## CONTENTS

### DESIGN AND CONSTRUCTION

| IPC2014-33018 | V001T03A001 |
| Models and Methods of Determining the Minimum Stack Metal Temperature During Sonic Blowdown of Natural Gas | C. Hartloper, K. K. Botros, E. Abdalgawad, and S. Reid |

| IPC2014-33038 | V001T03A002 |
| Application of Reliability-Based Design Method of Pipeline Material Selection | Zhenyong Zhang, Wen Wei Zhang, Jinyuan Zhang, and Yuqing Liu |

| IPC2014-33049 | V001T03A003 |
| Direct Pipe® as Alternative to HDD in Permeable Soil Conditions | Gerhard Lang and Diana Pfeff |

| IPC2014-33096 | V001T03A004 |
| When HDD Construction Shifts Happen: Insertion of a Casing Sleeve Mitigated a Major Threat to Completion of the Project | G. Arthur Kanzaki, Stephen L. Grant, and Jarrod R. MacKenzie |

| IPC2014-33110 | V001T03A005 |
| Myanmar-China Oil and Gas Pipeline Project | Zhifeng Yu and Xuejun Wang |

| IPC2014-33134 | V001T03A006 |
| A Stress Check Procedure for Pipe Lowering-In Process During Pipeline Construction | Da-Ming Duan, Thomas Jurca, and Charles Zhou |

| IPC2014-33136 | V001T03A007 |
| Horizontal Directional Drilling Application in a Wide River Crossing in the Amazon Rain Forest | Robson Santana Nóbrega Alves and Byron Gonçalves de Souza Filho |

| IPC2014-33184 | V001T03A008 |
| Research on Hydrostatic Test of the Test Pipe Section With a 0.8 Design Factor in the West-to-East China Gas Pipeline III | Zhenyong Zhang, Yuqing Liu, Zifeng Zhao, Kai Wen, and Jinyuan Zhang |

| IPC2014-33196 | V001T03A009 |
| Field Testing of Pipeline Trench Backfill Properties | Rodney McAffee, Ryan Phillips, and Michael Martens |

| IPC2014-33203 | V001T03A010 |
| IWEX: New Horizons for Pipeline Girth-Weld AUT Inspection | Niels Portzgen, Xavier Deleye, Vincent Gaffard, Jan Van der Ent, and Jasper Schouten |

| IPC2014-33235 | V001T03A011 |
| Pipeline Integrity Analyses for Construction in Mountainous Areas | Fan Zhang, Ming Liu, Yong-Yi Wang, Ryan Surface, and Adam Phillips |
IPC2014-33237
Stress Analysis of Lifting and Lowering-In Process
Fan Zhang, Ming Liu, Yong-Yi Wang, and William A. Bruce

IPC2014-33239
Pipeline Separation: A Review of Requirements, Guidance and Best Practices
Danielle Demers and Arti Bhatia

IPC2014-33250
Development of an Effective Pipeline Material Traceability and Compliance Program
Brett D. Vogt and Les Owen

IPC2014-33259
Layout Optimization of Branch Pipeline Network on Curved Surface Using Genetic Algorithm
Jun Zhou, Xiaoping Li, Tao Deng, Mengya Cheng, and Jing Gong

IPC2014-33287
Venting of a 32 KM NG Pipeline: Field Measurements and CFD Simulations
Ajit Godbole, Guillaume Michal, Cheng Lu, Xiong Liu, Philip Venton, and Noel Laidlaw

IPC2014-33289
Strain Based Design Versus Preheat for Hotbit Pipelines
Graeme King, Ian Phiri, and John Greenslade

IPC2014-33295
Buried Steel Pipeline Design: External Load Methodologies and Strain Limits
Z. L. Chou, L. J. Wittenberg, S. Adeeb, and J. J. R. Cheng

IPC2014-33301
A Case Study of Stress Analysis of Pipeline in River Crossing Tunnel
Xiaolin Wang, Xianzhi Qi, Jianhua Fang, and Yan Di

