List of contributors xi
Woodhead Publishing Series in Food Science, Technology and Nutrition xiii
Preface xxvii

1 The use of natural antimicrobials in food: an overview 1
P.M. Davidson, H. Bozkurt Cekmer, E.A. Monu, C. Techathuvanan
1.1 Introduction 1
1.2 Types of natural antimicrobials: animal sources 3
1.3 Types of natural antimicrobials: plant sources 6
1.4 Types of natural antimicrobials: microbial sources 9
1.5 Challenges to application of natural antimicrobials to foods 12
1.6 Application of natural antimicrobials 16
1.7 Conclusions 18
References 19

Part One Types 29

2 Plant extracts as antimicrobials in food products: types 31
R. Gyawali, S.A. Hayek, S.A. Ibrahim
2.1 Introduction 31
2.2 Herbs, spices, and plant extracts as antimicrobials 32
2.3 Essential oils 37
2.4 Plant extracts in combination with minerals 38
2.5 Conclusion 40
Acknowledgment 40
References 41

3 Plant extracts as antimicrobials in food products: mechanisms of action, extraction methods, and applications 49
R. Gyawali, S.A. Hayek, S.A. Ibrahim
3.1 Introduction 49
3.2 Mechanisms of action of plant extracts 50
3.3 Plant extracts and antibiotic resistance 53
3.4 Extraction methods to maximize antimicrobial properties 54
3.5 Response of Gram-positive and Gram-negative bacteria
to plant extracts 57
3.6 Applications of plant extracts in food products 58
3.7 Conclusion 62
   Acknowledgment 62
   References 62

4 Bacteriophages as antimicrobials in food products: history,
biology and application 69
H. Anany, L.Y. Brovko, T. El-Arabi, M.W. Griffiths
4.1 Introduction 69
4.2 Research into bacteriophages 70
4.3 Biology of bacteriophages 71
4.4 Bacteriophages as biocontrol agents in food 74
4.5 The use of phage endolysins as biocontrol agents in food 80
4.6 Combining bacteriophages with other preservation techniques
to enhance food safety 82
   References 83

5 Bacteriophages as antimicrobials in food products: applications
against particular pathogens 89
H. Anany, L.Y. Brovko, T. El-Arabi, M.W. Griffiths
5.1 Introduction 89
5.2 Bacteriophages to control Gram-negative food-borne
   pathogens 90
5.3 Bacteriophages to control Gram-positive food-borne
   pathogens 99
5.4 Conclusion and future trends 105
   References 106

6 Lactic acid bacteria (LAB) as antimicrobials in food products: types
and mechanisms of action 117
6.1 Introduction 117
6.2 Characteristics of lactic acid bacteria (LAB) 117
6.3 Carbohydrate metabolism in LAB 118
6.4 Effects of culture preparation and storage techniques on LAB 119
6.5 Antimicrobial compounds produced by LAB: organic acids,
diacetyl, and hydrogen peroxide 124
6.6 Antimicrobial compounds produced by LAB: bacteriocins 126
6.7 Conclusions 129
   Acknowledgments 129
   References 129
11 Nanostructured and nanoencapsulated natural antimicrobials for use in food products
A. Brandelli, T.M. Taylor

11.1 Introduction 229
11.2 Natural food antimicrobials 230
11.3 Nanostructures for antimicrobial delivery 233
11.4 Methods for characterization of nanostructures 242
11.5 Food applications of nanostructured antimicrobial systems 249
11.6 Conclusions and future trends 251
References 252

12 Modelling the effects of natural antimicrobials as food preservatives
A.K. Jaiswal, S. Jaiswal

12.1 Introduction 259
12.2 Antimicrobial susceptibility assessment 260
12.3 Mathematical modelling in food preservation 261
12.4 Types of models 261
12.5 Model development 268
12.6 Modelling the effects of natural antimicrobial agents 271
12.7 Conclusion and future trends 278
References 279

Part Three Using natural antimicrobials in particular foods

13 Using natural antimicrobials to enhance the safety and quality of fresh and processed fruits and vegetables: types of antimicrobials

13.1 Introduction 287
13.2 Fresh and processed fruits and vegetables: advances and challenges 288
13.3 Natural antimicrobials used in assuring the safety and quality of fresh and processed fruits and vegetables: antimicrobials from plant essential oils 291
13.4 Antimicrobials from plants: aldehydes and methyl jasmonate 299
13.5 Antimicrobials from plants: phenolic compounds and isothiocyanates 300
13.6 Chitosan is not from plant origin 303
13.7 Natural antimicrobials of microbial origin: lactic acid bacteria (LAB) and bacteriocins 304
13.8 Conclusion and future trends 305
References 306
14 Using natural antimicrobials to enhance the safety and quality of fresh and processed fruits and vegetables: application techniques and quality issues 315

14.1 Introduction 315
14.2 Techniques for applying natural antimicrobials to fruits and vegetables: key issues 315
14.3 Encapsulation of natural antimicrobials 316
14.4 Edible films and coatings enriched with natural antimicrobials 318
14.5 Antioxidant properties of natural antimicrobials 319
14.6 Plant antimicrobials as flavoring compounds 322
14.7 Conclusion and future trends 323

References 323

15 Using natural antimicrobials to enhance the safety and quality of milk 327

M.C. Pina-Pérez, D. Rodrigo, A. Martinez

15.1 Introduction 327
15.2 Enhancing the safety and quality of milk-based beverages using natural antimicrobials: milk 328
15.3 Enhancing the safety and quality of infant milk formulas using natural antimicrobials 334
15.4 Enhancing the safety and quality of egg–milk beverages using natural antimicrobials 337
15.5 Conclusion and future trends 340

References 340

16 Using natural antimicrobials to enhance the safety and quality of fruit- and vegetable-based beverages 347

M.C. Pina-Pérez, D. Rodrigo, A. Martinez

16.1 Introduction 347
16.2 Enhancing the safety and quality of fruit- and vegetable-based beverages using natural antimicrobials 348
16.3 Melon and watermelon juices 348
16.4 Orange and orange-based juices 350
16.5 Grape juices 353
16.6 Apple and pear juices 354
16.7 Dark fruit juices 355
16.8 Tomato juices 357
16.9 Other vegetable beverages 358
16.10 Conclusion and future trends 358

References 359
17 Using natural antimicrobials to enhance the safety and quality of alcoholic and other beverages
M.C. Pina-Pérez, D. Rodrigo, A. Martinez
17.1 Introduction
17.2 Alcoholic beverages
17.3 Wine
17.4 Beer
17.5 Apple cider
17.6 Hot drinks
17.7 Conclusion and future trends
References

18 Using natural antimicrobials to enhance the safety and quality of poultry
M. Singh, J. Smith, M. Bailey
18.1 Introduction
18.2 Food safety and its role in food quality
18.3 Pre-harvest use of natural antimicrobials
18.4 Antimicrobials for use on poultry products
18.5 Conclusion and future trends
References
