CHAPTER 1 Toward Standardization of Terminologies and Recognition of Chemostratigraphy as a Formal Stratigraphic Method 1

Mu. Ramkumar

1.1 Introduction	1
1.2 Basis of Chemostratigraphy	2
1.3 Development of Chemostratigraphy	3
1.4 Prevailing Terminologies, Their Intended Meanings and Definitions.....	4
1.4.1 Chemostratigraphy	4
1.4.2 Fingerprinting or Geochemical Fingerprinting	4
1.4.3 Geochemical Signature.....	4
1.4.4 Excursion, Shift, Fluctuation, Perturbation, and Anomaly.....	5
1.4.5 Trend.....	6
1.4.6 Chemostratigraphic Indices	7
1.4.7 Chemozone	7
1.4.8 Chemochron	8
1.4.9 Resolution.....	9
1.4.10 Scale of Correlation.....	9
1.5 Terminologies and Applications of Chemostratigraphy: A Fit Case for Formalization....	11
Acknowledgments.....	11
References	12

CHAPTER 2 Isotope and Elemental Chemostratigraphy 23

*Alcides N. Sial, Claudio Gaucher, Valderez P. Ferreira, Natan S. Pereira,
Wilker S. Cezario, Letícia Chiglino, Haroldo M. Lima*

2.1 Introduction	23
2.2 Isotope and Elemental Chemostratigraphy: Use and Limitations.....	24
2.2.1 Carbon Isotopes	24
2.2.2 Nitrogen Isotopes.....	28
2.2.3 Oxygen Isotopes	29
2.2.4 Sulfur Isotopes.....	29
2.2.5 Calcium and Boron Isotopes	30
2.2.6 Chromium and Molybdenum Isotopes	30
2.2.7 Strontium and Neodymium Isotopes	31
2.2.8 Elemental Chemostratigraphy	32

2.3	Temporal Trends and Signatures	33
2.3.1	Archean.....	33
2.3.2	Paleoproterozoic	34
2.3.3	Mesoproterozoic	37
2.3.4	Neoproterozoic	38
2.3.5	Paleozoic.....	40
2.3.6	Mesozoic.....	43
2.3.7	Cenozoic	44
2.4	Conclusions.....	47
	Acknowledgments.....	48
	References	48

CHAPTER 3 Stable Isotopes: Tools for Understanding Past Climatic Conditions and Their Applications in Chemostratigraphy 65

Manish Tiwari, Ashutosh K. Singh, Devesh K. Sinha

3.1	Introduction	65
3.2	Stable Isotope Systematics	67
3.2.1	Isotopic Fractionation	68
3.2.2	Delta (δ) Value	70
3.2.3	Isotopic Standards	70
3.2.4	A Few Important Equations Used in Stable Isotope Analysis.....	71
3.3	Stables Isotopes of a Few Elements and Their Applications	72
3.3.1	Stable Isotopes of Oxygen and Carbon in Cenozoic Paleoceanography and Stratigraphy.....	72
3.3.2	Nitrogen Isotopes of Sedimentary Organic Matter as Denitrification Indicator	82
3.3.3	Carbon Isotopes of Sedimentary Organic Matter as Provenance Indicator.....	84
3.4	Conclusion.....	86
	Acknowledgment	86
	References	86

CHAPTER 4 Time Averaging and Compositional Averaging in Biogenic Carbonates: Implications for Chemostratigraphy 93

Pratul Kumar Saraswati

4.1	Introduction	93
4.2	Biogenic Carbonate Chemostratigraphy	94
4.3	Implications of Time Averaging and Compositional Averaging	95
4.4	Conclusions	99
	Acknowledgment	99
	References	100

