Biography xxiii

Section 1

VEGETABLES AND ROOT CROPS

1. Effect of Processing on Active Compounds in Fresh-Cut Vegetables
   I. PRADAS-BAENA, J.M. MORENO-ROJAS, M.D. LUQUE DE CASTRO
   Introduction 3
   How Composition is Altered 4
   Harvest 4
   Reception 4
   Pre-cooling 5
   Peeling 5
   Cutting 5
   Washing 7
   Drying 8
   Other Ways in which Composition is Altered 8
   Analytical Techniques 8
   References 9

2. Changes in β-Carotene During Processing of Carrots
   GRIET KNOCKAERT, LIEN LEMMENS, SANDY VAN BUGGENHOUT, MARC HENDRICKX, ANN VAN LOEY
   Introduction 11
   Effect of Processing on β-Carotene Stability 11
   Effect of Processing on β-Carotene Bioaccessibility 14
   References 16

3. Brassica Composition and Food Processing
   ALFREDO AIRES
   Introduction 17
   Phytochemical Composition of Brassica Vegetables 17
   Factors Affecting Phytochemical Content of Brassica 20
   Final Considerations 24
   References 24

4. Ascorbic Acid, β-Carotene and Antioxidant Activity of Broccoli During Short-Term Refrigerated Storage
   A. NATH, S. MANDAL, R.K. SINGH, BIDYUT C. DEKA, S.V. NGACHAN
   Introduction 27
   Changes in Ascorbic Acid 28
   Changes in β-Carotene 30
   Changes in Antioxidant Activity 31
   References 33

5. Blanching as a Treatment Process: Effect on Polyphenol and Antioxidant Capacity of Cabbage
   NISSREEN ABU-GHANNAM, AMIT KUMAR JAISWAL
   Introduction 36
   Antioxidants in Cabbage 36
   References 43

6. Effect of Different Types of Processing and Storage on the Polyacetylene Profile of Carrots and Parsnips
   ANASTASIOS KOIDIS, ASHISH RAWSON, NIGEL BRUNTON
   Types, Occurrence, and Bioactive Properties of Falcarinol Type C17-Polyacetylenes 45
   Analysis and Quantification of Polyacetylenes 46
   Compositional Changes in the Contents and Profile of Polyacetylenes During Processing 47
   Recommendations to Ensure Bioactive Retention During Processing and Storage 52
   References 52

7. Impact of Food Processing on Non-Hallucinogenic Indole Derivatives in Edible Mushrooms
   BOŻENA MUSZYŃSKA, KATARZYNA SUŁKOWSKA-ZIAJA
   Introduction 55
   How Composition is Altered 56
   Other Ways in which Composition is Altered 60
   Analytical Techniques 60
   References 62

8. Impact of Processing on Bioactive Compounds of Field Peas
   JOYCE IRENE BOYE, ZHEN MA
   Introduction 63
   How Composition is Altered 64
   Micronutrients 68
   Other Ways in which Composition is Altered 68
   Analytical Techniques 69
   References 69
9. Carotenoids in Pumpkin and Impact of Processing Treatments and Storage
JOÃO GUSTAVO PROVESI, EDNA REGINA AMANTE
Introduction 71
Carotenoids in Pumpkins: Composition and Changes 72
Effects of Processing on Carotenoids in Pumpkin Products 76
Analytical Techniques 78
References 79

10. Cassava Production and Processing and Impact on Biological Compounds
LEON BRIMER
Introduction 81
How Composition is Altered 82
Analytical Techniques 86
References 86

11. Radiation Processing for Sprout Inhibition of Stored Potatoes and Mitigation of Acrylamide in Fries and Chips
JYOTI TRIPATHI, PRASAD S. VARIBAR, REKHA S. SINGHAL, ARUN SHARMA
Introduction 89
Mechanism of Formation 89
Influence of Different Parameters on Acrylamide Formation 89
Analytical Techniques for Estimation of Acrylamide in Food Matrix 91
Strategies for Reduction of Acrylamide 92
Effect of Post-Harvest Storage on Acrylamide Content in Potato 92
Radiation Processing for Mitigation of Acrylamide Content in Potato Chips 93
Application for Sprout Inhibition in Bulbs and Tubers 95
References 96

12. Production of Jerusalem Artichoke (Helianthus tuberosus L.) and Impact on Inulin and Phenolic Compounds
VIBE BACH, MORTEN RAHR CLAUSEN, MERETE EDELENBOS
Introduction 97
How Composition is Altered 97
Other Ways in which Composition is Altered 100
Analytical Techniques 101
References 102

