Proceedings of the
8th FPNI Ph.D Symposium on
Fluid Power
– 2014 –

DESIGN IN FLUID POWER SYSTEMS AND COMPONENTS
MODELING AND SIMULATION IN FLUID POWER
HYDRAULIC HYBRIDS IN TRANSMISSION
COUPLED SIMULATION OF MECHATRONIC MACHINES
CONTROL OF FLUID POWER SYSTEMS

presented at
THE 8th FPNI Ph.D SYMPOSIUM ON FLUID POWER
JUNE 11–13, 2014
LAPPEENRANTA, FINLAND

sponsored by
THE FLUID POWER SYSTEMS AND TECHNOLOGY DIVISION, ASME

A S M E
Two Park Avenue * New York, N.Y.
CONTENTS

DESIGN IN FLUID POWER SYSTEMS AND COMPONENTS

FPNI2014-7809 .................................................................................................................. V001T01A001
Development of an Energy Saving Hydraulic Stepper Drive
Christoph Gradl, Ivo Kovacic, and Rudolf Scheidl

FPNI2014-7815 .................................................................................................................. V001T01A002
Investigation Into the Effects of Index Angle on Fluidborne Noise and Structureborne
Noise of a Tandem Axial Piston Pump
Shaogan Ye, Bing Xu, and Junhui Zhang

FPNI2014-7820 .................................................................................................................. V001T01A003
Experimental Investigation on the Helmholtz Hydraulic Silencer With Flat Cylindrical
Vessel Configuration
Tetsuya Kuribayashi, Takayoshi Ichiyanagi, and Takao Nishiumi

FPNI2014-7821 .................................................................................................................. V001T01A004
Advanced Hydraulically Actuated Patient Transfer Assist Device
Heather C. Humphreys and Wayne J. Book

FPNI2014-7822 .................................................................................................................. V001T01A005
Predictive Friction Compensation for Control of Pneumatic Actuators
Hannes G. Daepp and Wayne J. Book

FPNI2014-7827 .................................................................................................................. V001T01A006
Construction and Experimental Research on Plastic Cycloidal Gears Used in Gerotor Pumps
Justyna Krawczyk and Jaroslaw Stryczek

FPNI2014-7829 .................................................................................................................. V001T01A007
Experimental Analysis of Air Jets for Sorting Applications
Thiago Ferreira, Sylvie Sesmat, Eric Bideaux, and Fabien Sixdenier

FPNI2014-7834 .................................................................................................................. V001T01A008
Combined Air Supply at Fuel Pump Entrance
Salimzhan Gafurov, Leonid Rodionov, and Asgat Gimadiev

FPNI2014-7839 .................................................................................................................. V001T01A009
Digital Hydraulic System Using Pumps and On/Off Valves Controlling the Actuator
Cristiano Cardoso Locatelli, Paulo Leonel Teixeira, Edson Roberto De Pieri, Petter Krus, and
Victor Juliano De Negri

FPNI2014-7842 .................................................................................................................. V001T01A010
Energy Efficient Hydraulic Rotary Drive: Analysis and Comparison of Two Different
Displacement Controlled Solutions
D. Padovani and M. Ivantysynova
FPNI2014-7850
Technical Cleanliness of Assembled Fluid Power Components
Lauri Elo, Juuso Pekkonen, and Jari Rinkinen

FPNI2014-7852
Design Method for Fast Switching Seat Valves for Digital Displacement® Machines
Daniel B. Roemer, Per Johansen, Henrik C. Pedersen, and Torben O. Andersen

FPNI2014-7856
Study on Dynamics of Air Pressure Reducing Valve With Focus on the Noise Attenuation Problem
Liliia Badykova, Dmitry Stadnick, Kirill Afanasev, Alexander Igolkin, and Victor Sverbilov

MODELING AND SIMULATION IN FLUID POWER
FPNI2014-7804
Electro Hydraulic Gas Exchange Valve Actuation of 4-Stroke Large Bore Diesel Engine
Mika Herranen and Kalevi Huhtala

FPNI2014-7806
Novel Open Circuit Displacement Control Architecture in Heavy Machinery
Roman Ivantysyn and Jürgen Weber

FPNI2014-7812
Dynamics of Transmission Line Junctions: Comparison of CFD Results Against Measurements
Clemens Fries and Bernhard Manhartsgruber

