# TABLE OF CONTENTS

## VOLUME 1

### PS1: AGGREGATION AND DEMAND RESPONSE

**Stochastic Evaluation of Aggregator Business Models - Optimizing Wind Power Integration in Distribution Networks**
Q. Lambert, C. Sandels, L. Nordstrom .......................... 1

**A Probabilistic Approach to Study the Load Variations in Aggregated Residential Load Patterns**
I. Safiadi, G. Chicco, R. Napoli .................................. 9

**Demand Response of a Heterogeneous Cluster of Electric Water Heaters Using Batch Reinforcement Learning**
P. Ruelens, B. Claessens, S. Vandael, S. Lacorcella, P. Vingerhoets, R. Belmans ......................... 16

**On the Problem of Controlling Shiftable Prosumer Devices with Price Signals**
S. Ruhe, C. Rehtanz, S. Lehnhoff ................................. 23

**Optimal Bidding of Plug-in Electric Vehicles in a Market-Based Control Setup**
M. Vaya, L. Rosello, G. Anderson ................................. 30

**Battery Management in V2G-based Aggregations**
M. Landi, G. Gross .................................................. 38

### PS2: FREQUENCY CONTROL

**Determination of Load-Following Reserves in Power Systems with High Wind Penetration: An Application to the Greek Power System**
E. Bakirtzis, D. Chatziigianis, A. Nomikos, C. Simoglou, P. Biskas, D. Labridis, A. Bakirtzis .............. 45

**A New Frequency Control Reserve Framework based on Energy-Constrained Units**
T. Borsche, A. Ulibig, G. Andersson ............................. 53

**Analysis and Comparison of Secondary Frequency Control Reserve Activation Rules: Pro-Rata vs. Merit Order**
I. Avramiotes-Faliareas, P. Zolotarev, A. Ahmadi-Khatir, M. Zima .............................................. 60

**Availability of Load to Provide Frequency Response in the Great Britain Power System**
M. Cheng, J. Wu, S. Galsworthy, N. Jenkins, W. Hung ................................................................. 67

**A New Control Method of Multiple Sets of Battery Energy Storage System for Load Frequency Control in Power System with Massive Integration of Renewable Energy Resources**
A. Hashimoto, A. Yokoyama ........................................ 74

### PS3: TRANSMISSION PLANNING

**Round-the-year Based Network Reinforcement Solution Generator**
A. Chtpuliga, M. Gibescu, M. Meijden, W. Kling ............................................................... 82

**Large-Scale Power System Planning Using Enhanced Benders Decomposition**
C. Skar, G. Doorman, A. Tomaszard ............................ 89

**Simplified Representation Of A Large Transmission Network For Use In Long-Term Expansion Planning**
C.-A. Fezeu, K. Bell, J. Ding, P. Panciatici, M.-S. Deby ..................................................... 96

**Transmission Network Expansion Planning: Bridging the Gap between AC Heuristics and DC Approximations**
R. Bent, C. Coffrin, R. Gummetico, P. Henteniyck ................. 103

**A Thorough Comparison Among Impact Of Different Technologies On Power System Reactive Planning**
P. Zeng, X. Qin, Y. Zhang, C. Liang ................................................. 118

### PS4: NEW TECHNIQUES FOR POWER SYSTEM PROTECTION

**Reliability and Availability Analysis Methodology for Power System Protection Schemes**
A. Santos, P. Correia, M. Barros .................................. 124

**Wavelet-Demodulation-Method Based Out Of Step Detection And Damping Estimation In Japan Campus Wams**
Khadiruddin, Y. Qudash, Y. Mitani, M. Watanabe, T. Kerdphol ................................. 131

**Protection Scheme against Out-of-Step Condition Based on Synchronized Measurements**
D. Antoneo, A. Safkhah, A. Usano, A. Svalos, G. Bachgerrbyev ................................. 138

**Design Of UFLS Schemes Taking Into Account Load Variation**
L. Sigrist, L. Rosca .................................................. 146

**A Policy Switching Approach to Consolidating Load Shedding and Islanding Protection Schemes**
R. Meier, E. Cotilla-Sanchez, A. Fern ........................................... 153

