Biofiber Reinforcement in Composite Materials

Edited by
Omar Faruk and Mohini Sain
Part I Bast fibers

1 The use of jute fibers as reinforcements in composites
J. A. Khan, National University of Bangladesh, Bangladesh and M. A. Khan, Bangladesh Atomic Energy Commission, Bangladesh

1.1 Introduction 3
1.2 Composition and properties of jute fibers 4
1.3 Processing and properties of grafted jute fibers 7
1.4 Processing and properties of alkali-treated jute fibers 8
1.5 Characterization of jute fibers 10
1.6 Manufacture of jute fiber composites 11
1.7 Preparation and properties of irradiated jute composites 12
1.8 Preparation and properties of oxidized jute composites 15
1.9 Preparation and properties of mercerized jute composites 18
1.10 Preparation and properties of jute composites modified by other processes 20
1.11 Types and properties of hybrid jute composites 24
1.12 Applications of jute composites 26
1.13 Conclusion 29
1.14 References 29

2 The use of flax fibres as reinforcements in composites
J. Müssig and K. Haag, Hochschule Bremen – University of Applied Sciences, Germany

2.1 Introduction 35
2.2 Key fibre properties 40
### Contents

2.3 Cultivation and quality issues 48  
2.4 Processing as a fibre reinforcement for composites 54  
2.5 Integration into the matrix 61  
2.6 Assessing the performance of the composites 69  
2.7 Applications 73  
2.8 Summary: strengths and weaknesses 73  
2.9 Future trends 80  
2.10 Sources of further information and advice 81  
2.11 Acknowledgements 82  
2.12 References 82

5 The use of kenaf fibers as reinforcements in composites
H. Akil, M. H. Zamri and M. R. Osman, University of Sains, Malaysia

5.1 Introduction
5.2 Processing of kenaf fibers
5.3 Matrices for kenaf fiber-reinforced composites
5.4 Fabrication of kenaf fiber-reinforced composites (KFRC)
5.5 Performance of KFRC
5.6 Applications of KFRC
5.7 Conclusion

Part II Leaf fibers

6 The use of sisal and henequen fibres as reinforcements in composites
Y. Li and Y. O. Shen, Tongji University, China

6.1 Introduction
6.2 The microstructures of sisal fibres
6.3 The mechanical properties of sisal fibres
6.4 Manufacture of sisal fibre-reinforced composites
6.5 Mechanical properties of sisal fibre-reinforced composites: interfacial properties
6.6 Mechanical properties of sisal fibre-reinforced composites: interlaminar fracture toughness
6.7 Mechanical properties of unidirectional sisal fibre-reinforced composites
6.8 Effect of fibre twist on the mechanical properties of sisal fibre-reinforced composites
6.9 Durability of sisal fibre-reinforced composites: effects of moisture absorption
6.10 Effects of ultraviolet (UV) light on the mechanical properties of sisal fibre-reinforced composites
6.11 Applications of sisal fibre-reinforced composites
6.12 Conclusion and future trends

7 The use of pineapple leaf fibers (PALFS) as reinforcements in composites
A. L. Leão, São Paulo State University (UNESP), Brazil, B. M. Cherian and S. Narine, Trent University, Canada, S. F. Souza and M. Sain, University of Toronto, Canada and S. Thomas, Mahatma Gandhi University, India

7.1 Introduction 211
7.2 The pineapple plant 213
7.3 Pineapple production 215
7.4 Pineapple culture in Brazil and worldwide 215
7.5 Fiber extraction 216
7.6 Potential of fiber production plant 218
7.7 Fiber properties 220
7.8 Pineapple leaf fiber (PALF)-reinforced polymer composites 222
7.9 Application of pineapple fibers and composites 226
7.10 Conclusions 232

8 The use of banana and abaca fibres as reinforcements in composites
A. A. Mamun and H. P. Heim, University of Kassel, Germany, O. Faruk, University of Toronto, Canada and A. K. Bledzki, University of Kassel, Germany and West Pomeranian University of Technology, Poland

8.1 Introduction 236
8.2 Banana and abaca plants and their cultivation 237
8.3 Fibre extraction 239
8.4 Fibre structure and properties 241
8.5 Disadvantages of banana and abaca fibres as reinforcement materials 244
8.6 Surface modification of fibres 246
8.7 Processing of banana/abaca fibre-reinforced composites 250
8.8 Performance of banana/abaca fibre-reinforced thermoset polymer composites 252
8.9 Performance of banana/abaca fibre-reinforced thermoplastic polymer composites 257
8.10 Performance of banana/abaca fibre-reinforced biodegradable polymer composites 267
8.11 Conclusions 269
