# Table of Contents

Message from the CIT 2014 General Chairs
Message from the CIT 2014 Program Chairs
Message from the CIT 2014 Steering Chairs
Message from the CIT 2014 Workshop/Symposium Chairs
CIT 2014 Organizing and Program Committees
Message from the RACIT 2014 Symposium Chairs
RACIT 2014 Organizing and Program Committees
Message from the DTWSM 2014 Workshop Chairs
DTWSM 2014 Organizing and Program Committees
Messages from the MMN 2014 Workshop Chairs
MMN 2014 Organizing and Program Committees
Message from the ESM-WSNs 2014 Workshop Chairs
ESM-WSNs 2014 Organizing and Program Committees
Message from the ivrloT 2014 Workshop Chairs
ivrloT 2014 Organizing and Program Committees
Message from the LSNS 2014 Workshop Chairs
LSNS 2014 Organizing and Program Committees
Keynote Addresses
Invited Speakers

## The 14th IEEE International Conference on Computer and Information Technology (CIT 2014)

### CIT-01: Wireless Communications (1)

Performance Evaluation for Sum Capacity in OFDMA Systems with Proportional Fairness

*Su Fong Chien, Ka Kien Lo, Kae Hsiang Kwong, and Heng Siang Lim*

An Improved Wi-Fi Indoor Positioning Method via Signal Strength Order Invariance

*Jie Zhuang, Jiadong Zhang, Demin Zhou, Hong Pang, and Wei Huang*
Efficient Taguchi Algorithm for Cognitive Radio Spectrum Allocation .............................................................. 7
   Zhuo Qiu, Yongqiang Hei, and Min Li

Net Utility-Oriented Mobility Load Balancing in Self-Optimizing Networks .......................................................... 14
   Chungang Yang, Hongyan Li, and Yingying Dai

Time Routing: A Community Based Routing Protocol for Opportunistic Networks .................................................. 20
   Xuebin Ma, Zhenchao Ouyang, Jing Bai, and Xin Zhan

CIT-02: Wireless Communications (2)

Cooperation Strategies by Cournot Game for Partner Selection and Power Control in S-UMTS ........................................ 26
   Lixi Fu, Di Liu, Yizhou He, Gaofeng Cui, Huaping Liang, and Weidong Wang

Study of a Target Positioning Algorithm with Data Filtering in Wireless Sensor Networks ........................................... 31
   Yan Shi, Shengtao Yu, Jing Zhao, Songhua Huang, and Zhaochen Zhang

Pattern-Aware Sequential Monte Carlo Detection for Generalized Space-Time Shift Keying ..................................... 36
   Jianping Zheng, Juan Tao, Jinfang Dou, and Booming Bai

Joint Vector Perturbation Precoding for Multiuser MIMO-OFDM Systems ................................................................. 44
   Rui Chen, Changle Li, Bo Su, and Jiandong Li

An Energy-Efficient Power Control Approach for IEEE 802.11n Wireless LANs ....................................................... 49
   Yuan Li, Ke Li, Wenwen Li, Yan Zhang, Min Sheng, and Jianxiang Chu

CIT-03: Wireless Communications (3)

A Numerical Study of Scheduling Power Efficiency Gain for MIMO-OFDM Networks ................................................. 54
   Xiangyu Gao and Yuesheng Zhu

Power and Delay-Aware Routing Protocol for Ad Hoc Networks ............................................................................. 59
   Salwa Othmen, Aymen Belghith, Faouzi Zarai, Mohammad S. Obaidat, and Lotfi Kamoun

A Scheduling Framework Supporting QoS in Wireless Mesh Network ................................................................. 65
   Ya Gao, Haolin Zhang, Dong Yang, and Xiaofeng Lu

Optimization of Non-convex Cooperative Spectrum Sensing with Modified Artificial Bee Colony Algorithm .................. 70
   Min Li, Yongqiang Hei, and Zhuo Qiu

Performance Evaluation and Optimization of SRVCC Handover Scheme .............................................................. 76
   Tingting Yuan, Zesong Fei, Yuqiao Ren, and Jianyin Zhang

