CONTENTS

DYNAMICS, VIBRATION AND CONTROL

ESDA2014-20007 ................................................................. V002T07A001
Study the Impact Behavior of the Prosthetic Lower Limb Lamination Materials Due to Low Velocity Impactor
   Jumaa S. Chiad

ESDA2014-20024 ................................................................. V002T07A002
The Stability of the Self-Lubricated Journal Slider Bearing
   Valentin Stingelin

ESDA2014-20026 ................................................................. V002T07A003
Stick-Slip Model for PDC Bits Accounting for Coupled Torsional and Axial Oscillations
   Vadim Tikhonov, Olga Bukashkina, and Raju Gandikota

ESDA2014-20034 ................................................................. V002T07A004
Analysis of Stiffening Effect and Rupture in Dynamics of Graphite Electrodes of the Electric Arc Furnace
   Eugenio G. M. Brusa

ESDA2014-20038 ................................................................. V002T07A005
Sliding Mode Control Design for Nonlinear Systems Without Reaching Phase and its Applications to a Flexible Spacecraft
   Nurdan Bilgin and Metin U. Salamci

ESDA2014-20049 ................................................................. V002T07A006
Influence of Installation Tension on Transmission Error Due to Resonance in a Synchronous Belt
   Masanori Kagotani and Hiroyuki Ueda

ESDA2014-20071 ................................................................. V002T07A007
Residual Vibration Reduction With Commanded Motion Optimization
   Alberto Borboni, Matteo Lancini, and Rodolfo Faglia

ESDA2014-20072 ................................................................. V002T07A008
New Approach for the Indirect Detection of Blade-to-Stator Rubbing in Turbo-Machinery Using Wavelet Techniques
   Fadi Al-Badour, Lahouari Cheded, and M. Sunar

ESDA2014-20131 ................................................................. V002T07A009
Dynamics of Externally Pressurized Air Bearing With High Values of Clearance
   Abdurrahim Dal and Tuncay Karaçay

ESDA2014-20166 ................................................................. V002T07A010
Modal Analysis of Automotive Clutch Using Finite Element Method
   Yasser Aktir, Jean-François Brunel, Philippe Dufrency, and Hervé Mahe
Minimum Energy Control of Redundant Manipulators With Axes Coupling and Compounded Path
Lior Alpert and Yoram Halevi

Vibration Isolation by Compliant Sensor Mounting Applied to a Coriolis Mass-Flow Meter
L. (Bert) van de Ridder, Wouter B. J. Hakvoort, and Johannes van Dijk

Active Performance Optimization of Cantilever Piezoelectric Energy Harvester
M. Tavakkoli Anbarani and A. Alasty

Vibration Analysis of a Vertical Roller Mill: Modeling and Validation
Engin H. Çopur, Metin U. Salamci, and Selahattin Gülbevayz

Faris Elasha, Cristobal Ruiz-Carcel, and David Mba

Using Data Mining Approaches for Force Prediction of a Dynamically Loaded Flexible Structure
Meik Schlechtingen, Sofiane Achiche, Tiago Lourenco Costa, Maxime Raison, and Ilmar Santos

Linear Control Root-Clustering of Uncertain Systems
S. Gutman

Development and Comparison of Laplace Domain Models for Non-Slender Beams and Application to a Half-Car Model With Flexible Body
R. Michael Van Auken

Numerical Algorithm for Non-Stationary Covariance Analysis of Nonlinear Mechanical System Using Equivalent Stochastic Linearization
Giuseppe Carlo Marano, Giuseppe Acciani, and Angelamaria Abrescia

Experimental Analysis of the Transition Between Veering and Crossing on a Two-Beam System
Oliviero Giannini and Aldo Sestieri

Dynamics of Ice Milling and Breaking During Arctic Ship Steering Operations
Erno Keskinen, Jori Montonen, Nikol Sharma, and Michal Cotsafitis
Experimental Transfer Path Analysis for a Heavy Duty Truck
Andrei Cristian Stan, Hakan Yenerer, Polat Sendur, and Ipek Basdogan

Global Sensitivity Analysis of Railway Vehicle Dynamics on Curved Tracks
Daniele Bigoni, Allan P. Engisg-Karup, and Hans True

Application of Recent Variance Expressions Associated With Binary Markov Processes for Detecting Changes in Bandwidth and Power With Application to Health Monitoring
Peter J. Sherman

