C. Cremona  

Life-cycle performance monitoring and evaluation of long-span bridges  
J.P. Ou, X.G. Zhang, H. Li, M.S. Pei & N. Li  

Four decades of inspecting a suspension bridge cable  
B.T. Martin  

Performance enhancement of bridges and other structures through the use of fibre-reinforced polymer (FRP) composites: Some recent Hong Kong research  
J.G. Teng, S.S. Zhang, Q.G. Xiao, B. Zhang & D.N. Fernando  

Life cycle management of steel-concrete composite bridges  
M.M.S. Cheung & K.K.L. So  

The future of ageing metallic bridges  
M.K. Chryssanthopoulos & B. Imam  

Durability of steel orthotropic bridge decks  
J.W. Fisher & S. Roy  

The outstanding legacy of Edgar Cardoso: An audacious and visionary Portuguese bridge engineer  
P.J.S. Cruz  

---

**MINI-SYMPOSIA**

**Data management & analysis for bridge monitoring results**

Organizers: A. Miyamoto, I. Hakola, A. Yabe & G. Watanabe  

Simplified method of bridge durability determination  
H. Zobel, Th. Alkhafaji & M. Wróbel  

3-D visualization for better bridge asset management  
J.K. Shaffer, L.D. Tanase, B.D. Witter & T.W. Gilmore  

A structure’s fatigue evaluation through fluctuating stress measurement during service and effective plan of maintenance  
S.O. Na, C.J. Cha, I.H. Kim & N.Y. Park  

---
Real-time fatigue life evaluation of steel suspension bridge
P. Hradil & I. Hakola

Basic principles of global bridge monitoring, testing and analyzing system
I. Hakola, P. Hradil & M. Halonen

Practical application of a health monitoring system for short- and medium-span bridges based on public bus vibration
A. Miyamoto

Data management and damage criteria for a health monitoring system based on public bus vibration
H. Emoto, A. Miyamoto & A. Yabe

Proposal for prediction of fatigue crack propagation in steel bridges using K-gages
M. Yamanishi, T. Yamagami, S. Tsukamoto, T. Uesugi, S. Fujita & Y. Kannoto

Evaluation methods of thermal movements in cable-supported bridges based on monitoring data

Development of a health monitoring system for short- and medium-span bridges based on public bus vibration
A. Yabe, A. Miyamoto & H. Emoto

Life-cycle assessment of bridge performance in an aggressive environment
Organizers: I. Iwaki, M. Akiyama & D.M. Frangopol

Safety assessment and life-circle management of large-span steel suspension bridges in its design lifetime
Y. Zeng, A.R. Chen, R.J. Ma, H.M. Tan & J.L. Ren

A method for life circle fatigue assessment of suspension bridge hangers based on in-situ traffic investigation
Y. Zeng, D.H. Chen & H.M. Tan

Life-cycle reliability of RC jetties in a marine environment using Markov model and sequential Monte Carlo simulation
K. Takenaka, M. Akiyama, D.M. Frangopol & I. Yoshida

Time-dependent reliability analysis of CFST arches for in-plane stability considering concrete creep
W. Jiang & D.G. Lu

Life-cycle vehicle carrying safety assessment for highway RC Grillage Narrow Bridge considering carbonation and corrosion
Z. Sun, Y. Zhang & Y. An

Experimental study on the bond strength of corroded reinforced concrete

Seismic performance of reinforced corroded concrete bridge piers
C.Q. Fang, Z.J. Yuan, J.M. Zhang & J. Zhu

Numerical simulation of corroded reinforced concrete bridge piers under cyclic loading
H.J. Zhou, X. Xu, Z.H. Fang & F. Xing

Analysis of the performance of the concrete specimens subjected to cyclic loading and aggressive environment
J. Göringer & M. Foglar

Time-variant risk of aging bridges under seismic mainshock followed by aftershocks
Y. Dong, D.M. Frangopol & S. Sabatino

Sustainability-based pre-earthquake probabilistic retrofit optimization of highway bridges considering risk attitudes
Y. Dong, D.M. Frangopol & S. Sabatino

