The Shell Bitumen Handbook
Sixth edition

Principal authors
Dr Robert N. Hunter, Andy Self and Professor John Read
## Contents

About the principal authors  xii  
Foreword  xiv  
Acknowledgements  xv  

### Chapter 1  Introduction  1  
1.1 Origins  3  
1.2 Definition of bitumen  4  
1.3 The uses of bitumen  5  
1.4 Health, safety and environment  10  
1.5 Other binders  11  
1.6 Terminology  13  
References  13  

### Chapter 2  Manufacture and storage of bitumens  15  
2.1 The manufacture of bitumen  15  
2.2 Fractional distillation of crude oil  15  
2.3 Air blowing of short residues  20  
2.4 Delivery, storage and handling temperatures of bitumen  24  
References  27  

### Chapter 3  Handling, health, safety and environmental aspects of bitumens  29  
3.1 Handling and safety  29  
3.2 Health aspects of bitumen  36  
3.3 Bitumen and the environment  42  
References  44  

### Chapter 4  Constitution and structure of bitumens  47  
4.1 Bitumen constitution  48  
4.2 Bitumen structure  54  
4.3 The relationship between bitumen constitution, structure and rheology  57
4.4 The relationship between broad chemical composition and physical properties during the bitumen life cycle 58

References 62

Chapter 5 **Specifying bitumens and checking their quality** 65

5.1 Penetration grade, hard penetration grade and viscosity grade bitumens 66
5.2 Polymer modified bitumens (PMBs) 66
5.3 Oxidised bitumens 69
5.4 Hard bitumens 70
5.5 Bitumen quality 70
5.6 The CEN bitumen specification 81
5.7 The SHRP/Superpave bitumen specification 82

References 85

Chapter 6 **Routine testing and mechanical properties of bitumens** 87

6.1 Standard specification tests for bitumens 87
6.2 Temperature susceptibility – the penetration index (PI) 92
6.3 Viscosity 93
6.4 The bitumen test data chart 99
6.5 Engineering properties of bitumen 105
6.6 Cohesion 114

References 116

Chapter 7 **Rheology of bitumens** 119

7.1 Rheology, deformation and flow 120
7.2 The rheology of bitumen 134

References 145

Chapter 8 **Polymer modified bitumens and other modified binders** 149

8.1 The role of bitumen modifiers in asphalt pavements 150
8.2 The modification of bitumen 153
8.3 Other modified products used for road and industrial applications 166
8.4 Properties of PMBs and related test methods 174
8.5 Manufacture, storage and handling of PMBs 177
8.6 Performance of PMBs for road application: Shell Cariphalte® example 179

References 180
### Chapter 9: Bitumen Emulsions

- **9.1** A brief history of the development of bitumen emulsions 186
- **9.2** The components of emulsions 187
- **9.3** The manufacture of bitumen emulsions 193
- **9.4** Storage and handling of bitumen emulsions 194
- **9.5** Properties of bitumen emulsions 196
- **9.6** Modification of bitumen emulsion properties 203
- **9.7** Classification and specification of bitumen emulsions 208
- **9.8** Uses of bitumen emulsions 209
- **9.9** Trends and new developments in the use of bitumen emulsions 214
- **9.10** Further information on bitumen emulsions 214

### Chapter 10: Aggregates in Asphalts

- **10.1** Introduction 217
- **10.2** Origin and type 218
- **10.3** Aggregate processing 224
- **10.4** Coarse and fine aggregates 231
- **10.5** Filler aggregate 250
- **10.6** Assuring aggregate quality 255

### Chapter 11: Choosing Asphalts for Use in Flexible Pavement Layers

- **11.1** Asphalts used in flexible pavements in Europe 261
- **11.2** UK pavements 264
- **11.3** Asphalts used in flexible pavements in the UK 267
- **11.4** Asphalts used in flexible pavements in France 277
- **11.5** Asphalts used in flexible pavements in Germany 282
- **11.6** Asphalts used in flexible pavements in the USA 284
- **11.7** Asphalts used in flexible pavements in India 287
- **11.8** Asphalts used in flexible pavements in China 289

### Chapter 12: Design of Asphalt Mixtures

- **12.1** A very brief history of asphalt mixture design methods 295
- **12.2** Mixture volumetrics 297
### Chapter 13: Design of flexible pavements
