2014 IEEE 25th International Symposium on Software Reliability Engineering
ISSRE 2014
Table of Contents

Message from the General Chair.................................................................viii
Message from the Program Committee Chairs...........................................x
Conference Committee Lists........................................................................xii
Program Committee....................................................................................xiv
Reviewers.....................................................................................................xvi

Session I: Best Paper Nominees

Security Benchmarks for Web Serving Systems ...........................................1
Naaliel Mendes, Henrique Madeira, and Joao Duraes

Zen-CC: An Automated and Incremental Conformance Checking Solution to Support
Interactive Product Configuration ...............................................................13
Hong Lu, Tao Yue, Shaukat Ali, Kunming Nie, and Li Zhang

Predicting Vulnerable Components: Software Metrics vs Text Mining ..........23
James Walden, Jeff Stuckman, and Riccardo Scandariato

Session II: Modeling

Uncovering Errors in ATL Model Transformations Using Static Analysis
and Constraint Solving .................................................................................34
Jesús Sánchez Cuadrado, Esther Guerra, and Juan de Lara

On the Long-Term Predictive Capability of Data-Driven Software Reliability Model:
An Empirical Evaluation ............................................................................45
Jinhee Park, Nakwon Lee, and Jongmoon Baik

Deadlock and Temporal Properties Analysis in Mixed Reality Applications ....55
Raymond Devillers, Jean-Yves Didier, Hanna Klaudel, and Johan Arcile
Session III: Program Logic

Program Logic Based Software Plagiarism Detection ................................................................. 66
  Fangfang Zhang, Dinghao Wu, Peng Liu, and Sencun Zhu

A Systematic Approach for Software Interference Analysis ........................................................... 78
  Bastian Zimmer, Christoph Dropmann, and Jochen Ulrich Hänger

WPBOUND: Enforcing Spatial Memory Safety Efficiently at Runtime with Weakest Preconditions ................................................................. 88
  Ding Ye, Yu Su, Yulei Sui, and Jingling Xue

Experience Report: An Analysis of Hypercall Handler Vulnerabilities ............................................. 100
  Aleksandar Milenkoski, Bryan D. Payne, Nuno Antunes, Marco Vieira, and Samuel Kounev

Session IV: Fault Localization

Why Does my Spreadsheet Compute Wrong Values? ................................................................. 112
  Birgit Hofer and Franz Wotawa

Effective Bug Triage Based on Historical Bug-Fix Information .................................................. 122
  Hao Hu, Hongyu Zhang, Jifeng Xuan, and Weigang Sun

More Debugging in Parallel ........................................................................................................ 133
  Wolfgang Högerle, Friedrich Steimann, and Marcus Frenkel

Session V: Case Studies I

Norming to Performing: Failure Analysis and Deployment Automation of Big Data Software Developed by Highly Iterative Models ................................................................. 144
  Keun Soo Yim

Experience Report: Orthogonal Classification of Safety Critical Issues ........................................ 156
  Nuno Silva and Marco Vieira

Failure Analysis of Jobs in Compute Clouds: A Google Cluster Case Study ...................................... 167
  Xin Chen, Charng-Da Lu, and Karthik Pattabiraman

Session VI: Data Analysis

Analysis and Diagnosis of SLA Violations in a Production SaaS Cloud ........................................ 178
  Catello Di Martino, Daniel Chen, Geetika Goel, Rajeshwari Ganesan, Zbigniew Kalbarczyk, and Ravishankar Iyer

Mutations: How Close are they to Real Faults? .............................................................................. 189
  Rahul Gopinath, Carlos Jensen, and Alex Groce

A Survey on Unit Testing Practices and Problems ........................................................................... 201
  Ermira Daka and Gordon Fraser
Session VII: Industrial Systems
Assessing Direct Monitoring Techniques to Analyze Failures of Critical Industrial Systems ................................................................. 212
Marcello Cinque, Domenico Cotroneo, Raffaele Della Corte, and Antonio Pecchia
Sagar Sen, Carlo Ieva, Arnab Sarkar, Aile Sander, and Astrid Grime
Runtime Verification of Web Services for Interconnected Medical Devices ................................................................. 235
Normann Decker, Franziska Kühn, and Daniel Thoma

Session VIII: Case Studies II
Access Control Policy Evolution: An Empirical Study ........................................................................ 245
Jeehyun Hwang, Da Young Lee, Laurie Williams, and Mladen Vouk
Experience Report: A Safety Engineering Tool Supporting Error Model Creation and Visualization ........................................................................ 255
Roland Mader, Rene Obendrauf, Philipp Prinz, and Gerhard Griefnig
Reproducibility of Environment-Dependent Software Failures: An Experience Report ........................................................................ 267
Davide G. Cavezza, Roberto Pietrantuono, Javier Alonso, Stefano Russo, and Kishor S. Trivedi

Session IX: Software Testing
An Empirical Study on the Scalability of Selective Mutation Testing ........................................................................ 277
Jie Zhang, Muyao Zhu, Dan Hao, and Lu Zhang
Multi-objective Construction of an Entire Adequate Test Suite for an EFSM ........................................................................ 288
Nesa Asoudeh and Yvan Labiche
Using Pre-Release Test Failures to Build Early Post-Release Defect Prediction Models ........................................................................ 300
Kim Herzig

Session X: Applications of Machine Learning
Defect Prediction between Software Versions with Active Learning and Dimensionality Reduction ........................................................................ 312
Huihua Lu, Ekrem Kocaguneli, and Bojan Cukic
Sunint Kaur Khalsa and Yvan Labiche
Predicting Effectiveness of IR-Based Bug Localization Techniques ........................................................................ 335
Tien-Duy B. Le, Ferdian Thung, and David Lo

Author Index ........................................................................ 346