Risk assessment of bridges with partially or fully closed lanes
B.J. Zhu & D.M. Frangopol
Stochastic deterioration modelling and residual performance assessment of concrete bridges affected by corrosion
H.P. Chen & N. Xiao

Bridge loading – Measurement and modelling
Organizers: C. Caprani & X. Ruan

Simplified probabilistic model for maximum traffic load from weigh-in-motion data
M. Soriano, J.R. Casas & M. Ghosn

Field-calibrated influence line for the application of BWIM technology on wide bridge
B. Long, H. Zhao, X.D. Shao & C.J. Tan

Experimental study on load capacity variation with pier scour depth

Continuous prestressed concrete bridge: Loss of full continuity
J. Huang & D. Woehl

Evaluation and modeling of wrought iron bridge in Bahia
A.C. Marques, A.R. Borges & T.N. Bittencourt

Are current bridge load modelling techniques realistic for existing road bridges?
M.A. Treacy & E. Brühwiler

Dynamic simulation analysis for vehicle-bridge interaction on a simply supported multi-T-girder bridge
L.W. Zhang, H. Zhao & X.D. Shao

Finite element analysis of ultimate load-carrying capacity for double-deck and three main trusses steel bridge with rigid cable

From innovative investigations in a prestressed concrete bridge to repair project
A. Houel, D. Germain & A. Mathey

Characteristics of pedestrian crowd flow demand for vibration serviceability of footbridges
J. Keogh, R. Duignan & C.C. Caprani

Vehicle load statistical distribution characteristics for highway bridges based on WIM system
Y.J. Xu, H.J. Zhang & Z.H. Xia

Adjusting AASHTO LRFD design live load using recent weigh-in-motion data
B. Sivakumar

Static-dynamic load testing of the Nanpanjiang suspension bridge
Y. Zhong

Statistical traffic load model based on WIM measurements for bridge fatigue assessment
L.M. Sun & S.W. Sun

Visual evaluation and remaining service life assessment of a reinforced concrete arch bridge: Çayirhan bridge
A. Caner & A. Turer

Traffic loading model for long span multi-pylon suspension bridge: Using WIM data and performance design concepts
J.Y. Zhou, X. Ruan & X.F. Shi

Bridge performance assessment and prediction using monitoring
Organizers: A. Strauss & D.M. Frangopol

Detecting the limits of accuracy of lifetime predictions by structural monitoring
D. Sanio, M.A. Ahrens & P. Mark

Reliability prediction of bridge structures based on Bayesian dynamic nonlinear models and MCMC simulation
X.P. Fan & D.G. Lu
Risk assessment of bridge schemes comparison in ecological landscape zone at the preliminary design stage
Y. Zeng, H.M. Tan, Z.F. Xiang, Z.H. Li & F. Yu

Early damage warning of railway bridge in time-domain based on statistical learning theory
D.S. Shan, Z. Huang, I. Khan & C.Y. Fu

Modal parameters identification of combined cable-stayed suspension bridge in time-frequency domain
D.S. Shan, Z. Huang, Q. Li & I. Khan

On the evaluation of a ductility criterion for shear failure based on the crack widening velocity
Ch. Fust, M.A. Ahrens & P. Mark

A wireless sensor node for vibration measurement of large civil infrastructure

Load bearing capacity assessment of existing concrete bridges supported by results from NDT
L. Topczewski & J. Ciesla

Enhancement of the Chong Qi bridge project girder sections to reduce vortex shedding induced oscillations by applying passive tuned mass damper systems
C. Meinhardt, X. Yin, Y. Luo & X. Gao

Structural health monitoring of a steel girder bridge rehabilitated with full depth full width precast deck panels over the red river near the town of Morris, Manitoba
R.M. Ellis, H.M. Vogel, B. Wood, K. Amy & R. Eden

Smartphones and mass market microcontrollers for bridge monitoring applications
G. Morgenthal & N. Hallermann

Future maximum load effect based on WIM data and its application
G. Fu, P. Yen, J. You & L. Liu

Vibration based structural model updating and damage identification of bridges
H.P. Chen

Investigations on the correlation-based determination of damping in engineering structures
M. Österreicher, A. Strauss, K. Bergmeister, D. Prammer, T. Zimmermann & R. Flesch

