Rail Human Factors around the World
Impacts on and of People for Successful Rail Operations

Editors
John R. Wilson
University of Nottingham and Network Rail, UK

Ann Mills
Rail Safety and Standards Board, London, UK

Theresa Clarke
HS2, London, UK

Jane Rajan†
European Railway Agency, Lille, France

Nastaran Dadashi
University of Nottingham, UK
Contents

Preface XIII

Keynote: The third age of human factors: From independence to interdependence
E. Hollnagel 1

Rail safety, human reliability, accident reporting and rules
The classification and analysis of railway incident reports
W.H. Gibson, A. Mills & S. Hesketh 11

"A posteriori" analysis of occupational accidents: A new casual analysis approach
C. Blatter, G. Tirilly, S. Barthelme, S. Leblois & M. Mazeau 20

(Why) are Dutch cargo trains 2.6 times more often involved in SPADs compared to passenger trains?
R. van der Weide, H.F.L. Frieling & D.W. de Bruijn 30

How much regulation should there be? Rules and their application in three different fields of railway work
J. Weichbrodt & G. Grote 40

Human factors aspects of enforcement decision making
J. Mawhood 48

Investigating assistance provision to disabled rail users
J. Cardell, S. Idris & P. Wilks 57

Human reliability management software and audit plan of human factors in highly automated railway systems
P. Calvo Holgado, B. Gil de Egea & C. García Suárez 68

Human factors in the railway system safety analysis process
M. Hammerl & F. Vanderhaegen 73

Development, use and usability of TRACER-RAV (Technique for Retrospective Analysis of Cognitive Errors for Rail, Australian Version
C. Caponecchia, M.T. Baysari & A.S. McIntosh 85

Can the concept of organisational drift help explain the degradation of safety performance that may be observed during re-franchising?
P. Leach & J. Berman 94

Simulation for rail human factors
Determining the effect of simulator configuration in a VR train driver system
T.K. Yates & S. Sharples 107
Efficient control of passenger railways: Testing advice and information systems in a driving simulator  
*T. Albrecht & C. Gassel*

Rail simulations to study human reliability  
*F. Vanderhaegen*

Assessment of train drivers’ performance in a driving simulator  
*C. Maag & M. Schmitz*

Simulator tests of a harmonised European driver’s desk  
*M. Rentzsch, D. Seliger, D. Miglianico & D. Georget*

From a testing laboratory for railway technical components to a human factors simulation environment  
*M. Hammerl, M. De Filippis, I. Steinhäuser, C. Torens, O. Gantz, M. Meyer zu Hörste & K. Lemmer*

Uploading to the MATRICS: Combining simulation and serious gaming in railway simulators  
*J. van Luipen & S. Meijer*

Development of software add-on tools for enhancing the capabilities of train driving simulators  
*M. Schmitz & C. Maag*

Human factors integration in rail simulators  
*B. Gil de Egea, P. Calvo Holgado & C. García Suárez*

**Ergonomics design and human factors integration in the railway**  
A case study of human factors integration in the rules change process  
*T. Luke & K. Bonsall*

Integration in design projects – delivering the return on investment  
*E. Grimes, K. Wright & G. Hillier*

Embedding good human factors in complex multi-disciplinary engineering projects  
*G. Hillier, K. Wright & E. Grimes*

Involving end users in the light rail cab design. A global approach  
*J.R. Ruiz-Rodríguez, J.S. Solaz, D. Miglianico, L. de Victoria, H. de Rosario, B. Mateo & A. Soler*

3D virtual environments in rail ergonomics  
*T. Sobkow & K. Wright*

Case studies in the specification and design of interim control points  
*R. Waterhouse & J. Robinson*
From buttons for fingers towards graphics for brains; history and future of ticket vending machines
*L. Verhoef*

Investigating presentation of rail specific spatial information on handheld computer screens
*Y. Dadashi, S. Sharples, J.R. Wilson & T. Clarke*

Usability testing for German railway HMIS: A chance to optimize software engineering
*F. Feldmann & M. De Filippis*

Emergency whiteboard design for Network Rail
*A. Parkes & N. Carroll*

Preparation for the rollout of the GB GSM-R system
*G. Morrisroe*

**Human factors and the metro and light rail**

Human factors and London Underground: Past, present and future
*J. Wackrow & A. Slamen*

Developing the in-cab signalling display for the Victoria Line
*J. Wood*

Effective human factors integration in the design of a signalling and train control system for the metro rail industry
*S. Heape & C. Lowe*

Human error analysis of signal and point maintenance assets: An overview of the process for validation of quantification of potential human errors
*P. Traub & J. Wackrow*

The use of style guides to support user interface design in the metro rail industry
*D. Lock, M. Kazem & S. Heape*

**Rail signalling and control human factors**

Measuring situation awareness in rail signalling
*D. Golightly, N. Balfe, S. Sharples & E. Lowe*

A systems approach to the assessment of mental workload in a safety critical environment
*A. Pretorius*

Signaller forms automation: The ultimate irony of automation
*N. Balfe, E. Lowe, R. Abboud, Y. Dadashi, R. Bye & P. Murphy*

The application of cognitive work analysis in rail
*L. Millen, S. Sharples, D. Golightly & N. Balfe*
Effects of level of signalling automation on workload and performance 404
N. Balfe, J.R. Wilson, S. Sharples & T. Clarke

