Contents

Full Papers

Is a Dialogue-Based Tutoring System that Emulates Helpful Co-constructed Relations During Human Tutoring Effective? .................................................. 3
Patricia Albacete, Pamela Jordan, and Sandra Katz

Educational Question Answering Motivated by Question-Specific Concept Maps ................................................................. 13
Thushari Atapattu, Katrina Falkner, and Nickolas Falkner

A Study of Automatic Speech Recognition in Noisy Classroom Environments for Automated Dialog Analysis ........................................... 23
Nathaniel Blanchard, Michael Brady, Andrew M. Olney, Marci Glaus, Xiaoyi Sun, Martin Nystrand, Borhan Samei, Sean Kelly, and Sidney D'Mello

Teachable Agents with Intrinsic Motivation ........................................... 34
Ailiya Borjigin, Chunyan Miao, Su Fang Lim, Siyao Li, and Zhiqi Shen

Temporal Generalizability of Face-Based Affect Detection in Noisy Classroom Environments ............................. 44
Nigel Bosch, Sidney D'Mello, Ryans Baker, Jaclyn Ocumpaugh, and Valerie Shute

Transfer Learning for Predictive Models in Massive Open Online Courses .................................................. 54
Sebastien Boyer and Kalyan Veeramachaneni

Mind the Gap: Improving Gender Equity in Game-Based Learning Environments with Learning Companions ................. 64
Philip Sheridan Buffum, Kristy Elizabeth Boyer, Eric N. Wiebe, Bradford W. Mott, and James C. Lester

Comparing Representations for Learner Models in Interactive Simulations ........................................... 74
Cristina Conati, Lauren Fratamico, Samad Kardan, and Ido Roll

Games Are Better than Books: In-Situ Comparison of an Interactive Job Interview Game with Conventional Training ........... 84
Ionut Damian, Tobias Baur, Birgit Lugrin, Patrick Gebhard, Gregor Mehlmann, and Elisabeth André

Predicting Comprehension from Students’ Summaries ................. 95
Mihai Dascalu, Larise Lucia Stavarache, Philippe Dessus, Stefan Trausan-Matu, Danielle S. McNamara, and Maryse Bianco
  Aysu Ezen-Can and Kristy Elizabeth Boyer

Positive Impact of Collaborative Chat Participation in an edX MOOC ........ 115
  Oliver Ferschke, Diyi Yang, Gaurav Tomar, and Carolyn Penstein Rosé

Who Needs Help? Automating Student Assessment Within Exploratory Learning Environments .............................................................. 125
  Mark Floryan, Toby Dragon, Nada Basit, Suellen Dragon, and Beverly Woolf

Moody Agents: Affect and Discourse During Learning in a Serious Game .... 135
  Carol M. Forsyth, Arthur Graesser, Andrew M. Olney, Keith Millis, Breya Walker, and Zhiqiang Cai

Examining the Predictive Relationship Between Personality and Emotion Traits and Learners’ Agent-Direct Emotions ........................................ 145
  Jason M. Harley, Cassia C. Carter, Niki Papaionnou, François Bouchet, Ronald S. Landis, Roger Azevedo, and Lana Karabachian

Evaluating Human and Automated Generation of Distractors for Diagnostic Multiple-Choice Cloze Questions to Assess Children’s Reading Comprehension ................................................................. 155
  Yi-Ting Huang and Jack Mostow

Machine Learning for Holistic Evaluation of Scientific Essays ................... 165
  Simon Hughes, Peter Hastings, Mary Anne Britt, Patricia Wallace, and Dylan Blaum

Learning to Diagnose a Virtual Patient: An Investigation of Cognitive Errors in Medical Problem Solving ....................................................... 176
  Amanda Jarrell, Tenzin Doleck, Eric Poitras, Susanne Lajoie, and Tara Tressel

Studying Student Use of Self-Regulated Learning Tools in an Open-Ended Learning Environment ......................................................... 185
  John S. Kinnebrew, Brian C. Gauch, James R. Segedy, and Gautam Biswas

