2nd International Symposium on Fatigue Design and Material Defects 2014 and the 14th International SF2M Spring Meeting 2014

(FDMDII-JIP 2014)

MATEC Web of Conferences Volume 12 (2014)

Paris, France
11-13 June 2014

Editors:

Frank Morel
Jean-Yves Buffiere

Yves Nadot
Jeanne Chone

ISBN: 978-1-63266-884-4
# TABLE OF CONTENTS

## 2ND INTERNATIONAL SYMPOSIUM ON FATIGUE DESIGN AND MATERIAL DEFECTS 2014

<table>
<thead>
<tr>
<th>Title</th>
<th>Authors</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Effects of Casting Defects, Matrix Structures and Loading Conditions on the Fatigue Strength of Ductile Irons</td>
<td>Masahiro Endo, Keiji Yanase</td>
<td>1</td>
</tr>
<tr>
<td>Effect of Silicon Content and Defects on the Lifetime of Ductile Cast Iron</td>
<td>Akram Alhussein, Marion Risbet, Jerome Favergeon</td>
<td>3</td>
</tr>
<tr>
<td>Multi-scale Modelling of AISI H11 Martensitic Tool Steel Surface Anisotropic Mechanical Behaviour</td>
<td>Ahmed Zouaghi, Vincent Velay, Adriana Soveja, Farhad Rezai-Aria</td>
<td>6</td>
</tr>
<tr>
<td>Fatigue Damage Accumulation and Lifetime Prediction of Defective C35 Steel Subjected to Block Loading</td>
<td>Haifa Sallem, Yves Nadot, Chokri Bouraoui</td>
<td>8</td>
</tr>
<tr>
<td>Model for Fracture Mechanics Based Prediction of the Fatigue Strength of Engineering Alloys Containing Microscopical Initial Defects</td>
<td>Uwe Zerbst, Mauro Madia, H. Thomas Beier</td>
<td>10</td>
</tr>
<tr>
<td>Fatigue Damage Monitoring in 304L Steel Specimens by an Acoustic Emission Method</td>
<td>Ammar Ould-Amer, Anne-Lise Gloamec, Stéphane Courtin</td>
<td>12</td>
</tr>
<tr>
<td>Inclined Defects and Their Effect on the Fatigue Limit and Small Crack Growth</td>
<td>Andrew Roiko, Jesse Solin, Yukitaka Murakami</td>
<td>14</td>
</tr>
<tr>
<td>Influence of Intermetallic Particles on Short Fatigue Crack Initiation in AA2050-T8 and AA7050-T7451</td>
<td>Erembert Nizery, J.-Y. Buffiere, Henry Proudhon, Armelle Daniélou, Samuel Forest</td>
<td>16</td>
</tr>
<tr>
<td>Prediction for Multiaxial Fatigue Strength with Small Defects</td>
<td>Keiji Yanase, Masahiro Endo</td>
<td>18</td>
</tr>
<tr>
<td>Initiation in Gigacycle Fatigue Related to Metallurgical Defects</td>
<td>C. Bathias, A. Nikitiu, I. Marines, Q. Wang, C. Wang</td>
<td>20</td>
</tr>
</tbody>
</table>

## 14TH INTERNATIONAL SF2M SPRING MEETING 2014

<table>
<thead>
<tr>
<th>Title</th>
<th>Authors</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Probabilistic Integrity Assessment of Turbine Disks in Presence of Potential Defects</td>
<td>S. Beretta, Stefano Foletti, Mauro Madia, Emanuela Cavalleri</td>
<td>22</td>
</tr>
<tr>
<td>Analysis of the Influence of Defects on Fatigue Resistance of Metallic Components</td>
<td>Mirco D. Chapatti</td>
<td>25</td>
</tr>
<tr>
<td>Fatigue Strength of VDSiCr Spring Steel Under Cyclic Torsion and Cyclic Axial Loading at Different Load Ratios in the VHCF Regime</td>
<td>R. Schuller, H. Mayer, D. Irrasch, M. Hahn, M. Backer-Höchst</td>
<td>28</td>
</tr>
<tr>
<td>Towards Proper Sampling and Statistical Analysis of Defects</td>
<td>Ali Celir, Andrew Roiko, Lind Mina</td>
<td>31</td>
</tr>
<tr>
<td>Fatigue Characterization of Flowformed A356-T6</td>
<td>Matteo Cova, Marco Nanni, Roberto Tava</td>
<td>36</td>
</tr>
<tr>
<td>Improvement of Mechanical Behaviour of Cylinder Head Alloys</td>
<td>M.J. Roy, D.M. Majier, Jianbin Zhao</td>
<td>39</td>
</tr>
<tr>
<td>Mechanisms of Fatigue-Crack Initiation and Their Impact on Fatigue Life of AlSi7 Die-Cast Components</td>
<td>Christian Klemt, Franz Wilhelm, Joachim Hammer</td>
<td>42</td>
</tr>
<tr>
<td>Mean Stress Sensitivity of Ductile Iron with Respect to Technological and Statistical Size Effect Considering Defects</td>
<td>Sabine Redik, Markus Tauscher, Florian Grün</td>
<td>44</td>
</tr>
<tr>
<td>Role of Defects in Fatigue Damage Mechanisms of Cast Polycrystalline Superalloy MAR-M 247</td>
<td>Miroslav Šmid, Stanislava Pintová, Luděk Kuna, Pavel Huta</td>
<td>47</td>
</tr>
</tbody>
</table>
Concepts for Estimating the Fatigue Strength of Sintered Steel Components .......................................................... 129
Sebastian Gotz, Klaus-Georg Eulitz