CIT-04: Wireless Communications (4)

Outage Performance for Two-Way AF Relaying with Asymmetric Date Rate Requirements and Imperfect CSI over Nakagami-m Fading .......................................................... 82
   Qifei Bu, Jianhua Ge, and Yitong Chen

Outage and Diversity Analysis of Cognitive Relay Networks with Direct Link under Interference Constraints over Nakagami-M Fading ............................................................. 88
   Yitong Chen, Jianhua Ge, and Qifei Bu

A Reliable Beaconless Routing Protocol for VANETs .............................................................................................. 94
   Yun Chen, Changle Li, Xiaolei Han, Mingyu Gao, and Lina Zhu
Full-Duplex MIMO Wireless Communication System ................................................................. 100
Wu Shandan, An Peng, Li Chao, and Yao Mingwu

Avoiding Information Congestion in VANETs: A Congestion Game Approach .................................. 105
Chen Chen, Yajuan Li, Qingqi Pei, and Chen Chen

CIT-05: Microwave and Radar (1)
Chaotic Discrete Frequency Coding Waveform Design for MIMO Radar ........................................ 111
Dong Shen, Yu Zhou, Xin Liu, and Linrang Zhang

Space-Surface Bistatic Sar Using BeiDou-2 as Illuminator ............................................................... 118
Weiming Tian, Tian Zhang, Cheng Hu, Xiaopeng Yang, and Tao Zeng

Radar Signal Parameter Estimation with Sparse Bayesian Representation Based on Zoom-Dictionary ................................................................. 123
Danlei Xu, Lan Du, and Hongwei Liu

Study of Multistatic Radar Against False Targets Jamming Using Spatial Scattering Properties .................. 129
Shanshan Zhao, Linrang Zhang, Yu Zhou, and Nan Liu

CIT-06: Microwave and Radar (2)
Design and Simulation of Elliptic Aperture Array with Low Side Lobes on Airplane ................................ 134
Jirong Zhou, Xunwang Zhao, Yu Zhang, and Shuang Zhang

UV Coverage Optimization with Simulated Annealing .............................................................. 138
Huan Zhou, Haitao Li, and Guangliang Dong

SAR Image Despeckling Based on the Nonlocally Centralized Sparse Representation Model .................. 143
Chenglong Wang, Guanghui Zhao, Guangming Shi, and Huan Li

Radar Emitter Recognition in Airborne RWR/ESM Based on Improved K Nearest Neighbor Algorithm ................................................................. 148
Wang Ruijia and Wang Xing

CIT-07: Pattern Recognition, Data Mining, and Artificial Intelligence (1)
Efficient Personalized Recommendation of Mobile Web Content Using an EM-Based Clustering Method ................................................................. 152
Ming He, Alvin Chin, Enhong Chen, and Jilei Tian

Mining Periodic Patterns from Nested Event Logs .............................................................. 160
Janusz R. Getta, Marcin Zimniak, and Wolfgang Benn

SAR Sea Ice Image Segmentation Using Watershed with Intensity-Based Region Merging .................. 168
Tolulope Bamidele Ijitona, Jinchang Ren, and Phil Byongjun Hwang

Feature Extraction and Pattern Recognition for Human Motion by a Deep Sparse Autoencoder ............... 173
Hailong Liu and Tadahiro Taniguchi
CIT-08: Pattern Recognition, Data Mining, and Artificial Intelligence (2)

Human Action Recognition Using Compact Global Descriptors Derived from 2DPCA-2DLDA .................................................. 182

Yangyang Wang, Yibo Li, and Xiaofei Ji

Real-Time Moving Object Detection from Airborne Videos with Relative Distance Change

Measure ....................................................................................................................................... 187

Xiaosong Lan, Shuxiao Li, and Hongxing Chang

Road Detection Based on Off-Line and On-Line Learning .............................................................. 193

Qi Xie, Meiping Shi, Hao Fu, and Tao Wu

Task Specific Top-Down Visual Attention Based on Local Pattern Analysis and Histogram

Backprojection for Fast Object Localization .................................................................................. 198

