Proceedings of NordDesign 2014 Conference

Edited by
Miko Laakso
Kalevi Ekman

Aalto University
# Table of Content

## Education and teaching of design, product development and innovation
- **8** Pay it forward - Planning and Assessment of a Coaching Seminar for Global-Design Team Alumni
  - Franziska Höger, Thomas Kowark and Matthias Uflacker
- **18** Learning outcomes of a project-based capstone product development course
  - Erika Rautavaara, Ville Toijamaa, Viljami Lyynkkäinen and Tapio Salakoski
- **27** A Design-Engineering Interdisciplinary and German-Korean Intercultural Design Project Course
  - Hyunjune Yim, Keun Lee, Alexander Brezing and Manuel Löwer
- **37** Investigating the Potential of Design Jams to Enhance Sustainable Design Education
  - Valentina Vezzani and Tang Tang
- **47** Design Research: The Application in Professional Design Practice and Teaching in Design Education
  - Wooyoung Sung and Jacques Giard
- **54** Exploring the curricular relationship between service experience design and interaction design
  - Youngbok Hong and Aaron Ganci
- **65** The Educational Design Ladder: Creation of a Multi-Discipline Design Thinking Program
  - Karla Straker and Cara Wrigley
- **75** The potential of design to foster academic entrepreneurship: An ethnographic study of metaLAB at Harvard
  - Luca Simeone
- **85** (re)Designing Design Labs. Processes and places for a new generation of designers = enterprises
  - Massimo Bianchini, Patrizia Bolzan and Stefano Maffei
- **95** Creativity for a New Era
  - Markus Kretschmer
- **105** New Approaches to the Application of Additive Manufacturing and Reverse Engineering in Design Education
  - Stefan Junk and Rebecca Matt
- **115** Design Education: Fostering the conditions for transfer through a structured and critical approach to reflective practice
  - Grant Ellmers, Sue Bennett and Jan Brown
- **125** Mixed Method Research Procedure for Design Education
  - Luke Feast and Janneke Blijlevens
- **135** Conflicts within complex contexts: the relationship between facilitators and participants in interdisciplinary pedagogy
  - John Eggleston & Christine Thong

## Collaboration, communication and co-creation in design and development
- **146** How university-industry collaboration in mixed teams creates value in the front end of innovation?
  - Kirsi Polvinen and Pekka Berg
- **154** Design Research for the Real World: A Design-led Innovation Model for Action Research
  - Rebecca Price, Cara Wrigley, Judy Matthews and Alexander Dreiling
- **164** Using PD6 to Explore the Initial Collaboration between Chinese Companies and Chinese Universities Experiments Done by Sino-Finnish Centre, Tongji University
  - Fei Fan, Zhou Lu, Danni Wang and Wenjia Zhou
- **173** Iterative Creation and Analysis of Generic Ideation Spaces for SMEs
  - Johannes Heck, Katam Al-Falou, Martin Steinert and Mirko Meboldt
- **183** Organisational culture as the mechanism for internationalising innovation platforms
  - Päivi Oinonen
- **193** Phantom discipline? A preliminary study of industrial design in the regional manufacturing industry of Biobio, Chile.
  - Juan Carlos Briede W., Marcela Cabello M., Jorge Cartes s. and Gilda Vargas M.
- **203** Enhancing collaboration between project participants in a research and development consortium
  - Paulkina Mattila, Samuli Mäkinen and Miko Laakso
- **213** Reasoning processes involved in ICT-mediated design communication
  - Pieter Pawuels, Jolanda Mørkel and Rens Bod
- **223** Artifacts Supporting Distributed Design Collaboration
  - Pekka Alakultra and Matti Vartiainen
- **233** Analysing information sharing in virtual New Product Development Teams using the Google Drive API
  - Cornelius Illi, Franziska Höger and Matthias Uflacker
243 Cultural impact on co-design team communication in distributed bi-national teams
  Jeff Man, Yuan Lu, Aarnout Brombacher and Fangtian Ying

252 Face to face with ambiguity and diversity: dynamics of interdisciplinary team work in different phases of explorative new product development projects
  Satu Rekonen

262 Visualization of Problems in Experience Sharing
  Johan Holmqvist, Åsa Ericson and Johan Wenngren

272 Learnings from joint service spheres
  Minttu Lampinen and Päivi J. Tossavainen

Users in design and development

284 Disabled users as lead users in user centred product innovation: a literature overview
  Peter Conradi, Lieven De Courrêur, Jelle Saldien and Lieven De Marez

