CONTENTS

STRUCTURES, SAFETY AND RELIABILITY

OMAE2014-23049 .................................................. V04AT02A001
Quadrature Solutions for Large Deflection Static Cable Problems
John Peddieson and Y. Jane Liu

OMAE2014-23051 .................................................. V04AT02A002
Free Vibration Analysis of Rectangular Plates With Multiple Rectangular Openings and
Arbitrary Edge Constraints
Dae-Seung Cho, Nikola Vladimir, and Tae-Muk Choi

OMAE2014-23057 .................................................. V04AT02A003
Reliability Analysis of a Steel Catenary Riser With Environmental, Geometry, and
Operational Uncertainties
C. Y. Ma, U. Alibrandi, and C. G. Koh

OMAE2014-23062 .................................................. V04AT02A004
Spatial Model for Corrosion in Ships and FPSOs
Jesus Luque, Rainer Hamann, and Daniel Straub

OMAE2014-23095 .................................................. V04AT02A005
Lessons Learned From Norwegian Anchor Line Failures 2010-2013
Arne Kvitrud

OMAE2014-23099 .................................................. V04AT02A006
Derrick Structure Design and Finite Element Analysis of CPOE-16 Jack-Up
Zeng Ji, Chen Gang, Mo Jian, Yuan Hong Tao, Zhou Ruijia, and Li Chenfeng

OMAE2014-23126 .................................................. V04AT02A007
Prediction of Extreme Values of Offshore Structural Response by an Efficient Time
Simulation Technique
M. K. Abu Husain, N. I. Mohd Zaki, and G. Najafian

OMAE2014-23129 .................................................. V04AT02A008
Uncertainty in Stress Concentration Factor Computation for Ship Fatigue Design
Viktor Ogeman, Wengang Mao, and Jonas W. Ringsberg

OMAE2014-23142 .................................................. V04AT02A009
The Accuracy of the MFMNS and FMNS Models in Predicting Long-Term Distribution of the
Extreme Values of Offshore Structural Response
N. I. Mohd Zaki, M. K. Abu Husain, and G. Najafian

OMAE2014-23145 .................................................. V04AT02A010
Modelling Approaches for Reliability Estimations of Fibre-Reinforced Plastic Laminates
Luis Felipe Sánchez-Heres, Jonas W. Ringsberg, and Erland Johnson

OMAE2014-23153 .................................................. V04AT02A011
Assessment of Residual Ultimate Strength of Damaged Ships
Xiaoli Jiang, Haiyang Yu, and Mirek Kaminski
OMAE2014-23155 ........................................................................................................... V04AT02A012
Ultimate Shear Strength of Stiffened Panels for Offshore Structures
Nicolau Antonio dos Santos Rizzo, Diogo do Amaral Amante, and Segen F. Estefen

OMAE2014-23156 ........................................................................................................... V04AT02A013
Omnidirectional Return Values for Storm Severity From Directional Extreme Value Models:
The Effect of Physical Environment and Sample Size
David Randell, Elena Zanini, Michael Vogel, Kevin Ewans, and Philip Jonathan

OMAE2014-23157 ........................................................................................................... V04AT02A014
Estimation of Storm Peak and Intra-Storm Directional-Seasonal Design Conditions
in the North Sea
Graham Feld, David Randell, Yanyun Wu, Kevin Ewans, and Philip Jonathan

OMAE2014-23166 ........................................................................................................... V04AT02A015
Fatigue Failure Analysis of Fillet Welded Joints Used in Offshore Structures
Jonas W. Ringsberg, Majid Anvari, Djan Eirik Djavit, and Erik Strande

OMAE2014-23175 ........................................................................................................... V04AT02A016
An Efficient Direct Calculation Approach for Fatigue Assessment of Container Ships Concerning
Bending and Warping Stresses
Zhiyuan Li, Wengang Mao, and Jonas W. Ringsberg

OMAE2014-23198 ........................................................................................................... V04AT02A017
How We Determine the Design Environmental Conditions and How They Impact the
Structural Reliabilities?
Linbin Li, Ping Li, and Yuan Liu

OMAE2014-23210 ........................................................................................................... V04AT02A018
Progressive Collapse Analysis and Reliability of a Damaged Hull Girder
Achinike U. Ibekwe, YongChang Pu, Wan L. Ham, and Robert S. Dow

OMAE2014-23219 ........................................................................................................... V04AT02A019
How Reliable Are the Current Testing Procedures for the Safety Assurance Against
Crack Propagation in Seamless Gas Pipelines?
Aida Nonn, Marion Erdelen-Peppler, Waldemar Wessel, and Denise Mahn

OMAE2014-23233 ........................................................................................................... V04AT02A020
Assessing Conductor and Casing Systems for Damage From Extreme Snag Loads
Yusuf Arikan, Ryan Koska, and Jess Zlokich

OMAE2014-23238 ........................................................................................................... V04AT02A021
Development of Fatigue Damage Model of Wide-Band Process by Artificial Neural Network
Bongho Kang, Hosoung Kim, Yooil Kim, and Kyung-Su Kim

OMAE2014-23252 ........................................................................................................... V04AT02A022
Alternative Environmental Contours for Marine Structural Design: A Comparison Study
Erik Vanem and Elzbieta M. Bitner-Gregersen

OMAE2014-23254 ........................................................................................................... V04AT02A023
Investigation on the Post-Ultimate Strength Behavior of Sandwich Plate
Weijun Xu, Wei Wang, Xiongliang Yao, and Nana Yang
