CONTENTS

26TH SYMPOSIUM ON FLUID MACHINERY
FEDSM2014-21012 ........................................................................................................V01BT10A001
Optimal Design of Gas Turbines Flow Paths Considering Operational Modes
Anatoli V. Boiko, Yuri Govorushchenko, Aleksander Usaty, and Oleksii Rudenko

FEDSM2014-21030 ........................................................................................................V01BT10A002
Meridian Profile Case Study of the Best Specific Speed and Blade Number
Takuji Tsugawa

FEDSM2014-21075 ........................................................................................................V01BT10A003
Development of an Operation Point Detection System for Centrifugal Pumps by Classifying the
Time Signal of a Single Vibration Sensor
Christian Licht and Martin Böhle

FEDSM2014-21101 ........................................................................................................V01BT10A004
Predictive Erosion Modeling in an ESP Pump
Sahand Pirouzpanah and Gerald L. Morrison

FEDSM2014-21117 ........................................................................................................V01BT10A005
Research on the Performance of Shaftless Water-Jet Propulsion
Puyu Cao, Yang Wang, Guidong Li, and K. X. Qian

FEDSM2014-21128 ........................................................................................................V01BT10A006
Analyze of the Size of Secondary Droplets due to Film Separation at the Blade Trailing Edge
Hans Josef Dohmen, Friedrich-Karl Benra, Cornelius Schepers, and Sebastian Schuster

FEDSM2014-21129 ........................................................................................................V01BT10A007
Radially and Circumferentially Oriented Vortices in Axial Flow Compressors
Andrew Gill, Theodor W. von Backström, and Thomas M. Harms

FEDSM2014-21148 ........................................................................................................V01BT10A008
Experimental and Numerical Studies of Pump Transient Characteristics During Stopping Period
Peng Wu, Dazhuan Wu, and Leqin Wang

FEDSM2014-21152 ........................................................................................................V01BT10A009
Computational Study of a Low Cost Rope Washer Pump for Brine Pumping
Application in Rural Areas
Neelesh Bhandari and Murali Damodaran

FEDSM2014-21199 ........................................................................................................V01BT10A010
Investigation of the Self-Priming Process of Self-Priming Pump Under Gas-Liquid
Two-Phase Condition
Quihong Li, Yang Wang, Gang Yin, Yurui Cui, and Qihong Liang

FEDSM2014-21206 ........................................................................................................V01BT10A011
Multi Objective Optimization of a Multiphase Pump for Offshore Plants
Joon-Hyung Kim, Him-Chan Lee, Joon-Yong Yoon, Kyoung-Yong Lee, Yong-Kab Lee, and
Young-Seok Choi

</table>
FEDSM2014-21396
Development of High Efficiency and Low Noise Cross-Flow Fans for Room Air Conditioner Indoor Unit
Hironobu Yamakawa

FEDSM2014-21418
Numerical Investigation of the Effect of Balancing-Hole on the Axial-Force of a Partial Emission Pump
Zhang Lisheng, Jiang Jin, Xiao Zhihuai, and Li Yanhui

FEDSM2014-21431
Flow Characteristics Downstream of Swirl Flow Generators
Takanori Nakazawa, Masanori Kudo, Koichi Nishibe, and Kotaro Sato

FEDSM2014-21444
Numerical Simulation of Pressure Vibrations in a Francis Turbine Draft Tube With Air Admission
Renfang Huang, An Yu, Xianwu Luo, Bin Ji, and Hongyuan Xu

FEDSM2014-21533
On the Effect of Volute Design on Unsteady Flow and Impeller-Volute Interaction in a Centrifugal Pump
Oliver Litfin and Antonio Delgado

FEDSM2014-21538
CFD Investigation of the Effect of Viscosity on a Three-Stage Electric Submersible Pump
Henrique Stel, Thiago Sirino, Pamella R. Prohmann, Francisco Ponce, Sergio Chiva, and Rigoberto E. M. Morales

FEDSM2014-21580
Experimental Investigation of Engine Bypass Flow Behavior in the Presence of Surface Heat Exchangers
Laura Villafane and Guillermo Paniagua

FEDSM2014-21593
PIV Measurements of the Flow in the Tip Region of a Compressor Rotor
David Tan, Yuanchao Li, Ian Wilkes, Rinaldo L. Miorini, and Joseph Katz

FEDSM2014-21665
Optimisation Methods for Coupled Thermodynamic and 1D Design of Radial-Inflow Turbines
Rodney Persky, Emilie Sauret, and Lin Ma

FEDSM2014-21731
Research on Critical Stable Sectional Area of Surge Chamber Considering the Fluid Inertia in the Penstock and Characteristics of Governor
Wen-cheng Guo, Jian-dong Yang, and Jie-ping Chen

FEDSM2014-21738
Domain Partitioned Transformation of Pump-Turbine Characteristic Curves in 3D Space
Wei Zeng, Jiandong Yang, and Yongguang Cheng
Experimental Investigation on the Performance of Scroll Refrigeration Compressor With Suction Injection Cooling
Shuaihui Sun, Pengcheng Guo, Jianjun Feng, Xiaobo Zheng, and Zhizhong Wang

