CONTENTS

APPLIED MECHANICS

ESDA2014-20062 ................................................................. V001T01A001
Effect of Loading Rate on the Stress Distribution on Heavy Truck Chassis   
Ali Cinar

ESDA2014-20091 ................................................................. V001T01A002
In-Plane Thermal Residual Stresses in Functionally Graded Plates   
M. Kemal Apalak and M. Didem Demirbas

ESDA2014-20123 ................................................................. V001T01A003
A Study on a Grade-One Type of Hypo-Elastic Models   
S. Alireza Momeni and Mohsen Asghari

ESDA2014-20285 ................................................................. V001T01A004
Numerical Simulation of Friction Stir Welding by an Efficient 3D Updated   
Lagrangian Technique   
D. Canales, Ch. Ghatios, A. Leygue, F. Chinesta, I. Alfaro, E. Cueto, E. Feulvarch, and   
J. M. Bergheau

ESDA2014-20347 ................................................................. V001T01A005
Finite Element Method Modelling and Analysis on Compressor Coupling Integrity Review   
Edi Hamdi, Tatacpta Dirgentara, and Hery Setiawan

ESDA2014-20363 ................................................................. V001T01A006
Effect of Temperature Gradient on the Mechanical Buckling Resistance of FGM Shallow Arches   
M. Bateni and M. R. Eslami

ESDA2014-20365 ................................................................. V001T01A007
On the Stress Triaxiality Sensitivity of High Density Polyethylene   
Kamel Hachour, Lydia Sadeg, Djamal Sersab, and Meziane Aberkane

ESDA2014-20372 ................................................................. V001T01A008
Influence of Explicit and Implicit Integration of Hyperelastic-Plastic Combined Hardening   
Models on the Springback in Sheet Forming   
Michael P. Pietryga, Ivaylo N. Vladimirov, and Stefanie Reese

ESDA2014-20406 ................................................................. V001T01A009
Large Amplitude Thermally Induced Vibration of Circular FGM Plate   
Yasser Kiani and Mohammad Reza Eslami

ESDA2014-20419 ................................................................. V001T01A010
Analysis of Static Strength and Failure Mode of FSSW Joint in Aluminum Alloy   
Francesco Vivio, Vincenzo Vullo, and Pierluigi Fanelli

ESDA2014-20608 ................................................................. V001T01A011
Some Unexpected Results in the Stress Calculation Around Multiple Holes in an Isotropic Plate   
Under In-Plane-Loads   
Ghazi H. Asmar, Elie A. Chakar, and Toni G. Jabbour
Theoretical Analysis of Thrust-Induced Delamination in Hemispherical Drilling Composite Materials
Chungchen Tsao and Keilin Kuo

AUTOMOTIVE SYSTEMS

Effect of Using Grilles in Car Park Through Reversible Supply Exhaust Ventilation Strategy
Ahmed Osama Mohammed Said, Essam E. Khalil, Ahmed A. Medhat Fahim, and Esmail Mohamed Ali Elbialy

Engine Mount Vibration Sensitivity to Stiffness and Mass Properties of Major Components
Fatih Kagnici

Dynamic Behavior and Synchronization of an Automobile as a Complex System
Claudia A. González-Cruz, Juan C. Jáuregui-Correa, Carlos S. López-Cajún, and Mihir Sen

An Investigation of the Relation Between Combustion Phase and Emissions of ULSD & RME Biodiesel With a Common-Rail HSDI Diesel Engine
Hayder A. Dhahad, Mohammed A. Abdulhadi, Ekhlas M. Alfayyadh, and T. Megaritis

Optimization of the Roll and Steer Systems of a Four-Wheeled Tilting Vehicle
Massimiliano Caneri, Roberto Lot, Vittore Cossalter, and Matteo Massaro

Design of a Semi Active Differential to Improve the Vehicle Dynamics
Claudio Annicchiarico, Mirko Rinchi, Stefano Pellari, and Renzo Capitani

Injury Criteria Based Optimisation of Automobile Passive Safety Systems to Mitigate the Effects of Full-Frontal Automobile Collisions
Volkan Esat

Potential of the Variable Valve Actuation (VVA) Strategy on a Heavy Duty CNG Engine
Mirko Baratta, Roberto Finesso, Daniela Misul, Ezio Spessa, Yifei Tong, and Cesare Peletto

An Investigation of an Electromechanical Valve Actuator With a Disc Type of Electromagnet
Zeliha Kamiş Kocabiçak, Elif Erzan Topçu, and Ibrahim Yüksel

Configuration Design and Energy Balancing of Compact-Hybrid Powertrains
Paul D. Walker and Holger M. Roser

</table>
Development of Driving Cycle for Amman City With Performance Evaluation for ICE Vehicle
M. Abu Mallouh, B. W. Surgenor, E. Abdelhafez, M. Salah, and M. Hamdan

BIOMEDICAL BIOTECHNOLOGY ENGINEERING

Compliant Device for Hand Rehabilitation of Stroke Patient
Alberto Borboni, Rodolfo Faglia, and Maurizio Mor

