GUIDANCE AND CONTROL OF AUTONOMOUS / UNMANNED SYSTEMS

SDRE Based Guidance and Flight Control of Aircraft Formations (AIAA 2015-0601) .............................................................. 999
Ozan Tekinalp, Sarper Kumbasar

Tight Formation Flight with Feasible Model Predictive Control (AIAA 2015-0602) ................................................................. 1018
Fabio Almeida

A Fully Parameterizable Implementation of Autonomous Take-off and Landing for a Fixed Wing UAV (AIAA 2015-0603) ........... 1035
Thomas W. Carnes, Tim M. Bakker, Robert H. Klenke

A Kalman Filter Based Attitude Heading Reference System Using a Low Cost Inertial Measurement Unit (AIAA 2015-0604) ......... 1057
Matthew Leccadito, Tim M. Bakker, Ruizin Niu, Robert H. Klenke

Design of Gain Scheduled Stability and Control Augmentation System for Quad-Tilt-Wing UAV (AIAA 2015-0606) .......... 1069
Hironori Totoki, Yoshimasa Ochi, Masayuki Sato, Koji Murakata

ADAPTIVE CONTROL OF FLIGHT VEHICLES

Output Feedback Concurrent Learning Model Reference Adaptive Control (AIAA 2015-0607) .................................................. 1086
John F. Quindlen, Girish Chowdhary, Jonathan P. How

Application of a Novel Scalability Notion in Adaptive Control to Various Adaptive Control Frameworks (AIAA 2015-0608) ....... 1101
Simon P. Schatz, Tansel Yucelen, Benjamin C. Grunwald, Florian Holzapfel

A Direct Uncertainty Minimization Framework in Model Reference Adaptive Control (AIAA 2015-0610) ......................... 1118
Tansel Yucelen, Benjamin C. Grunwald, Jonathan A. Muse

Mario Frazolini, Tansel Yucelen, Benjamin C. Grunwald, Khan T. Nguyen, Daniel Wagner

An Adaptive Compensation Strategy of Control Surfaces Free-play (AIAA 2015-0612) .......................................................... 1146
Andrea Mannarino

MISSILE GUIDANCE III

A New Impact Time Control Guidance Law for Precise Time-on-Target Missile Strike (AIAA 2015-0613) .................................. 1166
Mark G. Snyder, Richard J. Prazenica, Richard A. Hull

Blind Evasion by Random-Phase Periodic Maneuvers (AIAA 2015-0614) ................................................................. 1176
Robert (Wes) W. Morgan, Jonathan L. Riel

Analysis of Two-Stage Proportional Navigation with Impact Angle and Field-of-View Constraints (AIAA 2015-0615) ......... 1195
Ashwini Ratnou

Impact Time and Angle Control Guidance (AIAA 2015-0616) .......................................................................................... 1210
Shashi Ronjan Kumar, Debasish Ghose

AEROSPACE ROBOTICS AND AUTONOMOUS / UNMANNED SYSTEMS IV

Jongho Park, Youdan Kim

Image-based Visual Servoing Framework for a Multirotor UAV using Sampling-based Path Planning (AIAA 2015-0846) ........... 1248
Songwook Cho, Daeil Lee, David Hyochoel Shin

Yonggan Cao, Derek Kingston, Steven Rasmussen

Vision Based Obstacle Detection and Avoidance for UAVs Using Image Segmentation (AIAA 2015-0848) ................. 1277
Pooja Agrawal, Ashwini Ratnou, Debasish Ghose

LANDER TECHNOLOGY DEVELOPMENT AT NASA II

Jennifer L. Devolites, Jon B. Olesen

Interpolation-Enhanced Powered Descent Guidance for Onboard Nominal, Off-Nominal, and Multi-X Scenarios (AIAA 2015-0850) ................................................................. 1297
Daniel P. Schaaf, Scott R. Plone, Behzad A. Akkinnese

Real-Time Terrain Relative Navigation Test Results from a Relevant Environment for Mars Landing (AIAA 2015-0851) ........ 1313
Andrew E. Johnson, Yang Cheng, James P. Montgomery, Nikolai Trawny, Brent Tweddle, Jason X. Zheng
Mike Hannan, Doug Rickman, Greg Chavers, Jason Adam, Chris Becker, Joshua Ellser, Dan Gunter, Logan Kennedy, Patrick O'Leary