Vibro-Acoustic Analysis of a Heavy Duty Truck Cabin
Hakan Yenerer, Andrei Cristian Stan, Polat Sendur, and Ipek Basdogan

Free Vibration of Micro Cantilever Beam With Electromagnetic Actuators
Hassan Askari and Ebrahim Esmailzadeh

Metamaterial Sensors for Structural Health Monitoring
Adriana Savin, Rozina Steigmann, and Gabriel-Silviu Dobrescu

A Ranking Method for the Selection of the Interior Modes of Reduced Order Resonant System Models
Ilaria Palomba, Dario Richiedei, and Alberto Trevisani

Detection of Cracks in Stationary Rotors via the Modal Frequency Changes Induced by a Roving Disc
Z. N. Haji and S. O. Oyadiji

Optimize Mechanical Performance of Cantilevered Vibration Energy Harvesters Using a Modal Approach
X. Xiong and S. O. Oyadiji

Influence of Underbody Suspended Equipment on Rail Ride Comfort
Roberto Corradi, Laura Mazzola, Francesco Ripamonti, and Lorenzo Rosa

Integrated Methodology for Investigation of Wagon Bogie Concepts by Simulation
S. S. N. Ahmad, C. Cole, M. Spiryagin, and Y. Q. Sun

Robot Assisted Experimental Modal Analysis on a Bladed Wheel
L. Bertini, B. Monelli, P. Neri, C. Santus, and A. Guglielmo

</table>
ESDA2014-20312
Thermo-Economic Analysis of a Solar Heating and Cooling System With Desiccant-Based Air Handling Unit by Means of Dynamic Simulations
Giovanni Angrisani, Carlo Roselli, Maurizio Sasso, and Francesco Tariello

ESDA2014-20324
Low Temperature Heat Recovering Through Integration of Organic Rankine Cycle and CO₂ Removal Systems in a NGCC
Vittorio Tola and Matthias Finkenrath

ESDA2014-20342
Measurements and Analysis on Energy Efficiency of Elevators in Shanghai
Wu Hao, Chang Xiaoqing, and Xue Jiai

ESDA2014-20355
A New Multi-Objective Evolutionary Algorithm for Optimizing the Aerodynamic Design of HAWT Rotor
Ekhlas M. AlFayyadh, Sadeq H. Bakhy, and Yasir M. Shkara

ESDA2014-20390
Numerical Simulation of Convective-Radiative Heat Transfer in a Solar Chimney
Bernardo Buonomo, Oronzio Manca, Sergio Nardini, and Gianluca Tartaglione

ESDA2014-20391
Numerical Investigation on Thermal Behaviors of an Inclined Ventilated Roof
Oronzio Manca, Antonio Mangiacapra, Salvatore Marino, and Sergio Nardini

ESDA2014-20493
Optimal Operation of Small Geothermal Systems Through Entropy Generation Analysis
Sara Cosentino, Adriano Sciavovelli, and Vittorio Verda

ESDA2014-20504
Second Law Analysis Optimal Design of a Mixer for Sanitary Water
Adriano Sciavovelli, Vittorio Verda, and Stefano Mauro

ESDA2014-20514
Effect of Turbocharger Cut Out on Two-Stroke Marine Diesel Engine Performance and NOx Emissions at Part Load Operation
Dimitrios T. Hountalas, Nikolaos F. Sakellaridis, Efthimios Pariotis, Antonis K. Antonopoulos, Leonidas Zissimatos, and Nikiforos Papadakis

ESDA2014-20515
Thermodynamic Evaluation of Energy Integration and Cogeneration in Ammonia and Urea Production Complexes
Zornitza Kirova-Yordanova

ESDA2014-20528
Two-Stroke Marine Diesel Engine Variable Injection Timing System Performance Evaluation and Optimum Setting for Minimum Fuel Consumption at Acceptable NOx Levels
Dimitrios T. Hountalas, Spiridon Raptotasios, Antonis Antonopoulos, Stavros Daniolos, Iosif Dolapzis, and Maria Tsobanoglou
ESDA2014-20542 ................................................................. V002T09A023
Optimal Design and Management of a Hybrid Photovoltaic-Pump Hydro Energy
Storage System
Anna Stoppato, Giovanna Cavazzini, Alberto Benato, Nicola Destro, and Guido Ardizzon

ESDA2014-20568 ................................................................. V002T09A024
A Comparative 1D Analysis of PEM, SO and DB Fuel Cells
Isaac Perez-Raya, Michael W. Ellis, Abel Hernandez-Guerrero, Francisco Elizalde-Blancas,
Carlos U. Gonzalez-Valle, and Luis D. Lorenzini-Gutierrez