13. Bioactive Compounds in Asparagus and Impact of Storage and Processing
JOSÉ MARÍA FUENTES ALVENTOSA, JOSÉ MANUEL MORENO ROJAS
Introduction 103
How Composition is Altered 104
Other Ways in which Composition is Altered 107
Analytical Techniques 109
References 110

14. Bioactive Components in Potatoes as Influenced by Thermal Processing
CARLA S.P. SANTOS, SARA CUNHA, SUSANA CASAL
Introduction 111
How Potatoes Bioactive Compounds are Influenced by Thermal Processing 112
Influence of New Processing Techniques 117
Analytical Techniques 118
References 118

15. Processing of Fructans and Oligosaccharides from Agave Plants
CLARITA OLVERA CARRANZA, ANGELA ÁVILA FERNANDEZ, GUSTAVO R. BUSTILLO ARMENDARIZ, AGUSTIN LÓPEZ-MUNGUIA
Introduction 121
Agave Fructans Structure 122
Agave Fructans in Traditional Products 122
Agave Inulin and Agave FOS as Nutraceuticals: Health Implications 126
Agave Fructans Production Process 127
Agave Fructooligosaccharides Production 127
Actual and Potential Market of Agave Derived Products 128
References 128

Section 2
FRUIT

16. Effects of 1-Methylcyclopropene on Active Composition in Fruits
JUNFENG GUAN, MUQIANG HU, CHENGUO SHEN, SHUO ZHOU, YUDOU CHENG, JINGANG HE
Introduction 133
Sugars 133
Organic Acids 134
Volatile Compounds 134
Antioxidants 135
Fatty Acids 136
Amino Acids 136
Analytical Techniques 136
References 137

17. How Cultivars Influence Fruit Composition: Total Phenols, Flavonoids Contents, and Antioxidant Activity in the Pulp of Selected Asian Pears
JUNFENG GUAN, JINGANG HE, CHENGUO SHEN, LIMEI LI, YANXIA WANG, YUDOU CHENG
Introduction 139
Determination of Total Phenols and Antioxidant Activity in the Pulp of Asian Pears 140
Comparison of Total Phenolic Content, Flavonoids Content and Antioxidant Activity in the Pulp of Asian Pears 140
Antioxidant Activity in Fruit 140
Relationship between Phenolics, Flavonoids, and Antioxidant Activity in Fruit 142
Genetic Background Determines the Antioxidant Potential of Fruit 143
References 144

18. Freezing of Fruits and Impact on Anthocyanins
SHYAMS. SABLANI

Introduction 147
Mechanisms of Anthocyanin Degradation 150
Effect of Freezing on Anthocyanins 151
Effect of Frozen Storage on Anthocyanins 151
Other Factors Affecting Anthocyanin Degradation 152
Effect of Frozen Storage on Antioxidant Capacity 152
Analytical Techniques 154
References 155

19. Strawberry Phenolics and Impact of Ripening
KJERSTI AABY, SIV FAGERTUN REMBERG

Introduction 157
How Composition is Altered 159
Other Ways in which Composition is Altered 162
Analytical Techniques 163
References 163

20. Biologically Active Compounds in Melon: Modulation by Preharvest, Post-harvest, and Processing Factors
ANA L. AMARO, ANA OLIVEIRA, DOMINGOS P.E. ALMEIDA

Introduction 165
How Composition is Altered 166
Other Ways in which Composition is Altered 169
References 171

INES EICHOLZ, SUSANNE HUYKENS-KEIL, SASCHA ROHN

Introduction 173
How Composition is Altered 174
Other Ways in which Composition is Altered- Further Impacts on Phenolic Compounds in Blueberry Fruits 178
Analytical Techniques 179
References 179

22. Production of Raisins and its Impact on Active Compounds
M. BELLLOCH-TINOCO, J. CARRANZA-CONCHA, M.M. CAMACHO, N. MARTINEZ-NAVARRETE

Introduction 181
How Composition is Altered 181

Other Ways in which the Composition is Altered 184
Analytical Techniques 185
References 186

23. Vapor Treatments, Chilling, Storage, and Antioxidants in Pomegranates
DANIEL VALERO, SEYED HOSSEIN MIRDEHGHAN, MOHAMMAD SAYYARI, MARIA SERRANO