Yiping Shen, Shuxiao Li, Chengfei Zhu, and Hongxing Chang

CIT-09: Computer Science (1)

Exploration of a Heterogeneous Concentrated-Sparse On-Chip Interconnect for Energy Efficient
Multicore Architecture ......................................................................................................................... 204

Thomas Canhao Xu, Ville Leppänen, and Martti Forsell

Assimilating Cleaning Operations with Flash-Level Parallelism for NAND Flash-Based Devices .................................................... 212

Ronghui Wang, Zhiguang Chen, Nong Xiao, Minxuan Zhang, and Weihua Dong

Simple Octree Solution for Multi-resolution LiDAR Processing and Visualisation .................................................. 220

Yu You, Lixin Fan, Kimmo Roimela, and Ville-Veikko Mattila

Illustrating Software Modifiability—Capturing Cohesion and Coupling in a Force-Optimized
Graph ......................................................................................................................................... 226

Johannes Holvitie and Ville Leppänen

An Analytic Hierarchy Process Algorithm for Cloud Based Wi-Fi Offloading ................................................. 234

Xingyu Liu, Peng Zhang, Weixue Gong, and Zheng Yan

CIT-10: Computer Science (2)

Performance Prediction Model in Heterogeneous MapReduce Environments ................................................. 240

Yuanquan Fan, Weiguo Wu, Yunlong Xu, Yangjie Cao, Qian Li, Jinhua Cui, and Zhangfeng Duan

Customized Core Layout: A Case Study on Dual-Core Dynamic Binary Translation System ................................................................. 246

Fan Xu, Li Shen, Zhiying Wang, Hui Guo, Bo Su, and Wei Chen

Contract-Based Generic Programming Mechanism for Dynamic Service Orchestration ........................................... 252

Wuping Xie, Jinyun Xue, and Dongming Jiang

A CRI Based Vertical Handoff Algorithm in Heterogeneous Networks ...................................................... 258

Mingdi Hu, Wujun Yang, Kun Liu, and Siming Cong
CIT-11: Reliability, Security, Privacy, and Trust (1)

Capacity-Equivocation Region Bounds for Degraded Broadcast Channel with Action-Dependent States ................................................................................................................................. 263
Xinxing Yin, Yan Zhu, Xiao Chen, Liang Pang, and Zhi Xue

A Novel Technique for Ring Oscillator Based PUFs to Enroll Stable Challenge Response Pairs .............................................................................................................................. 270
Chaohui Du and Guoqiang Bai

LRMAPC: A Lightweight RFID Mutual Authentication Protocol with Cache in the Reader for IoT .......................................................................................................................... 276
Kai Fan, Chen Liang, Hui Li, and Yintang Yang

New Ciphertext-Policy Attribute-Based Encryption with Efficient Revocation .......................................................................................................................... 281
Longhui Zu, Zhenhua Liu, and Juanjuan Li

Spatially Aware Malware Infection Modeling Framework .......................................................................................... 288
Aapo Kalliola and Tuomas Aura

CIT-12: Reliability, Security, Privacy, and Trust (2)

A Soft Decision Scheme against Intermittent SSDF Attack in Cooperative Spectrum Sensing .............................................................................................................................. 293
Jingyu Feng, Yuqing Zhang, and Guangyue Lu

Generic Codes Based Traitor Tracing and Revoking Scheme from Attribute-Based Encryption .................................................................................................................. 299
Xingwen Zhao, Gaofei Zhao, and Hui Li

DIAS: Automated Online Analysis for Android Applications ........................................................................................................... 307
Juanru Li, Yuanyuan Zhang, Wenbo Yang, Junliang Shu, and Dawu Gu

On Reusable Projective Garbling Schemes .................................................................................................................. 315
Tommi Meskanen, Valtteri Niemi, and Noora Nieminen

Research on Node Trusted Degree Based Security Routing Technology .................................................................................................................. 323
Hongquan Liang and Wei Wu

CIT-13: Mobile Multimedia Communications

Belief Propagation Based Compressed Video Streaming in Wireless Multimedia Sensor Networks .................................................................................................................. 327
Fang Tian, Haixiao Liu, Bin Song, and Guangliang Ren