CHAPTER 5 Sedimentology and Geochemistry of the Late Miocene–Pliocene Succession in the Fars Interior (SW Iran): Implications on Depositional and Tectonic Setting, Provenance and Paleoweathering in the Zagros Basin.....	103
<i>Mohammad Sahraeyan, Hossein Seif, Esmat Ebne Haddad, Nasim Mohammadzadeh</i>	
5.1 Introduction	103
5.2 Regional Setting	104
5.3 Material and Methods	107
5.4 Results and Interpretations.....	108
5.4.1 Lithofacies	108
5.4.2 Architectural Elements	114
5.4.3 Depositional Environments	116
5.4.4 Detrital Framework Components	117
5.4.5 Source Rock Lithology	119
5.4.6 Sandstone Classification.....	121
5.4.7 Provenance and Tectonic Setting.....	122
5.4.8 Source-Area Weathering.....	122
5.5 Conclusions	125
Acknowledgments.....	126
References	126
CHAPTER 6 Environmental and Climatic Conditions during the K–T Transition in the Cauvery Basin, India: Current Understanding Based on Chemostratigraphy and Implications on the KTB Scenarios.....	131
<i>T. Sugantha, Mu. Ramkumar, V. Balaram, Jyotsana Rai, M. Satyanarayanan</i>	
6.1 Introduction	131
6.2 Geological Setting.....	132
6.3 Materials and Methods.....	134
6.4 Results	135
6.4.1 Facies and Depositional History	135
6.4.2 Geochemical Anomalies	141
6.5 Discussion	150
6.5.1 Completeness of the K–T Stratigraphic Records of the Cauvery Basin.....	150
6.5.2 Environmental and Climatic Conditions	151
6.5.3 Implications on the Causative Factors of Extinction across K–T.....	152
6.6 Conclusions	158
Acknowledgments.....	159

References	159
Appendix I Nannofossil Assemblage Recorded from the Ottakoil Formation	169
Appendix II Nannofossil Assemblage Recorded from the Lagoonal Facies of the Kallamedu Formation in the Niniyur Section	171
CHAPTER 7 Cretaceous Carbon Isotope Stratigraphy and Constraints on the Sedimentary Patterns of the Turonian Forearc Successions in Hokkaido, Northern Japan	173
<i>Go-Ichiro Uramoto, Rui Tahara, Hiromichi Hirano</i>	
7.1 Introduction.....	173
7.2 Geological Setting.....	175
7.3 Diagenesis and Local Effects on $\delta^{13}\text{C}$ Profiles of Terrestrial Organic Carbon	177
7.4 Carbon Isotope Stratigraphy	177
7.4.1 Correlation of Terrestrial $\delta^{13}\text{C}$ Records with Reference $\delta^{13}\text{C}$ Records of Marine Carbonates	177
7.4.2 Chemostratigraphic Constraints on Sedimentary Patterns in the Yezo Group....	179
7.5 Conclusions.....	180
References	181
CHAPTER 8 Geochemistry of Late Cretaceous Sedimentary Rocks of the Cauvery Basin, South India: Constraints on Paleoweathering, Provenance, and End Cretaceous Environments.....	185
<i>J. Madhavaraju</i>	
8.1 Introduction.....	185
8.2 Geology and Stratigraphy	186
8.3 Materials and Methods.....	188
8.4 Results	188
8.4.1 Major Elements	188
8.4.2 Trace Elements	196
8.4.3 Rare Earth Elements	196
8.5 Discussion	196
8.5.1 Geochemical Indicators of Weathering	196
8.5.2 Provenance.....	204
8.6 Conclusions.....	209
References	211

CHAPTER 9 A Chemostratigraphic Model for the Development of Parasequences and Its Application to Sequence Stratigraphy and Paleoceanography, Cretaceous Western Interior Basin, USA....215*Philip Morath, Leah Calvert, Timothy White*

9.1	Introduction.....	215
9.2	Geological Setting.....	216
9.2.1	Cretaceous Western Interior Basin	216
9.2.2	Stratigraphic Units.....	218
9.2.3	Chronostratigraphy	219
9.3	Methodology	219
9.3.1	Application of the Parasequence Model	221
9.4	Discussion	222
9.4.1	Marker Horizons.....	222
9.4.2	Parasequence Correlations.....	224
9.4.3	Duration of Parasequences	230
9.4.4	Relative Sea Level Fluctuations	231
9.4.5	Evolution of Accommodation Space in the KWIB	236
9.4.6	Alluvial-Plain Stratal Architecture and Pedogenesis during the Mid-Cretaceous	239
9.5	Conclusion.....	240
	Acknowledgments.....	240
	References	240

CHAPTER 10 Paleo-Redox Conditions of the Albian-Danian Carbonate Rocks of the Cauvery Basin, South India: Implications for Chemostratigraphy.....247*J. Madhavaraju, S.M. Hussain, J. Ugeswari, R. Nagarajan,
S. Ramasamy, P. Mahalakshmi*