Introduction 189
Pomegranate Phytochemicals 190
Cold Storage, Chilling Injury, and Pomegranate Bioactive Compounds 192
Methyl Jasmonate and Methyl Salicylate Vapor Treatments and Pomegranate Antioxidant Properties 193
Concluding Remarks 195
Analytical Techniques 195
References 195

Section 3
DAIRY AND EGGS

24. Milk Pasteurization, Curdling and Salting: Steps which can Modify Omega-3-Fortified Cheese
DANIELA BERMUDEZ-AGUIRRE, GUSTAVO BARBOSA-CANOVAS

Introduction 199
How the Composition is Altered 200
Analytical Techniques 205
References 206

25. Use of Lactobacillus spp to Degrade Pesticides in Milk
MÓNICA CALDERÓN-SANTIAGO, MARÍA DOLORES LUQUE DE CASTRO

Introduction 207
How Composition is Altered 208
Other Ways in which Composition is Altered 209
Analytical Techniques 211
References 212

26. Yayik Butter Profiles from Different Species of Mammals’ Milk
EBRU ŞENEL, METIN ATAMER

Introduction 215
The Production of Yayik Butter from Different Mammals’ Milk 216
Some Properties of Yayik Butters 216
The Effects of Other Technological Parameters on Yayik Butter Characteristics 219
Analytical Techniques 220
References 220
27. Formation of Biogenic Amines in Cheese
   TUBA SANLI, EBRU SENEL
   Introduction 223
   Occurrence of Biogenic Amines in Cheese 224
   Role of the Ripening Process and Proteolysis in Formation of Ba in Cheese 224
   Factors Affecting Biogenic Amines Occurrence in Cheese 225
   Environmental Conditions Related to Ba Formation in Cheese 228
   Analytical Techniques 229
   References 230

28. Changes in Volatile Compounds of Cheese
   SEVAL ANDIC, YUSUF TUNCTÜRK, GOKHAN BORAN
   Introduction 231
   How Composition is Altered 231
   Other Ways in which Composition is Altered 238
   Analytical Techniques 238
   References 238

Section 4
OILS FATS SPREADS

29. Oxidation Products of Corn Oil at Room Temperature
   ENCARNACION GOICOECHEA, MARIA D. GUILLEN
   Introduction 243
   How Composition is Altered 244
   Other Ways in which Composition is Altered 247
   Analytical Techniques 248
   List of abbreviations 248
   References 249

30. Aldehydes after Prolonged Heating at Frying Temperature
   ANDREA MARTINEZ-YUSTA, ENCARNACION GOICOECHEA, MARIA D. GUILLEN
   Introduction 251
   How Composition is Altered 251
   Other Ways in which Composition is Altered 255
   Analytical Techniques 255
   List of Abbreviations 257
   References 257

31. Influence of Filtration on Composition of Olive Oils
   KAROLINA BRKIC BUBOLA, OLIVERA KOPRIVNJAK
   Introduction 259
   Influence of Filtration on Active Components and Quality of Ooo 260
   Voo Quality 262
   Other Ways in which Voo Minor Active Components are Altered 263

Section 5
MEATS

32. Virgin Olive Oil: Losses of Antioxidant Polar Phenolic Compounds due to Storage, Packaging, and Culinary Uses
   ANASTASIOS KOIDS, DIMITRIOS BOSKOU
   Virgin Olive Oil and its Polar Fraction 267
   Factors that Influence the Retention of Polar Phenols 269
   Analysis of Polar Phenols and Other Bioactives in Olive Oils 271
   References 273

33. Volatile Compounds in High-Pressure-Processed Pork Meats Products
   ANA RIVAS-CANEDO, MARIA TERESA DIAZ, ANTONIA PICON, ESTRELLA FERNANDEZ-GARCIA, MANUEL NUNEZ
   Introduction 277
   Composition of the Volatile Fraction of Pork Meat Products as Altered by HHP Treatments 278
   Analytical Techniques for the Study of the Volatile Fraction of Pork Meat Products 282
   References 284

34. Imidazole Dipeptides in Meat from Different Animal Species and Effect of Cooking Method on their Contents in Beef and Turkey Meat
   PIER GIORGIO PEIRETTI, CLAUDIO MEDANA
   Introduction 285
   How Composition is Altered 286
   Other Ways in which Composition is Altered 288
   Analytical Techniques 290
   References 292