Multidimensional QoE Assessment of Multi-view Video and Audio (MVV-A) IP Multicast Transmission Methods ........................................................................................................... 332
Kazunori Sako and Toshiro Nunome

A Method to Evaluate Quality of Real Time Video Streaming in Radio Access Network .................................................................................................................. 340
Liang Chen, Xiaolin Deng, Yongmei Qi, Salah Addin Mohammed, Zesong Fei, and Jianyin Zhang

Toward Designing Efficient Application to Identify Objects for Visually Impaired .................................................................................................................. 345
Hessah Almotiry, Hind Abahussain, Lama Alhammad, Masheal Alshehri, Reem Aldosari, and Sara Alkathiri

A QoE-Driven Resource Allocation Strategy for OFDM Multiuser-Multiservice System .................................................................................................................. 351
Xiaolin Deng, Qiang Gao, Salah Addin Mohammed, Liang Chen, Feiwang, and Zesong Fei
CIT-14: Information Technology
Quasi-Cyclic LDPC Codes Based on the Improved Combining Method ..................................................356  
Yuan-Hua Liu, Mei-Ling Zhang, and Xin-Liang Niu
A Bayesian Framework of Information Theoretic Metrics for Anonymity ..................................................359  
Han-Ru Pei, Zhi-Jian Wang, and Yu Wang
Design and Evaluation of Virtual Channel-Based Optical-Electrical Interface for Optical  
Network-on-Chip ........................................................................................................................................365  
Weiwei Fu, Mingmin Yuan, Tianzhou Chen, and Minghui Wu
POND: A Novel Protocol for Network Coding Based on Hybrid Cryptographic Scheme ..........................373  
Chengqiang Huang, Atsuko Miyaji, Longhai Li, and Shangmei Xu
Efficiency Priority Schedule Mechanism with Network Coding in Wireless Networks ..........................381  
Rui Zhang, Guoliang Ding, Quan Qian, and Bofeng Zhang

CIT-15: Information Technology and IT for Biomedicine
Transport Route Planning for Mobile Tour Applications ...........................................................................387  
Shou-Chih Lo, Fu-Chiang Huang, and Chien-Chung Wang
Quality Models of e-Government Online Services Towards a Local Focus: Towards a Local  
Focus .........................................................................................................................................................393  
Filipe Sá, Álvaro Rocha, and Manuel Pérez Cota
HOTDOL: HTML Obfuscation with Text Distribution to Overlapping Layers ........................................399  
Sungjae Han, Minsoo Ryu, Jaehyuk Cha, and Byung-Uk Choi
Efficient Grouping Reservation Method for Fast Tag Identification in Passive RFID System ................405  
Wang Honggang, Lu Guangyue, Yao Mingwu, and Pei Changxing
Network Analysis and Experimental Validation of the Five Shu Points Model of Traditional  
Oriental Medicine ........................................................................................................................................410  
Seonghui An, SeungHeui Ryu, Min-Jung Kim, Sang-Min Lee, and Dohoon Lee

CIT-16: Signal Processing (1)
Flexible Nonlinear Comanding Transform for Reducing PAPR of Multi-carrier Signals ..........................416  
Shenghua Zhai
Interference Truncation for Compute-and-Forward Relaying in Multiple Access Channels ....................420  
Zhongyan Zhao, Mogen Peng, Zheng Zhou, and Zhao Wang
BER Analysis for Controller Area Network Impaired by the Impulse Noise in Cyber-Physical  
Systems .........................................................................................................................................................425  
Bo Shen, Xingshe Zhou, and Ru Wang
Automatic Modulation Recognition of Digital Signals Using CWT Based on Optimal Scales ..................430  
Yuanyuan Lv, Yuanan Liu, Fang Liu, Jinchun Gao, Kaimeing Liu, and Gang Xie
CIT-17: Signal Processing (2)
Correlation Noise Estimation for Wyner-Ziv Video Transmission over Wireless Network

Zhenhua Tang, Xiangyan Liang, Tuanfa Qin, and Kan Chang