Resistant-wear road expansion joints
A. Strauss, T. Zimmermann, S. Lachinger, S. Hoffmann, M. Delatoni & D.M. Frangopol

Design and management of highway and railway Brazilian bridges
Organizers: T.N. Bittencourt & L.C. Meneghetti

Assessment of the structural conditions of the bridge “Fazenda Modelo”
L.M. Trautwein & L.C. Almeida

Estimating concrete strength using field testing data

Structural health monitoring and numerical analysis of a steel railway bridge on the river Santa Maria

A bridge management system for Brazil
F.F. Fontes, R.C. Verly, G.S. Santos, E.P. Magalhães

Bridges maintenance – the Brazilian experience
J. Timermant

Research and applications in bridge health monitoring
Organizers: F.N. Catbas, J. Casas, H. Furuta & D.M. Frangopol

Quantifying deterioration or damage levels with novel bridge monitoring concepts
G.D. Chen

Fatigue crack growth monitoring of welded tubular structures using piezoelectric film acoustic emission sensor
Y. Zhang, C. Zhou & L.W. Tong
Continuous monitoring of bearing forces and displacements in the High Coast Bridge
L. González & R. Karoumi

Analysis of safety assessment based bridge management system in Korea

Vibration-based damage detection and damage-induced stress redistribution of a real steel truss bridge
C.W. Kim, K.C. Chang, S. Kitauchi & M. Kawatani

Data summarization for heterogeneous infrastructure using spike-based monitoring technique
G. Sundaresan, L.L. Wu, H.-B. Yun, K.-T. Park & J.-W. Kim

Bridge field testing by using wireless and laser Doppler sensing technologies – Case studies
K.S. Dai & Z.H. Huang

Application of contemporary programming techniques in health monitoring software of suspension spanning structure
D.S. Shan, J. Dong, J.C. Yang, S.X. Zhang, I. Khan & Z. Huang

Joint distribution of wind speed and direction of Sutong Bridge based on SHMS
H. Wang, J.R. Zhang, Y.T. Tao & T. Guo

A wavelet based drive-by bridge inspection system
P.J. McGetrick & C.W. Kim

Quantitative non-destructive evaluation of damages in a steel plate bonding method
H. Tachibana, K. Nakamoto, Y. Yamaguchi & S. Hirose

Wavelet domain analysis for identification of vehicle axles in the application of BWIM technology
C.J. Tan, H. Zhao, W.W. Xiao & Y.Z. Wang

Mode shape-informed tension force estimation of stay cables
B.F. Yan, X.D. Shao, M. Soliman & D.M. Frangopol

Damage quantification and localization algorithms for indirect SHM of bridges

On the impact of prior perception on bridge health diagnosis

Application of a novel time series based method for damage detection, localization and quantification using output only acceleration data
Q. Mei & M. Gul

Visual inspection strategies for large bridges using Unmanned Aerial Vehicles (UAV)
N. Hallermann & G. Morgenthal

Non-target displacement measurement of structures using vision based approaches
T. Khuc & F.N. Catbas

Operational performance monitoring of the critical mechanical components of a movable bridge
M. Malekzadeh & F.N. Catbas

Experimental study on the extant pre-stressed force to a 20-year old concrete simply-supported beam
Y. Huang & Z.Z. Fang

Application of the Acoustic Emission Method of identification and location of destructive processes to the monitoring of concrete bridges
B. Goszczyńska, G. Świt, W. Trąmpczyński & A. Krampikowska

Monitoring of traffic induced vibrations on concrete bridges: A case study
A. Fiore, G.C. Marano & P. Monaco

Wind vibration characteristic of Bogazici suspension bridge using structural health monitoring data
N.M. Apaydin, B. Dogan & C. Zulfıkar
Vulnerability modeling and risk assessment of bridges subjected to multiple threats

Organizers: J.E. Padgett & C. Caprani

Multi-hazard reliability analysis of bridges based upon damage indices
S. Kameshwar & J.E. Padgett

Influence of live loads on component and system level highway bridge seismic fragility
C.C. Caprani, J. Ghosh & J.E. Padgett