Situated Pedagogical Authoring: Authoring Intelligent Tutors from a Student’s Perspective .............................................................. 195
  H. Chad Lane, Mark G. Core, Matthew J. Hays, Daniel Auerbach, and Milton Rosenberg

Two Modes are Better Than One: A Multimodal Assessment Framework Integrating Student Writing and Drawing .......................................... 205
  Samuel Leeman-Munk, Andy Smith, Bradford Mott, Eric Wiebe, and James Lester
To Resolve or Not to Resolve? That Is the Big Question About Confusion... 216
  Blair Lehman and Arthur Graesser

Motivational Design in an Intelligent Tutoring System That Helps Students
Make Good Task Selection Decisions ........................................... 226
  Yanjin Long, Zachary Aman, and Vincent Aleven

SNS Messages Recommendation for Learning Motivation .................. 237
  Sébastien Louvigné, Yoshihiro Kato, Neil Rubens, and Maomì Ueno

How Spacing and Variable Retrieval Practice Affect the Learning
of Statistics Concepts ............................................................. 247
  Jaclyn K. Maass, Philip I. Pavlik Jr., and Henry Hua

Leveraging Multiple Views of Text for Automatic Question Generation ... 257
  Karen Mazidi and Rodney D. Nielsen

Mind Wandering During Learning with an Intelligent Tutoring System.... 267
  Caitlin Mills, Sidney D'Mello, Nigel Bosch, and Andrew M. Olney

DeepStealth: Leveraging Deep Learning Models for Stealth Assessment
in Game-Based Learning Environments ........................................ 277
  Wookhee Min, Megan H. Frankosky, Bradford W. Mott, Jonathan P. Rowe,
  Eric Wiebe, Kristy Elizabeth Boyer, and James C. Lester

Learning Mental Models of Human Cognitive Processing by Creating
Cognitive Models ................................................................. 287
  Kazuhisa Miwa, Nana Kanzaki, Hitoshi Terai, Kazuaki Kojima,
  Ryuichi Nakaike, Junya Morita, and Hitomi Saito

A Player Model for Adaptive Gamification in Learning Environments ... 297
  Baptiste Monterrat, Michel Desmarais, Élise Lavoué, and Sébastien George

Exploring the Impact of a Learning Dashboard on Student Affect .......... 307
  Kasia Muldner, Michael Wixon, Dovan Rai, Winslow Burleson,
  Beverly Woolf, and Ivon Arroyo

Cognitive Tutor Use in Chile: Understanding Classroom and Lab Culture... 318
  Amy Ogan, Evelyn Yarzebinski, Patricia Fernández, and Ignacio Casas

TARLAN: A Simulation Game to Improve Social Problem-Solving Skills
of ADHD Children ................................................................. 328
  Atefeh Ahmadi, Antonija Mitrovic, Badroddin Najmi, and Julia Rucklidge

Blocking vs. Interleaving: Examining Single-Session Effects Within Middle
School Math Homework ............................................................ 338
  Korinn Ostrow, Neil Heffernan, Cristina Heffernan, and Zoe Peterson
Impact of Adaptive Educational System Behaviour on Student Motivation
Jan Papoušek and Radek Pelánek

Understanding Student Success in Chemistry Using Gaze Tracking and Pupillometry
Joshua Peterson, Zachary Pardos, Martina Rau, Anna Swigart, Colin Gerber, and Jonathan McKinsey

AttentiveLearner: Improving Mobile MOOC Learning via Implicit Heart Rate Tracking
Phuong Pham and Jingtao Wang

Distractor Quality Evaluation in Multiple Choice Questions
Van-Minh Pho, Anne-Laure Ligozat, and Brigitte Grau

Interpreting Freeform Equation Solving
Anna N. Rafferty and Thomas L. Griffiths

ITS Support for Conceptual and Perceptual Connection Making Between Multiple Graphical Representations
Martina A. Rau and Sally P.W. Wu

Discovering Individual and Collaborative Problem-Solving Modes with Hidden Markov Models
Fernando J. Rodríguez and Kristy Elizabeth Boyer

Improving Student Problem Solving in Narrative-Centered Learning Environments: A Modular Reinforcement Learning Framework
Jonathan P. Rowe and James C. Lester