**Analysis of Potential Use of the SVM Technique for Transformer Protection**
D. Bejmert, W. Rebizani, L. Schieel ........................................... 160
PS5: CONTROLLABLE LOAD AND DEMAND SIDE INTEGRATION

Multi-agent Scheme to Handle Flexible Loads on Low Voltage Distribution Grids ......................................................... 167
N. Blaauwbroek, D. Işıkaba, J. Lopes

A Norm Behavior Based Deterministic Methodology for Demand Response Base Lines .................................................. 174
K. Vanhoutte, W. Foubert, C. Stuckens, G. Premereur

Control of Thermostatic Loads Using Moving Horizon Estimation of Individual Load States .............................................. 181
E. Vrettos, J. Mathieu, G. Andersson

Operating Limits Of Buildings As Controllable Loads ........................................................................................................ 188
M. Mulhulid, C. Nwankpa

Effect of Price Responsive Demand on the Operation of Microgrids .................................................................................... 195
F. Ramos, C. Canizarcs, K. Bhattacharyya

Development of Energy Management System for DC Microgrid for Office Building - Day Ahead Operation
Scheduling Considering Weather Scenarios ......................................................................................................................... 202
K. Shinomachi, R. Haru, H. Kita, M. Noritake, H. Hoshi, K. Hirase

PS6: INTER-AREA OSCILLATIONS AND PSS

An Inter-Area Oscillation Based Approach for Coherency Identification in Power Systems ............................................... 208
J. Stadler, H. Renner, K. Kock

Governor-deadband-induced Sliding Bifurcations in South-East European Interconnection Model ................................. 214
J. Mantzaris, C. Younus

Small-Signal Stability Analysis of Delayed Power System Stabilizers ............................................................................... 222
V. Bekhrarite, R. Sipahi, F. Milano

Evolution Strategies-Tuned Support Vector Machine-based Classification Of Inter-Area Oscillations ............................... 229
A. Marinakis, C. Fransc, M. Larsson

Coordinated Tuning of Power System Controllers Using Metaheuristic Techniques ......................................................... 236
M. Rios, R. Gonzalez-Fernandez

Potential Interactions between VSC HVDC and STATCOM ................................................................................................. 244
L. Shen, M. Barnes, J. Milanovic, K. Bell, M. Belivanis

PS7: PLANNING AND UNCERTAINTY

Impacts of Network Expansion on Generation Capacity Expansion ...................................................................................... 251
D. Pozo, E. Sauma, J. Contreras

A Multi-Area Approach to Evaluate the Brazilian Power System Capacity to Supply the Peak Load Demand Using Detailed Simulation Model of Power Plants Operation ....................................................................................... 258
L. Marzono, F. Batista, M. Maceira, A. Melo, T. Justino, A. Giraldo

A Mean-Variance Optimization Approach to the Development of Portfolios of Renewable Generation in Transmission-Constrained Systems .................................................................................................. 265
R. Ferreira, L. Barros, M. Carvalho, M. Pereira

Flexibility in Generation Planning: Identifying Key Operating Constraints ........................................................................ 272
B. Palminter

Real Options On Power System Planning Under Uncertainties And Efficiency Constraints .................................................. 279
M. Osthus, C. Rehans, G. Blanco, M. Negnevitsky

Application of CVaR Risk Aversion Approach in the Expansion and Operation Planning and for Setting the Spot Price in the Brazilian Hydrothermal Interconnected System ................................................................. 286
M. Maceira, L. Marzano, D. Penna, A. Diniz, T. Justino

PS8: STATE ESTIMATION PROCESSES FOR DISTRIBUTION NETWORKS

Improvement of Observability in Poorly Measured Distribution Networks ............................................................................ 293
C. Bovo, V. Ilea, M. Sabasic, F. Zanellini, C. Arigoni, R. Bonera

Identification of Topology Faults by Smart Meter Data in Meshed Low Voltage Grids .......................................................... 300
W. Weltzow, D. Wodarsch

Real-Time State Identification For MV-Grids On Autonomous Agent Platforms ................................................................. 307
N. Nourse-Lange, C. Oester, F. Dorsmugen, J. Meese, M. Zdralleck

