Leveraging Applications of Formal Methods, Verification and Validation Technologies for Mastering Change

6th International Symposium, ISoLA 2014
Imperial, Corfu, Greece, October 8-11, 2014
Proceedings, Part I
# Table of Contents – Part I

## Evolving Critical Systems

Evolving Critical Systems - Track Introduction .......................... 1  
  *Mike Hinchey and Tiziana Margaria*

Statistical Abstraction Boosts Design and Test Efficiency of Evolving Critical Systems ................................. 4  
  *Axel Legay and Sean Sedwards*

Combinatory Logic Synthesizer ........................................... 26  
  *Jan Bessai, Andrej Dudenhefner, Boris Düdder, Moritz Martens, and Jakob Rehof*

Incremental Syntactic-Semantic Reliability Analysis of Evolving Structured Workflows ........................................ 41  
  *Domenico Bianculli, Antonio Filieri, Carlo Ghezzi, and Dino Mandrioli*

Prototype-Driven Development of Web Applications with DyWA .......................... 56  
  *Johannes Neubauer, Markus Frohme, Bernhard Steffen, and Tiziana Margaria*

Domain-Specific Languages for Enterprise Systems ....................... 73  
  *Jesper Andersen, Patrick Bahr, Fritz Henglein, and Tom Hvitved*

## Rigorous Engineering of Autonomic Ensembles

Introduction to “Rigorous Engineering of Autonomic Ensembles” – Track Introduction .................................................. 96  
  *Martin Wirsing, Rocco De Nicola, and Matthias Hölzle*

HELENA®Work: Modeling the Science Cloud Platform ...................... 99  
  *Annabelle Klarl, Philip Mayer, and Rolf Hennicker*

Formalizing Self-adaptive Clouds with KnowLang .......................... 117  
  *Emil Vassev, Mike Hinchey, and Philip Mayer*

Towards Performance-Aware Engineering of Autonomic Component Ensembles ............................................... 131  
  *Tomáš Bureš, Vojtěch Horký, Michal Kit, Lukáš Marek, and Petr Tůma*

Self-expression and Dynamic Attribute-Based Ensembles in SCEL .......................... 147  
  *Giacomo Cabri, Nicola Capodieci, Luca Cesari, Rocco De Nicola, Rosario Pugliese, Francesco Tiezzi, and Franco Zambonelli*
  Michele Loreti, Andrea Margheri, Rosario Pugliese, and Francesco Tiezzi

Rigorous System Design Flow for Autonomous Systems ................. 184
  Saddek Bensalem, Marius Bozga, Jacques Combaz, and Ahlem Triki

Automata Learning

Learning Models for Verification and Testing — Special Track at ISoLA 2014 - Track Introduction ......................................................... 199
  Falk Howar and Bernhard Steffen

Algorithms for Inferring Register Automata: A Comparison of Existing Approaches ................................................................. 202
  Fides Aarts, Falk Howar, Harco Kuppens, and Frits Vaandrager

Active Learning of Nondeterministic Systems from an icoco Perspective ................................................................. 220
  Michele Volpato and Jan Tretmans

Verification of GUI Applications: A Black-Box Approach ............. 236
  Stephan Arlt, Evren Ermis, Sergio Feo-Arenis, and Andreas Podelski

Formal Methods and Analysis in Software Product Line Engineering

Formal Methods and Analyses in Software Product Line Engineering (Track Summary) ......................................................... 253
  Ina Schaefer and Maurice H. ter Beek

A Core Language for Separate Variability Modeling ..................... 257
  Alexandru F. Iosif-Lazăr, Ina Schaefer, and Andrzej Wasowski

Domain Specific Languages for Managing Feature Models: Advances and Challenges ......................................................... 273
  Philippe Collet

Delta-Trait Programming of Software Product Lines .................... 289
  Ferruccio Damiani, Ina Schaefer, Sven Schuster, and Tim Winkelmann

Deployment Variability in Delta-Oriented Models ....................... 304
  Einar Broch Johnsen, Rudolf Schlatte, and S. Lizeth Tapia Tarifa

DeltaCCS: A Core Calculus for Behavioral Change ..................... 320
  Malte Lochau, Stephan Mennicke, Hauke Baller, and Lars Ribbeck
