

# Characterization of a novel nitric oxide reductase from *Geobacter metallireducens*

INAUGURALDISSERTATION

zur Erlangung des Doktorgrades  
der Fakultät für Chemie und Pharmazie  
der Albert-Ludwigs-Universität Freiburg im Breisgau

vorgelegt von

**Grietje N. Kuipers**

Aus Leens (Gn.), Niederlande

|--|------------|
| <b>ABSTRACT</b> .....  | <b>V</b>   |
| <b>CONTENTS</b> .....  | <b>VII</b> |
| <b>1. INTRODUCTION</b> .....   | <b>1</b>   |
| 1.1 EXPLOITING THE MICROBIAL NITROGEN CYCLE .....                                      | 1          |
| 1.1.1 <i>Chemolithotrophic growth on nitrogen cycle components</i> .....               | 3          |
| 1.1.2 <i>Chemo-organotrophic growth on nitrogen cycle components</i> .....             | 6          |
| 1.1.3 <i>The anaerobic chemo-organotroph Geobacter metallireducens</i> .....           | 9          |
| 1.2 CYTOCHROMES .....  | 12         |
| 1.2.1 <i>Heme biosynthesis</i> .....   | 13         |
| 1.2.2 <i>Maturation of c-type cytochromes</i> .....                                    | 15         |
| 1.2.3 <i>Cytochrome c maturation system I</i> .....                                    | 16         |
| 1.3 EVOLUTION OF NITROGEN CYCLE CYTOCHROMES.....                                       | 18         |
| 1.3.1 <i>Evolutionary multiheme clades</i> .....                                       | 19         |
| 1.3.2 <i>Protein structures show traces of multiheme evolution</i> .....               | 20         |
| 1.3.1 <i>Structure of an ONR clade protein</i> .....                                   | 24         |
| 1.3.4 <i>A HZO cluster protein characterized</i> .....                                 | 25         |
| 1.3.3 <i>Structure of a protein from intermediate evolutionary cluster III.1</i> ..... | 27         |
| 1.4 ENZYMATIC CONVERSION OF NITRITE AND HYDROXYLAMINE.....                             | 33         |
| 1.5 ENZYMATIC REDUCTION OF NITRIC OXIDE.....   | 34         |
| 1.6 SCOPE OF THE STUDY .....   | 38         |
| <b>2. MATERIALS AND METHODS</b> .....  | <b>39</b>  |
| 2.1 MATERIALS.....   | 39         |
| 2.2 EXPERIMENTAL METHODS .....   | 39         |
| 2.2.1 <i>Utilized construct</i> .....  | 39         |
| 2.2.2 <i>Construction of active-site mutations</i> .....                               | 39         |
| 2.2.3 <i>Test expression</i> .....   | 40         |
| 2.2.4 <i>Large scale expression</i> .....  | 41         |
| 2.2.5 <i>Protein purification</i> .....  | 41         |
| 2.2.6 <i>SDS PAGE analysis</i> .....   | 42         |
| 2.2.7 <i>Blue-Native PAGE analysis</i> .....   | 42         |
| 2.2.8 <i>UV-Vis spectroscopy</i> .....   | 43         |
| 2.2.9 <i>Reductive activity assay</i> .....  | 43         |
| 2.2.10 <i>Product analysis</i> .....   | 44         |
| 2.2.11 <i>Crystallization</i> .....  | 44         |
| 2.2.12 <i>Crystal handling and data processing</i> .....                               | 45         |
| 2.1 ENZYME KINETICS AND SPECTROSCOPIC DATA ANALYSIS .....                              | 46         |
| 2.2 X-RAY CRYSTALLOGRAPHY .....  | 48         |

|  |            |
|--|------------|
| <b>3. RESULTS</b> .....  | <b>51</b>  |
| 3.1 PURIFICATION OF <i>GmNOR</i> WILD-TYPE .....                                 | 51         |
| 3.2 PRODUCTION OF <i>GmNOR</i> VARIANTS .....                                    | 53         |
| 3.3 <i>GmNOR</i> IS A NITRIC OXIDE REDUCTASE .....                               | 56         |
| 3.4 MECHANISTIC ANALYSIS OF THE ACTIVE SITE RESIDUES .....                       | 62         |
| 3.5 CRYSTALLIZATION OF <i>GmNOR</i> VARIANTS AND COCRYSTALLIZATION .....         | 65         |
| 3.6 STRUCTURAL MODIFICATIONS IN <i>GmNOR</i> VARIANTS F229Y AND R264E .....      | 66         |
| 3.7 ASYMMETRICAL SUBSTRATE COORDINATION .....                                    | 70         |
| <b>4. DISCUSSION</b> .....   | <b>75</b>  |
| 4.1 <i>GmNOR</i> IS AN EVOLUTIONARY TRANSITION STATE MULTITHEME PROTEIN .....    | 75         |
| 4.2 <i>GmNOR</i> EVOLVED FOR NITRIC OXIDE REDUCTASE ACTIVITY .....               | 77         |
| 4.3 MECHANISTIC DETAILS OF NITRIC OXIDE COORDINATION .....                       | 79         |
| 4.4 MECHANISM OF NITRIC OXIDE CATALYSIS .....                                    | 81         |
| 4.5 IMPLICATIONS FOR THE MECHANISM OF NITRITE AND HYDROXYLAMINE CONVERSION ..... | 83         |
| 4.6 IMPLICATIONS FOR <i>GmNOR</i> HOMOLOGS .....                                 | 84         |
| 4.7 WHAT RENDERS <i>GmNOR</i> A NITRIC OXIDE REDUCTASE? .....                    | 84         |
| 4.8 RESPIRATORY DETOXIFICATION .....   | 85         |
| 4.9 CONCLUDING REMARKS .....   | 86         |
| 4.10 OUTLOOK .....   | 87         |
| <b>5. SUMMARY IN DUTCH AND GERMAN</b> .....                                      | <b>95</b>  |
| 5.1 NEDERLANDSE SAMENVATTING .....   | 95         |
| 5.2 DEUTSCHE ZUSAMMENFASSUNG .....   | 98         |
| <b>6. APPENDIX</b> .....   | <b>91</b>  |
| 6.1 ALIGNMENT OF DIRECT HOMOLOGS OF <i>GmNOR</i> .....                           | 91         |
| 6.2 ABBREVIATIONS .....  | 93         |
| 6.3 ACKNOWLEDGEMENTS - DANKZEGGING .....   | 95         |
| <b>7. REFERENCES</b> .....   | <b>102</b> |