Filtering of Spontaneous and Low Intensity Emotions in Educational Contexts
Sergio Salmerón-Majadas, Miguel Arevalillo-Herráez, Olga C. Santos, Mar Saneiro, Raúl Cabestredo, Pilar Quirós, David Arnau, and Jesus G. Boticario

Contextual Recommendation of Educational Contents
Nidhi Saraswat, Hiranmay Ghosh, Mohit Agrawal, and Uma Narayanan

Coherence Over Time: Understanding Day-to-Day Changes in Students' Open-Ended Problem Solving Behaviors
James R. Segedy, John S. Kinnebrew, and Gautam Biswas

From Learning Companions to Testing Companions: Experience with a Teachable Agent Motivates Students' Performance on Summative Tests
Björn Sjödén and Agneta Gulz
Negotiation-Driven Learning ........................................... 470
   Raja M. Suleman, Riichiro Mizoguchi, and Mitsuru Ikeda

From Heterogeneous Multisource Traces to Perceptual-Gestural Sequences: The PeTra Treatment Approach ........................................... 480
   Ben-Manson Toussaint, Vanda Luengo, Francis Jambon, and Jérôme Tonetti

Probability Based Scaffolding System with Fading ........................................... 492
   Maomi Ueno and Yoshimitsu Miyasawa

Understanding Students' Use of Code-Switching in a Learning by Teaching Technology ........................................... 504
   Evelyn Yarzebinski, Amy Ogan, Ma. Mercedes T. Rodrigo, and Noboru Matsuda

Posters

Improving Learning Maps Using an Adaptive Testing System: PLACEments ........................................... 517
   Seth Akonor Adjei and Neil T. Heffernan

Domain Module Building From Textbooks: Integrating Automatic Exercise Generation ........................................... 521
   Itziar Aldabe, Mikel Larrañaga, Montse Maritxalar, Ana Arruarte, and Jon A. Elorriaga

The Beginning of a Beautiful Friendship? Intelligent Tutoring Systems and MOOCs ........................................... 525
   Vincent Aleven, Jonathan Sewall, Octav Popescu, Franceska Xhakaj, Dhruv Chand, Ryan Baker, Yuan Wang, George Siemens, Carolyn Rosé, and Dragan Gasevic

Predicting Misalignment Between Teachers' and Students' Essay Scores Using Natural Language Processing Tools ........................................... 529
   Laura K. Allen, Scott A. Crossley, and Danielle S. McNamara

Am I Wrong or Am I Right? Gains in Monitoring Accuracy in an Intelligent Tutoring System for Writing ........................................... 533
   Laura K. Allen, Scott A. Crossley, Erica L. Snow, Matthew E. Jcovina, Cecile Perret, and Danielle S. McNamara

Predicting Students' Emotions Using Machine Learning Techniques ........................................... 537
   Nabeela Altrabsheh, Mihaela Cocea, and Sanaz Fallahkhair

Using Artificial Neural Networks to Identify Learning Styles ........................................... 541
   Jason Bernard, Ting-Wen Chang, Elvira Popescu, and Sabine Graf
Measuring Argumentation Skills with Game-Based Assessments: Evidence for Incremental Validity and Learning. ........................................... 545
Maria Bertling, G. Tanner Jackson, Andreas Oranje, and V. Elizabeth Owen

Student Performance Prediction Using Collaborative Filtering Methods. .... 550
Hana Bydžovská

Steps Towards the Gamification of Collaborative Learning Scenarios Supported by Ontologies ................................................................. 554
Geiser Chalco Challco, Riichiro Mizoguchi, Ig Ibert Bittencourt, and Seiji Isotani

Towards the Development of the Invention Coach: A Naturalistic Study of Teacher Guidance for an Exploratory Learning Task ................. 558
Catherine C. Chase, Jenna Marks, Deena Bernett, Melissa Bradley, and Vincent Aleven

Adaptive Representation of Digital Resources Search Results in Personal Learning Environment ................................................................. 562
Daouda Sawadogo, Cyrille Suire, Ronan Champagnat, and Pascal Estraillier

