Textile-led Design for the Active Ageing Population

Edited by

Jane McCann and David Bryson
Contents

List of contributors xiii
Woodhead Publishing Series in Textiles xv

Part One Understanding the active ageing population 1

1 Technological culture and the active ageing: a lifetime of technological advances 3
   D. Bryson
   1.1 Introduction 3
   1.2 Learning and teaching 3
   1.3 Photography, audiovisual technologies, and e-learning 7
   1.4 Implications for the active ageing 9
   1.5 Conclusions 10
   1.6 Sources of further information and advice 11
       References 11

2 Clothing, identity, embodiment and age 13
   J. Twigg
   2.1 Introduction: clothing, social identity and age 13
   2.2 Age ordering 14
   2.3 Age-related clothing 15
   2.4 The changing cultural location of older people 17
   2.5 Baby boomers 18
   2.6 Casual dress 20
   2.7 Adjusting the cut 21
   2.8 Conclusion 22
       Acknowledgement 22
       References 22

3 Attitudes to apparel amongst the baby boomer generation 25
   P. Borcherding, J. Bubonia
   3.1 Introduction 25
   3.2 The baby boomers and the growth of marketing 27
   3.3 Baby boomers and their interaction with apparel and textiles 29
   3.4 Market implications 31
3.5 Current lifestyle trends for the baby boomers and product needs for the future 32
3.6 Conclusion 35
References 36

4 The importance of colour in textiles and clothing for an ageing population 39
C. Johnston
4.1 Introduction 39
4.2 Attitudes towards colour amongst the active ageing 39
4.3 The colour selection process for clothing 40
4.4 Colour forecasting 41
4.5 Classic and changing colours 42
4.6 How the colour selection process starts: designers and inspiration 42
4.7 Sharing information: the case of the British Textile Colour Group 43
4.8 How colour palettes are used 43
4.9 From colour palette to product 44
4.10 Conclusion 45
References 45
Further reading 45

5 The adoption and nonadoption of new technologies by the active ageing 47
D. Bryson
5.1 Introduction 47
5.2 Technological use by the active ageing 47
5.3 Internet access in care and nursing homes 48
5.4 Internet access, leisure activities, and the active ageing 50
5.5 How do the active ageing adopt new technologies? 51
5.6 Wearable technology and the active ageing 52
5.7 Tablet technologies and the active ageing 53
5.8 Social media, communities, and the active ageing 55
5.9 Conclusions 55
5.10 Sources of further information and advice 56
References 56

Part Two Understanding and researching apparel needs amongst the active ageing population 59

6 Qualitative and quantitative methods applied in active ageing 61
B.R.M. Manning, S. Benton
6.1 Introduction 61
6.2 Meaning and interpretation 61
6.3 Knowledge acquisition 63

Part Three Apparel design requirements for the active ageing population 171  

11 The role of wearable electronics in meeting the needs of the active ageing population 173  
D.C. Jones  
11.1 Introduction 173  
11.2 Current applications and end-users 175  
11.3 Communication and entertainment 175  
11.4 Comfort and safety in the outdoors 176  
11.5 Fitness monitoring, sports performance and health care 177  
11.6 Apparel heating systems 178  
11.7 Commercial challenges of wearable electronics for active ageing 180  
11.8 Implementation considerations 182  
11.9 Conclusion 183  

12 Overview of the design requirements of the active ageing 185  
M.W. Timmins, J. McCann  
12.1 Introduction 185  
12.2 Defining smart clothes and wearable technology 186  
12.3 An introduction to the clothing layering system 191  
12.4 The identification of user needs: design fit for purpose 197
12.5 Co-design approach to smart clothing development 204
12.6 The way forward 209
References 213
Websites 213

13 Co-design principles and practice: working with the active ageing 215
J. McCann
13.1 Introduction 215
13.2 Capturing user experiences: clothing and technology 216
13.3 Explaining the attributes of the ‘layering system’ to older users 218
13.4 Segmenting types of walking 228
13.5 Creating personas to guide the design process 231
13.6 Creating a range plan to cater for different walking requirements 237
13.7 Future trends 240
13.8 Conclusion 242
References 243

14 Public involvement in garment design research 245
T. Williamson, S. Hinder
14.1 Introduction 245
14.2 Background to public involvement in design research 246
14.3 Planning for public involvement 247
14.4 Designing research studies 249
14.5 Conducting the research 252
14.6 Beyond the study 253
14.7 Additional processes 254
14.8 Conclusion 255
References 255

15 The co-design process for apparel for the active ageing population: the participant experience 257
M. Sinfield
15.1 Introduction 257
15.2 The New Dynamics of Ageing (NDA) programme and the Older People’s Reference Group (OPRG) 258
15.3 Engaging in the Design for Ageing Well project 259
15.4 Training of volunteers in user engagement 259
15.5 Getting to know terminology in the clothing for active ageing sector 260
15.6 Getting to know the textile industry: the International Sporting Goods Trade Fair 2010 (ISPO 2010) 261
15.7 Getting to know the textile retail sector 262
15.8 Getting volunteer participants 263
15.9 The co-design process and outcomes 264
15.10 Conclusions 267
References 268
19.4 Synthetic cellulosics 342
19.5 Biofibres 344
19.6 Textiles and fibres for health and well-being 347
19.7 Smart, sensory and adaptive materials 349
19.8 Interactive technologies 350
19.9 Environmental and sustainability concerns 351
19.10 Conclusion 356
19.11 Future trends 357
References 357
Websites 358
Further reading 359

20 Designing base layers for apparel for the active ageing population: balancing technology and aesthetics 361
V. Haffenden, J. Smith
20.1 Introduction 361
20.2 Defining technologies 362
20.3 The roles of body and base layers in a clothing system 367
20.4 Designing for the older body shape 368
20.5 Technical and aesthetic design considerations and processes 369
20.6 Manufacturing considerations: materials, methods and costs 377
20.7 Conclusion 379
20.8 Future trends 380
References 381
Further reading 383

21 Co-design development: design direction for the clothing layering system as a wearable technology platform 385
J. McCann
21.1 Introduction 385
21.2 Creating a hierarchy of emerging key design requirements 386
21.3 Sorting and elaborating the design requirements: form 391
21.4 Co-design prototype design development process 405
21.5 Technical 3D development 410
21.6 Final prototype development 412
21.7 The way forward: design direction to help bring product to market 419