Design and Control of an Active Humanoid Leg for Testing Lower-Limb Prostheses
Cristiano Marinelli, Hermes Giberti, and Ferruccio Resta

PCL/Eggshell Scaffolds for Bone Regeneration
Tania Viana, Sara Biscaia, Henrique A. Almeida, and Paulo J. Bârtolo

Determining of Optimized Mechanical Characters for Designing of an Artificial Ankle
Ali M. Goudarzi, Hossein Kheirrollahi, Mohammad Fazeli, and Misagh Imani

Hemodynamical Aspects of Endovascular Repair for Aortic Arch Aneurisms
Asaph Nardi, Idit Avrahami, Moshe Halak, Daniel Silverberg, and Moshe Brand

Stent vs Stent Study by Means of Finite Element Method
Misagh Imani, A. M. Goudarzi, D. D. Ganji, and M. Barzegar Gerdroodbary

Functional Recovery of the Upper Limb With an Active Personal Device
Federico Casolo and Masoud Amiri

Static Analysis and Strength Reliability of Human Femur Bone
Viswanath Yakkala, Suhail Ahmad, Puneet Mahajan, and Pankaj Pankaj

The Mechanical Behavior of a Balloon-Expandable Stent in a Stenotic Artery
Misagh Imani, A. M. Goudarzi, D. D. Domairy Ganji, and M. Barzegar Gerdroodbary

Resonant Ultrasound Spectroscopy Used for Diagnosis of Some Medical Prosthesis Components Made From Zirconium Oxides
Adriana Savin, Mihai Liviu Craus, and Rozina Steigmann

COMPUTATIONAL MECHANICS

Mixed-Mode Hygrothermal Fracture Analysis of Orthotropic Functionally Graded Materials Using J-Integral
Serra Topal and Serkan Dag
ESDA2014-20156 .......................................................... V001T04A002
Estimating the Effect of Chirality and Size on the Mechanical Properties of Carbon Nanotubes
Through Finite Element Modelling
Muhammad Jibran Shahzad Zuberi and Volkan Esat

ESDA2014-20402 .......................................................... V001T04A003
Nonlinear Thermal Buckling Analysis of FGM Shallow Arches Under Linear Temperature Gradient
H. Asgari and M. R. Eslami

ESDA2014-20458 .......................................................... V001T04A004
Cristiana Delprete and Carlo Rosso

ESDA2014-20541 .......................................................... V001T04A005
Finite-Element Simulation of Temperature Fields and Residual Stresses in Butt Welded Joints and Comparison With Experimental Measurements
Enrico Armentani, Angela Pozzi, and Raffaele Sepe

ESDA2014-20574 .......................................................... V001T04A006
FORM Based Reliability Analysis With Accurate Sensitivity for Heat Conduction
Weiya Jin, Brian H. Dennis, Xing He, Bo Ping Wang, and Zengliang Gao

ESDA2014-20575 .......................................................... V001T04A007
Numerical Simulation of Tooth Surface Finish Effects on Gear Noise
S. Jolivet, S. Mezghani, M. El Mansori, and H. Zahouani

DESIGN
ESDA2014-20082 .......................................................... V001T05A001
Innovative Force Gauge
Chien-Sheng Liu, Hong-Fei Li, and Hong-Tzong Yau

ESDA2014-20154 .......................................................... V001T05A002
Bio-Inspired Solutions in Design for Manufacturing of Micro Fuel Cell
Farzaneh Omidvarnia and Hans Nørgaard Hansen

ESDA2014-20211 .......................................................... V001T05A003
A Model for Organizing and Analyzing Integration of Environmental Concerns in Product Design and Re-Design
Michael Søgaard Jørgensen

ESDA2014-20224 .......................................................... V001T05A004
An Inner-Enterprise Design Knowledge Flow Management Approach
Zhinan Zhang, Yonghong Liu, Qing Long, and Youbai Xie

ESDA2014-20232 .......................................................... V001T05A005
Development of a Water Brake Dynamometer With Regard to the Modular Product Design Methodology
Shams Torabnia and Afshin Banazadeh
Managing the Conceptualization Process in Innovative Engineering Design, Demonstrated on a Hybrid Two-Wheeler Design Case Study
Holger M. Roser and Paul D. Walker

Product Design Knowledge Model in Distributed Resource Environment
Xudong Dai and Xuefen Ma

Reciprocal Frame Optimisation for Laser-Tube Technology
Pierpaolo Ruttico, Pasquale Lorusso, and Stefano Arrighi

Use of NC3568 Flange Design Rules for B16.47 Flanges: An Analytical and Finite Element Based Study
Anindya Bhattacharya and Michael P. Cross

A Comparison of Two Different Approaches to Camera Calibration in LSDM Photogrammetric Systems
Ou Bai, Fiorenzo Franceschini, Maurizio Galetto, Luca Mastrogiacomo, and Domenico A. Maisano