10.1	Introduction.....	247
10.2	Geology and Stratigraphy	248
10.3	Methodology.....	253
10.4	Results.....	255
10.4.1	Major Oxides	255
10.4.2	Trace Elements	258
10.5	Redox-Sensitive Trace Elements for Application in Chemostratigraphy	262

10.6	Conclusions.....	266
	Acknowledgments.....	266
	References.....	266

CHAPTER 11 Temporal Trends of Geochemistry, Relative Sea Level, and Source Area Weathering in the Cauvery Basin, South India 273

Mu. Ramkumar, Z. Berner

11.1	Introduction.....	273
11.2	Geological Setting	275
11.3	Material and Methods.....	281
11.4	Results and Interpretations	282
	11.4.1 Influence of Relative Sea Level Changes over the Depositional Environments.....	282
	11.4.2 Influence of Tectonics over the Depositional Environments	288
	11.4.3 Temporal Variations of Geochemical Composition vis-à-vis Depositional Environments	289
	11.4.4 Stratigraphic Variations of Weathering Indices	291
11.5	Discussion on Paleoclimatic Trends and Cycles.....	296
11.6	Conclusions.....	299
	Acknowledgments.....	300
	References.....	301

CHAPTER 12 Chemostratigraphy of the Dhosa Oolite Member (Oxfordian), Kachchh Basin, Western India: Implications for Completeness of the Stratigraphic Record and Correlation with Global Oolite Peak 309

Mu. Ramkumar, Matthias Alberti, Franz T. Fürsich

12.1	Introduction.....	309
12.2	Geological Setting	312
12.3	Materials and Methods	314
12.4	Results and Interpretations	314
	12.4.1 Geochemical Characteristics with Reference to Upper Continental Crust Composition.....	314
	12.4.2 Stratigraphic Variations of Absolute Concentrations and Trends in Geochemical Profiles.....	316
	12.4.3 Weathering Indices and Environmental Indicators.....	320
12.5	Discussion.....	324
	12.5.1 Temporal Variations and Coupled Nature of Depositional Environments, Climate, Source Area Weathering, and Relative Sea Level	324
	12.5.2 Phosphorus Anomalies and Short-term Sea-level vis-à-vis Climatic Fluctuations	325
	12.5.3 Barium Anomalies	327

12.5.4 Relative Contribution of Depositional and Diagenetic Processes over Geochemical Signals	329
12.5.5 Scales of Sea-level Fluctuations, Ooids in DOM, and Their Relationship with Global Oolite Peak	332
12.6 Conclusions.....	335
Acknowledgments	335
References	336
CHAPTER 13 Facies and Carbon Isotope Chemostratigraphy of Lower Jurassic Carbonate Deposits, Lusitanian Basin (Portugal): Implications and Limitations to the Application in Sequence Stratigraphic Studies.....	341
<i>Ricardo L. Silva, Luís V. Duarte, María José Comas-Rengifo</i>	
13.1 Introduction.....	341
13.2 Geological Background	343
13.3 Materials and Methods	344
13.4 Results: Studied Sections, Stratigraphic Improvements, and Isotope Data	346
13.4.1 Tomar.....	346
13.4.2 Rabaçal	348
13.4.3 Peniche	351
13.5 Depositional Environment	353
13.6 Sequence Stratigraphy: Third-Order Sequences and Carbon Isotope Stratigraphy.....	354
13.6.1 Sequence Stratigraphic Surfaces and Stratigraphic Genetic Units	354
13.6.2 Definition of a Sequence Stratigraphy Type Section and Third-Order Sequences	356
13.6.3 Model-Dependent Analysis	357
13.6.4 Carbon Isotope Stratigraphy and Relation with Second- and Third-Order Sequence Stratigraphy.....	359
13.6.5 Comparison with the Boreal and Tethyan Domains.....	359
13.7 Conclusions.....	361
Acknowledgments	362
References	362
CHAPTER 14 Chemostratigraphy of the Permian–Triassic Strata of the Offshore Persian Gulf, Iran	373
<i>Vahid Tavakoli</i>	
14.1 Introduction.....	373
14.2 Geological Setting and Stratigraphy	374
14.3 Materials and Methods	375

