Contents

Preface ................................................................................................................................. xi

1. An Introduction to Sequence-Controlled Polymers ................................................. 1
   Jean-François Lutz

   Biological Polymers and Bio-Inspired Methods

2. The Language of Protein Polymers ................................................................. 15
   Felipe García Quiroz and Ashutosh Chilkoti

3. Precision Sequence Control in Bioinspired Peptoid Polymers ......................... 35
   Jing Sun, Caroline Proulx, and Ronald N. Zuckermann

4. Peptide-Polymer Conjugates as Model Systems To Explore the Functional
   Space of Precision Polymers ................................................................................... 55
   Niels ten Brummelhuis, Sebastian Wieczorek, Patrick Wilke, Thorsten Schwemmer,
   and Hans G. Börner

5. DNA-Templated Chemistries for Sequence Controlled Oligomer Synthesis .... 71
   P. J. Milnes and R. K. O’Reilly

6. Recent Advances in Solid Phase Polymer Synthesis: Polyamides from
   Tailor-Made Building Blocks ............................................................................... 85
   Felix Wojcik, Daniela Ponader, Simone Mosca, and Laura Hartmann

7. Solid-Phase Synthesis as a Tool for the Preparation of Sequence-Defined
   Oligomers Based on Natural Amino Acids and Synthetic Building Blocks .... 103
   Delphine Chan-Seng and Jean-François Lutz

   Sequence Regulation in Synthetic Polymerization

8. Synthesis of Sequence-Controlled Copolymers Using Time-Regulated
   Additions of N-Substituted Maleimides in Styrenic Radical
   Polymerizations ....................................................................................................... 119
   Nathalie Baradel, Olga Shishkan, Sansanee Srichan, and Jean-François Lutz

9. RAFT for the Control of Monomer Sequence Distribution – Single Unit
   Monomer Insertion (SUMI) into Dithiobenzoate RAFT Agents ......................... 133
   Graeme Moad, Carlos Guerrero-Sanchez, Joris J. Haven, Daniel J. Keddie,
   Almar Postma, Ezio Rizzardo, and San H. Thang
10. Selective Single Monomer Radical Addition via Template-Assisted Ring Closure: A Feasibility Study toward Sequence Control in Vinyl Polymers with Peptide Templates ............................................. 149
   Makoto Ouchi, Yusuke Hibi, Takahiro Arima, Daisuke Hayata, and Mitsuo Sawamoto

11. Sequence-Controlled Polymers by Ruthenium-Mediated Ring-Opening Metathesis Polymerization .......................................................... 161
   Alice B. Chang, Garret M. Miyake, and Robert H. Grubbs

   Takamasa Soejima, Kotaro Satoh, and Masami Kamigaito

13. Cu(0)-Mediated Controlled/Living Radical Polymerization: A Tool for Precise Multiblock Copolymer Synthesis ....................................... 201
   Cyrille Boyer, Michael R. Whittaker, and Per B. Zetterlund

14. The Rationale Behind Sequence-Controlled Maleimide Copolymers .......... 213
    Bert Klumperman

15. Sequence-Regulated Polymers via Combination of Orthogonal Passerini Three-Component Reaction and Thiol-ene Reaction ............................. 223
    Jian Zhang, Xin-Xing Deng, Fu-Sheng Du, and Zi-Chen Li

16. Sequence-Controlled Polymerization Guided by Aryl-Fluoroaryl \( \pi \)-Stacking ....................................................................................... 235
    Clément Mugemana, Sarah Almahdali, and Valentin O. Rodionov

17. Sequence-Regulated Polymers via Living Radical Polymerization: From Design to Properties and Functions ................................................. 255
    Takaya Terashima and Mitsuo Sawamoto

Properties and Functions of Sequence-Controlled Polymers

18. Engineering Hydrolytic Degradation Behavior of Poly(lactic-co-glycolic acid) through Precise Control of Monomer Sequence .............................. 271
    Jian Li, Michael A. Washington, Kerri L. Bell, Ryan M. Weiss, Sam N. Rothstein, Steven R. Little, Harry M. Edenborn, and Tara Y. Meyer

19. Gradient Sequence \( \pi \)-Conjugated Copolymers ........................................... 287
    Edmund F. Palermo and Anne J. McNeil

20. Sequence-Controlled Radical Copolymerization for the Design of High-Performanced Transparent Polymer Materials .................................. 301
    Akikazu Matsumoto

21. Dynamic Single Chain Polymeric Nanoparticles: From Structure to Function ......................................................................................... 313
    Müge Artar, Elisa Huerta, E. W. Meijer, and Anja R. A. Palmans
22. Sequence-Controlled Multi-Block Glycopolymers via Cu(0) Mediated Living Radical Polymerization ................................................................. 327 Qiang Zhang, Jennifer Collins, Athina Anastasaki, Russell Wallis, Daniel A. Mitchell, C. Remzi Becer, Paul Wilson, and David M. Haddleton

24. Organic Synthesis of Periodic 2D Polymers ........................................ 369 Junji Sakamoto

Editors' Biographies ...................................................................................... 395