35. Cantonese Sausage, Processing, Storage and Composition
   WEIZHENG SUN, FEIBAI ZHOU, MOUMING ZHAO
   Introduction 293
   Effect of Processing and Storage on Protein Composition of Cantonese Sausage 294
   Effect of Processing and Storage on Peptide Release in Cantonese Sausage 296
   Effect of Processing and Storage on Lipid Composition of Cantonese Sausage 296
   Effect of Processing and Storage on Residual Nitrite Content of Cantonese Sausage 298
   References 299
Section 6
GRAIN, BEANS, PULSES, NUTS AND SEEDS

36. The Effects of Processing on Gluten from Wheat, Rye, and Barley, and its Detection in Foods
GIRIDHARI M. SHARMA, PRASAD RALLABHANID

Introduction 303
Gluten Proteins and their Properties 303
Effect of Food Processing on Gluten and its Composition 305
Analytical Techniques for Gluten Detection in Foods 306
References 307

37. Carotenoids, Tocols, and Retinols during the Pasta-Making Process
ALESSANDRA FRATIANNI, GIANFRANCO PANFILI, RAIMONDO CUBADDA

Introduction 309
How Composition is Altered 310
Other Ways in which Composition is Altered 314
Analytical Techniques 315
References 316

38. Dietary Fiber Arabinoxylans in Processed Rye: Milling- and Breadmaking-Induced Changes
MALGORZATA R. CYRAN

Introduction 319
Structural Features of Cereal Arabinoxylans 320
Distribution, Content and Water-Extractability of Arabinoxylans in the Grain 320
How Composition is Altered 321
Other Ways in which Composition is Altered 323
Analytical Techniques 326
References 327

39. Processing of Corn (Maize) and Compositional Features
LETICIA X. LOPEZ MARTINEZ, HUO S. GARCIA

Introduction 329
How Composition is Altered 329
Other Ways in which Composition is Altered 332
Analytical Techniques 334
References 335

40. Impact of Thermal Processing on Faba Bean (Vicia faba) Composition
ISABEL REVILLA

Introduction 337
How Composition is Altered 337
Analytical Techniques 342
References 343

41. Processing of Millet Grains and Effects on Non-Nutrient Antioxidant Compounds
FEREIDOON SHAHIDI, ANOMA CHANDRASEKARA

Introduction 345
Types of Millet 346
Production and Distribution of Millets 346
Processing of Millets 346
Compounds in Millet Grains with Antioxidative Properties 347
Effect of Processing on Phenolics and their Antioxidant Activities of Millet Grains 348
Effect of Processing on Phytic Acid Content 350
Summary 351
References 352

42. Influence of Processing on Nutraceuticals of Little Millet (Panicum sumatrense)
MANISHA GUHA, YADAHALLY N. SREERAMA, N.G. MALLESHI

Introduction 353
How Composition is Altered 354
Other Ways in which Composition is Altered 359
Analytical Techniques 359
References 360

43. Processing Oats and Bioactive Components
APOLLINAIRE TSOPMO

Introduction 361
Oat Processing 361
Effect of Commercial Processing on Oat Active Compounds 362
Effect of Germination on Oat Active Compounds 364
Wet Processing 366
Analytical Methods 367
References 367

44. Soybean Mineral Composition and Glyphosate Use
KRISHNA N. REDDY, STEPHEN O. DUKE

Introduction 369
Soybean Nutritional Value (in General) 370
Commercialization of Glyphosate-Resistant Soybean 370
Glyphosate Use on GR Soybean 371
Glyphosate Drift 371
Mineral Composition in Non-GR Soybean 372
Mineral Composition in GR Soybean 372
References 374

45. Drought and Heat Stress Effects on Soybean Fatty Acid Composition and Oil Stability
NACER BELLALOUI, KRISHNA N. REDDY, ALEMU MENGISTU

Introduction 377
Drought Effects on Seed Oil, Fatty Acid Composition, and Oil Stability 378
Section 7
MARINE FOODS

50. Isoelectric Processing of Seafood Products: Amino Acid and Fatty Acid Profiles
JACEK JACZYNSKI, REZA TAHERGORABI

Introduction 417
Compositional Changes of Proteins and Lipids from Seafood During Isoelectric Solubilization/Precipitation 419

Conclusions 424
References 424

51. The Effect of Carbon Monoxide on Slaughter and Processing of Fish
ANNA CONCOLLATO, GRY AELETTA BJÖRLYKKE, BJÖRN OLAV KVAMME, ODDVIN SØRHEIM, ERIK SLINDE, ROLF ERIK OLSEN