IPC2014-33311
Pipeline Aerial Crossings
Murray M. Johnson

IPC2014-33364
Numerical Modeling of Pipe-Soil Interaction Under Transverse Direction
Bahar Farhadi and Ron C. K. Wong

IPC2014-33370
The COOLTRANS Research Programme: Learning for the Design of CO₂ Pipelines
Julian Barnett and Russell Cooper

IPC2014-33412
Seismic Integrity of High-Strain Cold Bend in Lateral Spreading Zone
Nobuhisa Suzuki, Hidetaka Watanabe, Toshiyuki Mayumi, and Hiroyuki Horikawa

IPC2014-33434
Limit States Design for Onshore Pipelines: Methodology and Implications
Maher A. Nessim, Riski H. Adianto, and Mark J. Stephens
Leveraging HCA Results in an Advanced Pipeline Risk Assessment Model
Otto Huisman, Ricardo Almandoz, Thomas Schuster, Adriana Andrade Caballero, and Leonardo Martinez Forero

Automatic Linear Disturbance Footprint Extraction Based on Dense Time-Series Landsat Imagery
Zhaohua Chen, Bill Jeffries, Paul Adlakha, Bahram Salehi, and Des Power

A Spatial Multi-Criteria Analysis Process to Optimize and Better Defend the Pipeline Route Selection Process
Kevin Seel, Massimo Dragan, Moise Coulombe-Pontbriand, Colleen Simpson Laird, and Curtis Campbell

Short Term Hydrotechnical Risk Control Measures Used During the Implementation of Watercourse Pipe Replacement Projects
Doug Dewar, Bob Costerton, Edward McClarty, and Jan Bracic

Achieving Efficiency in Environmental Assessment Through Focused Selection of Valued Components
Ward Prystay, Andrea Pomeroy, and Sandra Webster

Understanding State Variability and Recommendations for Minimizing Schedule Risk in Pipeline Siting and Development
John H. Morton, Steve T. Rowe, Rosemary C. Hargrave, Catherine F. Storey, and Stephanie L. White

Environmental Permitting of British Columbia Oil and Gas Commission Regulated Pipelines: Lessons From the Trenches
Kristen L. de Jong, Patrick M. Blancher, and Matthew G. Scoular

If You Build It, Will They Come? Caribou Habitat Restoration for Pipeline Projects
Brian Coupal and Paula Bentham

“ I Know It When I See It”: Where to Look for Social License
Garrath Douglas

The Pipeline Industry and Social Media
Garrath Douglas

Risk Management for Lateral Channel Movement at Pipeline Water Crossings
Jan J. Bracic, Craig Malcovish, and Eugene Yaremko
A Novel Approach for Automatic Matching and Updating Pipeline Data
Michel Morgan and Lindsay Giles

Pipeline Safety Targets and the Connection to Social License
Walter Kresic, Len LeBlanc, and Lorna Harron

Environmental Management and Mitigation: Enbridge Northern Gateway Pipelines Project
Paul Anderson, Jeffrey Green, and Linda Postlewaite

Why Marine Mammals Matter to Your Terrestrial Export Pipeline Project
Andrea Ahrens, Jeffrey E. Green, Paul Anderson, and Linda Postlewaite

Measurements and Evaluation of Internal Wall Surface Roughness of Small Diameter Pipes for High Pressure Natural Gas Systems
C. Hartloper, K. K. Botros, J. Geerligs, H. Golshan, and K. Jensen

Evaluation of Maximum Velocity Limit Criteria of Flows in High Pressure Natural Gas Systems
C. Hartloper, K. K. Botros, L. Jensen, and A. Tse

Leakage Detection and Location in Compressible Flow in a Pipeline
Desmond Adair, Hosam E. Emara-Shabaik, and Martin Jaeger

Modulating Pressure Setpoints in Pipeline Pressurizing
Heitor Honda Federico, Douglas Estevam Torci, and Cláudio Rogério Garcia

Economic Feasibility of Transporting Natural Gas Hydrates in Slurry Pipelines
K. K. Botros and S. Hall