A Pre-Estimation Filtering Process of Bad Data for Linear Power Systems State Estimators using PMUs ............................... 315
M. Pignni, L. Zamani, S. Surri, R. Cherkasco, J.-Y. Boudec, M. Paulone

Statistical Error Analysis of Household Load Profile for Medium Voltage Grid State Estimation ............................................. 323
Y. Xiang, J. Cobben, P. Ribeiro

Impact Evaluation Of PV Generation On LV Networks ......................................................................................................... 330
A. Supponen, S. Repo
PS9: ENERGY STORAGE

Thermal-Wind-Storage Joint Operation of Power System Considering Pumped Storage and Distributed Compressed Air Energy Storage .......................................................... 337
C. Wang, L. Chen, F. Liu, B. Liu, C. Fang

Cooperative Control of Energy Storage Systems and Biogas Generator for Multiple Renewable Energy Power Plants .......................................................... 344
Y. Manabe, K. Takitani, T. Tambe, S. Ishikawa, T. Oomura

Optimal Power Flow with Storage .......................................................... 351
J. Felder, I. Hiskens

Optimal Siting and Sizing of Distributed Energy Storage Systems via Alternating Direction Method of Multipliers ....................................................... 358
M. Nick, R. Cherkasy, M. Paulovic

Storage Management Algorithm For Schedule Based DSO System Operation With Respect To TSO’s System Responsibility ........................................... 365
R. Schwerdfeger, D. Westermann

An Optimal Scheduling of Battery Output and Load Control for Loss Minimizing Islanding Operation of Distribution Networks in Emergency .......................................................... 372
M. Abe, H. Satoh

PS10: RISK ASSESSMENT IN POWER SYSTEM OPERATION

Probabilistic Cascading Event Risk Assessment .......................................................... 379
K. Kock, H. Renner, J. Studler

Risk-Based Framework for Establishing and Visualising Operational Constraints of Power Systems .......................................................... 386
R. Preece, A. Adrees, J. Milanovic

Preventing Large-Scale Blackouts in Power Systems Under Uncertainty .......................................................... 393

Risk Assessment of Critical Time to Renewable Operation with Steady-state Security Region .......................................................... 400
Y. Hou, J. Yan, C. Peng, Z. Qin, H. Ruan, S. Lei

Risk-Constrained Optimal Power Flow with Probabilistic Guarantees .......................................................... 406
L. Roaid, M. Vrakopoulou, F. Oldewartel, G. Andersson

Application of Emergency-Single Machine Equivalent Method for Cascading Outages .......................................................... 413
H. Shao, Z. Lin, S. Norris, J. Bialtek

PS11: DISTRIBUTION PLANNING AND INTERACTION WITH TRANSMISSION

Optimizing The Reactive Power Balance Between A Distribution And Transmission Grid Through Iteratively Updated Grid Equivalents .......................................................... 419
F. Marten, L. Lower, J.-C. Tobermann, M. Braun

Time Series Based Distribution Grid Planning Approach With Decentralised Voltage Regulation .......................................................... 426
A. Seack, J. Kaes, C. Rehtanz

Constructive Heuristic Algorithm for Sub-transmission System Planning .......................................................... 433
L. Munoz, F. Assis, A. Silva, L. Rezende, F. Santos

Distribution Network Reinforcement Planning Considering Demand Response Support .......................................................... 440
E. Citrona, P. Mancarella

Optimal Expansion Model Of Renewable Distributed Generation In Distribution Systems .......................................................... 447
S. Montoya-Bueno, J. Munoz, J. Contreras

Practice-Oriented Optimization of Distribution Network Planning using Metaheuristic Algorithms .......................................................... 454
M. Grend, H. Luong, J. Morren, P. Bateman, H. Slootweg, H. Poure

PS12: HYDRO SCHEDULING

Assessment of the Long-Term Hydrothermal Scheduling Operation Policies with Alternative Inflow Modeling .......................................................... 462
V. Matos, P. Lurroyd, E. Finardi