Introduction 427
How Fish Composition is Altered 428
Analytical Techniques 429
Practical Considerations 429
References 431

52. Sodium Nitrite, Salt-Curing and Effects on Carotenoid and N-Nitrosoamines in Marine Foods
JØRGEN LERFALL

Introduction 433
How Composition is Altered 434
Other Ways in which Composition is Altered 436
Analytical Techniques 436
References 438

53. Marinating and Salting of Herring, Nitrogen Compounds’ Changes in Flesh and Brine
MARIUSZ SZYMCZAK, GRZEGORZ TOKARCZYK, KATARZYNA FELISIAK

Introduction 439
How Composition is Altered 440
Other Ways in which Composition is Altered 444
Analytical Techniques 444
References 444

54. Shellfish (Mussel) Processing and Components
SERGIO ALMONACID, JOSELYN BUSTAMANTE, RICARDO SIMPSON, MARLENE PINTO

Introduction 447
How Composition is Altered 448
Other Ways in which Composition is Altered 453
Analytical Techniques 453
References 453

55. Influence of Ozone Depuration on the Physical Properties of Fresh American oysters (Crassostrea virginica)
VIOLETA PARDIO-SEDAS

Introduction 455
How Composition is Altered 456
Other Ways in which Composition is Altered 458
Analytical Techniques 460
References 460

65. Furan and Other Furanic Compounds in Coffee: Occurrence, Mitigation Strategies, and Importance of Processing
MONICA ANESE

Introduction 541
How Composition is Altered 542
Other Ways in which Composition is Altered 543
Analytical Techniques 545
References 546

66. Mineral Composition Variability of Coffees: A Result of Processing and Production
REBECA CRUZ, SIMONE MORAIS, SUSANA CASAL

Introduction 549
Agricultural Practices 550
Processing Methods 550
Beverage Preparation 553
Coffee Remains 554
Origins and Species 554
Analytical Approaches 556
References 557

67. Free Radical Processes in Coffee I—Solid Samples
BERNARD A. GOODMAN, CHAHAN YERETZIAN

Introduction 559
Antioxidants, Free Radicals, and Reactive Oxygen Species—Definitions and Functions 559
Direct Observation of Free Radicals Using Electron Paramagnetic Resonance (EPR) Spectroscopy 560
Free Radical Processes in Green Coffee Beans 560
Free Radical Formation During Coffee Bean Roasting 560
Characterization of the Free Radicals in Roasted Coffee 561
Factors Affecting the EPR Free Radical Signal Intensity in Roasted Coffee Beans 562
Radical Reactions During Storage of Roasted Coffee Beans 563
Free Radical Reaction Products in Stored Coffee 563
Discussion and Conclusions 565
References 565

68. Free Radical Processes in Coffee II—Liquids
BERNARD A. GOODMAN, CHAHAN YERETZIAN

Introduction 567
Observation of Free Radicals Using EPR Spectroscopy 567
Radical Reactions in Coffee Solutions Including Soluble Coffee 568
Pro-and Antioxidant Properties of Coffee Solutions 568
Role of O2 in the Free Radical Chemistry of Coffee Solutions 569
Factors Affecting the Stability of Coffee Concentrates 570
Influence of O2 on the Stability of Whole Roasted Coffee Bean Extracts 571
Formation of Free Radical Reaction Products 571
Degradation of Coffee Flavor and Aroma During Storage in the Liquid Form 572
Discussion and Conclusions 572
References 573

69. Acrylamide in Coffee: Influence of Processing
CRISTINA M.D. SOARES, RITA C. ALVES, M.BEATRIZ P.P. OLIVEIRA

Introduction 575
How Composition is Altered 575
Other Ways in which Composition is Altered 579
Analytical Techniques 580
References 581

70. Use of Microwaves to Extract Chlorogenic Acids from Green Coffee Beans
LINGAMALLU JAGAN MOHAN RAO, KULATHOORAN RAMALAKSHMI

Introduction 583
How the Composition Altered 584
References 590

71. Tea Leaf Age, Shade and Characteristic Levels of L-Theanine, Caffeine, (−)-Epigallocatechin Gallate (EGCG), (−)-Epigallocatechin (EGC), (−)-Epicatechin (EC), and (−)-Epicatechin Gallate (ECG)
KEHUA A. HAGIWARA, ANTHONY D. WRIGHT

