The Software Craftsman

Professionalism, Pragmatism, Pride

Sandro Mancuso
Contents

Foreword by Robert C. Martin xv
Preface xvii
Acknowledgments xxv
About the Author xxix

Part I Ideology and Attitude 1

Chapter 1 Software Development in the Twenty-First Century 3
Seniority 5
A New Reality 6

Chapter 2 Agile 9
Process-Oriented Agile Disciplines 10
Technical-Oriented Disciplines 10
What Is It to Be Agile? 11
A Game Changer 11
People Empowerment 12
Professional Evolution 12
Agile Manifesto 12
Principles behind the Agile Manifesto 13
The Agile Transformation Era 14
## Contents

The Agile Hangover                                      14  
  A Partial Transformation                               16  
  But It's Not All Bad News                              21  
Agile versus Software Craftsmanship                    21  
Summary                                                22  

### Chapter 3  Software Craftsmanship                    23  
  A Better Metaphor                                      23  
  What Does Wikipedia Say?                              24  
  A More Personal Definition                            24  
  A Shorter Definition                                   24  
  Beyond Definitions                                     25  
  Craft, Trade, Engineering, Science, or Art            25  
Software Craftsmanship History                          26  
  The Software Craftsmanship Summit                      27  
  Crossing Borders                                       28  
  Craftsman Swap                                         29  
  Software Craftsmanship Communities                    30  
  The Software Craftsmanship Manifesto                  30  
  The Manifesto                                          32  
Summary                                                39  

### Chapter 4  The Software Craftsmanship Attitude       41  
  Who Owns Your Career?                                  42  
    Employer/Employee Relationship                       43  
  Keeping Ourselves Up to Date                           44  
    Books, Many Books                                    44  
    Blogs                                                46  
    Technical Websites                                   47  
  Know Who to Follow                                     48  
    Social Media                                         48  
  Practice, Practice, Practice                           48  
    Katas                                               49  
    Pet Projects                                        50  
    Open Source                                          52  
    Pair Programming                                     53  
  Socialize                                             54  
  Deliberate Discovery                                  55

Contents

Taking a Punt 148
Hiring for an Existing Team versus Hiring for a New Team 149
Pre-Interview Coding Exercises 150
Everyone Should Know How to Interview 151
Developers Must Interview Developers 152
Summary 152

Chapter 11 Interview Anti-Patterns 153
Don't Be a Smart-Ass Interviewer 153
Don't Use Brainteasers 154
Don't Ask Questions to Which You Don't Know the Answers 154
Don't Try to Make the Candidate Look Like a Fool 155
Don't Block the Internet 156
Don't Code on a Piece of Paper 156
Don't Use Algorithms 157
Don't Conduct Phone Interviews 157
Summary 158

Chapter 12 The Cost of Low Morale 159
The Agile Hangover: Low Morale 159
The Cost of Employing 9-to-5 Developers 161
Constrained by Lack of Motivation 164
Injecting Passion 165
Summary 167

Chapter 13 Culture of Learning 169
Wrong Motivation 170
Creating a Culture of Learning 171
Start a Book Club 172
Have a Tech Lunch (Brown Bag Session) 173
Have Group Discussions (Roundtables) 173
Switch Projects for an Iteration 174
Conduct Group Code Reviews 176
Have Hands-On Coding Sessions 176
Start Internal Communities of Practice (CoP) 178
Encourage Pet-Project Time 178
Engage with External Technical Communities 179
What if Others Don’t Want to Join In? 179
   Be an Example 180
   Focus on Those Who Care 180
   Don’t Force 180
   Don’t Try to Change Everyone 180
   Avoid Consensus Delays 181
   Don’t Ask for Authorization 181
   Don’t Complicate 181
   Establish a Rhythm 182
Summary 182

Chapter 14 Driving Technical Changes 185
Identifying Skepticism Patterns 185
Be Prepared 189
Where Do We Start? 191
   Establish Trust 191
   Lead by Example 192
   Choose Your Battles 193
   Iterate, Inspect, and Adapt 194
Fear and Incompetence 195
How Do I Convince My Manager? 196
How Do I Convince My Team to Do TDD? 197
Facing the Skeptics 198
   The Ivory-Tower Architect 199
   The Wronged 204
Should We Really Care about All That? 205
Summary 205

Chapter 15 Pragmatic Craftsmanship 207
Quality Is Always Expected 207
Busting the “Expensive and Time-Consuming Quality” Myth 209
   Do We Need to Test-Drive Everything? 210
Refactoring 211
The “One Way” of Developing Software 212
Helping the Business 213
   A Simple and Quick Solution 214
Software Projects Are Not about Us 217
Great versus Mediocre 217