Probabilistic Thermal-Mechanical Fatigue Criterion for Lost Foam Casting Aluminium Alloys Based on 2D/3D Porosities Distribution .......................................................... 132
F. Szymkta, N. Limodin, L. Wang, P. Osmond, J. Adrien, E. Charkaluk, J.-Y. Buffiere

Transferability of Fatigue Resistance Data for Welded Joints ...................................................................................... 134
Matthias Kaffenberger, Ina Platte, Ehsan Shams, Michael Vormwald

3D Characterisation of RCF Crack Networks ................................................................................................................. 137
Johan Ahlström, Casey Jessop, Lars Hammar, Christer Persson

Shrinkages in Heavy-Sized Cast Components of Nodular Cast Iron – NDT and Fatigue ................................................. 140
Christoph Bleicher, Heinz Kaufmann, Rainer Wagen

Integrity and Quality Assessment Applied on Laser Welded Titanium Components ................................................. 143
Håkan Wirdellius, Kenneth Hamberg, Erik Lindgren

Fatigue Crack Growth from Handling Surface Anomalies in a Nickel Based Superalloy at High Temperature .................................................................................................................................. 146
Stéphane Gourdin, Luc Doretus, Yves Nadot, Gilbert Hénaff, Stéphane Pierret

Influence of the Surface Roughness on the Fatigue Properties in Ausferritic Ductile Irons (ADI) .......................................... 149
Roger Svenningson, Henrik Svensson, Henrik Borgström, Anders Gote

In-Service Life Estimation of Damaged Gas Pipelines: Full-Scale Experiments and Finite Element Analyses .................................................................................................................................. 152
Guillaume Burgnaud, Remi Brun, Stephane Herz-Clemens, Georges Cailleaul, Yazid Madi, Gilles Rousseller

Effects of Surface Roughness on Plastic Strain Localization in Polycrystalline Aggregates .................................................. 158
Yoann Guilhem, Stéphanie Basseville, Henry Proudhon, Georges Cailleaul

Effect of Orientation of Small Defects on Fatigue Limit of Steels ...................................................................................... 161
Pablo Lorenzino, Saburo Ozaki, Hisao Matsunaga, Yukitaka Murakami

A Surface Defect Versus Microstructure Under Fatigue Loading: Experimental and Numerical Approach .................................................................................................................................. 164
Mathieu Vincent, Yves Nadot, Carole Nadot-Martin, André Dragon

Thermo-Mechanical Behavior and Fatigue Strength of a Grey Cast Iron for Automotive Brake Discs Considering Graphite Flakes Debonding ........................................................................................................ 167
Louis Augustins, François Hild, René Billardon

Influence of Loading Pattern in Fatigue Life for Notched Round Bars Subjected to Bending-Torsion .............................................. 170
Ricardo Branco, J.D. Costa, F.V. Antunes

Effects of Multiaxial Cyclic Loading Conditions on the Evolution of Porous Defects .......................................................... 173
Armel Mbiakop, Andrei Constantinescu, Kostas Dumas

A Unifying Approach to Fatigue Design in Presence of Defects and Notches Subject to Uniaxial Loading .................................................................................................................................. 176
Bruno Atzori, Paolo Lazzarin, Giovanni Meneghetti

A New Proposal of Effective Stress and Critical Distance for Fatigue at Notches .......................................................... 181
C. Valléllamo, A. Navarro, V. Chaves

A Crack Arrest Methodology Based on Bazant’s Parameter to Estimate Threshold Fretting Conditions .................................................................................................................................. 183
José Araújo, Raphael Cardoso, Jorge Ferreira, Fabio Castro, Estarle Campos

Development of a Probabilistic Model for the Prediction of Fatigue Life in the Very High Cycle Fatigue (VHCF) Range Based on Inclusion Population .................................................................................. 186
A. Kolyshkin, A. Grigorescu, E. Kaufmann, M. Zimmermann, H.-J. Christ

VHCF of Spray Formed Hypereutectic Aluminium Silicon Alloy ......................................................................................... 189
M. Fitzka, H. Mayer, R. Schuller, S. Stanzl-Tschegg, T. Prazorski, P. Krug

Influence of Defects on the Very High Cycle Fatigue Behaviour of Forged Aeronautic Titanium Alloy .............................................. 192
A. Nikitin, Thierry Pain-Luc, Andrey Shanyavsky, C. Bathias

Fatigue Crack Initiation and Damage Mechanisms During Ultrasonic Fatigue Testing of Cast Aluminium Alloy AISI7Mg .................................................................................................................................. 195
Dominik Krewomen, Anja Weldner, Horst Biermann

Short-crack Modelling of the Effect of Corrosion Pits on the Fatigue Limit of a 12% Cr Steel .................................................. 198
Gunnar Härkräfte

Non-Local High Cycle Fatigue Criterion for Metallic Materials with Corrosion Defects .................................................. 201
Mohamed El May, Nicolas Saintier, Thierry Pain-Luc, Olivier Devos

Fatigue Assessment of Corroded Turbine Blade Steels ........................................................................................................ 204
B.M. Schönbaumer, A. Perlega, U.P. Karr, S. Stanzl-Tschegg