Tsunami risk assessment of bridges based on an AHP-FUZZY algorithm
J. Andrić & D.G. Lu

Risk-based combination of earthquake and scour hazards for the design of reinforced concrete bridges
Z.H. Wang, L. Dueñas-Osorio & J.E. Padgett

A framework for risk-based optimum cable replacement strategies for cable-stayed bridges
B.F. Yan, M. Soliman & D.M. Frangopol

Terrorism risks for bridges in a multi-hazard environment
M.G. Stewart & J. Mueller

The seismic, blast and fire resilience of concrete-filled FRP tube (CFFT) bridge columns
A. Echevarria, A.E. Zaghi, V. Chiariotto & R. Christenson

The influence of the different bridge pier reinforcement arrangements on the performance under vehicle impact
P. Jiříček & M. Foglar

Strategies for safety assurance of bridges exposed to multiple climate-related threats
C.C. Caprani, J.E. Padgett & W.K. Chiu

Displacement-based fragility analysis of typical multi-span RC bridges
G. Tecchio, F. Longo, M. Donà & C. Modena

Fatigue cracks in orthotropic plates – A case study
G. Tecchio, M. Caldion, F.P. Marchesini, M.A. Zanini, M. Donà, C. Pellegrino & C. Modena

Hazard analysis of cable-stayed bridges with cable-sliding friction seismic bearing
J. Zhong, Y.T. Pang & W.C. Yuan

Seismic fragility analysis of multi-span deep water bridges
Y.T. Pang, K. Wei, J. Zhong, W.C. Yuan & G.Y. Shen

Management and strengthening of bridges – An Australian perspective

Organizers: N. Powers, R. Al-Mahaidi & X.L. Zhao

A study of the bond of FRP-concrete using shear-lap tests in Australia
H.B. Pham & R. Al-Mahaidi

From independent span viaduct to statically indeterminate bridge thanks to longitudinal external prestressing tendons
R. Sadone, B. Jacquier & D. Germain

Deterioration modeling using condition inspection data and engineering judgment
N. Powers & S. Hinkeesing

Deterioration forecasting of concrete bridge elements in Victoria, Australia using a Markov Chain

The strengthening of the Westgate Bridge using FRP composites and innovate anchorage systems
R. Kalfat & R. Al-Mahaidi

Rehabilitation of alkali-aggregate reaction damaged bridge columns using CFRP composites
T. Kubat, R. Al-Mahaidi & A. Shayan

Strengthening of fire-damaged bridge columns using CFRP fabrics
Y.S.S. Al-Kamaki, R. Al-Mahaidi & I. Bennetts
Preliminary study on modular assembly of GFRP sandwiches for potential bridge superstructures
S. Satasivam, Y. Bai & X.L. Zhao

Innovative FRP space frame structure for pedestrian bridge application
X. Yang, Y. Bai & X.L. Zhao

Experimental study on repair of steel plate with different damage degrees subject to fatigue loading

Fatigue design of CFRP strengthened welded steel connections
C. Wu, X.L. Zhao & M. Motavalli

Research on strengthening effect of the prestressing technology on the deteriorating trussed combination arch bridge
G.W. Yao & T. Li

West Gate Bridge – fatigue cracking treatment works
J. Silla-Sanchez, J. Noonan & R. Percy

Assessment and strengthening of urban toll-way viaducts at Southern Link, Melbourne:
Part 1 Assessment
L.J. Walsh, H.B. Pham & K. Forsterling

Assessment and strengthening of urban toll-way viaducts at Southern Link, Melbourne:
Part 2 Strengthening
L.J. Walsh, H.B. Pham & K. Forsterling

Dangerous bridge details
Organizer: P.G. Malerba

Experiment study on pier-girder joint in long-span high-pier continuous rigid-frame bridge
R.Z. Zhou, D. Liu & Y.H. Yang

Riveted steel elements deformed by the swelling of interstitial rust. A study on a residual bearing capacity
P.G. Malerba & L. Sgambi

Structural safety of segmental concrete bridges during construction
F. Biondini & P.G. Malerba

Life-time perspective for design and maintenance of short, medium, and long-span bridges