FPNI2014-7825
Lauri O. Luostarinen, Rafael Áman, and Heikki Handroos

FPNI2014-7830
A Numerical Procedure to Design the Optimal Axial Balance of Pressure Compensated Gear Machines
Divya Thiagarajan and Andrea Vacca

FPNI2014-7837
An Investigation of the Impact of Micro Surface on the Cylinder Block/Valve Plate Interface Performance
Rene Chacon and Monika Ivantysynova

FPNI2014-7841
Material Combinations for the Piston-Cylinder Interface of Axial Piston Machines: A Simulation Study
Daniel Mizell and Monika Ivantysynova

FPNI2014-7843
The Impact of the Surface Shape of the Piston on Power Losses
Ashley M. Wondergemand Monika Ivantysynova
Energy Saving Potential of a Hydrostatic Drivetrain With Variable Charge Pump
Peter Zavadinka and Robert Grepl

The Finite Element Model of Vibroacoustical Characteristics of Pipe System Under Force Excitation by Oscillating Fluid Flow
Tatiana Mironova, Andrey Prokofiev, and Victor Sverbilov

HIL Simulation of Elastomer Supported Machine Bed Dynamics
Tuomas Saarikoski and Matti Pietola

Capabilities and Challenges of CFD in Multiphase Simulation of Hydraulic Tanks
Thees Vollmer and Johannes Untch

HYDRAULIC HYBRIDS IN TRANSMISSION
Experimental Analysis of Electro-Hydraulic Hybrid Actuator System for Off-Highway Working Vehicles
Rafael Åman, Pavel Ponomarev, Lauri O. Luostarinen, Heikki Handroos, Juha Pyrhönen, and Lasse Laurila

Hardware-in-the-Loop Testing of a Novel Blended Hydraulic Hybrid Transmission
Michael Sprengel and Monika Ivantysynova

Experimental Analysis of Heat Losses in Different Types of Hydraulic Accumulators
Jyri Juhala, Jyrki Kajaste, and Matti Pietola

System Parameter Study for a Light-Weight Series Hydraulic Hybrid Vehicle
Katharina Baer, Liselott Ericson, and Petter Krus

COUPLED SIMULATION OF MECHATRONIC MACHINES
Simulation of Water Hydraulic Control System of Francis Turbine
Pawel Walczak and Andrzej Sobczyk

Electric Motor Based Hydraulic Pump Emulator in Real-Time Hil-Simulation: Finding the Optimum Emulator Electric Motor
Jani E. Heikkinen, Tatiana A. Minav, Heikki M. Handroos, and Juan A. Tapia
Control of Fluid Power Systems

FPNI2014-7801
An Integrator Backstepping Position Control of Electro-Hydraulic Servo System Based on Particle Swarm Optimization
Ermiyas Assegu, Hamid Roozbahani, and Heikki Handroos

FPNI2014-7802
Quadratic Programming to Optimize Energy Efficiency of Speed-and Displacement-Variable Pumps
Johannes Willkomm, Matthias Wahler, and Jürgen Weber

FPNI2014-7803
A Novel Three-Parameter Tuning Method for Seismic Simulation Shaking Table
He Mao, Qiangli Luan, and Zhangwei Chen

FPNI2014-7804
An Adaptive Robust Control for Displacement-Controlled End-Effectors
Enrique Busquets and Monika Ivantysynova

FPNI2014-7805
Research on Three-Variable Control Technology of Seismic Simulating Shaking Tables
Qiangli Luan, Zhangwei Chen, and He Mao

FPNI2014-7806
A Real Time Controlled Test Rig for High Bandwidth Force Control
Alessandro Bertucci, Giovanni Jacazio, Andrea Mornacchi, and Massimo Sorli

FPNI2014-7807
Position Control of Direct Driven Hydraulic Drive
Carlo Bonato, Tatiana A. Minav, Panu Sainio, and Matti Pietola

FPNI2014-7808
Analysis of Signals and Power Flow in a Digital Hydraulic Multi Actuator Application
Matti Karvonen, Mikko Heikkilä, Matti Linjama, and Kalevi Huhtala

FPNI2014-7809
Boom Motion Control Using Pressure Control Valve
Jesper K. Sørensen, Michael R. Hansen, and Morten K. Ebbensen
