Introduction 1
Australian context and challenges
Focus of the book
Structure and key themes
Authors
Parts: outline of content

PART I
Pressures and principles: the changing planning context 13

1 The evolving framework for planning in Australia: moving towards sustainable governance? 15
  1.1 Introduction
  1.2 From ‘government’ to ‘governance’ – developments since the mid-eighties
  1.3 Changing paradigms and players
  1.4 Government and planning in Australia
  1.5 Sustainable governance in Australia
  1.6 Evolving new structures and partnerships
  1.7 Conclusions
2 Evolving natural environmental context for planning in Australia: biodiversity and climate change 34
  2.1 Introduction
  2.2 A short history of environmental planning and planning for sustainable development
  2.3 What are environmental planning and planning for sustainable development?
  2.4 The scope of environmental planning and planning for sustainable development
  2.5 Key topics in planning for sustainable development
  2.6 Climate change and sustainability
  2.7 Planning for sustainable development: a non-traditional approach to planning
  2.8 Conclusions

3 The evolving social context for planning in Australia 55
  3.1 Introduction
  3.2 Demographic patterns and trends
  3.3 Patterns and implications of the geographic distribution of Australia's population
  3.4 Conclusions

4 Planning in a sustainable economic context: economic opportunities and determinants of competitive places 74
  4.1 Introduction
  4.2 Recent trends in the context of a global economy
  4.3 Competitive places
  4.4 Planning for sustainable urban and regional economic development in Australia
  4.5 Competitive and sustainable?
  4.6 Conclusions: economic development variations and challenges

PART II
Practice and processes: contemporary planning issues 93

5 Planning intervention in metropolitan urban form: the 21st-century challenge of urban consolidation in Australian capital cities 95
  5.1 Introduction
  5.2 A brief history of Australian suburban growth
  5.3 The emergence of urban consolidation in Australia
9.4 Overall policy planning options of adapting to climate change at the coast
9.5 Government policy
9.6 Policy at a local government level
9.7 Legal cases involving planning decisions made in the context of climate change at the coast
9.8 Building resilience in coastal communities to adapt to climate change
9.9 Conclusions

10 Trends in urban design
10.1 Introduction
10.2 Some international contributions to urban design
10.3 Some Australian contributions
10.4 Consolidation and conclusions

11 Affordable housing and the planning stumbling block
11.1 Introduction
11.2 Australian urban governance
11.3 Housing affordability and planning – common links
11.4 Different types of affordable housing stress – examples from Western Australia
11.5 Reflections and broader implications
11.6 Conclusions

12 Crime as an unintended consequence: planning for healthy cities and the need to move beyond crime prevention through environmental design (CPTED)
12.1 Introduction
12.2 Planning, health and the built environment
12.3 Planning, health and crime
12.4 Conclusions

13 Planning for urban open space: reflections and challenges
13.1 Introduction
13.2 Urban consolidation
13.3 Lessons from the first world
13.4 Australian nation and city building
13.5 Contemporary perspectives
13.6 Future urban open space challenges
13.7 Conclusions
19 Contemporary planning education – in the online environment

19.1 Introduction

19.2 Planning education

19.3 The elephant in the room – the 21st-century student

19.4 OUA, online learning and approaches – Curtin University

19.5 Online learning in urban and regional planning at Curtin

19.6 Analytics of the Curtin Online student community in urban and regional planning

19.7 Conclusions

Conclusions: towards the future

The changing planning context
Planning issues and responses
Processes and prospects
Conclusions