Stochastic Dynamic Programming with Discretization of Energy Interchange between Hydrothermal Systems in the Operation Planning Problem .......................................................... 469
W. Conceicato, T. Ramos, A. Marcato, J. Filho, R. Brandi, P. David

Medium-Term Optimization Of Pumped Hydro Storage With Stochastic Intrastage Subproblems .......................................................... 476
H. Abgottspon, G. Andersson

Equivalent Networks For Medium-Term Hydro-Thermal Scheduling With Variable Head Cascaded Reservoirs And Transmission Constraints .......................................................... 483
C. Fujisawa, L. Martins, A. Acevedo, S. Soares

Real-time Optimization of a Hydropower Cascade Using a Linear Modeling Approach .......................................................... 489
A. Hammam, G. Hug

A Decomposition Scheme for Short Term Hydrothermal Scheduling Problems suitable for Parallel Processing .......................................................... 496
T. Norbiato, A. Dimitz, C. Borges
Advanced Optimization Methods For Power Systems
P. Panciatici, M. Campi, S. Garatti, S. Low, D. Molzahn, A. Sun, L. Wehenkel

Day-ahead Economic Scheduling of Energy Storage
I. Lampropoulos, P. Geroafoula, P. Basch, R. Grost, W. Kling

Evaluation Of Storage Systems In Distribution Networks By Means Of An Agent-Based Simulation System
J. Kays, A. Seack, J. Haeberl, C. Rehnert

Scheduling Distributed Energy Storage Units to Provide Multiple Services
O. Megel, J. Mathieu, G. Andersson

Model Predictive Control for Energy Storage Systems in a Network with High Penetration of Renewable Energy and Limited Export Capacity

Modeling, Identification, and Optimal Control of Batteries for Power System Applications
P. Fortenbacker, J. Mathieu, G. Andersson

Use of Energy Storage in Isolated Micro Grids
P. Lombardi, Z. Styczynski, T. Sokolnikova, K. Siatl

Quasi Steady-State Model for Power System Stability: Limitations, Analysis and a Remedy
X. Wang, H.-D. Chiang

Stability Boundary On P-V Plane For Analysis Of Shortterm Voltage Stability
K. Konwabe, K. Tanaka

Improving Power Grids Transient Stability Via Model Predictive Control
A. Bonfiglio, A. Oliveri, R. Procopio, F. Delfino, G. Denegri, M. Invernizzi, M. Storace

Transient Stability Assessment of Controlled Islanding Based on Power Flow Tracing
Z. Lin, S. Norris, H. Shao, J. Bialek

Sensitivity based Assessment of Transient Voltage Sags caused by Rotor Swings
T. Weckesser, H. Johannsson, J. Ostergaard, T. Cieplem

Classification Of Disturbance Records In Power Stations Based On Fuzzy Reasoning
M. Moreno, D. Cieslak, J. Rolim

Detection Of Power System Transients Disturbances In Distributed Generation Systems Using Hilbert Transform And Signal Decomposition
T. Sitorski, P. Kastyla

Probabilistic Assessment of the Impact of Wind Power Generation on Voltage Sags in Composite Systems
J. Batista, A. Rodrigues, M. Silva

Calculation of Voltage Unbalance Factor in Power System Supplying Traction Transformers
L. Ladniak

Probabilistic Assessment of the Impact of Distributed Generation and Non-linear Load on Harmonic Propagation in Power Networks
S. Abdelrahman, H. Liao, J. Yu, J. Milanovic

Practical Implementation of the Coupled Norton Approach for Nonlinear Harmonic Models
A. Foiling, J. Myrzik, T. Wieszner, L. Jenderniuk

Convexification of AC Optimal Power Flow
L. Gai, S. Low

Structured Nonconvex Optimization of Large-Scale Energy Systems Using PIPS-NLP
N. Chiang, C. Petra, V. Zavala

Adaptive Robust Optimization for Daily Power System Operation
A. Sun, A. Lorca

Stochastic Optimal Power Flow Based On Convex Approximations Of Chance Constraints
T. Summers, J. Warrington, M. Morari, J. Lygeros

Addressing The Stochastic Nature Of Energy Management In Smart Homes
C. Keerthisinha, G. Verhic, A. Chapman