294 Lead User Identification through Twitter: Case Study for Camera Lens Products
  Sanjin Pajo, Paul-Armand Verhaegen, Dennis Vandeveen and Joost R. Duflou

302 Widening the interpretation of assistive devices – a designer's approach to assistive technology
  Jesper Grieg, Martina Maria Keitsch and Casper Boks

312 User involvement in product and service development: a literature review
  Saara Vuomela, Pia Helminen and Samuli Mäkinnen

322 “We try to listen – but do we understand?” An explorative study about user involvement in technology-driven organisations
  Thomas Abrell and Andreas Benker

335 Evaluating Value Design Workshop at Collaborative Design Sessions
  Pelin Gultekin-Atasoy, Yuan Lu, Tilde Bekker, Berry Eggen and Aarnout Brombacher

345 Human Factors Engineering as a supportive tool for Lean Product Development
  Micaela Institoris and Lars-Ola Bligård

355 Challenges in transferring user experience related knowledge to support commercialization of innovation
  Maarit Heikkinen, Hanna-Riikka Sundberg, Laura Kanto and Hannamaija Määttä

365 Total Cost of Ownership and its potential implications for Electric Vehicle diffusion
  Jens Hagman, Sofia Ritzén and Jenny Janhager Stier

375 Socio-technical infrastructuring to assist innovation in healthcare technologies
  Alastair S. MacDonald

385 A Tactile Visual Library To Support User Experience Storytelling
  Makayla Lewis and Lizzie Coles-Kemp

395 Storytelling and a narrative analysis based method for extracting users’ motives in UX design processes
  Francesco Pucillo, Ioanna Michailidou, Gaetano Cascini and Udo Lindemann

405 Customer journey and experience canvas
  Erez Nusem, Aimee Defries, Cara Wrigley and Judy Matthews

415 Logical Lego? Co-constructed perspectives on service design
  Claude Heath P. Heath, Lizzie Coles-Kemp and Peter A. Hall

425 Making Services Tangible for Bridging Stakeholder Understandings
  Samuli Mäkinnen and Pia Helminen

435 Hybrid Touchpoints for Relational Service in Social Innovation: A Case Study of “Eat Me!”
  Kathy Pui Ying Lo

445 Physicality in hybrid products - The role of physicality when data, services and new social meanings merge
  Lars Helland Bjørtnes, Trond Are Øritsland and Jóhannes B. Sigurjónsson

Design theory and practices

455 Design practices contributing to meaning-changing innovations – Case study in Finnish boating industry
  Janne Pekkala and Sanna Peltonen

465 Adding to Product Development Theory - A Language Perspective
  Poul Kyviggaard Hansen, Pekka Berg and Ade Mabogunje

475 Design as sensemaking: an autoethnography on the early phases of product development
  Ilkka Kettunen

485 The use of formal aesthetic principles as a tool for design conceptualisation and detailing
  Abu Ali and Andre Liem

495 Framing and reframing – the emergence of design constraints
  Johan Wenngren, Åsa Ericson and Johan Holmqvist
Creating a Reflective Understanding of Use of Formal Aesthetics in Product Semantic Frameworks
Abu Ali and Andre Liem

Analogies to Succeed: Applications to a Service Design Problem
Diana P. Moreno, Maria C. Yang, Lucienne Blessing and Kristin L. Wood

Examining designer's ability to predict new service success
Marina Candi and Gerda Gemser

The spread of product development methodology: Exploring drivers and barriers in Swedish Industry
Viktor Hiort Af Ornäs, Anders Warell, Andreas Larsson, Damien Motte and Santosh Jagtap

Situation-appropriate method selection in product development process – empirical study of method application
Albert Albers, Nicolas Reiß, Nikola Bursac, Jan Urbanec and Robert Lüdcke

Methods that emerge from designers' discourse
Julio Carlos de Souza van der Linden and Luisa Freitas Dos Santos

Enhancing design sensitivity and creativity in the detailing and materialisation stages of the design process through specific models and prototypes
Siti S. Isa and Andre Liem

Physiological Data Acquisition for Deeper Insights into Prototyping
Carlo Kriesi, Martin Steinert, Mirko Meboldt and Stephanie Balters