Early age cracking in high performance concrete decks of a curved steel girder bridge
Y. Xia, H. Nassif, D. Su, C. Na & P. Lou

Application of live load model for design of long span cable bridges
E.-S. Hwang, D.-Y. Kim & J.-Y. Mok

Investigation of deflection and vibration criteria for bridges
E.-S. Hwang, X.H. Le, Q.H. Nguyen & J.-W. Jeon

Vision-based monitoring system for estimating cable tensile forces of cable-stayed bridge
S.W. Kim, N.S. Kim, Y.M. Kim & J.C. Park

Effect of support rotational stiffness on tension estimation of short hanger ropes

Application of vibration control devices for bridge design and maintenance
Y.M. Kim, Y.S. Kim & J.S. Hwang

Application of elasto-magnetic based stress sensors for measurements of cable tension force in cable-stayed bridge
S.W. Shin, J. Yim, M.L. Wang & C.B. Yun

Understanding of engineering significance of heritage bridges
N.K. Hong, H.-M. Koh & S.-G. Hong
Reliability-based safety assessment of bridges
S. Shin, I. Paik, D.J. Kim & S.-S. Ahn

Long span suspension bridges – bridge information modeling
V. Samec, J. Stampler, H. Sorsky & T.W. Gilmore

Reliability analysis of wind load for long-span bridges
C.H. Yoo & H.K. Kim

Evaluation of existing railway bridges using structural health monitoring and finite element modeling
D. Su, H. Nassif & P. Lou

Employment of probabilistic concept in development of design manual for long-span cable-supported bridge
S.H. Lee, H.S. Lee & I. Paik

Modeling of train-bridge dynamic interaction system for bridges with stepped-beam cross-sections
Y.J. Wang, H. Nassif, P. Lou & E.S. Hwang

Fusion of multisensor data for bridge deflection estimation

MAINLINE – Maintenance and management of railway bridges
Organizers: J.S. Jensen & P. Cruz

Influence of advanced assessment methods on the LCA of elderly bridges
M. Soriano & J.R. Casas

Challenges within Life Cycle Cost (LCC) studies and Life Cycle Assessment (LCA)
P. Linneberg, A.O.S. Solgaard, K. Eriksen & J.S. Jensen

MAINLINE – MAINtenance, renewal, and Improvement of rail transport infrastructure to reduce economic and environmental impacts
J.S. Jensen, M. Sloth, P. Linneberg, B. Paulsson & L. Elfgren

Life-cycle assessment tool for railway infrastructure
D. Castillo, P. Linneberg & R. Puddicombe

Lifetime analysis of infrastructures
P.J.S. Cruz, H. Gervásio & L. Simões da Silva

Test to failure of a steel truss bridge – Calibration of assessment methods

Extending the life of elderly rail bridges by strengthening
J. Nilimaa, T. Blanksvård, B. Täljsten, L. Elfgren, A. Carolin & B. Paulsson

Performance profiles of ageing steel railway bridges affected by atmospheric corrosion
A.N. Kallias & M.K. Chryssanthopoulos

Life cycle management of infrastructures

Developing a life-cycle based management system for bridge disaster prevention

Smart carbon fiber reinforced concrete for structural health monitoring
F.Y. Yeh, C.C. Chen, K.C. Chang & W.C. Liao

Seismic assessment, maintenance and management of Taiwan highway bridges

Modeling on water and chloride transport in cracked unsaturated concrete
L.C. Wang & J.W. Bao

Steel jacket repairing of reinforced concrete bridge columns under near-fault ground motion
Reliability-based structural performance evaluation of deteriorated RC bridges 324

Involving the social costs in the Markov-based bridge maintenance optimization in Hong Kong 325
H. Gao & X.Q. Zhang

Probability-based damage evaluation for RC bridges considering the corrosive and seismic hazards in Taiwan 326
C.K. Chiu

Time-dependent reliability analysis of corroded existing RC bridges 327
X.Y. Sun, H.L. Wang, Z.C. Zhang & H. Pan

Probabilistic shear strength models for reinforced concrete deep beams 328
T. Wu, X. Liu, B.B. Lv & D.M. Frangopol