15TH SYMPOSIUM ON FLUID-STRUCTURE INTERACTION AND FLOW-INDUCED NOISE IN INDUSTRIAL APPLICATIONS

Experimental Investigation of Air Vortex Interaction With Porous Screen
Xudong An, Howard Fultz, Srinath Iyengar, and Fatemeh Hassanipour

Dynamic Forces Acting on Elastic Heaving Airfoils Based on the Bending Stiffness Considerations
Masaki Fuchiwaki, Tetsushi Nagata, and Kazuhiro Tanaka

Adaptive Finite Elements Simulation Methods and Applications for Monolithic Fluid-Structure Interaction (FSI) Problem
Bhuiyan Shameem Mahmood Ebna Hai and Markus Bause

Prediction of the Damaging Flow-Induced Vibrations in Tubular Heat Exchangers With Triangular Arrays
Yehia A. Khulief, Salem A. Bashmal, Sayed A. Said, Dhawi A. Al-Otaibi, and Khalid M. Mansour

Computational Aeroacoustic Analysis of a Heating Coil Within a Ventilation Duct
Joseph C. Herther and Stephen P. Gent

A Partitioned Strong Coupling Procedure for Simulation of Shock Wave/Flexible Structure Interaction
Guillaume Benefice, Yannick Rozenberg, Stéphane Aubert, Pascal Ferrand, and Fabrice Thouverez

Acoustic Sound Source Identification in a Gasoline DI Pump for High Pressure Fuel Flows
Prashanth Avireddi, Nikhil Seera, and Harsha Badarinarayan

Nonlinear Multi-Modal Panel Flutter Oscillations at Low Supersonic Speeds
Vasily Vedeneev, Anastasia Shishaeva, Konstantin Kuznetsov, and Andrey Aksenov

Heat Transfer Enhancement of Channel Flow via Vortex-Induced Vibration of Flexible Cylinder
Junxiang Shi, Jingwen Hu, Steven R. Schafer, and Chung-Lung Chen
FEDSM2014-22010 V01BT12A010
A New Approach to Mesh Adaptation Procedure Using Linear Elasticity for Geometries Undergoing Large Displacements
Jaber J. Hasbestan, James C. Newman III, and Abdollah Arabshahi

FEDSM2014-22149 V01BT12A011
Suppression of the Vortex-Induced Vibration of a Circular Cylinder With Permeable Meshes
Murilo M. Cicolin, Cesar M. Freire, and Gustavo R. S. Assi

FEDSM2014-22155 V01BT12A012
The Effects of a Passively Actuated Trailing Edge on the Aerodynamics of an Oscillating Wing
Jesse Rushen, Firas Siala, Alexander D. Totpal, Cameron J. Planck, and James A. Liburdy

8TH INTERNATIONAL SYMPOSIUM ON FLOW APPLICATIONS IN AEROSPACE
FEDSM2014-21130 V01BT13A001
A Continuum Approach to Permeation With Interfacial Leakage: A Space Seal Approach
Nicholas G. Garafolo and Rachel J. Wischt

FEDSM2014-21344 V01BT13A002
Effect of Forebody Strake on Directional Aerodynamic Characteristics of Typical Configuration and Its Mechanism
YanKui Wang, Bingrui Fu, and Shuai Ou

FEDSM2014-22079 V01BT13A003
Fluidic Deformation Under Hypervelocity Impacts
Andrew Thurber and Javid Bayandor

FEDSM2014-22110 V01BT13A004
Comprehensive Soft Impact Damage Methodology for Advanced High Bypass Ratio Turbofan Engines
Yangkun Song and Javid Bayandor

FEDSM2014-22217 V01BT13A005
Thermodynamic Control Systems for Cryogenic Propellant Storage During Long Missions
J.-P. Thibault, C. Corre, L. Demeure, and S. Mer

9TH SYMPOSIUM ON FLOW MANIPULATION AND ACTIVE CONTROL: THEORY, EXPERIMENTS AND IMPLEMENTATION
FEDSM2014-21108 V01BT14A001
Numerical Study of Dielectric Barrier Discharge Plasma Actuation
Hua Shan and Yu-Tai Lee

FEDSM2014-21136 V01BT14A002
Experimental Characterization of the Separate Flow Induced by a Wall-Mounted Bump
Fawzi Fadla, Laurent Keirsbulck, Fethi Aloui, and J-P. Laval

FEDSM2014-21190 V01BT14A003
Gas-Liquid Foam Through Straight Ducts and Singularities: CFD Simulations and Experiments
Rogelio Chovet, Fethi Aloui, and Laurent Keirsbulck
Flow Behaviour Around Square and Circular Obstacles in 2D and 3D Configurations Using Lattice Boltzmann Method
Wafik Abassi, Fethi Aloui, Sassi Ben Nasrallah, Laurent Keirsbulck, and Jack Legrand

Suppression of Unsteady Vortex Shedding From a Circular Cylinder by Using a Passive Jet Flow Control Method
Wenli Chen, Hui Li, and Hui Hu