Sketching interactive experiences: Video scenario to support imagination and co-design
Margherita Pillan, Marco Spadafora and Annamaria Andrea Vitali

From valuing design to designing value
Rohan Doherty, Cara Wrigley and Judy Matthews

Designing a Municipality
Ulrik Jungersen and Poul Kyvsgaard Hansen

Joining Forces: Investigating the influence of design for behavior change on sustainable innovation
Kristina Niedderer, James Mackrill, Stephen Clune, Martyn Evans, Dan Lockton, Geke Ludden, Andrew Morris, Robin Gutteridge, Edward Gardiner, Rebecca Cain and Paul Hekkert

Parallel Development of Products and New Business Models
Morten Lund and Poul Kyvsgaard Hansen

Test Results of Practical Value-Centric Business Development Methodology
Merili Randmaa, Tauno Otto and Thomas J. Howard

The conceptual design phase of Industrial Product-Service Systems (IPS2) - Learning from an industrial use-case
Daniel Meuris, Michael Herzog, Beate Bender and Tim Sadek

Building a pathway for innovation: Lessons learned from developing an online platform
Andre Benaim, Andreas Larsson, Tobias C. Larsson and Jenny Elfsberg

Early Innovation Leadership
Silje Aschehoug, Kjersti Schulte and Geir Ringen

Discovering concept patterns in spatial design
Katam Al-Falou, Johannes Heck, Carlo Kriesi, Martin Steinert and Mirko Meboldt

A retrospective analysis of Engineering Change Orders to identify potential for future improvements
Martina C. Wickel, Nepomuk and Udo Lindemann

Impacts of making design decision sequence explicit on NPD projects in a forest machinery company
Nillo Halonen, Timo Lehtomen and Tero Juuti

Measurement of Design Process Front-End - Radical Innovation Approach
Pekka Berg, Jussi Pihlajamaa and Poul Kyvsgaard Hansen

An Initial Approach for the Application of Product Assembly Information in the Early Phases of the Product Development Process by Using Methods of Model Based Systems Engineering
Martin Eigner, Joscha Ernst, Daniil Roubanov and Thomas Dickopf

Implementation and automation of the characteristic property-concept within a PDM system
Johannes Kößler, Jochen Reitmeier and Kristin Paetzold

Integration Framework for Product Development and Production Development
Pascal Stoffels, Frank Litwa, Christian Gerlach and Michael Vielhaber
Enabling modularization potentials by standardized vehicle layouts  
Armin Förg, Johannes Stocker, Matthias Kreimeyer and Markus Lienkamp

Collaboration in Model-Based Systems Engineering based on Application Scenarios  
Christian Tschirner, Lydia Kaiser, Roman Dumitrescu and Juergen Gausemeier

Software support for the consistent transition from requirements to functional modeling to system simulation  
Fabio Dohr, Boris Eisenbart, Christian Huwig, Lucienne Blessing and Michael Vielhaber

Approach for a standardized database regarding tolerance analysis in automotive industry  
Frank Litwa, Christian Gerlach, Martin Gottwald, Martin Bohn, Benedikt Kraß and Michael Vielhaber

Supporting the development of lightweight design structures with simple methods in early stages  
Benedikt Posner, Hansgeorg Binz and Daniel Roth

Weight Optimization Approach for Conceptual Design - Requirements, Functions, Working Principles  
Tobias Luedeke, Romano Bonertz and Michael Vielhaber

Using 3D in design - an overview of measuring methods and experiences  
Juho-Pekka Virtanen, Matti Kurkela and Hannu Hyypää

Using system-level simulation in early mechatronic design stages  
Fabio Dohr and Michael Vielhaber

Feature models supporting trade-off decisions in early mechatronic systems design  
Arno Kühn, Christian Bremer, Roman Dumitrescu and Jurgen Gausemeier

Differences and Similarities Between Quality Improvement Methods Originating from the USA and Japan  
Kirs Andersson, Markku Lintinen, Timo Lehtonen and Paul H. Andersson

A case study of efficient tolerance synthesis in product assemblies under loading  
Maciej Mazur, Martin Leary and Aleksandar Subic

Measurement and visualisation of evolutionary changes in product shape for justification of styling decisions in design  
Charlie Ranscombe and Janneke Blijlevens