Performance-based detection, evaluation and strengthening of existing bridges
Organizers: C.S. Wang, E. Brühwiler & Y.E. Zhou

Fatigue safety examination of riveted railway bridges using monitored data 331
E. Brühwiler

Technical research on the seamlessness and continuity transformation of existing multi-span simply-supported hollow slab bridge 332
J.-C. Dong, B.C. Chen, Y.-Z. Zhuang, B. Briseghella & C.-W. Yang

Criteria and indices systems for comprehensive evaluation on bridge substructure 333
Q. Huang, Z.W. Huang, Y. Ren, J.Z. Sun & J.G. Zheng

Effect of diaphragm on integrity of precast T-shape girder bridge based on inner force analysis 334
Y.W. Niu, Y. Zhao, S. Rong & P.M. Huang

Life-cycle bearing performance analysis of prestressed concrete continuous rigid frame bridge considering corrosion of steel strand 335
X.M. Wang, S.H. He, P.F. Ge & H.Y. Li

Durability evaluation for service RC bridges based on AHP method 336

Fatigue crack detection and evaluation in a welded steel girder highway bridge 337
C.C. Fu, G. Zhao, T. Saad, Y. Zhang & Y.E. Zhou

Fatigue performance-based detection and monitoring of orthotropic steel decks 338
C.S. Wang, Q. Dong, L. Tian, M. Soliman & D.M. Frangopol

Fatigue performance-based safety evaluation and maintenance of orthotropic steel bridge decks 339
C.S. Wang, M.S. Zhai, D.M. Frangopol, M. Soliman, Q. Dong & X.T. Li

Member performance and distortion-induced fatigue damage at common bridge details 340
I.C. Hodgson, B.T. Yen & Y.E. Zhou

Performance-based fatigue evaluation of concrete girder bridges 341
C.S. Wang, P.J. Zhang, E. Brühwiler, M.S. Zhai & L. Duan

Performance-based retrofitting methods for distortion-induced fatigue in steel girder bridges 342
C.S. Wang, Y.J. Sun, M.C. Wei, Y.E. Zhou, X.Q. Wei & X.K. Quan

Performance-based safety evaluation of concrete beam bridge 343
Q. Wang, R. Li & C.S. Wang

Research on performance-based reinforcement methods for orthotropic steel decks 344
C.S. Wang, C. Li, L. Duan, L. Tian & E. Brühwiler

Development and challenge of bridge monitoring and maintenance in China
Organizers: L.P. Feng, N. Li & B. Hu

Fatigue damage monitoring and residual life evaluation for the orthotropic steel deck of HZMB Jianghai Navigation Bridge 347
B. Hu, G.J. Zhang, L.P. Feng & S. Hao
The function of bridge health monitoring system and the application examples in bridge operation
Z. Liang, L.P. Feng & N. Li

Study on structural health monitoring system of Nanjing 4th Yangtze River Bridge
Z.Q. Liu, L.P. Feng, N. Li & H. Xie

Dynamic responses analysis of long-span suspension bridge with the action of both running vehicle and cross wind
Q. Ma & L.P. Feng

Research on dynamic behavior of cracked simply supported girder bridge under moving vehicular loads
S.W. Ma & F.L. Liu

The precision research report of key detection index data of dynamic weighing system on Qingzhou Bridge
H.G. Wang

The spectrum analysis of GPS dynamic deformation monitoring on Qingzhou Bridge
H.G. Wang

The present situation and experience of maintenance management of the long and huge bridge
J. Zhang, Y.S. Jiang & Z.L. Long

Null live load point identification method of live load for continuous rigid frame bridges based on monitoring data

Safety margins in bridge's fatigue design and a structural fatigue-damage evaluation diagram (SFED)
S. Hao

SPECIAL SESSIONS

Steel bridge rehabilitation
Organizer: M. Sakano

Orthotropic steel deck design to extend the lifetime of plate and box girder bridge and viaducts
A. Pipinato

Railroad bascule bridge load rating
Y.Z. Yang & D.A. Magistro

Fatigue damage test and analysis of U-ribs butt weld of steel orthotropic deck

Evaluation for cable bands on suspension bridges at the stage of maintenance
T. Fujiwara, Y. Kobayashi & H. Ikeda

