## CONTENTS

### SIMPLE AND COMBINED CYCLES

**POWER2014-32081**

Experimental Investigation of Film Cooling Performance for a New Shaped Hole at the Leading Edge  
*Tarek Elnady and Ibrahim Hassan*

**POWER2014-32125**

Oxy-Fuel Turbine Through-Flow Design  
*Majed Sammak, Srikant Deshpande, and Magnus Genrup*

**POWER2014-32169**

Flexible Combined Heat and Power Systems for Offshore Oil and Gas Facilities With CO₂ Bottoming Cycles  
*Marit J. Mazzetti, Yves Ladam, Harald T. Walnum, Brede L. Hagen, Geir Skaugen, and Petter Neksa*

**POWER2014-32198**

Parametric Study of Inlet Cooling With Varied COP on Gas Turbine Performance  
*Maryam Besharati-Givi and Xianchang Li*

**POWER2014-32201**

Performance Analysis of Fogging Cooled Gas Turbine With Regeneration and Reheat Under Different Climatic Conditions  
*Maryam Besharati-Givi and Xianchang Li*

**POWER2014-32246**

Simulations of Pressurized Fluidized Circulating Bed Based Combined Cycle (PFCB)  
*Hossin Omar and Mohamed Elmnefi*

### ADVANCED ENERGY SYSTEMS AND RENEWABLES (WIND, SOLAR, AND GEOTHERMAL)

**POWER2014-32005**

Heat Storage Enhanced in Solar Chimney Power Plant Model by Using PCM Material  
*Rafea A. H. Albaldawi, Assel K. Shyaa, and Hadir S. Nuri*

**POWER2014-32017**

Optimized Energy Recovery in Line With Balancing of an ATES  
*Mohammadreza Behi, Seyed Aliakbar Mirmohammadi, Alexander B. Suma, and Björn E. Palm*

**POWER2014-32023**

Hydropower Generation by a Self-Circulating Solar Thermosyphon  
*Hiro Yoshida, Haruhiko Imada, and Naoto Hagino*

**POWER2014-32035**

Development of a Full-Scale Lab-Validated Dynamic Simulink® Model for a Stand-Alone Wind-Powered Microgrid  
*Nicholas T. Janssen, Rorik A. Peterson, and Richard W. Wies*
Ocean Thermal Energy Conversion (OTEC) as Base Load Renewable Power
Laurence J. Shapiro

Model Centric Approach for Monte Carlo Assessment of Storm Restoration and Smart Grid Automation
Danling Cheng, Ahmet Onen, Reza Arghandeh, Jaesung Jung, Robert Broadwater, and Charlie Scirbona

Ten Years of California Distributed Combined Heat and Power: Living Up to Expectations
William Marin, George Simons, Kurt Scheuermann, and Myles O’Kelly

Paul Johnston

Inclusion of a Simple Dynamic Inflow Model in the Blade Element Momentum Theory for Wind Turbine Application
Xiaomin Chen and Ramesh Agarwal

Software Based Barriers to Integration of Renewables to the Future Distribution Grid
Emma M. Stewart and Sila Kiliccote

Advanced Cooling Tower Concept for Commercial and Industrial Applications
Sergey Anisimov, Aleksandr Kozlov, Paul Glanville, Mark Khinkis, Valeriy Maisotsenko, and Jessica Shi

Wet, Dry, and Hybrid Heat Rejection System Impacts on the Economic Performance of a Thermoelectric Power Plant Subjected to Varying Degrees of Water Constraint
Thomas P. Carter, James W. Furlong, Sean P. Bushart, and Jessica Shi

William Lubega, Apoorva Santosh, Amro M. Farid, and Kamal Youcef-Toumi

An Engineering Systems Sensitivity Analysis Model for Holistic Energy-Water Nexus Planning
William Lubega and Amro M. Farid