14.4	Results.....	376
14.4.1	Sr Isotopes	376
14.4.2	Characteristics of $\delta^{13}\text{C}$ Data	377
14.4.3	Characteristics of $\delta^{18}\text{O}$ Data.....	378
14.4.4	Th/U Ratio	379
14.4.5	Elemental Analysis	380
14.5	Discussion.....	381
14.5.1	Sr Data	381
14.5.2	$\delta^{13}\text{C}$ Data	381
14.5.3	$\delta^{18}\text{O}$ Data.....	382
14.5.4	Th/U Ratio Changes	384
14.5.5	Elemental Analysis	384
14.5.6	Global Correlation	385
14.6	Conclusions.....	386
	Acknowledgments.....	387
	References.....	388

CHAPTER 15 The Position of the Ordovician–Silurian Boundary in Estonia Tested by High-Resolution $\delta^{13}\text{C}$ Chemostratigraphic Correlation 395

Leho Ainsaar, Janika Truumees, Tõnu Meidla

15.1	Introduction.....	395
15.2	Geological Setting and Stratigraphy	397
15.3	Material and Methods	400
15.4	$\delta^{13}\text{C}$ Chemostratigraphy	400
15.5	Discussion.....	402
15.6	Conclusions.....	407
	Acknowledgments.....	408
	References.....	408

CHAPTER 16 Stable isotope stratigraphy: correlations and implications for hydrocarbon microseepage and prospecting 413

Devleena Mani, D.J. Patil, A.M. Dayal

16.1	Introduction.....	413
16.2	Carbon Isotope Event Stratigraphy.....	415
16.3	Chemostratigraphic Correlations for Petroleum Prospecting	417
16.4	Methodology for Sample Selection and Analysis.....	419
16.4.1	Postdepositional Alteration.....	419
16.4.2	Analytical Procedure	419

16.5	C and O Isotope Anomalies and Near Surface Hydrocarbon Manifestations.....	420
16.5.1	Vindhyan Basin.....	421
16.5.2	Kutch and Cuddapah Basins.....	425
16.6	Conclusion	427
	Acknowledgments	427
	References	427

CHAPTER 17 Chemostratigraphy of Neoproterozoic Banded Iron Formation (BIF): Types, Age and Origin..... 433

Claudio Gaucher, Alcides N. Sial, Robert Frei

17.1	Introduction.....	433
17.2	Age of Neoproterozoic BIFs.....	434
17.3	Depositional Environment of Neoproterozoic BIFs	438
17.3.1	Sedimentology and Facies Association	438
17.3.2	Geochemistry and Chemostratigraphy	441
17.4	Discussion.....	444
17.5	Conclusions.....	445
	Acknowledgments.....	445
	References	445

CHAPTER 18 Chemostratigraphy of Neoproterozoic Carbonate Deposits of the Tuva–Mongolian and Dzabkhan Continental Blocks: Constraints on the Age, Glaciation and Sedimentation..... 451

*Irina Vishnevskaya, Elena Letnikova, Natalia Pisareva,
Artem Proshenkin*

18.1	Introduction.....	451
18.2	Geologic Setting	451
18.2.1	Stratigraphy of the Tuva–Mongolian Block	455
18.2.2	Stratigraphy of the Dzabkhan Block	458
18.3	Methods of Investigation	459
18.4	Results.....	460
18.4.1	Tuva–Mongolian Block Carbonate Deposits.....	460
18.4.2	Carbonate Rocks from the Dzabkhan Block Cover.....	472
18.5	Sr and C Isotopic Composition.....	479
18.6	Discussion.....	481
18.7	Conclusion	484
	Acknowledgments.....	484
	References	484

CHAPTER 19 Correlation of Phosphorite and Nonphosphorite Carbonate Sequences of the Lower Aravalli Group, Northwest India: Implications on the Paleoproterozoic Paleoenvironment.....	489
<i>Ritesh Purohit</i>	
19.1 Introduction.....	489
19.2 Geological Setting	490
19.3 Problem of Correlation	494
19.4 Geochemical Characterization of PBs and NPBs.....	495
19.4.1 Chemistry of the PB and NPB Carbonates.....	495
19.4.2 Chemistry of PB and NPB Black Shales.....	497
19.4.3 Stable Isotope Chemistry of the PB and NPB	498
19.5 Redox State Variations in PBs and NPBs	499
19.6 Discussion.....	499
19.6.1 Global versus Local Scenario	499
19.6.2 Correlation of the PBs and NPBs	501
19.7 Summary.....	501
Acknowledgments.....	503
References.....	503
Index	509