Introduction 591
How Composition is Altered 592
Other Ways in which Composition is Altered 595
Analytical Techniques 596
References 596

72. The Impact of Variety, Environment and Agricultural Practices on Catechins and Caffeine in Plucked Tea Leaves
HAO CHENG, KANG WEI, LIYUAN WANG

Introduction 597
Varietal Effect 598
Climate 598
Agricultural Practice 600
Plucking Season and Leaf Age 600
Analytical Techniques 601
List of Abbreviations 602
References 602

73. Cocoa Processing and Impact on Composition
JASMINKA GIACOMETTI, SLAVICA MAZOR JOLIĆ, DJURO JOSIĆ

Introduction 605
Bioactive Components in Cocoa Cultivars 605
Analytical Techniques 610
Perspectives and Challenges 611
References 611
74. Tagatose Stability in Beverages as Impacted by Composition and Thermal Processing
LEONARD N. BELL

Introduction 613
How Composition is Altered 614
Other Ways in which Composition is Altered 616
Analytical Techniques 617
References 618

75. High-Pressure Processing, Strawberry Beverages, and Composition of ‘Bioactives’
RAVI KIRAN TADAPANENI, INDIKA EDIRISINGHE, BRITT BURTON-FREEMAN

Introduction 619
Bioactive Compounds and Health 619
Polyphenols in Strawberry 620
Processing Effects on Food/Beverage Quality 620
Thermal Processing Alternatives 623
High-Pressure Processing (HPP) as an Emerging Technology 623
Impact of HPP on Bioactives 623
Summary and Conclusions 626
References 626

76. Processing Pomegranates for Juice and Impact on Bioactive Components
NALLELY NUNCIO-JAUREGUI, ANGEL CALÍN-SÁNCHEZ, LAURA VÁZQUEZ-ARAUJO, ANTONIO JOSÉ PÉREZ-LÓPEZ, MARÍA J. FRUTOS-FERNÁNDEZ, ÁNGEL A. CARBONELL-BARRACHINA

Introduction 629
How Composition is Altered Due to Pomegranate Juice Manufacturing 630
Other Ways in which Composition of Pomegranate Juice is Altered Due to The Manufacturing 633
References 636

77. Carotenoids in Nonthermally Treated Fruit Juices
LODROIZOLA-SERRANO, G. OMS-OLIU, R. SOLIVA-FORTUNY, O. MARTÍN-BELLOSO

Introduction 637
How Composition is Altered 637
Analytical Techniques 640
References 642

Section 9
HERBS AND SPICES AND MISCELLANEOUS VEGETATION

78. Dehydration of Basil Leaves and Impact of Processing Composition
RAFFAELLA BOGGIA, PAOLA ZUNIN, VILMA HYSENAJ, ALDO BOTTINO, ANTONIO COMITE

Introduction 645
How Composition is Altered 646
Analytical Techniques 647
References 648

79. Variations in Polyphenols and Lipid Soluble Vitamins in Moringa oleifera
JULIA P. COPPIN, H. RODOLFO JULIANI, QINGLI WU, JAMES E. SIMON

Introduction 655
How Composition is Altered 656
Other Ways in which Composition is Altered 660
Analytical Techniques 661
References 662

Section 10
CONFECTIONARY AND OTHER FOOD ITEMS

80. Effect of Processing on Dark Chocolate Composition: A Focus on Allergens
SEFATE H. KHUDA, KRISTINA M. WILLIAMS

Introduction 667
How Composition is Altered 667
Other Ways in which Composition is Altered 668
Analytical Techniques 668
References 673

81. Honey Production and Compositional Parameters
JONATHAN M. STEPHENS, DAVID R. GREENWOOD, LIAM FEARNLEY, JESSIE BONG, RALF C. SCHLOTHAUSER, KERRY M. LOOMES

Introduction 675
How Composition is Altered 676
Other Ways in which Composition is Altered 679
Analytical Techniques 679
References 680

82. Jam Processing and Impact on Composition of Active Compounds
TAHA M. RABABAH, MUHAMMAD H. AL-UDATT, SUSAN BREWER

Introduction 681
Jam Processing 681
How Composition is Altered 682
Active Compounds in Fruits and their Jams 682
Flavonoids 684
Light, Time, and Temperature 685
Acidity 685
Analytical Techniques 686
Conclusion 686