Towards Investigating Performance Differences in Clinical Reasoning in a Technology Rich Learning Environment ................................. 566
Tenzin Doleck, Amanda Jarrell, Eric Poitras, and Susanne Lajoie

Emotional, Epistemic, and Neutral Feedback in AutoTutor Trialogues to Improve Reading Comprehension ................................................. 570
Shi Feng, Janay Stewart, Danielle Clewley, and Arthur C. Graesser

Comparison of Expert Tutors Through Syntactic Analysis of Transcripts. ... 574
Reva Freedman and Douglas Kriegbaum

Exploring Through Simulation an Instructional Planner for Dynamic Open-Ended Learning Environments .................................................. 578
Stephanie Frost and Gord McCalla

Modeling Self-Efficacy Across Age Groups with Automatically Tracked Facial Expression ................................................................. 582
Joseph F. Grafgaard, Seung Y. Lee, Bradford W. Mott, Kristy Elizabeth Boyer, and James C. Lester

Adapting Feedback Types According to Students’ Affective States .......... 586
Beate Grawemeyer, Manolis Mavrikis, Wayne Holmes, and Sergio Gutiérrez-Santos

Game Features and Individual Differences: Interactive Effects on Motivation and Performance ................................................................. 642
Matthew E. Jacovina, Erica L. Snow, G. Tanner Jackson, and Danielle S. McNamara

Gamification of Online Learning .......................................................... 646
Jincheul Jang, Jason J.Y. Park, and Mun Y. Yi

Examining the Relationship Between Performance Feedback and Emotions in Diagnostic Reasoning: Toward a Predictive Framework for Emotional Support ................................................................. 650
Amanda Jarrell, Jason M. Harley, Susanne Lajoie, and Laura Naismith

Learning, Moment-by-Moment and Over the Long Term .......................... 654
Yang Jiang, Ryan S. Baker, Luc Paquette, Maria San Pedro, and Neil T. Heffernan

When Is It Helpful to Restate Student Responses Within a Tutorial Dialogue System? ................................................................. 658
Pamela Jordan, Patricia Albacete, and Sandra Katz

Quality of LOD Based Semantically Generated Questions .......................... 662
Corentin Jouault, Kazuhisa Seta, and Yuki Hayashi

New Opportunities with Open Learner Models and Visual Learning Analytics ................................................................. 666
Judy Kay and Susan Bull

The Relationship Between Working Memory Capacity and Students’ Behaviour in a Teachable Agent-Based Software ................................................................. 670
Lisa Palmqvist, Camilla Kirkegaard, Annika Silvervarg, Magnus Haake, and Agneta Gulz

Lesson Discovery Support Based on Generalization of Historical Events .... 674
Tomoko Kojiri, Yusuke Nogami, and Kazuhisa Seta

Predicting Student Performance from Multiple Data Sources .................. 678
Irena Koprinska, Joshua Stretton, and Kalina Yacef

Automated Generation of Self-Explanation Questions in Worked Examples in a Model-Based Tutor ................................................................. 682
Amruth N. Kumar

First Evaluation of the Physics Instantiation of a Problem-Solving-Based Online Learning Platform ................................................................. 686
Rohit Kumar, Gregory K.W.K. Chung, Ayesha Madni, and Bruce Roberts
FARMA-ALG: An Application for Error Mediation in Computer Programming Skill Acquisition

   Alexander Robert Kutzke and Alexandre I. Direne

The Role of Peer Agent’s Learning Competency in Trialogue-Based Reading Intelligent Systems

   Haiying Li, Qinyu Cheng, Qiong Yu, and Arthur C. Graesser

Teaching a Complex Process: Insertion in Red Black Trees

   C.W. Liew and F. Xhakaj

Learner-Adaptive Pedagogical Model in SIAL, an Open-Ended Intelligent Tutoring System for First Order Logic

   Jose A. Maestro-Prieto and Arancha Simon-Hurtado

Predictive Knowledge Modeling in Collaborative Inquiry Learning Scenarios

   Sven Manske, Tobias Hecking, and H. Ulrich Hoppe

Worked Examples are More Efficient for Learning than High-Assistance Instructional Software

   Bruce M. McLaren, Tamara van Gog, Craig Ganoe, David Yaron, and Michael Karabinos