ESDA2014-20593 ................................................................. V002T09A025
Using Parabolic Trough Concentrators With Tracking System for Heating Residential Water
Mohamad Ramadan, Mahmoud Khaled, Bakri Abdulhay, Mohamad Hammoud, and
Ali Shaito

FLUIDS ENGINEERING
ESDA2014-20042 ................................................................. V002T11A001
Unsteady Flow Simulation in Suction Muffler of a Hermetic Reciprocating Compressor
Umut Can Coskun, Hasan Gunes, Kemal Sarioglu, and Husnu Kerpicci

ESDA2014-20043 ................................................................. V002T11A002
Numerical Simulation of Lubrication System in a Hermetic Reciprocating Compressor
Mustafa Ozsipahi, Sertac Cadirci, Hasan Gunes, Kemal Sarioglu, and Husnu Kerpicci

ESDA2014-20044 ................................................................. V002T11A003
Experimental Investigation of Oil Flowrate in a Hermetic Reciprocating Compressor
Sibel Tas, Sertac Cadirci, Hasan Gunes, Kemal Sarioglu, and Husnu Kerpicci

ESDA2014-20053 ................................................................. V002T11A004
CFD Study of Ejector Efficiencies
Giorgio Besagni, Riccardo Mereu, and Emanuela Colombo

ESDA2014-20061 ................................................................. V002T11A005
High Reynolds Gas-Liquid Two Phase Flow Around a Triangular Body
Pedram Hanafizadeh, S. Alireza Hojati, Hamid Eslami, and Navid Latifian

ESDA2014-20083 ................................................................. V002T11A006
Effect of Inclination Pipe Angle on Oil-Water Two Phase Flow Patterns and Pressure Loss
S. Alireza Hojati and Pedram Hanafizadeh

ESDA2014-20085 ................................................................. V002T11A007
Design of a Flow Diverter Mechanism and a Nozzle for a Hydro Turbine Experimental Test Rig
Huseyin Cetinturk, Fatma Zeynep Aytac, Yigit Tascioglu, Kutay Celebioglu, and Selin Aradag

ESDA2014-20087 ................................................................. V002T11A008
A Combined Experimental and Computational Study for the Design of a Low Water
Consumption Cooling Tower
Burak Dogan, Ibrahim Yilmaz, Ozgur Polat, Oytun Karabulut, Ahmet Ural, Yusuf Uludag, and
Selin Aradag
Experimental and Numerical Study of Counter-Current Flow in a Vertical Pipe
Giorgio Besagni, Gaël Guédon, and Fabio Inzoli

Measurement of Film Thickness for Continuous Fluid Flow Within a Spinning Cone
Digby D. Symons and Arnaud F. M. Bizard

Simulation of Fluid Sloshing for Decreasing the Response of Structural Systems
Ilker Vuruşkan, Cüneyt Sert, and Mehmet Bülent Özer

Investigation of MHD Natural Convection Flow Exposed to Constant Magnetic Field via Generalized Differential Quadrature Method
Elgiz Baskaya, Melih Fidanoglu, Guven Komurgoz, and Ibrahim Ozkol

Aerodynamic Performance Prediction of a Profile in Ground Effect
Carlo Cravero

Simulation of Combustion in a Porous Reactor
Arash Mohammadi and Mona Benhari

Assessment of the Academic CFD Code "Galatea" Using the NASA Common Research Model (CRM)
Georgios N. Lygidakis and Ioannis K. Nikolos

Diffusion Measurements Using DOE Schardin's Schlieren #2 Technique
Dario Ambrosini, Cinzia De Leo, Domenica Paoletti, and Giorgio Galli

Effect of Corner Cut on the Near Wake Flow Structures of a Square Cylinder
Hariprasad Chakkalaparambil Many, Nagella Yashwanth, Haresh Bhardwaj, R. Ajith Kumar, and B. H. Lakshmana Gowda

Experimental Analysis of NC Fibers Sedimentation After Dehydration Process in Propellant Production
Juan Martinez-Pastor, Patricio Franco, and Domingo Moratilla

Rheological Characterization of Energetic Materials by Rotational Testing Techniques
Juan Martinez-Pastor, Patricio Franco, and F. Javier Ramirez-Fernandez

A Parametric Investigation of Jet and Vortex Actuator
Sertac Cadirci and Hasan Gunes
