CONTENTS

FUELS AND COMBUSTION, MATERIAL HANDLING, EMISSIONS

POWER2014-32022 ................................................................. V001T01A001
Assessment of the Combustion Behavior of a Pilot-Scale Gas Turbine Burner
Using Image Processing
Maria Grazia De Giorgi, Aldebara Sciolti, Stefano Campilongo, and Antonio Ficarella

POWER2014-32031 ................................................................. V001T01A002
Selection of Biomass Feedstock for Production of Biocoal for Coal-Fired Boilers
Jaisen Mody, Roman Saveliev, Ezra Bar-Ziv, and Miron Perelman

POWER2014-32036 ................................................................. V001T01A003
Production and Characterization of Biocoal for Coal-Fired Boilers
Jaisen Mody, Roman Saveliev, Ezra Bar-Ziv, and Miron Perelman

POWER2014-32037 ................................................................. V001T01A004
Firing Tests of Biocoal
Jaisen Mody, Roman Saveliev, Ezra Bar-Ziv, and Miron Perelman

POWER2014-32055 ................................................................. V001T01A005
Role of Toluene and Carbon Dioxide on Sulfur Recovery Efficiency in a Claus Process
Salisu Ibrahim, Marie Chardonneau, Ahmed S. AlShoaibi, and Ashwani K. Gupta

POWER2014-32056 ................................................................. V001T01A006
Xylene Addition Effects in Thermal Stage of Claus Reactors
Salisu Ibrahim, Ahmed S. AlShoaibi, and Ashwani K. Gupta

POWER2014-32089 ................................................................. V001T01A007
Emerging Challenges and Design Strategies for SCR Systems
Larry Czarnecki and Paulo Oliveira

POWER2014-32114 ................................................................. V001T01A008
Low Emissions, Renewable, Dispatchable Power Generation Using Ethanol/Natural Gas Blends
Maclain M. Holton, Michael S. Klassen, Leo D. Eskin, Richard J. Joklik, and Richard J. Roby

POWER2014-32150 ................................................................. V001T01A009
Turbulent Flow Energy Budget Calculations in a Dump Combustor Model
Saad Ahmed, Bharath Raghavan, and Mohamed Gadalla

POWER2014-32160 ................................................................. V001T01A010
Investigation of Particle Size on Gasification Process for Solid Waste Treatment
T. C. Ho, S. C. Fu, and Christopher Y. H. Chao

POWER2014-32162 ................................................................. V001T01A011
Investigation on Thermal and Kinetic Characteristics During Co-Pyrolysis of Coal and
Lignocellulosic Agricultural Residue
Zhiqiang Wu, Shuzhong Wang, Jun Zhao, Lin Chen, and Haiyu Meng

POWER2014-32193 ................................................................. V001T01A012
Parametric Effects on Exergetic Efficiency During H2-O2 Combustion Including Singlet Oxygen
Devon A. Washington and Howard N. Shapiro
Catalytic and Non-Catalytic Combustion of Propane in a Meso-Scale Heat Recirculating Combuster
Teresa A. Wierzbicki, Ivan C. Lee, and Ashwani K. Gupta

Gasification of Wood Pellets in Air and CO₂
K. Trehan, H. Molintas, and A. K. Gupta

Soot Formation Reactions Effect in Modeling Thermal Partial Oxidation of Jet-A
Richard Scenna and Ashwani K. Gupta

Solid Fuel to Natural Gas Conversions for Circulating Fluid Bed Boilers
Bill Gurski, John Guarco, and Nando Nunziante

Maryland Poultry Litter Biomass Power Plant Study
Prodip Bose, Mehdi Hashemian-Nik, and Tony Clark

Transient Simulations of Spouted Fluidized Bed for Coal-Direct Chemical Looping Combustion
Zheming Zhang and Ramesh Agarwal

Optimum Heating of Thick Wall Pressure Components of Steam Boilers
Piotr Dzierwa, Dawid Taler, Jan Taler, and Marcin Trojan

