CONTENTS

OFFSHORE GEOTECHNICS

OMAE2014-23045 ................................................................. V003T10A001
Latest Technological Developments in Offshore Deep Mixing for Piled Oil and Gas Platforms
Giovanni Spagnoli, Paul Doherty, Diego Bellato, and Leonhard Weixler

OMAE2014-23094 ................................................................. V003T10A002
Numerical Methods for Modeling the Rock Cutting Process in Deep Sea Mining
Xiuhan Chen, Sape A. Miedema, and Cees van Rhee

OMAE2014-23195 ................................................................. V003T10A003
Characterisation of Residual Shear Strength at the Sheringham Shoal Offshore Wind Farm
Thi Minh Hue Le, Gudmund Reidar Eiksund, and Pål Johannes Strøm

OMAE2014-23206 ................................................................. V003T10A004
A Method for Predicting Six Degree-of-Freedom Ultimate Limit State of Subsea Mudmats
Xiaowei Feng and Susan Gourvenec

OMAE2014-23212 ................................................................. V003T10A005
Drift of Piles Subjected to Cyclic Lateral Loading From a Varying Direction:
System vs. Soil Element Behavior
Christina Rudolph, Jürgen Grabe, and Britta Bienen

OMAE2014-23245 ................................................................. V003T10A006
Sustained Uplift of Skirted Foundation in Clay
Xiaojun Li, Yinghui Tian, Mark J. Cassidy, and Christophe Gaudin

OMAE2014-23326 ................................................................. V003T10A007
Group Effects of TLP Tendon Driven Piles in Normally Consolidated (NC) Clay
Jianchun Cao

OMAE2014-23340 ................................................................. V003T10A008
Mechanical Response of Two Carbonate Sediments From Australia’s North West Shelf

OMAE2014-23440 ................................................................. V003T10A009
Effect of Preloading on the Response of a Shallow Skirted Foundation
Cristina Vulpe and Susan Gourvenec

OMAE2014-23469 ................................................................. V003T10A010
Continuous Characterisation of Near-Surface Soil Strength
Michael Cocjin, David White, and Susan Gourvenec

OMAE2014-23476 ................................................................. V003T10A011
Numerical Simulation of Drag Anchor Installation by a Large Deformation Finite
Element Technique
Yanbing Zhao and Haixiao Liu

OMAE2014-24393 ................................................................. V003T10A024
Design of Direct On-Seabed Sliding Foundations
Andrew Deeks, Hongjie Zhou, Henry Krisdani, Fraser Bransby, and Phil Watson

OMAE2014-24422 ................................................................. V003T10A025
Numerical Modelling of Cyclic Pull-Out Behaviors of Embedded Plate Anchors in Saturated Soft Clay
Cun Hu and Fu-ping Gao

OMAE2014-24426 ................................................................. V003T10A026
Feasibility of a Dynamically Stable Rock Armour Layer Scour Protection for Offshore Wind Farms Philippe de Schoesitter, Sarah Audenaert, Leen Baelus, Annelies Bolle, Andrew Brown, Luciana Das Neves, Tiago Ferradosa, Piet Haerens, Francisco T. Pinto, Peter Troch, and Richard Whitehouse

OMAE2014-24433 ................................................................. V003T10A027
On the Set-Up of Piles
Jürgen Grabe, Philipp Busch, and Thorben Hamann

OMAE2014-24479 ................................................................. V003T10A028
Experimental Study for Wave-Induced Oscillatory Pore Pressures in a Sandy Seabed Bo Liu, Dong-Sheng Jeng, and Guanlin Ye

OMAE2014-24480 ................................................................. V003T10A029
Poro-Elasto-Plastic Model for Wave-Induced Liquefaction Chengcong Liao, Hongyi Zhao, and Dong-Sheng Jeng

OMAE2014-24506 ................................................................. V003T10A030
Dynamic Model Test of Monopile for Offshore Wind Turbines Stian Baardsgaard Hanssen and Gudmund Eiksund

OMAE2014-24521 ................................................................. V003T10A031
Pipeline Upheaval Buckling in Clayey Backfill and Shore Approach Alahyar Koochekali, Behrouz Gatmiri, and Amirabbas Koochekali

OMAE2014-24536 ................................................................. V003T10A032
Upper Bound Solutions of Vertical Bearing Capacity of a New Type Bucket Foundation in Sand Run Liu, Guangsi Chen, Hongyan Ding, and Jijian Lian

OMAE2014-24669 ................................................................. V003T10A033
Dynamic Stresses in a Driven Pile During Installation-Classical Wave Equation Model Solution Using Partial Differential Equations Syed Muhammad Mohsin Jafri and Phayak Takkabutr
