aus Chemnitz

Table of Contents

Acknowledgment.....	1
Summary	1
Zusammenfassung.....	3
Preface.....	6
Chapter 1 General Introduction	8
1.1 Soil Composition.....	9
1.2 Biogeochemical Interfaces in Soil.....	10
1.3 The Soil Habitat	11
1.4 Soil Microbial Communities.....	13
1.4.1 Inhabitants and Actors of BGIs.....	13
1.4.2 Interactions of the Microbiota with the Abiotic Soil Environment.....	16
1.5 Soil Microbial Ecology.....	19
1.5.1 Methods	19
1.5.2 Challenges & Perspectives.....	20
1.6 Polycyclic Aromatic Hydrocarbons	21
1.6.1 General Definition	21
1.6.2 Fate in Soil	22
1.6.2.1 Soil as Sink for PAHs	22
1.6.2.2 Microbial PAH Degradation in Soil	26

1.6.3	Phenanthrene as PAH Model Compound.....	28
1.7	Experimental Approaches to Study Interactions at BGIs in Soil.....	29
1.8	Research Questions and Objectives	30
	Thesis Outline.....	32
	References.....	35
	Chapter 2 Mineral composition and charcoal determine the bacterial community structure in artificial soils.....	51
	Chapter 3 Metal oxides, clay minerals and charcoal determine the composition of microbial communities in matured artificial soils and their response to phenanthrene	70
	Chapter 4 Establishment of macro-aggregates and organic matter turnover by microbial communities in long-term incubated artificial soils.....	89
	Chapter 5 Soil mineral composition matters: Response of microbial communities to phenanthrene and plant litter addition in long-term matured artificial soils.....	113
	Chapter 6 Pyrosequencing-based analysis of matured artificial soils reveals the driving influence of the soil composition on the response of bacterial communities to added phenanthrene and litter.	137
	Chapter 7 Transport of phenanthrene influenced the release of mobile organic matter and soil bacterial community structure.....	173
	Chapter 8 Succession of bacterial and fungal 4-chloro-2-methylphenoxyacetic acid degraders at the soil-litter interface.....	217
	Chapter 9 General Discussion and Outlook.....	236
	Abbreviations	240