Optimizing 5-Axis Sculptured Surface Finish Machining Through Design of Experiments and Neural Networks
Nikolaos A. Fountas, John Kechagias, Redha Benhadj-Djilali, Constantinos I. Stergiou, and Nikolaos M. Vaxevanidis

Reverse Engineering Using Close Range Photogrammetry for Additive Manufactured Reproduction of Egyptian Artefacts and Other Objets d’art
John Kaufman, Allan E. W. Rennie, and Morag Clement

Numerical Simulations of Filling Flows in Die-Casting Molding of the Thin-Walled LED Heat Sink
Rong-Yuan Jou

Jewelry Fabrication via Selective Laser Melting of Glass
Miranda Fateri and Andreas Gebhardt

Integration of Topological and Functional Optimization in Design for Additive Manufacturing
Yunlong Tang, Jean-Yves Hascoet, and Yaoyao Fiona Zhao

Study on an Optimized Configuration of Conformal Cooling Channel by Branching Law
Jae Hyuk Choi, Jin Su Kim, Eun Su Han, Hyung Pil Park, and Byung Ohk Rhee
ESDA2014-20433 ........................................V001T06A008
Topological Shear Stress Optimisation of Micro-CT Based Scaffolds
Henrique A. Almeida and Paulo J. Bártolo

ESDA2014-20439 ........................................V001T06A009
In-Process Quality Characterization of Grinding Processes: A Sensor-Fusion Based Approach
Matteo Maggioni, Elena Marzorati, Marco Grasso, Bianca Maria Colosimo, and Paolo Parenti

ESDA2014-20464 ........................................V001T06A010
Fuzzy Model for Electrostatic Fluidized Bed Coating
Federica Trovalusci, Massimiliano Barletta, and Oliviero Giannini

ESDA2014-20484 ........................................V001T06A011
A Simulation Study of Flexible Manufacturing System Using Dynamic Scheduling Approach
Vijay Kumar Mahalingam

ESDA2014-20566 ........................................V001T06A012
Near-Optimal Mixing Allocation for Traded Products and Prices
Mukul Agarwal

EDUCATION
ESDA2014-20060 ........................................V001T08A001
Teaching Product Design Through Industry Collaboration
Gabriel J. Costello

ESDA2014-20103 ........................................V001T08A002
Shall We Continue Keeping High School Courses in Mechanical Engineering Curriculum?
Murat Sönmez

ESDA2014-20149 ........................................V001T08A003
Web-Based Assessment of CAD Data in Undergraduate Design Education
Daniel Benjamin Krüger and Sandro Wartzack

ESDA2014-20251 ........................................V001T08A004
Problem-Based Learning Approach in Marine Engineering Education Using Mobile Devices and Internet Tools
Carlos E. Mora Luis, Antonio González Marrero, Reyes Carrau Mellado, Beatriz Añorbe-Diaz, and Jorge Martín-Gutierrez

ESDA2014-20446 ........................................V001T08A005
Virtual Academic Teaching for Next Generation Engineers
Fabio Fortuna, Gino Bella, Mirko Barbuto, Riccardo Conti, Raffaello Cozzolino, Silvia Di Francesco, Alfredo Donno, Vincenzo Duraccio, Oliviero Giannini, Valeria Montesarchio, Alessio Monti, Laura Tribioli, and Federica Trovalusci

ESDA2014-20472 ........................................V001T08A006
Applying Actual Development Progress Into Education
Katharina Albrecht and Reiner Anderl

ESDA2014-20549 ........................................V001T08A007
Human Powered Vehicle Design: A Challenge for Engineering Education
Paolo Baldissera and Cristiana Delprete
The Application of Laser Cladding to Marine Crankshaft Journal Repair and Renovation
Toms Torims, Frank Bruckner, Andris Ratkus, Artjoms Fokejevs, and Andris Logins

Determination of Maximum Loads for Drive Train Components in Thrusters Using Flexible Multibody-System Models
Thomas Rosenlöcher and B. Schlecht

Airfoil Shape Design via Elastic Surface Inverse Design Method
M. Nili-Ahmadabadi, M. Safari, A. Ghaei, and E. Shirani

Programmable Support Functions to Assist Process Planning for Aeronautical Parts Manufacturing
Nikolaos A. Fountas, Constantinos I. Stergiou, and Nikolaoas M. Vaxevanidis

Flight Stability and Safety of WIG Craft With and Without Feedback Control
Andreas Groß, Nikolai Kornev, Tobias Hahn, Bernhard Lampe, and Wolfgang Drewelow

Efficiency Enhancement of Bidirectional Impulse Turbine Using Artificial Neural Network
R. Badhurshah and A. Samad

Influence of Opposing Jet on an Aerodisk Nose Cone at Hypersonic Flow
M. Barzegar Gerdroodbary, A. M. Moazemi Goudarzi, Misagh Imani, K. Sedighi, and D. D. Domairy Ganji

Author Index
