

Microstructure Evolution during Thermomechanical Multi-Step Processing of Extruded Aluminum Profiles

Zur Erlangung des akademischen Grades

Dr.-Ing.

von der Fakultät Maschinenbau
der Technischen Universität Dortmund
genehmigte Dissertation

vorgelegt von

Ahmet Güzel

aus

Kırşehir/Türkei

Dortmund, 2014

Table of Contents

| | |
|--|------------|
| Nomenclature | iii |
| 1 Introduction | 1 |
| 2 State of the Art | 3 |
| 2.1 Extrusion | 3 |
| 2.1.1 Fundamentals of Extrusion Process | 3 |
| 2.1.2 Material Flow and Tribology in Extrusion Process | 5 |
| 2.1.3 Simulation of Extrusion Process | 13 |
| 2.1.4 Application of Extruded Aluminum Profiles | 15 |
| 2.2 Electromagnetic Tube Compression | 16 |
| 2.2.1 Fundamentals of Electromagnetic Forming | 16 |
| 2.2.2 Simulation of Electromagnetic Forming | 20 |
| 2.2.3 Application of Electromagnetic Forming..... | 21 |
| 2.3 Evolution of Microstructure during Hot Forming..... | 24 |
| 2.4 Summary | 34 |
| 3 Aim of the Thesis | 37 |
| 4 Determination of Material Parameters for Extrusion Modelling | 39 |
| 4.1 Determination of Flow Stresses of EN AW-6082 | 39 |
| 4.2 Constitutive Modelling..... | 44 |
| 4.3 Determination of Material Parameters | 45 |
| 4.4 Simulation of Extrusion Process | 51 |
| 5 Modelling of Dynamic Recrystallization during Extrusion | 59 |
| 5.1 Analysis of Dynamic Grain Structure Evolution | 59 |
| 5.2 A Method to Determine Microstructural Evolution..... | 62 |
| 5.3 Modelling of Microstructural Evolution | 71 |
| 5.4 Simulation of Microstructural Evolution | 74 |
| 6 Determination of Material Parameters for Impulse Forming | 79 |
| 6.1 Determination of Flow Stresses of EN AW-6082 at High Strain Rates | 79 |
| 6.1.1 Impact Testing at a Strain Rate of 160 s^{-1} | 80 |
| 6.1.2 Impact Testing at Strain Rates of 2400 s^{-1} and 11000 s^{-1} | 82 |
| 6.1.3 Effects of Strain Rate and Temperature on Flow Behavior | 85 |
| 6.2 Constitutive Modelling..... | 87 |
| 6.2.1 Empirical Phenomenological Constitutive Models..... | 87 |
| 6.2.2 Microstructure Based Physical Constitutive Models | 89 |
| 6.2.3 Determination of Material Parameters | 90 |

| | | |
|-------------------|--|------------|
| 6.3 | Comparison of Low and High Strain Rate Material Behavior | 99 |
| 7 | Modelling of Dynamic Recrystallization during Impulse Forming | 101 |
| 7.1 | Analysis of Microstructure..... | 101 |
| 7.2 | Modelling of Microstructural Evolution | 110 |
| 7.3 | Through Process Simulation of Microstructural Evolution | 114 |
| 8 | Conclusions and Outlook | 127 |
| References | | 129 |