Domain Model for Adaptive Blended Courses on Basic Programming

   Mikel Larrañaga and Ainhoa Álvarez

Learning Bayesian Networks for Student Modeling

   Eva Millán, Guiomar Jiménez, María-Victoria Belmonte, and José-Luis Pérez-de-la-Cruz

Tutorial Dialogue Modes in a Large Corpus of Online Tutoring Transcripts

   Donald M. Morrison, Benjamin Nye, Vasile Rus, Sarah Snyder, Jennifer Boller, and Kenneth Miller

Data-Driven Worked Examples Improve Retention and Completion in a Logic Tutor

   Behrooz Mostafavi, Guojing Zhou, Collin Lynch, Min Chi, and Tiffany Barnes

Improving Engagement in an E-Learning Environment

   Kevin Mulqueeny, Leigh A. Mingle, Victor Kostyuk, Ryan S. Baker, and Jaclyn Ocumpaugh

Using Eye Tracking to Identify Learner Differences in Example Processing

   Amir Shareghi Najar, Antonija Mitrovic, and Kourosh Neshatian
The Design Rationale of Logic-Muse, an ITS for Logical Reasoning in Multiple Contexts

Roger Nkambou, Clauvice Kenfack, Serge Robert, and Janie Brisson

Evaluating the Effectiveness of Integrating Natural Language Tutoring into an Existing Adaptive Learning System

Benjamin D. Nye, Alistair Windsor, Phillip Pavlik, Andrew Olney, Mustafa Hajeer, Arthur C. Graesser, and Xiangen Hu

Adapting Collaboration Dialogue in Response to Intelligent Tutoring System Feedback

Jennifer K. Olsen, Vincent Aleven, and Nikol Rummel

The Role of Student Choice Within Adaptive Tutoring

Korinn S. Ostrow and Neil T. Heffernan

Identifying Affective Trajectories in Relation to Learning Gains During the Interaction with a Tutoring System

Gustavo Padrón-Rivera and Genaro Rebolledo-Mendez

A Predictive Model of Learning Gains for a Video and Exercise Intensive Learning Environment

José A. Ruipérez-Valiente, Pedro J. Muñoz-Merino, and Carlos Delgado Kloos

Integrating Learning Progressions in Unsupervised After-School Online Intelligent Tutoring

Vasile Rus, Arthur Graesser, Nobal Niraula, and Rajendra Banjade

When More Intelligent Tutoring in the Form of Buggy Messages Does Not Help

Douglas Selent and Neil Heffernan

Supporting Students' Interactions Over Case Studies

Mayya Sharipova and Gordon McCalla

A Framework for Automated Generation of Questions Based on First-Order Logic

Rahul Singhal, Martin Henz, and Shubham Goyal

Fine-Grained Analyses of Interpersonal Processes and their Effect on Learning

Tanmay Sinha and Justine Cassell
Promoting Metacognitive Awareness Within a Game-Based Intelligent Tutoring System ......................................................... 786

Student Performance Estimation Based on Topic Models Considering a Range of Lessons ...................................................... 790
   Shaymaa E. Sorour, Kazumasa Goda, and Tsunenori Mine

Towards a Model of How Learners Process Feedback ................................................................. 794
   Michael Timms, Sacha DeVelle, Ursula Schwantner, and Dulce Lay

Item Response Model with Lower Order Parameters for Peer Assessment ......................................................... 800
   Masaki Uto and Maomi Ueno

Selection Task and Computer-Based Feedback to Improve the Searching Process in Task-Oriented Reading Situations ......................................................... 804
   María-Ángeles Serrano, Eduardo Vidal-Abarca, Ignacio Máñez, and Carmen Candel

Personalized Expert Skeleton Scaffolding in Concept Map Construction ......................................................... 808
   Shang Wang, Erin Walker, Rishabh Chaudhry, and Ruth Wylie

Using Eye Gaze Data to Explore Student Interactions with Tutorial Dialogues in a Substep-Based Tutor ......................................................... 812
   Amali Weerasinghe, Myse Elmadani, and Antonija Mitrovic