Consideration of the Environmental Impact of Wet vs Dry Cooling for Combined Cycle Power Plants
A. G. Howell
Technology Choice and Water Consumption for Coal Electricity Production With Carbon Capture and Storage
Christopher Harto, Ellen White, Robert Horner, and Jenna Schroeder

Modeling Climate-Water Impacts on Electricity Sector Capacity Expansion
Stuart M. Cohen, Kristen Averyt, Jordan Macknick, and James Meldrum

Opportunities for Distributed Electricity Generation at Wastewater Facilities
Barry Liner, Steve Tarallo, Lauren Fillmore, and Chris Peot

Experimental and CFD Analyses of Two Bladed Savonius Water Turbine Under Low Velocity Conditions
Neelam K. Sarma, Agnimitra Biswas, and Rahul D. Misra

Flue Gas Desulfurization Wastewater Treatment for Coal-Fired Power Industry
Behrang Pakzadeh, Jay Wos, and Jay Renew

Ali H. Tarrad, Rafea A. Al-Baldawi, and Ahmad A. Al-Issa

Numerical Investigation of Rotating Stall Characteristics and Active Stall Control in Centrifugal Compressors
Taher Halawa, Mohamed Alqaradawi, Osama Badr, and Mohamed S. Gadala

Numerical Simulation of Stall Development Into Surge and Stall Control Using Air Injection in Centrifugal Compressors
Taher Halawa, Mohamed Alqaradawi, Osama Badr, and Mohamed S. Gadala

Design and Fabrication of an Experimental Facility for High-Pressure Pool Boiling
Nanxi Li and Amy Rachel Betz

The Effect of Different Designs on Performance of a Fluid Power Control System
Tahany W. Sadak and Ahmed Fouly

Numerical Simulation and Analysis of the Two-Sided Windcatcher Inlet\Outlet Effect on Ventilation Flow Through a Three Dimensional Room
Amirreza Niktash and B. P. Huynh
POWER2014-32261
CFD Simulations of Heat Recovery Steam Generators Including Tube Banks
Iván F. Galindo-García, Ana K. Vázquez-Barragán, and Miguel Rossano-Román

POWER2014-32014
Breadth First Search Based COSINE Software Code Framework Automation Algorithm
Hao Ren, Wentao Mo, Guang Zhao, Dangpei Ren, and Shuo Liu

POWER2014-32059
Earthquake Experience Data Point to Benefit of Diverse Backup Power
David J. Calhoun and Mark A. Gake

POWER2014-32067
Introducing ASME PTC 48
Olivier Le Galudec, James Oszewski, John Preston, and David Thimsen

POWER2014-32098
Performance Predictions of Axial Turbines for Organic Rankine Cycle (ORC) Applications Based on Measurements of the Flow Through Two-Dimensional Cascades of Blades
Karsten Hasselmann, Felix Reinker, Stefan aus der Wiesche, Eugeny Y. Kenig, Frithjof Dubberke, and Jadran Vrabec

POWER2014-32116
Experimental Results of Flow Nozzle Based on PTC 6 for High Reynolds Number
Noriyuki Furuichi, Kar-Hooi Cheong, Yoshiya Terao, Shinichi Nakao, Keiji Fujita, Kazuo Shibuya, Leopoldo Cordova, and Thomas Lederer

POWER2014-32177
Performance Corrections for Steam Turbines With Multi-Pressure Condensers
Thomas P. Winterberger and Ioannis Tzagkarakis

POWER2014-32184
Model Based Performance Correction Methodology: A Case Study
Koldo Zuniga, Thomas P. Schmitt, Herve Clement, and Joao Balaco

POWER2014-32187
Quantifying Correction Curve Uncertainty Through Empirical Methods
Christopher R. Bañares, Thomas P. Schmitt, Evan E. Daigle, and Thomas P. Winterberger

POWER2014-32189
Performance Testing of Hybrid Wet-Dry Cooling Systems: Insights From Numerical Modeling
R. W. Card

POWER2014-32205
Understanding Measurement Uncertainty in DP Flow Devices
Michael S. Hering and David R. Mesnard