Durability of a new type of pot bearing for short span railway bridge
H. Namiki, F. Yamada, S. Toriyama, K. Matsumoto, H. Suzuki & Y. Yamaguchi

Fatigue stress analysis of the U rib to deck weld connections in orthotropic steel deck

Numerical simulation on fatigue crack growth of orthotropic steel highway bridge deck
J.S. Zhu, Y.H. Guo & Y. Xing

Fatigue strength improvement of out-of-plane gusset joints under plate bending by ultrasonic peening
K. Kinoshita, A. Imamura, Y. Watanabe & M. Handa

Large scale structure improvement for the purpose of the fatigue damages risk reduction
K. Tokumasu, K. Amo, S. Kawamura & H. Ueda

The Finnish steel bridge program
J. Wuorenjuuri

Clayhithe bridge strengthening
R. Singh & G. Sivasamynathan

Development of monitoring system for bridge collapse detection by energy harvest with solar cell
H. Shirahata, N. Ueda & A. Kishida
Fatigue cracking in riveted cross-frame connection angles
L.L.-Y. Lai

Maintenance and reinforcement technique of Tianjin Jiefang Bridge
Z.Y. Han

A lightweight composite bridge deck system
Z. Zhang, X.D. Shao, W.G. Li & J.H. Cao

Extending fatigue life for steel bridge by girder link method and its verification
O. Shokaku, Y. Aoki, A. Tabata & K. Tokumasu

A study about the impact tests of a low noise railway bridge with the rubber-latex mortar coating
N. Taniguchi, M. Hansaka, F. Ohkubo, S. Satake & Y. Sugino

Forensic engineering for bridges: State of the art and future trends
Organizers: S. Arangio & C. Crosti

Forensic information modeling in bridge renovation: Sherman Minton Bridge

Bridge failure modes due to local scour
N. Tanasic & R. Hajdin

Safety of bridges and breakwaters by the latest draft of Japanese load and resistance factor design for roadway bridges
E. Watanabe

Extreme load performance and design of bridges for accelerated bridge construction
Organizer: M. Saiid Saiidi

Numerical simulation and analysis of composite steel-concrete bridges

Seismic performance of two-column bridge piers with innovative precast members and pipe pin connections
A. Mehrsoroush & M.S. Saiidi

Blast resilience of concrete-filled FRP tube (CFFT) bridge columns
A. Echevarria, A.E. Zaghi, V. Chiarito & R. Christenson

Construction control simulation for cable-stayed bridges based on geometrically nonlinear analysis
J. Wu, D.M. Frangopol & M. Soliman

Bridge maintenance strategies towards enhanced serviceability
Organizers: A.H. Malik & C.C. Fu

A proposal for weighted optimization method on bridge health integrity through corroded steel bridge infrastructure
Arong, S. Murakami & I. Hosoe

Experimental research on mechanical performance of hooping strengthening RC arch rib
H. Sun, Y.J. Qian & X.G. Li

Los Angeles International Airport (LAX) second level roadway rehabilitation
R.M. Firme

Maintainability of the expansion joints: case study of the joint failure on the Tydings Bridge
C.C. Fu & N. Zhang

Seismic retrofitting provided enhanced serviceability with minimum maintenance
A.H. Malik

On the fatigue behavior of precast concrete bridge decks in high-speed railway lines
C.F. Sousa, J.F. Rocha, R. Calçada & A.S. Neves

Structural redundancy, robustness and resilience of bridges
Organizers: F. Biondini & D.M. Frangopol

Condition rating of concrete bridges based on structural robustness
G. Anitori, J.R. Casas & M. Ghosn

Robustness issues and hybridization of a Tuned Mass Damper system on a suspension bridge model under variable wind buffeting
M. Domaneschi, L. Martinelli & E. Po

Robustness of passive and semi-active control schemes on a cable stayed bridge under extreme loading conditions
M. Domaneschi & L. Martinelli

Lifetime resilience of aging concrete bridges under corrosion
A. Titi, F. Biondini & D.M. Frangopol

