

Intermediates in the carboligation of the ThDP-dependent pyruvate decarboxylase

Tailor-made enzyme catalysts for industrial applications

Dissertation
for the award of the degree
"Doctor rerum naturalium"
of the Georg-August-University Göttingen

within the doctoral program *Biomolecules: Structure-Function-Dynamics*
of the Georg-August University School of Science (GAUSS)

submitted by
Dipl. Chem.
Cindy Wechsler
born in Böblingen

Göttingen 2014

Contents

1	Introduction	9
1.1	Thiamine and its Biological Relevance	9
1.2	Reactivity of ThDP	10
1.3	Activation of ThDP and its Intermediates	13
1.4	Diversity of ThDP Catalysis	15
1.5	Pyruvate Decarboxylase – a ThDP-dependent Enzyme	16
1.6	ZmPDC – A Prototypical ThDP-dependent Enzyme	18
1.6.1	<i>Zymomonas Mobilis</i>	18
1.6.2	ZmPDC – Biochemical Properties	18
1.6.3	Three-Dimensional Structure of ZmPDC	20
1.6.4	Catalytic Mechanism of ZmPDC	21
1.6.5	Preliminary Work	22
1.6.6	State of the Art	23
1.7	Application of PDC in Organic Synthesis	26
1.8	2-Hydroxy Ketones – Versatile Precursors	29
1.9	Enzymes for Industrial Applications	32
1.10	Aim of the Thesis	32
2	Materials & Methods	35
2.1	Materials	35
2.1.1	Chemicals	35
2.1.2	Equipment	38
2.2	Biological Methods	41
2.2.1	Molecular Biology	41
2.2.2	Concentration Determination of DNA	43
2.2.3	Site Directed Mutagenesis using PCR	43
2.2.4	Agarose Gel Electrophoresis	43
2.2.5	DNA Sequencing	43
2.2.6	Plasmid Transformation	44
2.3	Protein Chemistry	44
2.3.1	Concentration Determination of Proteins	44
2.3.2	SDS-PAGE	44
2.3.3	Protein Expression using pPLZM Plasmid	45

Contents

2.3.4	Protein Expression of pET28 Plasmids of E473G and E473F	45
2.3.5	Expression of Wild-Type PDC	46
2.3.6	Protein Purification of Non-Tagged PDC	46
2.3.7	Protein Purification of His-Tagged PDC	47
2.3.8	Desalting via Size Exclusion Chromatography	47
2.4	Kinetic and Thermodynamic Methods	47
2.4.1	Steady-State Activity Assay	47
2.4.2	Analysis of Kinetic Parameters - by Circular Dichroism Spectroscopy	48
2.4.3	Analysis of Thermostability - by Circular Dichroism Spectroscopy	49
2.4.4	Analysis of ThDP-binding - by Circular Dichroism Spectroscopy using Near-UV pH-Titration	50
2.4.5	Analysis of Reaction Product Distribution by ¹ H NMR	52
2.4.6	Analysis of Covalent Reaction Intermediates by Acid Quench ¹ H NMR- Spectroscopy	52
2.4.7	Identification of Donor and Acceptor Substrates by ¹³ C NMR-Spectroscopy	53
2.5	Chromatographic Methods	55
2.5.1	Chiral HPLC	56
2.5.2	Chiral GC	56
2.5.3	GC-MS	56
2.6	Crystallographic Methods	57
2.6.1	Crystallization	57
2.6.2	Diffraction experiment	57
2.6.3	Data processing	58
3	Results	59
3.1	Molecular Biology	59
3.2	Carboligation Competence: Synthesis of the α -Hydroxy Ketone PAC Increasing (S)-Selectivity: Introducing a Second Mutation	67 72
3.3	Carboligation Competence: Synthesis of the α -Hydroxy Ketone Acetoin	73
3.4	Analysis of Product Distribution by ¹ H NMR	78
3.5	Analysis of Intermediates in the Carboligation at Steady-State	81
3.6	Donor/Acceptor Concept: ¹³ C NMR Analysis	83
3.7	Analysis of Protonic and Tautomeric Equilibria: Near-UV pH-Titration	87
3.8	Thermal Stability of Selected Variants	91
3.9	Structural Investigation by X-Ray Crystallography	93
4	Discussion	99
4.1	Carboligation Competence	99
4.1.1	Carboligation: PAC-Synthesis Increasing (S)-Selectivity: Introducing a Second Mutation	99 102
4.1.2	Carboligation: Acetoin-Synthesis	103

4.1.3	Applicability in Industrial Synthesis	104
4.2	Mechanistic Aspects of <i>ZmPDC</i>	105
4.2.1	Reaction Intermediates at Steady-State	106
4.2.2	Donor/Acceptor Preferences in <i>ZmPDC</i>	106
4.2.3	Protonic and Tautomeric Equilibria of the ThDP-cofactor	108
4.3	Thermal Stability of <i>ZmPDC</i>	109
4.4	Structural Characterization by X-Ray Crystallography	110
5	Summary and Conclusion	113
6	Outlook	115
7	Appendix	117
	Bibliography	134
	Abbreviations	161
	Scientific contributions	165