APLNav: Development Status of an Onboard Passive Optical Terrain Relative Navigation System (AIAA 2015-0853) ................................................................. 1340
Timothy G. McGee, Paul E. Rosendall, Adrian Hill, Wen Jong Shyong, Thomas B. Criss, Cheryl Reed, Greg Chavers, Mike Hannan, Chirolf Epp, Nishant Mehta

CONTROL AND DIAGNOSTICS OF AIR VEHICLES AND UAVS

Maximizing the Efficiency of a UAV on Perimeter Patrol (AIAA 2015-0854) ................................................................. 1354
Krishnamoorthy Kalyanam, Meir Pachter

Necessary Conditions for Control Effort Minimization of Euler-Lagrange Systems (AIAA 2015-0855) ................................................................. 1361
Andrea L'Afflitto, Wassim Haddad

Disturbance Observer-Based Control to Suppress Air Resonance for the EC135 ACT/FHS Research Helicopter (AIAA 2015-0856) ................................................................. 1379
Steffen Greiser

Model-Based Detection and Isolation of Rodder Faults for a Small UAS (AIAA 2015-0857) ................................................................. 1392
Raghu Venkataraman, Peter J. Seiler

Worst Case Analysis of a Saturated Gust Loads Alleviation System (AIAA 2015-0858) ................................................................. 1410
Andreas Knoblauch, Harald Pflifer, Peter J. Seiler

Aircraft Inertial Measurement Unit Fault Identification with Application to Real Flight Data (AIAA 2015-0859) ................................................................. 1422
Peng Lu, Erik-Jan Van Kampen

MISSILE AUTOPILOT AND INTEGRATED CONTROL

Missile Autopilot Design During Boost Phase Using Robust Backstepping Approach (AIAA 2015-0860) ................................................................. 1442
Seokwon Lee, Youdan Kim, Gwonyong Moon, Byung-Eui Jun

Missile Guidance Law Considering Constraints on Impact Angle and Terminal Angle of Attack (AIAA 2015-0861) ................................................................. 1466
Hyoseungjun Kim, H Jin Kim

Considerations on Boost Phase Modeling and Guidance Command Generation (AIAA 2015-0862) ................................................................. 1482
Raziye Tekin, Koray S. Erer

Lyapunov Based Nonlinear Impact Angle Guidance Law for Stationary Targets (AIAA 2015-0863) ................................................................. 1492
H. Ulas Ates

Autopilot Design for Aerial Vehicles with Aerodynamic Surfaces and Lateral Jets Using Explicit Hybrid MPC (AIAA 2015-0864) ................................................................. 1506
Baoqing Yang, Yuanyao Zhao, Yu Yao

SPACECRAFT GUIDANCE, NAVIGATION, AND CONTROL I

SEXTANT - Station Explorer for X-ray Timing and Navigation Technology (AIAA 2015-0865) ................................................................. 1525

A Comparison of Thruster Implementation Strategies for a Deep Space Nanosatellite (AIAA 2015-0866) ................................................................. 1541
Matt Nehrens, Matt Sorgenfrei

On the Development of a 6DoF GNC Framework for Docking Multiple Small Satellites (AIAA 2015-0868) ................................................................. 1552
Miguel A. Nunes, Trevor C. Sorensen, Eric J. Pilger

Preliminary Design and Prototyping of a Low-Cost Spacecraft Attitude Determination and Control Setup (AIAA 2015-0869) ................................................................. 1565
Kemran Turkoglu, Anthony Gong

ADVANCES IN UAS TECHNOLOGIES I

Source Localization For A Turbulent Plume Model Using Bayesian Occupancy Grid Mapping (AIAA 2015-1071) ................................................................. 1578
Hossam Abdallah, Craig A. Woolsey, Hashim Arifat Ali

High Velocity Path Control of Quadrotors (AIAA 2015-1072) ................................................................. 1586
Jian Wang, Thomas Raffler, Florian Holzapfel

Synthesis and Flight Test of an Automatic Landing Controller Using Quantitative Feedback Theory (AIAA 2015-1073) ................................................................. 1602
Timothy D. Woodbury, John Valasek

Disturbance Rejection with Distributed Acceleration and Strain Sensing (AIAA 2015-1074) ................................................................. 1623
Gregory M. Gremillion, Lina Castano, James Humbert