An analysis of the usability of a planning algorithm: An empirical study in The Netherlands Railways 412
R.J. Jorna, W. van Wezel & J. Bos

Operative tests of a new system for train traffic control 424
G. Isaksson-Lutteman, A. Kauppi, A.W. Andersson, B. Sandblad & M. Erlandsson

Signaller workload exploration and assessment tool (SWEAT) 434
P. Shanahan, D. Gregory & E. Lowe

Development and implementation of a predictive tool for optimizing workload of train dispatchers 444
M. Zeilstra, D.W. de Bruijn & R. van der Weide

Train driver performance, driving aids, train cab HMI and level crossings

Red means stop, doesn’t it? A human factors trial of a UK train safety system driver-machine interface 457
A. Scott & H. Gibson

Feasibility of head up displays in driving cabs 465
K. Davies, P. Thorley, M. Thomas & H. Gibson

LED’s make rail better 475
D.W. de Bruijn & H.F.L. Frieling

“By the seat of their pants” cues and feedback used by train crew 484
N. Doncaster

Future train cab interface design: Development of a model to support driver situation awareness 495
M.S. Young & D.P.J. Grenier

Using a model of train driver performance to investigate the contribution of human factors to rail incidents 503
H. Blanchard & E. Lowe

Improving driver management – supporting driver managers 513
P. Leach & J. Berman

Simulation in junction signalling design 523
J. Aitchison, K. Davies, P. Cavanagh, M. Bendig, M. Thomas & K. Boak

The development of a visibility tool to support sign and signalling work on the railway 531
A. Peron, E. Lowe, C. Turner, T. Troscianko & P.G. Lovell
Further development of a route drivability assessment tool: Improving usability and supporting incident investigation 540
*A. McKenzie-Kerr, W.I. Hamilton, P. Townsend & E. Lowe*

Another train coming: Warnings at automatic level crossings 550
*J. Heavisides, M. Barrett & S. Hesketh*

Rail road safety audit checklist on grade crossings in Iran 561
*M.R. Keymanesh & A.R. Arjroody*

**Rail engineering work and maintenance**
Principles for protecting rail engineering work – challenges for the human factors community 571
*A. Schock, B. Ryan & J.R. Wilson*

Assessing safety impact of process change 579
*R. Ollerenshaw & P. Murphy*

Identification of resilience factors in rail engineering work 594
*P. Ferreira, T. Clarke, J.R. Wilson, S. Sharples & B. Ryan*

Patrolling excellence: Implementing behaviour change in a maintenance delivery team 604
*F. Kenvyn & N. Hattotuwa*

What is ‘concentrated effort’? Can it be applied safely to tasks undertaken in the red zone? 615
*L. Sutton & E. Lowe*

Protection of track work and maintenance of way personnel on Canadian railways 624
*D. Roosenboom*

**Competence, behaviour, training, fatigue and communications**
“More effective supervision, please!” 635
*C.E. Dickinson*

Reaping the benefits – How railways can build on lessons learned from Crew Resource Management 645
*B. Klampfer, E. Grey, A. Lowe, B. Hayward & K. Brandford*

The assessment and management of errors in a simulator: A rail-based case study 656
*K. Bonsall & J. Pitsopoulos*

Dipping into organisational change: The do’s and don’ts 666
*T. Farrington-Darby, J. McNamara & E. Courtney*

The impact of social networks, work pressures and decision latitude on site manager’s safety vs. productivity behaviours 675
*N. Hattotuwa*
X  Contents

Is conflict good?  
E. Courtney  

Personality traits and cognitive abilities of manual ultrasonic operator performance  
A. Bell, G. Munley, K. Rowley, B. McGrath & H. Bainbridge  

Psychometric testing in the railway: Getting the right tools for the job  
J. McNamara  

European legislation and occupational psychological evaluation of train drivers and other safety related personnel  
S. Elatri  

Leading practice in rail training and competence management  
J. Pitsopoulos & R. Luckins  

Training line managers in the art of human factors investigation  
E. Lowe  

Awareness and attention training for railway signallers  
R.E. Luther & E. Lowe  

Evaluating options for the formalisation of railway safety critical communications  
C. Turner, A. McKenzie-Kerr, J. Peters, H. Gibson, A. Scott & E. Lowe  

Findings of an industry wide railway communications survey  
C. Turner, A. McKenzie-Kerr, J. Peters, H. Gibson & A. Scott  

Mitigating the effects of monotony: The role of task complexity  
N. Dunn & A. Williamson  

Sleep, fatigue and hours of work of French train drivers  
P. Cabon, V. Lancelle, R. Mollard, J.Y. Grau, C. Blatter, M. Kaplan, M.P. Severyns & G. Tirilly  

Level of automation: Effects on train driver vigilance  
P. Spring, A. McIntosh, C. Caponecchia & M.T. Baysari  

Supporting the passengers and public  
Facilitating shared expectations between passengers and front-line staff  
J. Stafford, G. Pettersson & S. Neath  

Evacuation from trains – the railway safety challenge  
L. Kecklund, I. Anderzen, S. Petterson, J. Haggstrom & B. Wahlstrom  

Investigating assistance provision to disabled rail users  
J. Cardell, S. Idris & P. Wilks
High density boarding and alighting: How do people really behave?
A psycho-physical experiment
I. Rowe & N. Tyler

Providing better information during temporary timetable changes
R. Wicksman