Enhancing Liquid Hydrocarbon Pipeline Leak Detection Using Instrumented Aerial Surveillance
Adrian Banica, Doug Waslen, and Boyd T. Tolton

Pipeline Leak Detection Using Four Mode Fibre-Optic Based Distributed Sensing
Alastair Godfrey, David Hill, Chris Minto, John Williams, and Jerry Worsley

Benefits and Methods of Automating Surge Relief Valves
John W. Konopa and Kyle A. Konopa
Direct Hydrocarbon Leakage Detection of Pipelines Using Novel Carbon Nanotube Nanocomposites
Kaushik Parmar and Simon Park

Consideration of Line-Pack Flexibility in Dynamic Steady-State Simulations for Natural Gas Transport Networks
Kevin Münch, Hendrik G. E. Körner, and Albert Moser

Research of Gas Losses During Transportation in Gas Transmission Trunk Line
Rui Chen, Xiaokai Xing, Liansheng Jiang, Shubao Pang, and Xiaocui Tian

Calculation Method of Natural Gas Compressibility Factor and its Application in Pipeline Trade
Xiaocui Tian, Xiaokai Xing, Rui Chen, Shubao Pang, and Liu Yang

A Combined Leak Detection Method Using Pattern Recognition Techniques
Gerhard Geiger and Daniel Vogt

Pipeline Leak Detection Technologies and Emergency Shutdown Protocols
Gerhard Geiger

External Pipeline Leak Detection Based on Fiber Optic Sensing for the Kinosis 12"-16" and 16"-20" Pipe-in-Pipe System
Carlos Borda, Dana DuToit, Harry Duncan, and Marc Niklès

Synergy in Leak Detection: Combining Leak Detection Technologies That Use Different Physical Principles
Peter Y. Han and Mark S. Kim

Real-Time Pig Tracking Using a Fibre Optic Pipeline Monitoring System
Richard Espiner and Alastair Pickburn

The Development and Application of Virtual Flow Metering System in Offshore Gas Field
Zhi Wang, Jing Gong, Haihao Wu, and Qingping Li

Fast Detection and Localization of Small Leaks in Toxic Pipelines Using Distributed Fibre Optic Sensors
Daniele Inaudi, Roberto Walder, and Rob de Bont
Automated Test System for Monitoring the Efficacy and Reliability of Leakage Detection in Pipelines
Daniele Inaudi and Roberto Walder

Leak Detection Using Distributed Temperature Sensing: An Improved Calculation Method
Paul Skoczylas, Thomas Dessein, Tania Rizwan, and Scott Medynski

Petrobras Transporte S. A.: Transpetro’s Ultrasonic Flow Meter Recalibration Program
Thomaz Carvalho, Ana Luisa Ferreira, and Tulio C. Lourenço

Field Testing of Negative-Wave Leak Detection Systems
Shane Siebenaler, Eric Tervo, Paul Vinh, and Chris Lewis

Numerical Simulation of Stratified Two-Phase Flow in a Nearly Horizontal Gas-Liquid Pipeline With a Leak

Effects of Data Preparation on Leak Sensitivity Analysis
Rafael Noguerol, Juan Carlos Unriza, and Alberto Acevedo

Large Scale Test Apparatus to Test External Leak Detection Technologies
Chris Apps, Istemi Ozkan, Tania Rizwan, Marzie Derakhshesh, and Scott Medynski

Real Time Automatic Calibration of Flow Meters for Real-Time Hydraulic Modelling
Norense Okungbowa and Noorallah Rostamy

Triggers for the Transient State of a Pipeline in Material Balance Systems Used in Real-Time Transient Hydraulic Modeling
Noorallah Rostamy, Norense Okungbowa, and John D. Yurchevich

Development of Pipeline Leak Detection Technologies
Jun Zhang, Andy Hoffman, Adrian Kane, and John Lewis

A Novel Approach to Evaluating Leak Detection CPM System Sensitivity/Reliability Performance Trade-Offs
Shyam Chadha, Daniel Hung, and Samir Rashid