Lifetime robustness of a RC bridge pier under corrosion considering bridge importance
V. Di Silvestri, F. Biondini, A. Titi & D.M. Frangopol

System reliability-based bridge design using redundancy factors
B.J. Zhu & D.M. Frangopol

Risk and bridge management
Organizer: L. Klatter

Natural hazards and impacts on Florida bridges and sign structures
J.O. Sobanjo, P.D. Thompson & R.I. Kerr

Use of advanced bridge management system analytical tools in Prince Edward Island Department of Transportation and Infrastructure Renewal
D.J. Evans & R.M. Ellis

Incorporating fatigue risk in a bridge management system
P.D. Thompson, J.O. Sobanjo & R.I. Kerr

Management of overweight traffic risk on road bridges
E. DeBiasi, R. Zandonini & D. Zonta

Management of railway culverts in Finland
J. Wuorenjuuri

Optimal intervention strategies for multiple object types affects by both manifest and latent processes using a Markov model
N. Lethanh, B.T. Adey & D.N. Fernando

Assessment and management of risks at bridge and network levels
G. Klanker & L. Klatter

Research update of a typical bridge management system applied to a UK local authority
B.M. Kamya

Nondestructive condition assessment of highway bridges for safety enhancement
H. Bakamwesiga, J. Mwakali & S. Thelandersson

Exploring the economic consequences of the risk induced by earthquakes
F. Carturan, C. Pellegrino & C. Modena

Cable vibration mitigation, inspection and monitoring
Organizer: H.J. Zhou

Analyses and study of local inflexibility of pipes containing straight non-penetrative cracks under bending moment
D. Liu, J.S. Hu, T. Zhu & J. Zhou
Prediction of inclined cable galloping using a 2DOF aeroelastic model
A. Arash, S. Cheng & D.S.-K. Ting

Recommendations for the shear assessment of reinforced concrete solid slab bridges
E.O.L. Lantsoght, C. Van der Veen, J.C. Walraven & A. De Boer

**Bridge life cycle design – Approach and practice application**
Organizers: G. Liu & J.H. Ma

A rational method for determining design life of bridge components
G. Liu, J.H. Ma, R.G. Wang & L.J. Huang

Method of deterioration analysis of bridge components under dominant environmental attack considering the influence of secondary environmental attacks
J.H. Ma, G. Liu, R.G. Wang & L.J. Huang

Analysis on safety risks during operation of Chinese highway bridges
W.J. Li, J.L. Zhao, M. Feng & X. Li

Performance analysis for vessel collision on pile foundation with cap under soil surface
Q.H. Feng & H.B. Wu

Research on mix proportion design and properties of internal curing concrete in bridges
R. Guo, X.G. Zhang, G. Liu, G.P. Li, M.Z. An & S. Han

Design concept and approach on sustainable development of bridge engineering
X.G. Zhang, G. Liu, J.H. Ma, H.B. Wu & W.M. Wu

Mechanical properties and influence factors of Reactive Powder Concrete (RPC)
Q.L. Xu, H. Zhang, H.C. Li & J. Li

HSE assessment in operation period and HSE facility design of a bridge
Y. Wang, J.H. Ma, X.L. Du, Q.M. Gao & Q. Zhou

Research on initial gap of transverse restrainer device for simply-supported bridge under earthquake
Y.Q. Xu, Z.X. Li, Q.L. Xu, J.H. Ma & T.Y. Zhong

**Latest achievements in integral abutment bridges**
Organizers: B. Briseghella & T. Zordan

Italian national road authority IABs strategy
J.Q. Xue, B. Briseghella, B.C. Chen, T. Zordan & E. Mazzarolo

Optimization of Calatrava Bridge in Venice
T. Zordan, E. Mazzarolo, B. Briseghella, B.C. Chen, Y. Feng, E. Siviero & L. Fenu

Equivalent linearization of bridges with bilinear isolation systems
T. Zordan, E. Mazzarolo, Q.L. Zhang, B. Briseghella & T. Liu

**GENERAL SESSION**

Preventive maintenance for an old steel railway bridge in Japan: Experimental and numerical study