Chaotic Heat Transfer in a Laminar Pulsating Flow With Constant Wall Temperature
Mohammad Karami, Mojtaba Jarrahi, Zahra Habibi, Ebrahim Shirani, and Hassan Peerhossaini

Mixing Enhancement in a Chaotic Micromixer Using Pulsating Flow
Mohammad Karami, Mojtaba Jarrahi, Ebrahim Shirani, and Hassan Peerhossaini

Low Frequency Acoustic Streaming in a Hele-Shaw Cell
Maxime Costalonga, Hassan Peerhossaini, and Philippe Brunet

Flow Control of a Bluff Body Wake by Means of Self-Adaptive Flaps
Audrey Feuvrier, Nicolas Mazellier, and Azeddine Kourta

A Study of Pulsed Blowing Effect on Flow Separation Over Flap
Ping Zhou, Yankui Wang, and Dejian Zhao

Numerical Simulation and Control of the Flow Over a Backward Facing Ramp
Charles-Henri Bruneau, Meriem Jedouaa, Khodor Khadra, and Iraj Mortazavi

Initial Findings on Feasibility of Real-Time Feedback Control of a Hazardous Contaminant Released Into Channel Flow by Means of a Laboratory-Scale Physical Prototype
Sara P. Rimer, Nikolaos D. Katopodes, and April M. Warnock

Numerical Investigation on the Coanda Effect Over the S809 Airfoil With Synthetic Jet Actuator at High Angle of Attack
Mohammad Moshfeghi and Nahmkeon Hur

Acoustic Streaming Jets in Liquids
Valery Botton, Brahim Moudjed, Daniel Henry, Hamda Ben Hadid, Jean-Paul Garandet, and Alban Potherat
Flexible Turbulence Absorbers for Enhancing the Liquid Flow in Pipelines
Hayder A. Abdulbari, Rosli Bin Mohd Yunus, and Ashwin Charles

On the Effect of Various Shrouds on the Wake of a Circular Cylinder
Azlin Mohd Azmi, Tongming Zhou, and Liang Cheng

2ND INTERNATIONAL SYMPOSIUM ON MULTISCALE METHODS FOR MULTIPHASE FLOW

Interface Tracking Methods Applied to Phase Separation
L. Osmar, S. Vincent, J. P. Caltagirone, J. L. Estivalezes, F. Auguste, J. Magnaudet, T. Menard, A. Berlemont, Wojtek Aniszewski, Y. Ling, and S. Zaleski

Multi-Scale Near-Wall Averaging and Two-Phase Logarithmic Law for a CFD Two-Fluid Model
Avinash Vaidheeswaran, John R. Buchanan, Jr., Paul Guilbert, and Martin Lopez de Bertodano

Multiscale Approach for Particulate Flows, Application to Fluidized Beds
Manuel Bernard, Anthony Wachs, and Eric Climent

Multi-Scale Simulation of Reactive Flow Through a Fixed Bed of Catalyst Particles
Ferdaous Dorai, Ludovic Briquet, Abdelkader Hammouti, Matthieu Rolland, and Anthony Wachs

Numerical Simulation of Sand Ripple Evolution in Oscillatory Boundary Layers
Justin R. Finn, Sourabh V. Apte, and Ming Li

SYMPOSIUM ON NONINVASIVE MEASUREMENTS IN SINGLE AND MULTIPHASE FLOWS

Determination of Pressure Drop of Pure Water Flowing Upward Direction in a Double Tube Heat Exchanger Having Smooth and Microfin Tubes
Alican Çebi, Ali Celen, Ahmet Selim Dalkılıç, Mustafa Kemal Sevindir, and Somchai Wongwises

Digital Image Processing Algorithm for Determination and Measurement of In-Focus Spherical Bubbles
Chong Xu and Thomas Shepard

A Feasibility Study to Identify Ice Types by Measuring Attenuation of Ultrasonic Waves for Aircraft Icing Detection
Yang Liu, Wenli Chen, Leonard J. Bond, and Hui Hu
Droplet Size Characterization for Mist Flow in a Single-Side Heated Vertical Square Duct
Yao-Hsien Liu, Chia-Cheng Lin, and Chiao-Hsin Chen

Dynamic Imaging of Multiphase Flows in Rock Using Computed Tomography
Dustin Crandall, Dustin McIntyre, Karl Jarvis, Roger Lapeer, and Bryan Tennant

Simultaneous Measurements of 3D Flow and Wall Deformation in a Compliant
Wall Turbulent Channel Flow
Cao Zhang, Rinaldo L. Miorini, and Joseph Katz

Investigation of Two-Phase Flow in an Effervescent Atomizer
Mona Hassanzadeh Jobehdar, Aly H. Gadallah, Kamran Siddiqui, and Wajid A. Chishty

Investigation of Pseudo Turbulent Scalar Transport in Two Phase Fluid Flow and Passive Scalar
Mixing Using Simultaneous SPIV/PLIF
Mahdi Ramezani, Shankar Subramaniam, and Michael G. Olsen