UML-IT: An ITS to Teach Multiple Modelling Tasks ................................................................. 816
   Amali Weerasinghe and Bernard Evans

Virtual Teams in Massive Open Online Courses ................................................................. 820
   Miaomiao Wen, Diyi Yang, and Carolyn Penstein Rosé

Doctoral Consortium Paper

Promoting Self-regulated Learning in an Intelligent Tutoring System for Writing ......................................................... 827
   Laura K. Allen and Danielle S. McNamara

Exploring Missing Behaviors with Region-Level Interaction Network Coverage ......................................................... 831
   Michael Eagle and Tiffany Barnes

Educational Technologies to Support Linguistically Diverse Students, and the Challenges of Classroom Integration ......................................................... 836
   Samantha Finkelstein
Developing Self-regulated Learners Through an Intelligent Tutoring System ........................................ 840
  Kim Kelly and Neil Heffernan

Building Compiler-Student Friendship ........................................... 844
  Zhongxiu Liu and Tiffany Barnes

Toward Combining Individual and Collaborative Learning
Within an Intelligent Tutoring System ........................................ 848
  Jennifer K. Olsen, Vincent Aleven, and Nikol Rummel

Motivating Learning in the Age of the Adaptive Tutor .................... 852
  Korinn Ostrow

Creating Data-Driven Feedback for Novices in Goal-Driven Programming Projects ............................................. 856
  Thomas W. Price and Tiffany Barnes

Towards Multimodal Affective Detection in Educational Systems
Through Mining Emotional Data Sources ....................................... 860
  Sergio Salmeron-Majadas, Olga C. Santos, and Jesus G. Boticario

Promoting Metacognition Within a Game-Based Environment ............. 864
  Erica L. Snow, Matthew E. Jacovina, and Danielle S. McNamara

Negotiation-Driven Learning: A New Perspective of Learning
Using Negotiation ........................................................................ 868
  Raja M. Suleman, Riichiro Mizoguchi, and Mitsuru Ikeda

Supporting K-5 Learners with Dialogue Systems ............................ 873
  Jennifer Tsan and Kristy Elizabeth Boyer

Sharing Student Models That Use Machine Learning ...................... 877
  Benjamin Valds, Carlos Ramirez, and Jorge Ramirez

Workshop Abstracts

2nd Workshop on Simulated Learners ........................................... 883
  John Champaign and Gord McCalla

4th Workshop on Intelligent Support for Learning in Groups ................ 884
  Ilya Goldin, Roberto Martinez-Maldonado, Erin Walker, Rohit Kumar,
  and Jihie Kim

Workshop on Developing a Generalized Intelligent Framework
for Tutoring (GIFT): Informing Design through a Community of Practice... 885
  Benjamin Goldberg, Robert Sottilare, Anne Sinatra, Keith Brawner,
  and Scott Ososky
Learning Analytics for Project Based and Experiential Learning Scenarios.

Rose Luckin, Manolis Mavrikis and Daniel Spikol

6th International Workshop on Intelligent Support in Exploratory and Open-ended Learning Environments

Manolis Mavrikis, Gautam Biswas, Sergio Gutierrez-Santos, Toby Dragon, and James Segedy

6th International Workshop on Culturally-Aware Tutoring Systems (CATS2015)

Ma Mercedes T. Rodrigo, Emmanuel G. Blanchard, Amy Ogan, and Isabela Gasparini

Workshop on Les Contes du Mariage: Should AI Stay Married to Ed?

Kaska Porayska-Pomsta, Gord McCalla, and Benedict du Boulay

International Workshop on Affect, Meta-Affect, Data and Learning (AMADL 2015)

Genaro Rebolledo-Mendez, Manolis Mavrikis, Olga C. Santos, Benedict du Boulay, Beate Grawemeyer, and Rafael Rojano-Cáceres

Industry Track Papers

TutorGen: A Carnegie Mellon Start-up for Providing Adaptive Learning at Scale

Ted Carmichael, Mary Jean Blink, and John C. Stamper

Differentiation and Mastery Learning in Practice: Metrics and Visualizations for Cognitive Tutor Algebra

Stephen E. Fancsali, Ambarish Joshi, and Steven Ritter