Modeling of Superheater Operation in a Steam Boiler
Marcin Trojan, Dawid Taler, Jan Taler, and Piotr Dzierwa

Role of Boiling Mode and Rate in Formation of Waterside Deposits in Heat Recovery Steam Generator Evaporator Tubes
David S. Moelling and James Malloy

Alstom Desuperheater Addition to We Energies Oak Creek Power Plant Units 5 & 6
Terrence Olson Jr, Doug Wade, and Danny Gelbar

Diffusion Bonded Heat Exchangers (PCHEs) in Fuel Gas Heating to Improve Efficiency of CCGTs
Dereje Shiferaw and Robert Broad
The Thermal and Mechanical Considerations for the Replacement of Existing Condenser Tubes (Either by Retubing or Modular Replacement), Tubesheets and Waterboxes to Ensure Plant Optimization
Darren M. Nightingale and Earl Proud

Case Studies: Nueces Bay, Unit #7 and Barney M. Davis, Unit #2 for Topaz Power: The Successful Turnkey Repowering of Existing Steam Surface Condensers From Traditional Rankine to a 2x1 Combined Cycle Configuration
Darren M. Nightingale, Vincent Powers, Earl Proud, and Barry Johnson

The Third Option for Meeting Section 316(B) Requirements
Charles F. Bowman

CFD Simulations of Flow and Heat Transfer Through the Porous Interface of a Metal Foam Heat Exchanger
Emilie Sauret, Kamel Hooman, and Suvash C. Saha

Design and Optimization of Waste Heat Recovery Unit Using Carbon Dioxide as Cooling Fluid
Geir Skaugen, Harald T. Walnum, Brede A. L. Hagen, Daniel P. Clos, Marit J. Mazzetti, and Petter Nekså

High Pressure Feedwater Heater Cup Forging Alteration
Thomas R. Muldoon, Bob Cashner, and Sara Vestfals

Shell and Plate Feedwater Heater Prototype Test
Creed Taylor, Rhorn John, and Jason L. Williams

Admission of Bypass Steam Into a Water Cooled Condenser and Air Cooled Condenser: Similarities, Differences and Areas of Concern
Ranga Nadig and Dave Sanderlin

Improving Nuclear Plant Reliability by Developing an Eddy Current Test Strategy to Identify Uncommon Condenser Tube Defects
James A. Kocher, Robert Frazee, and Matthew Wolf

Selecting Shell Side Design Temperature for Feedwater Heaters
Kellen J. Muldoon

Research on Precision Correcting for Heat Transfer Coefficient of Steam Turbine
Yan Zhou, Danmei Xie, Yongxing Feng, and Shi Liu
Performance Improvements of Nuclear Power Plants By the Application of Longer LP Last Stage Blades and Advanced Design Techniques
Mike Jones and Robert Crossland

Understanding the Reactive Power Problem and a Mechanical Solution Using Peaking or Retired Generators
Randall M. Attix and D. M. Chamberlin

Does Online Social Networking Automatically Lead to 21st Century Communities of Practice?
Jane A. Hutt

Copper Deposition in Stator Cooling Water Systems
A. G. Howell

Generator Auxiliary Gas System Upgrades
John McPhearson and Blanca Ramirez Gutierrez

Impact of Developments in HEI Correction Factors on Condenser Performance and Operation: A Case Study
Komandur Sunder Raj

Performance/Condition Monitoring and Optimization for Fossil Power Plants
Komandur Sunder Raj

Mill Steam Inerting System Review and Performance Validation
Qingsheng Lin and Todd Collins

A Fuel Gas System Transient Study for Combined Cycle Plants
Yizhou Yan

Transient Analysis of a High Pressure Seal Injection System Under Startup Conditions
DeVon A. Washington and LeRoy N. Reiss

Diversification From a Combined Heat and Power Plant Owner to an Operations and Maintenance Service Provider
Ian Judd

Maintaining High-Energy Piping Integrity With Unit Specific Strategic Planning
Pamela Hamblin-Smoske
